* Professor of Law and Director, Dispute Resolution Program, Texas A&M University School of Law; formerly Professor of Law and William Trickett Faculty Scholar, Penn State University, Dickinson School of Law. This article is based, in part, on comments submitted by the ABA Section of Dispute Resolution to the Consumer Financial Protection Bureau. See Letter from Nancy A. Welsh, Chair-Elect, ABA Section of Dispute Resolution, to Monica Jackson, Office of the Executive Secretary, Consumer Financial Protection Bureau (July 29, 2016) (“Section Comments”). Although I served as the primary author of the Section Comments, I thank the following for their significant contributions: Sarah Cole, Benjamin Davis, Michael Green, Jill Gross, Howard Herman, Larry Mills, Andrea Schneider, and Jean Sternlight. I also thank Kristen Blankley, Christopher Honeyman and Judith Resnik for their comments on an earlier draft, Hanna Borsilli (Penn State University, Dickinson Law, J.D. 2018) for her research assistance with the comments submitted by the ABA Section of Dispute Resolution, Malikah Hall and Steffani Fausone (Texas A&M University School of Law) for their research assistance with this article, and the participants in the ABA Dispute Resolution Section’s 2018 Works-in-Progress Conference for their comments on an earlier draft, especially Kathleen Claussen, Deborah Eisenberg and Lydia Nussbaum. Any errors are mine alone.
Introduction

In 2016, the Consumer Financial Protection Bureau (CFPB) issued proposed rules regarding the use of mandatory pre-dispute arbitration clauses in consumer contracts for financial goods and services. One of these rules—barring class action waivers in mandatory pre-dispute arbitration clauses—attracted substantial attention. Much less noticed was the CFPB’s second proposed rule (“Arbitration Reporting Proposal”) requiring regulated providers of financial products and services to report to the CFPB regarding their use and the outcomes of arbitrations conducted pursuant to mandatory pre-dispute arbitration clauses. The Arbitration Reporting Proposal also proposed to make such information public, with appropriate redactions.

The American Bar Association Section of Dispute Resolution (“the Section”) submitted comments strongly supporting the CFPB’s Arbitration Reporting Proposal. In the course of preparing the Section’s comments, it also became clear to the author of this Article that dispute resolution neutrals and organizations should have an affirmative ethical obligation to

---

1. There have also been legislative efforts to increase the transparency of mandatory pre-dispute arbitration. See, e.g., H.R. 832, 115th Cong. (1st Sess. 2017) (also known as the “Arbitration Transparency Act”) (proposing to amend section 2 of the Federal Arbitration Act to require arbitrations between financial institutions and consumers to be open to the public); S. 647, 115th Cong. (1st Sess. 2017) (known as the “Mandatory Arbitration Transparency Act”) (proposing to amend Title 9 to ban pre-dispute agreements that provide for arbitration of employment, consumer, or civil rights if the agreements bar parties from contacting state or federal agencies regarding unlawful conduct or other issues of public policy or public concern, deeming such agreements to be “unfair or deceptive act[s] or practices” under the Federal Trade Commission Act, instructing the FTC to issue new rules and punish violators, and creating a private right of action for aggrieved consumers).
support responsible—“measured”—transparency regarding the use and outcomes of the processes they provide and promote in order to protect the public and these processes’ integrity. Most particularly, dispute resolution neutrals (including mediators, arbitrators, ombuds, and providers of online dispute resolutions services) should have an ethical obligation to support transparency when their processes are imposed upon people pursuant to judicial or legislative mandates or by contracts of adhesion, and when the outcomes that dispute resolution neutrals help to produce will be granted the privileges of narrow and deferential judicial review and expedited judicial enforcement.2

2. Professor Judith Resnik has also recently called for increased transparency regarding ADR, observing:

[H]ere, as part of a larger project addressing the impact of new procedural forms, I argue for shaping First Amendment doctrine in light of commitments that courts function as open, egalitarian venues. Even if the parties, judges, and other neutrals believe in the benefits of closure, and even when parties consent, court promotion of ADR, as a matter of constitutional interpretation, ought to be accompanied by public accountings of what transpires. . . . [T]he presence of the state infuses all these forms of ADR, which are mandated, advocated, and structured through hundreds of court rules, government manuals, and websites, and are commended to litigants by judges. The result of these many new rules is not “bargaining in the shadow of the law,” but bargaining as a requirement of the law. . . . As procedure is increasingly becoming contract, state-promoted contracting—produced at the behest of the state and shaped through judicial intervention—needs regulation through public oversight and participation. . . . The issue is which activities ought to have what Justice Brennan termed the “public character of judicial proceedings.” . . . Chief Justice Burger, writing for the plurality in [Richmond Newspapers], spoke about the “nexus between openness, fairness, and the perception of fairness.” He commented further that “[p]eople in an open society do not demand infallibility from their institutions, but it is difficult for them to accept what they are prohibited from observing.” . . . When [judges] convene meetings in courts, when they take on the role of “neutrals” or authorize others to do so with “quasi-judicial” status, their decisions and their procedures are the state, in action. As more of the activity of “the judicial” moves to become “quasi-judicial,” the public needs to be built in, so as to be able to be present [for] at least some aspects of the proceedings and to know the results.

Now is a particularly good time to consider the ethical obligations of one set of dispute resolution neutrals: mediators. This is because the Section, the American Arbitration Association (“AAA”), and the Association for Conflict Resolution (“ACR”) are currently considering whether to review and revise the Model Standards of Conduct for Mediators. Courts and legislatures regularly mandate parties’ participation in mediation. Mandatory pre-dispute mediation clauses are now turning up in the same contracts that contain mandatory pre-dispute consumer arbitration clauses. Courts reliably enforce mediated settlement agreements, generally with little review. Mediation is also the subject of substantial recent international activity. On December 20, 2018, the United Nations General Assembly adopted an international convention for the expedited enforcement of mediated settlement agreements. The convention will be open for signatures in Singapore in August 2019.

3. See Alliance for Justice, Lost in the Fine Print (HD), YOUTUBE (Oct. 6, 2014), https://www.youtube.com/watch?v=tgC3N802Szj (picturing a contract that includes a mediation clause just before the arbitration clause).

This Article will begin by describing the event that triggered the Section’s consideration of transparency—the CFPB’s announcement of its Arbitration Reporting Proposal. The Article will also detail the Proposal’s subsequent history, including its promulgation and repeal. The Article will then turn to the transparency that exists or has been proposed for various dispute resolution processes. For example, the Article will consider the transparency that (1) federal and state courts provide regarding their court filings and outcomes; (2) some states, some federal agencies, and some domestic and international dispute resolution organizations now require or provide regarding the use and outcomes of arbitration (and to a lesser degree, mediation); (3) some users of dispute resolution achieve through “self-help” initiatives; and (4) some commentators have proposed for online dispute resolution. Finally, the Article will consider whether the ethical principles that currently apply to mediators establish an affirmative ethical obligation to support transparency, at least under certain circumstances. Concluding that the Model Standards of Conduct for Mediators do not establish such an ethical obligation, the Article will end with a proposal to establish mediators’ ethical obligation to support transparency to a responsible degree when mediations are mandated by courts, legislatures, or contracts of adhesion and the resulting mediated settlement agreements are subject to only narrow and deferential judicial review or are granted expedited judicial enforcement. In particular, the Article will argue for the creation of a set of customized Model Standards for “imposed mediation.”

I. The Precipitating Event: The CFPB’s Arbitration Reporting Proposal

The use of mandatory pre-dispute arbitration agreements in consumer transactions and employment contracts has elicited substantial controversy in the general public, the courts, and the dispute resolution field. It has also been the subject of countless articles in law reviews and professional journals.

6. Regarding the general topic of mandatory pre-dispute arbitration in a disparate party context, see, for example, Hiro N. Aragaki, The Federal Arbitration Act as Procedural Reform, 89 N.Y.U. L. Rev. 1939 (2014); Lisa Blomgren Amsler, Combating Structural Bias

As part of the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act"), Congress specifically authorized the CFPB to issue regulations that would "prohibit or impose conditions or limitations" on mandatory pre-dispute consumer arbitration clauses in contracts for

financial products or services as long as the CFPB found that doing so was “in the public interest and for the protection of consumers.” Congress also required the CFPB to conduct a study of mandatory arbitration. Any regulatory findings made by the CFPB had to be consistent with the study. The CFPB conducted its empirical study and issued its final, voluminous report in March 2015 (“March 2015 Report”). In May 2016, the CFPB announced its proposed rules.

One portion of the CFPB’s proposed rules—in which the CFPB barred class action waivers in mandatory pre-dispute consumer arbitration clauses—garnered substantial attention. The other portion of the CFPB’s proposed rules—section 1040.4(b), or the Arbitration Reporting Proposal—remained largely under the radar. This portion dealt with the issue of transparency. The CFPB proposed to require regulated providers of financial products and services to report information regarding their use and the outcomes of arbitrations conducted pursuant to mandatory pre-dispute arbitration clauses. Specifically, the Arbitration Reporting Proposal required submission, with redaction of individuals’ names and other information, of the following five types of documents:

(1) the initial claim (whether filed by a consumer or by the provider) and any counterclaim; (2) the pre-dispute arbitration agreement filed with the arbitrator or arbitration administrator; (3) the award, if any, issued by the arbitrator or arbitration administrator; (4) any communications from the arbitrator or arbitration administrator with whom the claim was filed relating to a refusal to administer or dismissal of a claim due to the

---

11. This step was preceded by the CFPB’s submission of its tentative proposed rules to a Small Business Review Panel in November 2015.
provider’s failure to pay required fees; and (5) any communications related to a determination that an arbitration agreement does not comply with the administrator’s fairness principles.\footnote{12}

The CFPB also proposed to publish these materials on its website in some form, with appropriate redaction or aggregation.\footnote{13}

For most of the CFPB’s proposed requirements, the agency’s reasoning was, and remains, fairly apparent. However, the required reporting of communications regarding failure to comply with dispute resolution administrators’ fairness principles deserves further explanation. In April 1998, the AAA’s National Consumer Disputes Advisory Committee produced \textit{A Due Process Protocol for Mediation and Arbitration of Consumer Disputes} to guide the use of ADR processes to resolve consumer disputes.\footnote{14} The Protocol’s Statement of Principles asserted parties’...
entitlement to a “fundamentally-fair ADR process,” with the Principles serving as “embodiments of fundamental fairness.” The Protocol provided, among other things, for “independent and impartial” neutrals and administration; consumers’ continued access to small claims court; reasonable costs for consumers (including consideration of their ability to pay); “arbitrator-supervised exchange of information”; consumers’ access to all remedies available in courts of law and equity; and consumers’ access (upon request) to written explanations of arbitral awards. The Protocol also strongly encouraged the use of mediation. It did not address class action waivers. The AAA subsequently conditioned its provision of service upon compliance with the Protocol and, over the years, has been removed

---

16. Id. at 1–3.

17. Id. at 2. The complete list of principles contained in the Protocol are:

1. Fundamentally fair process
2. Access to information regarding ADR program
3. Independent and impartial neutral; independent administration
4. Quality and competence of neutrals
5. Small claims
6. Reasonable cost
7. Reasonably convenient location
8. Reasonable time limits
9. Right to representation
10. Mediation
11. Agreements to arbitrate
12. Arbitration hearings
13. Access to information
14. Arbitral remedies
15. Arbitration awards

  * For consumer cases with claims under $75,000, the AAA reviews the
from some consumer agreements due to businesses’ unwillingness to abide by the principles contained in the Protocol. Presumably, such removals involved communications regarding the AAA’s determination that the businesses’ consumer arbitration clauses did not meet the requirements of the Due Process Protocol. The CFPB proposed to require the submission of these communications.

The ABA Section of Dispute Resolution had examined mandatory pre-dispute consumer arbitration at various points over the years. With some limited exceptions for particular applications, the Section’s Council had contract clause to determine if it substantially and materially deviates from the Consumer Due Process Protocol. The AAA reserves the right to refuse to administer arbitrations with consumer clauses that violate the Consumer Due Process Protocol.

- Pursuant to the AAA’s National Rules for the Resolution of Employment Disputes, employers submit pre-dispute, corporate employment programs naming the AAA to the AAA for review to determine that the programs do not substantially and materially deviate from the Employment Due Process Protocol. The AAA reserves the right to decline its administrative services if the employer does not submit its plan for review or if the program does not comply with the Due Process Protocol.

Id.; see also Drahozal & Zyontz, Private Regulation, supra note 6, at 91 (reporting the results of first empirical study of the AAA’s enforcement of its Consumer Due Process Protocol and finding that the AAA’s review of arbitration clauses for protocol compliance appears to be effective at identifying and responding to those clauses with protocol violations); Horton & Chandrasekher, supra note 6, at 91 (observing that the “prophylactic steps” resulting from the AAA’s adoption and enforcement of its Consumer Due Process Protocols may make the AAA “more amenable to consumer plaintiffs than other venues”); Stipanowich et al., supra note 6, at 48 (“Importantly, AAA reviews arbitration clauses for their compliance with the Due Process Protocol. When AAA has found deviation from the Protocol, it has rejected cases or has required the company to agree to correct deficiencies.”).

20. Id. at 10.

22. For example, the Section’s Council voted to support a proposed ABA House of Delegates resolution (Resolution 111B) opposing the use of mandatory, binding, pre-dispute arbitration agreements between nursing homes and residents or their agents and supporting legislation and regulations invalidating such arbitration agreements. The House of Delegates
been unable to achieve a general consensus on whether to support or oppose
mandatory pre-dispute consumer arbitration.\textsuperscript{23} Due to the importance of the
CFPB’s proposed rules to the dispute resolution field, however, the Section
decided to try again. The Section’s Council established a CFPB Review
Task Force, composed of experienced and well-respected dispute resolution
practitioners and academics knowledgeable regarding mandatory pre-
dispute arbitration (particularly consumer arbitration),\textsuperscript{24} to review the
CFPB’s proposals\textsuperscript{25} and provide advice to the Section. The subsequent
deliberations of the Section’s Executive Committee and Council were
informed by the Task Force’s report.\textsuperscript{26}

After such deliberations, the Section’s Council voted to express its
strong support for the CFPB’s Arbitration Reporting Proposal. In comments
submitted to the CFPB in July 2016,\textsuperscript{27} the Section noted the current lack of
complete and consistent information regarding consumer arbitration and the
need for such information. The Section referenced the CFPB’s March 2015
report, in which the agency concluded that although it had a “reasonably
complete picture of the claims that consumers are willing to file in
arbitration where arbitration is an available option,”\textsuperscript{28} its analysis was

\textsuperscript{23} Welsh, \textit{Class Action-Barring Mandatory Pre-Dispute Consumer Arbitration
Clauses}, supra note 6, at 381-86 (describing history of Section’s attempts to develop a
policy and protocols on mandatory pre-dispute consumer arbitration); Welsh & Lipsky,
\textit{“Moving the Ball Forward,”} supra note 7, at 14 (describing position taken by Section
Council on Arbitration Fairness Act and its aftermath).

\textsuperscript{24} The CFPB Review Task Force consisted of Nancy Welsh (Chair), Lisa Amsler,
Louis Burke, Ben Davis, Homer Larue, Bruce Meyerson, Lawrence Mills, Peter Phillips,
Colin Rule, Jean Sternlight, Thomas Stipanowich, and Beth Trent.

\textsuperscript{25} At this point, the CFPB had released tentative proposals as part of a review by the
Small Business Review Panel. See CFPB, \textit{SMALL BUSINESS ADVISORY REVIEW PANEL FOR
POTENTIAL RULEMAKING ON ARBITRATION AGREEMENTS}, supra note 9 (regarding Small

\textsuperscript{26} Welsh et al., \textit{CONSUMER FIN. PROT. BUREAU, REPORT TO THE COUNCIL OF THE
DISPUTE RESOLUTION SECTION FROM THE CFPB REVIEW TASK FORCE} (on file with author).

\textsuperscript{27} Pursuant to Council direction, the Section sought and won permission from the
ABA (through its “blanket authority” procedure) to submit comments to the CFPB. See
Nancy A. Welsh, ABA Section of Dispute Resolution, Comment Letter on Proposed Rule of
Arbitration Agreements (July 29, 2016), https://www.regulations.gov/document?D=CFPB-
2016-0020-5905 [hereinafter Welsh, Comment Letter].

\textsuperscript{28} CFPB REPORT, supra note 10, § 5.1, at 4.
subject to limitations. To a large extent, these limitations derived from the paucity of complete and consistent information regarding the numbers, types of claims, outcomes, arbitrators, parties, and party representatives involved in arbitrations conducted pursuant to mandatory pre-dispute consumer arbitration clauses. The Section concluded that “despite the prevalence of mandatory pre-dispute consumer arbitration clauses, the public generally has little information regarding use of the process or its outcomes.”

Specifically, the Section noted that the CFPB had been forced to rely on data from a single source—the AAA—that “voluntarily provided its case filings to the CFPB pursuant to a non-disclosure agreement.” While there was “substantial evidence that the AAA dominate[d] the administration of consumer financial arbitration cases[,]” the CFPB had pointed out in its March 2015 report that other dispute resolution organizations also administered consumer financial arbitration. The Section found it significant that “only 18.3% of storefront payday-loan contracts, 16.7% of private student loan contracts, and 37.3% of prepaid cards studied by the CFPB provided for the AAA as the sole administrator, while most contracts identified the AAA as either the sole administrator or one of the available choices.” The CFPB had noted that “the types of claims handled by other providers might differ from the claims evidenced in the AAA filings, but due to the lack of required reporting, the CFPB had no means to determine whether such differences existed.” As a result, “the AAA might not be the

30. Id. at 2-3.
31. Id. at 3, 10 n.10 (“[T]he AAA is specified as at least one potential choice of contractually-specified arbitration administrators in 98.5% of the credit card market we studied; 98.9% of the checking account market we studied; 100% of the GPR prepaid card market we studied; 85.5% of the storefront payday loan market we studied; and 66.7% of the private student loan agreements we reviewed. The AAA is specified as the sole choice in 17.9% of the GPR prepaid card market that we studied; 44.6% of the checking account market we studied; and one of the private student loan agreements we reviewed. With that said . . . when we reviewed the court records of class cases in which parties moved to compel arbitration, we found five records indicating a subsequent filing with the AAA and four indicating a filing in JAMS.” (quoting CFPB REPORT, supra note 10, § 5.1, at 4 n.5)).
32. Id. at 3, 10 n.11 (“The CFPB specifically named JAMS, Inc., but it is very likely that there are also other dispute resolution providers handling these cases.”).
33. Id. at 3 (citing CFPB REPORT, supra note 10, § 2.5.3, at 35-39).
34. Id.
dominant administrator of arbitration in consumer financial contexts that were not studied by the CFPB.”

The CFPB acknowledged other difficulties with the data upon which it relied for its report, including the following shortcomings: ambiguity in defining what should count as a “win” for a consumer or company; a lack of information regarding the cases in which arbitrators did not make awards or in which the parties settled; and a lack of information regarding the outcomes of cases that did not proceed to arbitration or did not result in awards.

Ultimately, the Section was troubled by the lack of complete and consistent information regarding consumer arbitration and believed there was a need for such information.

The Section also found that the experience of quasi-public dispute resolution organizations, private organizations, and states demonstrated the value of collecting and publishing arbitration-related information, suggested specific information that would benefit from disclosure, and evidenced a developing trend toward transparency. The Section acknowledged that some dispute resolution professionals and organizations had raised legitimate concerns regarding the costs of complying with the CFPB’s Arbitration Reporting Requirement and the potential loss of confidentiality for processes that many describe as “private” dispute resolution. Nonetheless, the Section urged that transparency was essential to protect the integrity of arbitration and that:

[the] reporting and publication proposed by the CFPB—and the consequent availability of the information for those participating in consumer arbitration, those researching consumer arbitration, and those overseeing consumer arbitration—will help to protect the integrity of arbitration and, by extension, the integrity of the

35. Id.

36. CFPB Report, supra note 10, § 5.1, at 5-6 (observing that most state and federal courts also do not require reporting regarding settlements).

37. See, e.g., Letter from Nessa Feddis, Vice President & Senior Counsel, Ctr. for Regulatory Compliance, Am. Bankers Ass’n; Steven I. Zeisel, Exec. Vice President & Gen. Counsel, Consumer Bankers Ass’n; and K. Richard Foster, Senior Vice President & Senior Counsel for Regulatory & Legal Affairs, Fin. Servs. Roundtable, to Richard Cordray, Dir., CFPB (Aug. 22, 2016).
strong federal policy in favor of arbitration that has been expressed by the Supreme Court.\textsuperscript{38}

The Section then specifically identified the use of arbitration at issue here and explained the factors that demanded modification of the usual understanding of arbitration as a “creature of contract” that could and should be entirely private.

[T]ransparency is particularly important when, as here, one of the parties to a dispute is imposing a dispute resolution process upon the other party and the courts may be asked to enforce—and thus lend their coercive power and legitimacy to—the award produced by the process.\textsuperscript{39}

In sum, the Section strongly supported the CFPB’s proposal to require regulated entities to submit arbitration claim filings, awards, and other documents to the CFPB, and to publish such information. The Section also urged the CFPB to consider how quasi-public and private organizations had structured their databases to ensure easy access, searchability, and an overall sense of the dispute resolution system and its outcomes. The Section was particularly struck by those organizations that provided for both an online searchable database of individual awards and useful aggregated data (including data regarding mediation and different types of arbitral panels).

The Section also proposed a few modifications, based on the importance of assuring parties and the public that “individual arbitrators and dispute resolution providers offer an effective and impartial forum.”\textsuperscript{40} Regarding impartiality, the Section advocated for a searchable database of claim filings and awards that would reveal the number of times that a regulated entity had been a party in an arbitration filed with or administered by a particular dispute resolution provider, the number of times that a regulated entity’s arbitration had been conducted by a particular arbitrator, and the number of times that particular lawyers had represented clients in such arbitrations and before particular arbitrators. Thus, a searchable database would reveal repeat players of various types and potential conflicts of

\textsuperscript{38} Welsh, Comment Letter, \textit{supra} note 27, at 2. Notably, defenders of arbitration have also remarked upon “the need for more thorough empirical research into the dynamics of arbitration specifically and the resolution of disputes more generally.” Peter B. Rutledge, \textit{Who Can Be Against Fairness? The Case Against the Arbitration Fairness Act}, 9 \textit{CARDozo J. Conflict Resol.} 267, 281 (2008).

\textsuperscript{39} Welsh, Comment Letter, \textit{supra} note 27, at 8.

\textsuperscript{40} \textit{Id.}
interest. The database proposed by the CFPB did not, however, include information regarding “prior mediation experience with a particular dispute resolution organization or neutral, or the financial interests that might exist among dispute resolution organizations, parties, and legal representatives.” 41 The Section urged the CFPB to require disclosure regarding such prior experience and relationships to further assist with protecting the impartiality, effectiveness, and integrity of arbitration, and recommended considering the experience of the states in requiring disclosures regarding prior mediations42 and financial interests that might represent conflicts of interest. Finally, the Section urged the CFPB to consider specifying the mechanisms it would use to enforce its reporting requirements.

The election of Donald Trump as President in November 2016 apparently scuttled any chance that the CFPB’s proposed rules would be made effective.43 Nonetheless, on July 10, 2017, the CFPB announced its new rule barring mandatory pre-dispute consumer arbitration clauses that included class action waivers and requiring the reporting of arbitration claim filings, pre-dispute arbitration agreements, awards, and communications regarding compliance with fairness principles and payment requirements.44 The rule also provided for making such information public after appropriate aggregation or redaction.45

There were only a few differences between the Arbitration Reporting Proposal and the final rule announced in July 2017. Most notably, the CFPB had added two more reporting requirements. Providers of financial services and goods would be required to submit the answer to any initial claim or counterclaim and, “[i]n connection with any case in court by or

---

42. See Carrie Menkel-Meadow, Do the “Haves” Come Out Ahead in Alternative Judicial Systems?: Repeat Players in ADR, 15 OHIO ST. J. DISP. RESOL. 19, 34 n.71 (1999) (“Beyond the use of one ADR firm as a repeat provider, this law firm represented to me that a single mediator had been used over 300 times in one year! The repeat play law firm (by specialty) was able to maximize its use of a single repeat play mediator. So far, neither ethics regulations nor other rules require the law firm or the mediator to disclose to one-shot litigants that he had performed for this firm before.”).

43. See Welsh, Class Action-Barring Mandatory Pre-Dispute Consumer Arbitration Clauses, supra note 6, at 431 (expressing doubts regarding the likelihood that the CFPB would announce final rules).

45. Id.
against the provider . . . [a]ny submission to a court that relies on a pre-
dispute arbitration agreement in support of [an] attempt to seek dismissal,
deferral, or stay . . . and [t]he pre-dispute arbitration agreement [itself].”

The final rule also provided for the CFPB’s posting of the redacted records
(with possible additional redactions by the CFPB) on a publicly available
website that the CFPB would establish and maintain, with easy access and
retrieval functions.

Opponents quickly mounted legal and legislative challenges. Before
the end of July 2017, the House of Representatives voted to nullify the
CFPB’s new rule. On October 24, with a tie-breaking vote cast by Vice
President Pence, the U.S. Senate joined the House. On November 1,
President Trump signed the repeal of the CFPB’s rule.

A surprisingly broad swath of the media covered the Senate’s and the
President’s action nullifying the CFPB’s final rule. As before, though,
almost no attention was paid to the reporting provisions in the rule. Few

noticed when the CFPB first proposed to require reporting. Few noticed when the CFPB announced its reporting requirements. Few noticed when the reporting requirements were repealed. Regardless, by the end of this saga, the opportunity to bring some measure of transparency to mandatory pre-dispute consumer arbitration was dead.

Why, at this point, should anyone care?

II. The Experience of Federal and State Courts with the Collection and Publication of Information Regarding Civil Litigation

Professor Judith Resnik has observed recently that judges regularly “posit that openness supports informed discussions of government, fosters perceptions of fairness, checks corruption, enhances performance, facilitates accountability, discourages fraud, and permits communities to vent emotions.”

Perhaps the courts’ appreciation of the benefits of openness, particularly in a democracy, helps to explain federal and state courts’ general history of ensuring access to information regarding their operations.

Of course, court filings have long been presumed to be accessible to the public. As a result, information regarding the claims in individual cases, relief sought, counterclaims, defenses, parties, lawyers, and court judgments have been available to those willing to undertake the effort and time required to travel to individual courthouses and page through court files. Access to federal filings became much easier in 1990 with the creation of PACER (Public Access to Court Electronic Records), an online system maintained by the Administrative Office of the U.S. Courts. Access is not free, however, which has placed limits on the availability of

56. See Stevenson & Wagoner, supra note 54, at 1357-59.
57. The cost is ten cents per page, with a thirty-page cap on such costs for documents and case-specific reports. This cap does not apply to other searches. See Frequently Asked Questions, PACER, https://www.pacer.gov/psc/faq.html (last visited Nov. 27, 2018); see also Stevenson & Wagoner, supra note 54, at 1359-62 (regarding complaints about pay wall,
this resource for empirical research. In addition, as Peter Rutledge has observed, “the litigation system is not always bathed in sunshine—protective orders, closed proceedings, filings under seal, and settlements all reduce the degree of public scrutiny of the system.”

Both federal and state courts make aggregate information available regarding their operations. Interestingly, the Attorney General of the United States was responsible for the first publication of statistical tables regarding the federal courts in 1871. Today, the Administrative Office of the U.S. Courts produces and publishes annual reports that discuss the federal courts generally, with separate sections devoted to component parts of the federal judiciary. The reports provide aggregate numbers regarding complaints against judges and their disposition. They also highlight and explain unusual increases or declines in civil filings or dispositions. These

58. See Lynn M. LoPucki, Court-System Transparency, 94 IOWA L. REV. 481, 537 (2009) (urging that federal courts should require the use of data-enabled PDF forms) (“Policymakers, litigants, and the public could see the amounts of damages granted in personal-injury cases, the lengths of criminal sentences, the likelihood of success on various kinds of motions, the differences in outcomes among courts, the relative effectiveness of lawyers and expert witnesses, and the answers to a myriad of other questions.”); see also Stevenson & Wagoner, supra note 54, at 1359-60.

59. Rutledge, supra note 38, at 276-77 (urging that “the virtues of confidentiality at least counterbalance some of the loss of transparency”); see also Michael Kagan, Rebecca Gill & Fatma Marouf, Invisible Adjudication in the U.S. Courts of Appeals, 106 GEO. L.J. 683, 685-86 (2018) (reporting results of empirical research showing that many federal circuit court decisions on immigration appeals are unavailable and essentially invisible to the public).

explanations alert interested parties to trends throughout the federal courts or in particular jurisdictions. Twice each year, the Administrative Office of the U.S. Courts also publishes the most frequently requested tables of statistics regarding the workload of the federal courts. These tables contain aggregate data regarding a variety of information: numbers of cases filed, terminated, and pending by jurisdiction; numbers of cases filed by jurisdiction, nature of suit, and district; numbers of cases terminated, by nature of suit and action taken; and median time from filing to disposition of civil cases, by action taken.63 Both the annual reports and the semiannual tables of statistics are available online at no cost.

These reports and statistical tables are not perfect. Concerns have been raised regarding the accuracy and consistency of the data input by court clerks.64 In addition, there are some notable exclusions in the data captured for aggregation and publication. For example, while the reports and tables reveal the occurrence of dispositions, they do not provide information regarding the terms of such dispositions. Further, while the reports and tables show the number of civil cases terminated during a twelve-month period and provide some breakdowns regarding the actions taken that resulted in termination,65 such breakdowns are extremely limited. For example, there is no information regarding the number of terminations resulting from judicial settlement conferences, mediation, other facilitated settlement procedures, or traditional bilateral negotiations between the lawyers.66 Notably, a few district courts have taken the initiative to provide

---

65. The tables indicate how many civil cases are terminated with no court action and with court action occurring before trial, during or after pretrial, during or after a non-jury trial, and during or after a jury trial. See, e.g., Table C-4—U.S. District Courts—Civil Statistical Tables for the Federal Judiciary, U.S. CTS. (Dec. 31, 2017), http://www.uscourts.gov/statistics/table/c-4/statistical-tables-federal-judiciary/2017/12/31.

66. Nancy A. Welsh, Magistrate Judges, Settlement and Procedural Justice, 16 Nw. L.J. 983, 1044-45 (2016) (“While much is reported about magistrate judges’ functions, much more is unknown—e.g., how many dispositions actually result from magistrate judges’
aggregated information regarding their use of mediation and other ADR procedures. Other district courts have developed their own jurisdiction-specific settlement databases. Federal magistrate judges facilitating settlement conferences then use these databases with parties to allow comparisons with settlements reached in similar matters. These databases are not made available to the public generally.

State courts also publish aggregate information regarding their operations. For civil caseloads, state courts tend to report the number of filings and dispositions, often indicating whether the dispositions were the result of defaults, jury trials, or bench trials. However, only a few state
courts provide more detailed aggregate numbers regarding the dispositions resulting from the use of dispute resolution processes, such as court-connected mediation, arbitration, early neutral evaluation, or judicial settlement conferences.  

Significantly, federal and state courts are not alone in providing access to filings and aggregate information. Increasingly, quasi-public and “private” dispute resolution procedures are also subject to some degree of transparency.

III. The Experience of Quasi-Public and Private Organizations, States, and Users with the Collection and Publication of Information Regarding Dispute Resolution

The experience of quasi-public arbitration programs, private dispute resolution organizations, states and users with the collection and publication of data regarding arbitration proceedings (and to a much lesser degree, mediation sessions) is also instructive. The transparency and accountability offered by such reporting and publication have helped to promote the integrity of the dispute resolution processes.

A few examples follow regarding quasi-public and private arbitration programs’ provision for the transparency and accountability of their processes and outcomes by making their awards available and searchable online, much as proposed by the CFPB and supported by the Section. These are followed by examples of states’ disclosure requirements, users’ “self-help” initiatives, and calls for ODR to provide for transparency.

70. See, e.g., Uniform Data Reporting, Alternative Dispute Resolution Programs: Cases Ordered July through September 2017, FLA. CTS. (Oct. 27, 2017), http://www.flcourts.org/core/fileparse.php/541/url/Alternative-Dispute-Resolution-Program-Jul-Sep17.pdf (“This data is reported by court administration through the Uniform Data Reporting system web application and is not audited. In addition, data may be amended at a later date.”). But see Resnik, The Contingency of Openness, supra note 2, at 1667-68 (reporting that in Illinois, court-connected arbitration includes a public dimension and that outcomes are in a court database).
A. FINRA: Required Publication of Awards and Other Aggregate Data

The rules of the Financial Industry Regulatory Authority ("FINRA"), a not-for-profit organization authorized by Congress, require its awards to be made publicly available.71 The awards are online and searchable through the FINRA Arbitration Awards Online database,72 as well as commercial databases, such as Westlaw. The FINRA database is available without charge, and users can access FINRA arbitration awards from January 1989 through the present. In addition, users can access the awards of all arbitration programs absorbed over the years by FINRA (which include the American Stock Exchange, Chicago Board Options Exchange, International Stock Exchange, Philadelphia Stock Exchange, and Municipal Securities Rulemaking Board) and the New York Stock Exchange ("NYSE") (which includes Pacific Exchange/NYSE ARCA).

The database provides users with instantaneous access to awards and the ability to search for awards by using multiple criteria, such as by case number, keywords within awards, arbitrator names, party names, date ranges set by the user, and any combination of these features. FINRA also now includes information about the panel selection method and panel composition.

In addition, FINRA publishes various statistics online:

- The number of cases filed and closed thus far during the current year
- Historical statistics for cases filed and closed
- The top fifteen controversy types in customer arbitrations
- The top fifteen security types in customer arbitrations
- The top fifteen controversy types in intra-industry arbitrations

How arbitration cases close (e.g., after arbitration hearing, after arbitrators’ review of documents, direct settlement by parties, settled via mediation, withdrawn, all others)

Results of customer claimant arbitration award cases (e.g., percentage of all customer claimant cases closed that were decided by arbitrators, percentage (and number) of cases where customer awarded damages)

Results of all-public panels and majority-public panels in customer cases

Arbitrators by type and location

Mediation statistics thus far during the current year.

The resulting disclosures have helped to protect the integrity of the arbitration process by providing parties with information they need to prepare for arbitrations and, more broadly, enabling important empirical research and systemic analysis that otherwise would not be possible. These disclosures also have permitted regulators and observers to become aware of potentially worrisome trends in the financial services industry.

FINRA has continued to examine its procedures to enhance their transparency and legitimacy. Since 2009, for example, FINRA has required its arbitrators to issue an explained award—defined as “a fact-based award stating the general reason(s) for the arbitrators’ decision”—if all parties to the dispute jointly request one. Few parties have jointly requested an explained award since the rule’s enactment. In response, the FINRA Dispute Resolution Task Force recommended that FINRA change its rule to require an explained decision unless any party notifies the panel before the initial pre-hearing conference that it is opting out of such requirement.

The Task Force noted that it believed “increased confidence in the fairness of the system would likely flow from th[e] increased transparency.”

B. ICANN: Required Publication of Awards

The Internet Corporation for Assigned Names and Numbers (“ICANN”), a not-for-profit public benefit corporation, similarly requires its approved dispute resolution service providers to make Uniform Domain-Name Dispute-Resolution Policy (“UDRP”) decisions publicly available online, thus providing the public, parties, and arbitrators with easy access to arbitrators’ decisions and their reasoning. Publication of neutrals’ decisions is understood as necessary to enhance the legitimacy and predictability of the system. One of the dominant providers, the World Intellectual Property Organization (WIPO), has also established a system for querying its database regarding particular issues or categories of cases. As a result of the required publication of decisions, the ICANN system has permitted patterns of decision-making and institutions’ repeat appointments of arbitrators to be highlighted. Such transparency has assisted the integrity of the dispute resolution system.

79. Id. at 21.
80. See Rules for Uniform Domain Name Dispute Resolution Policy (the “Rules”), ICANN ¶ 16(b)), https://www.icann.org/resources/pages/udrp-rules-2015-03-11-en (last visited on Dec. 11, 2018) (“Except if the Panel determines otherwise [per Paragraph 4(j) of the Policy, ‘when an Administrative Panel determines in an exceptional case to redact portions of its decision’], the Provider shall publish the full decision and the date of its implementation on a publicly accessible web site. In any event, the portion of any decision determining a complaint to have been brought in bad faith (see Paragraph 15(e) of these Rules) shall be published.”).
81. See List of Approved Dispute Resolution Service Providers, ICANN, https://www.icann.org/resources/pages/providers-6d-2012-02-25-en (last visited Nov. 28, 2018) (listing approved dispute resolution service providers, including links to their databases of proceedings and decisions).
83. See Ethan Katsh & Colin Rule, What We Know and Need to Know About Online Dispute Resolution, 67 S.C. L. REV. 329, 336-37 (2016) (noting that the other major provider, National Arbitration Forum, enables only a full-text search of its decisions, and it is necessary to access a third party in order to conduct a full-text search of the decisions of both WIPO and NAM).
C. International Arbitration: Required and Increased Voluntary Publication of Awards

International dispute resolution providers regularly make information public regarding their proceedings and awards. The World Trade Organization ("WTO"), for example, provides a searchable, online database of trade disputes brought to the WTO for resolution pursuant to the Dispute Settlement Understanding. The awards are public, while pleadings are public only at the election of nations. In the investor-state arbitration framework, transparency is a critical component. The demands for transparency in ODR systems have increased with the rise of online dispute resolution (ODR) and the need for public trust in these systems. Transparency helps to ensure that an ODR system is operating the way that it should. ICANN's Uniform Domain Name Dispute Resolution Protocol (UDRP) is an excellent example of a transparent online dispute resolution process (even though it may have challenges in some of the other ethical standards). Under the UDRP, every case filing and decision is publicly accessible. This has led to quite a bit of external scrutiny for the UDRP process. As one may expect, it is not necessarily comfortable for the participants and the dispute resolution service providers to have full public scrutiny for all cases coming through the system. However, transparency can be a very important way for ODR systems to retain public trust, and for problems to be detected quickly and resolved. Much like how sunlight laws in the public sector promote honesty, process transparency in ODR is key to combating systemic bias.

Names and Numbers, 17 J. Int’l Arb., no. 3, 2000, at 115, 115-17, 122; Uniform Domain Name Dispute Resolution Policy, ICANN, https://www.icann.org/resources/pages/policy-2012-02-25-en (last visited Nov. 28, 2018); Benjamin G. Davis, Une Magouille Planétaire: The UDRP Is an International Scam: An Independent Assessment of the Uniform Domain Name Dispute Resolution Policy of the Internet Corporation for Assigned Names and Numbers, 72 Miss. L.J. 815 (2002); Daniel Klerman & Greg Reilly, Forum Selling, 89 S. Cal. L. Rev. 241, 298 (2016) (reporting that “[a]nalysis of arbitrator selection showed that among dominant providers [NAF and WIPO], arbitrators who decided most often in favor of the complainant received more cases, while persons with reputations for decisions protective of domain name owners were seldom if ever selected as sole arbitrators” and were instead “placed on [relatively rarely used] three-person panels”); also observing, based on subsequent research, that “the system improved over time”) (citing Michael Geist, Fair.com?: An Examination of the Allegations of Systemic Unfairness in the ICANN UDRP, 27 Brook. J. Int’l L. 903, 928-30 (2002)); 2012 Domain Dispute Study, DNATTORNEY.COM (Aug. 28, 2012), https://dnattorney.com/resources/case-studies/); Domain Name Dispute Resolution Policies, ICANN, https://www.icann.org/resources/pages/dndr-2012-02-25-en (last visited Nov. 28, 2018) (providing other domain name dispute resolution policies). Recently, Amy Schmitz and Colin Rule have pointed out the importance of ICANN’s transparency:

Transparency helps to ensure that an ODR system is operating the way that it should. ICANN’s Uniform Domain Name Dispute Resolution Protocol (UDRP) is an excellent example of a transparent online dispute resolution process (even though it may have challenges in some of the other ethical standards). Under the UDRP, every case filing and decision is publicly accessible. This has led to quite a bit of external scrutiny for the UDRP process. As one may expect, it is not necessarily comfortable for the participants and the dispute resolution service providers to have full public scrutiny for all cases coming through the system. However, transparency can be a very important way for ODR systems to retain public trust, and for problems to be detected quickly and resolved. Much like how sunlight laws in the public sector promote honesty, process transparency in ODR is key to combating systemic bias.

86. For example, the United States makes its pleadings available. Id.
context, the International Center for Settlement of Investment Disputes (“ICSID”) currently offers an online, searchable list of cases and arbitral awards. ICSID only publishes awards with the consent of the parties. However, even without the parties’ consent, ICSID publishes excerpts of arbitral panels’ legal reasoning. This information has been useful for the parties directly involved in investor-state disputes and for those conducting systemic, empirical analysis.

Indeed, in the investor-state context, substantial attention has been paid to the need for transparency. For example, the United Nations Rules on Transparency in Treaty-Based Investor-State Arbitration, which became effective on April 1, 2014, provide for the publication of documents, open hearings, and the opportunity for interested third parties to file and make submissions. For disputes arising out of treaties concluded before April 1, 2014, these rules regarding transparency apply only at the election of the parties to the arbitration or the parties to the relevant treaty.

Even though international commercial arbitration awards are not required to be published, there are indications that such awards and aggregated information are being published voluntarily with greater frequency. In the past, only a selective group of lawyers and law firms was likely to know about and use international commercial arbitrators’ decisions. Now, however, international commercial arbitral institutions are advocating increased publication, “with some institutions even shifting to a presumption in favor of redacted awards in the absence of party objection.” Legal journals, such as the Collection of ICC Arbitral Awards, publish arbitral awards with the redaction of names and other identifying information. As a result of shifting presumptions regarding the publication of awards, some commentators perceive an increasingly transparent body of non-binding but persuasive precedent being produced by international commercial arbitration. Other commentators acknowledge a trend toward transparency (especially in the investor-state arbitration context as described above), but they also note that “most if not all” international commercial arbitral institutions continue to publish only selected awards and then only in redacted form, and that such awards “are not always easy to search or find.” Indeed, access to such awards is generally available only by subscription.

Meanwhile, online subscription services now exist that use aggregated data regarding international commercial mediation and arbitration contributed by dispute resolution organizations from around the world (and involving data from 185 nations) to generate up-to-date geographic and case-type reports on “average claim amounts by case type, average claim amount versus amount awarded, arbitration and/or settlement outcomes by

94. See Rogers, supra note 92, at 1319-20.

95. Ank Santens & Romain Zamour, Dreaded Dearth of Precedent in the Wake of International Arbitration: Could the Cause Also Bring the Cure?, 7 Y.B. ON ARB. & MEDIATION 73, 78 (2015) (citing S.I. Strong, Research in International Commercial Arbitration: Special Skills, Special Sources, 20 AM. REV. OF ARB. 119 (2009)).
case type, whether parties frequently file counterclaims and their success rates, and the average length of case. In96 Subscribers also can learn about “the frequency of the use of discovery tools, including e-discovery, and the success rate of counterclaims by case type.”97 Access to these aggregated data regarding international commercial arbitration and mediation requires payment of a fee.

D. Labor Arbitration: Required and Voluntary Publication of Awards

Labor arbitration provides another model for the publication of information regarding arbitrations and their results. Many state providers of labor arbitration make their awards available online. Some states also make public the results of grievance arbitrations with public sector unions.

96. Q&A with Bill Slate, Chairman, CEO and Co-founder of Dispute Resolution Data, NORTON ROSE FULBRIGHT (Oct. 2017), http://www.nortonrosefulbright.com/knowledge/publications/157150/data-insights; see also International Commercial Arbitration and Mediation: What Does the Data Show?, Disp. Resol. Data, http://www.disputeresolutiondata.com/international_commercial_arbitration (last visited Dec. 11, 2018) [hereinafter What Does the Data Show?] (“[D]ispute Resolution Data (DRD) is receiving data from 17 international entities and then aggregating the data by case type (28 different) and seven geographic regions. In this process, each closed international commercial arbitration provides information for up to 100 data fields and each closed international mediation up to 45 data fields. Presently, over 1,000 cases have provided information, in excess of, 40,000 data fields.”).

97. What Does the Data Show?, supra note 96.

98. In contrast, this sort of information is not generally available for employment arbitration. See David B. Lipsky, J. Ryan Lamare & Michael D. Maffie, Mandatory Employment Arbitration: Dispelling the Myths, 32 ALTERNATIVES TO HIGH COST LITIG. 133, 142 (2014) (critiquing claims regarding expansive use of mandatory pre-dispute employment arbitration clauses but also acknowledging “that no institution or individual has ever been able to collect a comprehensive set of data on the total number of employment arbitration claims”). But see text at infra notes 103-04 (regarding AAA disclosures, including disclosures regarding employment arbitration conducted pursuant to mandatory pre-dispute arbitration clauses).

In other settings, labor arbitration awards are not required to be published. However, those that are published are generally accompanied by reasoned opinions that provide parties with valuable information. Parties can access searchable online databases of these labor arbitration awards through various private providers (e.g., Bloomberg BNA, CCH, and Thomson West’s LAIS). Bloomberg BNA’s Arbitration Award Navigator, for example, allows users to access a collection of at least 20,000 arbitration awards to assess trends, evaluate arbitrators, and pinpoint awards. Users can search awards by case name, arbitrator, topic, union, employer, industry, classification outline number, and several other criteria. These sources are non-public and require payment.

E. Consumer Arbitration in California, District of Columbia, Maine, and Maryland: Required Disclosures

There is also substantial state (and District of Columbia) experience with the required submission and publication of data, specifically regarding consumer arbitration. Again, such disclosures have enabled vital empirical research and systemic analysis.

101. The benefits of arbitrator opinion writing are many and varied. See Sarah R. Cole, The Federalization of Consumer Arbitration: Possible Solutions, 2013 U. CHI. LEGAL F. 271, 280. First, opinion writing improves the quality of arbitral decision-making. The process of writing an opinion encourages the arbitrator to carefully consider her decision. In addition, opinion writing assists parties in selecting an arbitrator because it provides them with better information about a particular arbitrator’s decision-making process and potential biases. The opinion-writing requirement also improves the hearing process (because the arbitrator will need to make sure he or she understands all of the issues presented) and provides a greater sense of resolution to the parties, who will now have a deeper understanding of the reasons they won or lost. Moreover, this relatively inexpensive process change would have a significant impact on parties’ and the public’s perception of arbitration as a fair and legitimate forum for the resolution of disputes. See generally Chad M. Oldfather, Writing, Cognition, and the Nature of the Judicial Functions, 96 GEO. L.J. 1283 (2008).

Unlike the quasi-public and private organizations described supra, the states have not provided for the disclosure and publication of awards. Instead, they have required dispute resolution providers to collect and disclose specific pieces of information. In some respects, the resulting data provides less information than would be available from a review of arbitration filings and awards; in other respects, the resulting data exceeds what would be available from such a review.

California is the leader in requiring disclosures regarding consumer arbitration. Effective January 1, 2003, California Civil Procedure Code section 1281.96 began requiring dispute resolution providers to collect, publish at least quarterly,\(^{103}\) and make available to the public on the provider’s website (and on paper upon request) a report containing information about the provider’s consumer arbitrations within the preceding five years.\(^{104}\) The statute also requires the report’s format to be searchable and sortable by members of the public using “readily available software” and “to be directly accessible from a conspicuously displayed link” that is identified as “consumer case information.”\(^{105}\)

The statute, which was amended in 2014, currently requires publication of the following pieces of information:

1. Whether arbitration was demanded pursuant to a pre-dispute arbitration clause and, if so, whether the pre-dispute arbitration clause designated the administering private arbitration company.

2. The name of the nonconsumer party, if the nonconsumer party is a corporation or other business entity, and whether the nonconsumer party was the initiating party or the responding party, if known.

\(^{103}\) CAL. CIV. PROC. CODE § 1281.96(a) (West 2016). Certain providers that handle fewer than 50 consumer arbitrations are required to report only semiannually. Id. § 1281.96(c)(2).

\(^{105}\) CAL. CIV. PROC. CODE § 1281.96(b) (West 2016).
(3) The nature of the dispute involved as one of the following: goods; credit; other banking or finance; insurance; health care; construction; real estate; telecommunications, including software and Internet usage; debt collection; personal injury; employment\(^{106}\), or other. . . .

(4) Whether the consumer or nonconsumer party was the prevailing party. As used in this section, “prevailing party” includes the party with a net monetary recovery or an award of injunctive relief.

(5) The total number of occasions, if any, the nonconsumer party has previously been a party in an arbitration administered by the private arbitration company.

(6) The total number of occasions, if any, the nonconsumer party has previously been a party in a mediation administered by the private arbitration company.

(7) Whether the consumer party was represented by an attorney and, if so, the name of the attorney and the full name of the law firm that employs the attorney, if any.

(8) The date the private arbitration company received the demand for arbitration, the date the arbitrator was appointed, and the date of disposition by the arbitrator or private arbitration company.

(9) The type of disposition of the dispute, if known, identified as one of the following: withdrawal, abandonment, settlement, award after hearing, award without hearing, default, or dismissal without hearing. If a case was administered in a hearing, indicate whether the hearing was conducted in person, by telephone or video conference, or by documents only.

(10) The amount of the claim, whether equitable relief was requested or awarded, the amount of any monetary award, the amount of any attorney's fees awarded, and any other relief granted, if any.

---

106. California is unique in including the arbitration of employment matters within a statute structured to focus on consumer arbitration. The Section was careful to take no position on this inclusion.
(11) The name of the arbitrator, his or her total fee for the case, the percentage of the arbitrator's fee allocated to each party, whether a waiver of any fees was granted, and, if so, the amount of the waiver.\textsuperscript{107}

It is particularly notable that California’s statute requires disclosure of a non-consumer’s prior mediation experience with a dispute resolution provider, as well as prior arbitration experience.\textsuperscript{108} Meanwhile, the statute does not require disclosure of the name of the consumer, the specific legal claims involved, the basis for an arbitral award, or the terms of any settlement. The statute also does not provide for any mechanism to enforce its requirements.\textsuperscript{109}

Some commentators and scholars report that despite the value of the information disclosed pursuant to California’s requirements, many dispute resolution providers are not in compliance.\textsuperscript{110} The AAA has been particularly conscientious in complying with the state’s requirements. The AAA displays the relevant data quite prominently on its website, discloses information about the statutes that require provision of the data, provides guidance on how to search the database,\textsuperscript{111} and, as noted supra, cooperated with the CFPB in furnishing data for the study required by the Dodd-Frank Act. Recently, however, Professor Judith Resnik reported deficiencies in even the AAA’s disclosures\textsuperscript{112} and concluded that the available information

\textsuperscript{107} CAL. CIV. PROC. CODE § 1281.96(a) (West 2016).
\textsuperscript{108} Id.
\textsuperscript{109} Id.
\textsuperscript{110} See Resnik, \textit{A2J}, supra note 2, at 648 (observing that a 2017 study reported that of the 32 entities offering consumer arbitration, only about one third (eleven) posted the data and one tenth (three) met all the California requirements); Resnik, \textit{Diffusing Disputes, supra} note 6, at 2898 (citing DAVID J. JUNG, JAMIE HOROWITZ, JOSE HERRERA & LEE ROSENBERG, PUB. LAW RESEARCH INST., REPORTING CONSUMER ARBITRATION DATA IN CALIFORNIA: AN ANALYSIS OF COMPLIANCE WITH CALIFORNIA CODE OF CIVIL PROCEDURE § 1281.96, at 9, 51 (2013)).
\textsuperscript{112} Resnik, \textit{Diffusing Disputes, supra} note 6, at 2900. A research team analyzed the AAA’s disclosures regarding claims that had been filed and closed between July 2009 and June 2014 (and thus were governed by the 2003 version of California’s disclosure requirements). They found disclosures regarding 7,303 consumer claims, excluding real estate and construction, and the disclosures generally revealed the names of the business entity and of the arbitrators and lawyers (if appearing), as well as whether the claim closed by settlement or award, the amounts sought, the fees, and fee allocations between the disputants. Of the
was “spotty.”

It does not appear that any dispute resolution provider has suffered any negative consequence as a result of the failure to make the disclosures required by California. Three other jurisdictions have also enacted arbitration disclosure requirements: Maine, Maryland, and the District of Columbia. All are patterned after California’s 2003 statute, although they include variations.

The District of Columbia’s reporting requirements, which became effective in 2008, look much like those in California. However, the

5,224 claims “terminated by an award,” about half included a dollar figure. Id. at 2899-900. Resnik also observes, “The information on prevailing parties comes with the caveat that arbitrators are the source; the AAA has not ‘reviewed, investigated, or evaluated the accuracy or completeness’ of such information.” Id. at 2900; see also Resnik, supra note 2, at 649 (observing that arbitration files are not accessible and often are held by individual arbitrators, not the reporting dispute resolution providers, and that the providers do not independently verify the individual arbitrators’ reports; also noting that “coding errors can occur at both individual and aggregate levels” and providing an example of sixty-two cases in which the consumers were coded erroneously as seeking exactly the same amount and receiving exactly the same award).

113. Resnik, Diffusing Disputes, supra note 6, at 2898; see also Amsler, supra note 6, at 42 (noting that California data was incomplete, thus precluding systematic analysis of outcomes (citing Lisa Blomgren Bingham, Jean R. Sternlight & John C. Healey, Arbitration Data Disclosure in California: What We Have and What We Need (Apr. 15, 2005) (unpublished paper presented at the American Bar Association Section of Dispute Resolution Conference in Los Angeles))).

114. CAL. CIV. PROC. CODE § 1281.96(f) provides: “It is the intent of the Legislature that private arbitration companies comply with all legal obligations of this section.” However, there is no express provision for enforcement of such obligation. See, e.g., Appellants’ Opening Brief at 10, Cross Country Bank v. California, No. A108572 (Cal. Ct. App. Jan. 2005), 2005 WL 677738 (observing that in dicta, the trial court in the case had noted that an arbitration agreement naming NAF as the provider “might be unenforceable” due to NAF’s failure to comply with the California disclosure requirements, but also noting the lack of any express provision for such disqualification). But see Honeycutt v. JPMorgan Chase Bank, N.A., 236 Cal. Rptr. 3d 255, 270-71 (Cal. Ct. App. 2018) (entering a judgment of vacatur of arbitral award in employment matter due to arbitrator’s failure to make disclosures as required by California statute and ethics provisions).

118. Interestingly, the District of Columbia’s reporting requirements also provide for the waiver of arbitration fees and costs “for any person having a gross monthly income that is less than 300% of the federal poverty guidelines issued annually by the United States Department of Health and Human Services.” Id. § 16-4430(d)(1). The District of Columbia’s
District of Columbia specifically provides for enforcement by permitting any person or entity affected by a violation of the provisions to seek an injunction against, and appropriate restitution from, the allegedly violating arbitration organization. If the person or entity bringing the action prevails, or if the arbitration organization voluntarily complies after the commencement of the action, then the arbitration organization can be held liable for the person or entity’s attorney’s fees and costs. ¹¹⁹

In addition, the District of Columbia requires each dispute resolution provider to disclose any financial interests that the provider has in a party or the legal representation of a party, as well as any financial interests that a party has in the provider. ¹²⁰ This additional requirement is consistent with the recommendations of scholars and the CPR-Georgetown Commission on Ethics and Standards in the Practice of ADR ¹²¹ and addresses important

¹¹⁹. D.C. CODE ANN. § 16-4430(i).
¹²⁰. Id. § 16-4430(h). Maine also requires disclosures regarding financial interest. See ME. REV. STAT. ANN. tit. 10, § 1394(1)(K) (2010).
¹²¹. In 2002, the CPR-Georgetown Commission on Ethics and Standards in the Practice of ADR published the CPR-Georgetown Principles for ADR Provider Organizations. These principles include the following regarding disclosures:

ADR Provider Organizations should take all reasonable steps to provide clear, accurate and understandable information about the following aspects of their services and operations:

a. The nature of the ADR Provider Organization’s services, operations, and fees;
b. The relevant economic, legal, professional or other relationships between the ADR Provider Organization and its affiliated neutrals;
c. The ADR Provider Organization’s policies relating to confidentiality, organizational and individual conflicts of interests, and ethical standards for neutrals and the Organization;
d. Training and qualifications requirements for neutrals affiliated with the Organization, as well as other selection criteria for affiliation; and
concerns regarding the potential for conflicts of interest. Such concerns were heightened after the Minnesota Attorney General brought a highly publicized suit against the National Arbitration Forum (“NAF”), a dispute resolution provider that conducted consumer arbitrations pursuant to mandatory pre-dispute arbitration clauses. The Attorney General alleged that NAF and its operations had become financially entangled with lawyers

e. The method by which neutrals are selected for service.

The ADR Provider Organization should disclose the existence of any interests or relationships which are reasonably likely to affect the impartiality or independence of the Organization or which might reasonably create the appearance that the Organization is biased against a party or favorable to another, including (i) any financial or other interest by the Organization in the outcome; (ii) any significant financial, business, organizational, professional or other relationship that the Organization has with any of the parties or their counsel, including a contractual stream of referrals, a de facto stream of referrals, or a funding relationship between a party and the organization; or (iii) any other significant source of bias or prejudice concerning the Organization which is reasonably likely to affect impartiality or might reasonably create an appearance of partiality or bias.

CPR-GEORGETOWN COMM’N ON ETHICS & STANDARDS OF PRACTICE IN ADR, PRINCIPLES FOR ADR PROVIDER ORGANIZATIONS 9-10 (May 1, 2002), https://www.cpradr.org/resource-center/protocols-guidelines/ethics-codes/principles-for-adr-provider-organizations/_res/id=Attachments/index=0/Principles-for-ADR-Provider-Organizations.pdf [hereinafter PRINCIPLES FOR ADR PROVIDER ORGANIZATIONS]; see also Welsh, Mandatory Predispute Consumer Arbitration, supra note 6, at 225-26 (suggesting disclosures of the following in order to understand the operation of any negotiated or facilitated processes that precede arbitration—e.g., “written policies (or performance evaluation factors) to guide employees’ decisions regarding the amount of their first [and subsequent] settlement offers to consumers”; the number of times that a consumer must refuse “settlement offers in order to be offered the full amount of [their] claim”; the length of time that employees wait before the consumer’s selection of an arbitrator to offer the full amount requested by a consumer; also suggesting disclosure of the following regarding arbitration—e.g., how the “available pool of arbitrators [was] selected for these types of cases;” how arbitrators are selected for particular cases; the “contractual and financial relationship” between companies and their arbitral provider(s); the company’s “share of each arbitral provider’s gross and net revenues”; the “potential for the arbitral provider, or individual arbitrators, to receive bonuses for their work” for a company and the basis for such bonuses; the information that the company receives about “the claims made by consumers, the results of these claims and the arbitrators responsible for deciding the claims”; how the company has used this information; and whether the company has ever used this information to “improve its products or services” and, if yes, in what way).

122. See generally Welsh, What Is “(Im)partial Enough,” supra note 6, at 427-30.
and other actors involved in debt collection matters subject to arbitration.\textsuperscript{123} NAF subsequently entered into a settlement with the Attorney General and discontinued its provision of consumer arbitrations pursuant to mandatory pre-dispute arbitration clauses.

Maine also requires a disclosure regarding financial interests that could represent a conflict of interest. In addition, the consumer protection division of Maine’s Office of the Attorney General is directly involved in publicizing dispute resolution providers’ disclosures to consumers. Specifically, each dispute resolution provider must notify the Attorney General of the website where its disclosures are posted (and must provide notification of the discontinuation of the use of such website), and the Attorney General is required to include links on its own publicly accessible website.\textsuperscript{124}

Maryland varies from both California and Maine in additionally requiring disclosure of the address where a consumer arbitration was conducted.\textsuperscript{125}

\textit{F. Disclosures by Users of Dispute Resolution Services}

Some proponents of international commercial and investor-state arbitration have pioneered online initiatives that empower users of dispute resolution services to publicize information regarding their experience with international arbitrators and arbitration.\textsuperscript{126} For example, the non-profit organization Arbitrator Intelligence solicits arbitral awards from users and posts them online. In addition, Arbitrator Intelligence uses a two-phase Arbitrator Intelligence Questionnaire ("AIQ") to collect both objective

\begin{footnotesize}
\begin{itemize}
\item \textsuperscript{124} \textit{Me. Rev. Stat. Ann. tit. 10, § 1394(2)} (West 2010).
\item \textsuperscript{125} \textit{Md. Code Ann., Com. Law} § 14-3903(a)(11) (West 2011). Maryland also varies from both California and Maine in not requiring disclosures regarding the arbitration of employment-related disputes or the number of times that a non-consumer has been a party in a mediation conducted by the disclosing dispute resolution organization. \textit{Id.} § 14-3903(a)(2), (5).
\end{itemize}
\end{footnotesize}
information and subjective assessments from users and counsel regarding individual arbitrators’ case management (e.g., ordering of interim measures and document production), decision-making (e.g., interpretive methodologies), and timeliness in the issuance of awards. When enough anonymized data has been collected as a result of users’ completion of questionnaires, Arbitrator Intelligence intends to publish “AI Reports” regarding individual arbitrators. These reports will be available, for a fee, to users, counsel, institutions, and arbitrators, provided that the profiled arbitrator consents to such publication. The underlying data that Arbitrator Intelligence gathered also will be made available to cooperating arbitral institutions.

Consumer advocates and academics have urged similar initiatives for domestic consumer arbitration. Professor Lisa Amsler, for example, has proposed that one-shot players might increase transparency and improve their experience in consumer arbitration if they are trained to identify key procedural elements and then upload their assessments and other information to an online platform that would be widely accessible—and potentially quite influential in the aggregate (e.g., Trip Advisor). Based in part on suggestions made during a National Roundtable on Consumer

128. See id. (answering the question “How will information from the AIQs be made available?”).
129. See id. (answering the question “How does the AIQ ensure that feedback is fair to arbitrators?”).
131. See Amsler, supra note 6; see also Alyson Carrel & Alan Boudreau, Crowdsourcing and Mediation: A New Approach to Social Justice Critiques, Presentation at ABA Dispute Resolution Section Annual Conference (Apr. 17, 2015) and Association of Conflict Resolution (Mar. 25, 2015), http://tinyurl.com/crowdsourcing-mediation; Alyson Carrel & Alan Boudreau, Crowdsourcing: Can Today’s Technology Answer Yesterday’s Social Justice Critique of Mediation? (n.d.) (unpublished manuscript, on file with author) (proposing use of crowdsourcing to bring transparency to mediated settlements, referencing glassdoor.com and others for potential templates, and noting that questions regarding confidentiality and logistics must be resolved); see also Carrie Menkel-Meadow & Robert Dingwall, Negotiating with Scripts and Playbooks: What to Do When Big Bad Companies Won’t Negotiate, in THE NEGOTIATOR’S DESK REFERENCE 717-18 (Christopher Honeyman & Andrea Kupfer Schneider eds., 2017).
Arbitration, Professor Tom Stipanowich developed a “Fairness Index” that users similarly could access in order to provide feedback on arbitration services.

There are some particularly notable examples of institutional repeat players’ willingness to cooperate with the publication of information regarding their internal dispute resolution programs. Professor Alan Morrison, for example, has used the annual reports published by the Office of the Independent Administrator—which administers arbitrations between Kaiser Foundation Health Plan, Inc. and its health plan members in California—to assess the fairness of Kaiser Permanente’s mandatory medical malpractice arbitration program. Professor Morrison has called for others to engage in greater in-depth analysis of this program, with access to data beyond what was contained in the annual reports.

---

132. See STIPANOWICH ET AL., supra note 6; see also Nancy A. Welsh & Lipsky, “Moving the Ball Forward,” supra note 7.

134. See Alan B. Morrison, Can Mandatory Arbitration of Medical Malpractice Claims Be Fair? The Kaiser Permanente System, 70 DISP. RESOL. J. 35, 35-36 (2015) (using available data to determine whether this type of mandatory arbitration can be “operated in a manner in which those who must use it to resolve their claims receive a fair hearing and a reasonable opportunity to recover their damages”). These reports include information on the process used to close cases, time to closure, claimants’ win rates, and parties’ and counsel’s assessments of the arbitrators and process. Morrison supplemented his review of the annual reports with interviews with the independent Administrator and Kaiser-Permanente officials. Id. Also, it should be noted that Kaiser Permanente developed its current arbitration program following the California Supreme Court’s severe criticism of the prior program in Engalla v. Permanente Medical Group, 938 P.2d 903 (Cal. 1997). Morrison, supra, at 36; see also Stephanie Smith & Janet Martinez, An Analytic Framework for Dispute System Design, 14 HARV. NEGOT. L. REV. 123, 134-44 (2009) (describing the design process that led to Kaiser Permanente’s current arbitration program).

135. See Morrison, supra note 134, at 59 n.71. Notably, Professor Morrison concluded that Kaiser Permanente’s arbitration system was less expensive for claimants and thus made it more possible to bring small- and medium-size claims, was faster than litigation, permitted claimants to present their cases fully, and produced “reasonably just” outcomes. Id. at 59. He added that “[t]he loss of a public trial before a jury is a negative, but whether it outweighs the positives is a question that will not be answered in the same way by everyone.” Id.
G. Proposed Transparency Requirements for ODR

A last recent development involves online dispute resolution (“ODR”). Increasingly, courts, agencies, and repeat litigants (e.g., insurers, manufacturers, employers) are expressing interest in using ODR to resolve relatively routine, low-dollar disputes. ODR creates the opportunity for collecting and analyzing substantial amounts of data, which can then be used to detect problematic patterns. At the same time, the public is increasingly aware of the dangers presented by involvement with the online world, including the potential for security breaches, victimization as a result of inaccurate information, and unfairness as a result of biased

The CRT team constantly seeks feedback from both satisfied and unsatisfied users to improve the process, identify problems, and replicate successful elements. They collect data in a myriad of ways available only because of the CRT’s online nature: active user input given through rating and ranking, open text boxes, ex-post feedback, and analysis of dispute resolution data. Indeed, CRT developers have devoted significant efforts and resources to the development and refinement of categorizations of claims and defenses in order to allow for meaningful use of the data. Such data helps to improve the CRT and the diagnosis phase, and, perhaps more importantly, helps prevent future claims.

As the CRT team has recognized, learning from data and prevention of problems need not be limited to the improvement of the system itself, but could be viewed as a broader goal of the legal system. As use of online systems expands and data is stored and studied more extensively by courts, they will be able to detect, through such indicators as spikes in particular claims, that there is a regulatory gap or a need for better enforcement of existing laws in certain areas. In this way, dispute resolution data collected in courts can be used to prevent future disputes from occurring.

Consequently, many ODR advocates are calling for ODR procedures to be made transparent and accountable, with required reporting regarding the number of people using them, their substantive results, users’ perceptions of the ODR process’s fairness, demographic patterns, and the results of algorithmic audits.\(^{139}\)

The example of federal and state courts, as well as the developments involving quasi-public and private organizations and self-help initiatives as described supra, strongly suggest a trend toward some degree of transparency—what this Article will term “measured transparency”—in order to assure the integrity and trustworthiness of “private” dispute resolution processes. It is at this point, then, that this Article turns to dispute resolution neutrals’ ethical obligations and their relationship with transparency.

IV. Dispute Resolution Ethics and Transparency: Focus on the Model Standards of Conduct for Mediators

In light of the Article’s primary focus to this point on the value of transparency in connection with the use and outcomes of mandatory pre-dispute consumer and employment arbitration, it would be reasonable to turn now to the Code of Ethics for Arbitrators in Commercial Disputes. After examining the ethical obligations of arbitrators, the Article might then begin to consider other dispute resolution neutrals’ ethics—e.g., mediators,¹⁴¹ dispute resolution organizations,¹⁴² ODR providers,¹⁴³ ombudspersons,¹⁴⁴ and even state¹⁴⁵ and federal judges.¹⁴⁶

---

¹⁴¹ See generally Model Standards of Conduct for Mediators, [AM Arbitration Ass’n, Am. Bar Ass’n, and Ass’n for Conflict Resolution 2005] [hereinafter Model Standards of Conduct].

¹⁴² See generally Principles for ADR Provider Organizations, supra note 121.

¹⁴³ See generally Ethical Principles for Online Dispute Resolution, ODR.INFO, http://odr.info/ethics-and-odr/ [last visited Nov. 30, 2018].

Because there are now discussions regarding potential revisions to the Model Standards of Conduct for Mediators, however, the Article will turn at this point to the ethical obligations of mediators. As noted previously, the use of mediation is mimicking arbitration in key respects. Mandatory mediation is most frequently associated with courts, but private contracts of adhesion increasingly contain mandatory pre-dispute mediation clauses. Thus, like consumer and employment arbitration, mediation is imposed upon parties, and many commentators have raised concerns over the years about the fairness of the process for those who are less powerful. Most

145. See generally MODEL CODE OF JUDICIAL CONDUCT (AM. BAR ASS’N 2018).
146. See generally CODE OF CONDUCT FOR UNITED STATES JUDGES (U.S. COURTS 2018).

It is worth noting that judges and lawyers might also reasonably be expected to support transparency as a means to protect the integrity of the judicial system. However, this is not the case. Indeed, it is striking how many lawyers opt out of the judicial system and into arbitration for disputes with their clients over fees or malpractice. Neither the ABA Model Rules of Professional Conduct nor ABA ethics opinions require any data or general transparency regarding the extent of this practice. Rather, the ABA requires only that lawyers make disclosures to their clients regarding the arbitration provisions contained in retainer agreements, gain the clients’ informed consent, and provide for the availability of common law or statutory remedies. See Feldman v. Davis, 53 So.3d 1132, 1136-37 (Fla. Dist. Ct. App. 2011); Brian Cressman, Comment, Bezio v. Draeger: A Missed Opportunity for a Doctrinal Solution to the Jurisdictional Split as to the Arbitrability of Legal Malpractice Claims, 6 Y.B. ON ARB. & MEDIATION 359 (2014); Terese Schireson, Comment, The Ethical Lawyer-Client Arbitration Clause, 87 TEMP. L. REV. 547 (2015); Chrissy L. Schwennsen, Case Note, Arbitration Clauses in Fee Retainer Agreements, 3 ST. MARY’S J. LEGAL MALPRACTICE & ETHICS 330 (2013) (surveying state and ABA ethics opinions, provisions); ABA Comm’n on Ethics & Prof’l Responsibility, Formal Op. 02-425 (2002) (finding arbitration clause permissible if client is fully apprised of advantages and disadvantages to permit informed decision and clause does not insulate lawyer from liability or limit liability to which she would otherwise be exposed under common or statutory law); Prof’l Ethics, Comm. for the State Bar of Tex., Op. No. 586 (2008) (requiring informed consent, requiring clause to be fair and reasonable to client; referencing Rule 1.08, Comment 2); see also Susan Sabb Fortney, A Tort in Search of a Remedy: Prying Open the Courthouse Doors for Legal Malpractice Victims, 85 FORDHAM L. REV. 2033 (2017).

recently, legislative mandates to participate in foreclosure mediation have triggered particular attention to these concerns.\textsuperscript{148} Even though there is currently no federal statute\textsuperscript{149} providing for narrow and deferential judicial review or expedited judicial enforcement of mediated settlement agreements, traditional legal research\textsuperscript{150} and available metrics\textsuperscript{151} suggest that federal and state courts tend to treat mediated settlement agreements as “super-contracts”\textsuperscript{152} with nearly automatic entitlement to judicial support and enforcement. An international

Schneider, Nancy Welsh, Eric Yamamoto, Deborah Hensler, Pat Chew, Sarah Cole, Charles Craver and Lisa Blomgren Amsler, among others. Gilat Bachar and Professor Deborah Hensler undertook to identify all of the empirical efforts to test Professor Delgado’s hypothesis that mediation (and arbitration) create systematic differences in dispute resolution outcomes by gender, race, ethnicity, or socio-economic status. Ultimately, they found the results to be contrary and inconclusive, and they called for such research to be undertaken. Gilat J. Bachar & Deborah R. Hensler, Does Alternative Dispute Resolution Facilitate Prejudice and Bias? We Still Don’t Know, 70 SMU L. REV. 817, 829-30 (2017).

\textsuperscript{148} See Lydia Nussbaum, ADR’s Place in Foreclosure: Remedying the Flaws of a Securitized Housing Market, 34 CARDOZO L. REV. 1889, 1946 n.242 (2013) [hereinafter Nussbaum, ADR’s Place] (citing Admin. Office of the Courts, Supreme Court of Nev., Foreclosure Mediation Program Beneficiary Compliance Outcomes (2012), http://www.nevadajudiciary.us/index.php/viewdocumentsandforms/finc-startdown/8318 [hereinafter Foreclosure Mediation Program] (detailing the extent to which the six primary loan servicers in Nevada (Bank of America, Wells Fargo, JP Morgan Chase, Ally/GMAC, US Bank, CitiGroup) and others complied with statutory requirements of the state foreclosure mediation program, such as attendance at mediation, production of required documents, authority to negotiate, and good faith participation)); Lydia Nussbaum, Mediation as Regulation: Expanding State Governance over Private Disputes, 2016 UTAH L. REV. 361, 412 [hereinafter Nussbaum, Mediation as Regulation] (pointing out that the foreclosure crisis ultimately required the creation of the Consumer Financial Protection Bureau and legal action by the U.S. Department of Justice and the state attorneys general from forty-nine states and the District of Columbia, and observing that “policymakers need to be aware that, while it may appear more politically expedient to require parties to mediate and then shape their behavior within the context of mediation, direct government intervention may be required to achieve the intended policy outcome”).

\textsuperscript{149} In contrast, the Federal Arbitration Act provides very limited grounds for vacating an arbitral award, and the courts have developed a deferential standard of review. See Welsh, Mandatory Predispute Consumer Arbitration, supra note 6, at 206.

\textsuperscript{150} See Welsh, Thinning Vision, supra note 4, at 59-78.

\textsuperscript{151} See Cohen & Thompson, supra note 4, at 74.

\textsuperscript{152} See Leonard L. Riskin et al., Dispute Resolution and Lawyers 483 (5th ed. 2014); see also Lydia Nussbaum, Trial and Error: Legislating ADR for Medical Malpractice Reform, 76 MD. L. REV. 247, 269 (2017) (describing, in the medical malpractice context, how some states have “deputiz[ed] screening panels to formalize settlement agreements and render them binding so parties can skip going to court for a final judgment and order”).

154. In some respects, mediation presents a more difficult case than arbitration because the process promises confidentiality in order to encourage the candor and free flow of information needed to arrive at settlements. Indeed, Professor Lydia Nussbaum has pointed out the conflict that can exist between mediation’s promise of confidentiality and state legislatures’ policy goals in mandating mediation, particularly in the foreclosure context: [M]aking decisions about policy reform requires access to information, but the mediation process can obscure information with its confidentiality protections and individualized approach to dispute resolution. Therefore, legislatures should spend time considering whether “nudging” more disputes to resolve out of the public eye, erodes transparency and undermines the state’s interest in protecting consumers. Will families be able to assess the safety practices of an adult care home if previous complaints were resolved in confidential mediation
Therefore, this Article now turns to the Model Standards of Conduct for Mediators (“Model Standards”) originally adopted by the American Bar Association’s Section of Dispute Resolution, American Arbitration Association, and Society of Professionals in Dispute Resolution (“SPIDR”) in 1994, and then revised and adopted as revised by the American Bar Association, AAA, and ACR (the successor to SPIDR) in 2005. The Model Standards have been very influential. Most courts, bar associations, and other organizations in the United States have looked to the Model Standards as templates for ethical requirements for their mediators.\footnote{155}

The Model Standards certainly invoke the importance of gaining and retaining the public’s trust and protecting the integrity of the mediation process. The Preamble, for example, quickly establishes that one of the Standards’ primary goals is “to promote public confidence in mediation as a process for resolving disputes.”\footnote{156} Neither here nor elsewhere, however, do the Model Standards provide for any duty actually owed by mediators to sessions? How can consumer advocates identify patterns of misconduct by loan servicers or telecommunications carriers if individual claims are resolved quietly, one at a time? Whether the state should relinquish its power over dispute resolution outcomes, and whether parties, often unequally matched, can actually regulate each other in settlement negotiations, are questions hotly debated by scholars. Policymakers should be thoughtful about what kinds of disputes may have significance to the public. Some existing proposals for preserving public information while encouraging settlement include requiring parties to report the outcome of settlements negotiated in mediation in a national database or for the parties themselves to make mediated settlement terms publically \footnote{sic} available.

Nussbaum, \textit{Mediation as Regulation}, \textit{supra} note 148, at 412-13. Others have pointed to the confidentiality offered by mediation as a means to avoid the increasing transparency of arbitration. See, e.g., Shahla F. Ali & Odysseas G. Repousis, \textit{Investor-State Mediation and the Rise of Transparency in International Investment Law: Opportunity or Threat?}, 45 \textit{Denv. J. Int’l L. & Pol’y} 225, 228-29 (2017) (“If this treaty [for the enforcement of mediated settlement agreements] were to be concluded, would it mean that investor-state mediation would not only be a convenient method to avoid the high levels of transparency now paradigmatic to investor-state arbitration, but would also enjoy high levels of international enforceability?”).

\footnote{155. \textit{See Riskin et al.}, \textit{supra} note 152, at 401. There are exceptions, of course. In Florida, for example, the ethics provisions regulating court-certified mediators (as well as mediators handling court-connected cases) preceded the 1994 Model Standards.}

\footnote{156. \textit{Model Standards of Conduct}, \textit{supra} note 141, at pmbl..}
demonstrate to the public on a systemic basis that the mediation process is deserving of trust and confidence.157

Meanwhile, the Model Standards frequently reference mediators’ duty to protect the integrity of the mediation process in individual cases. For example, Standard III, “Conflicts of Interest,” provides that while a mediator is required to disclose conflicts of interest, she is also required to withdraw from or decline to proceed with a mediation when the conflict “might reasonably be viewed as undermining the integrity of mediation.”158

Also pursuant to Standard III, a mediator is required to avoid establishing a relationship with a mediation participant if “that would raise questions about the integrity of the mediation.” Standard VII, “Advertising and Solicitation,” provides that a mediator’s solicitations for business must be constrained in order to avoid “giv[ing] the appearance of partiality for or against a party or otherwise undermin[ing] the integrity of the process.”160

In addition to focusing on individual cases rather than systemic needs, these standards consistently establish what a mediator must not do. A mediator must not proceed to serve as a mediator if a conflict of interest exists. A mediator must not establish a relationship with a mediation participant. A mediator must not engage in troublesome business solicitations. All of these prohibitions exist to protect the integrity of the mediation process. No standard referencing integrity establishes an affirmative requirement, however, such as taking action to support reasonable—or “measured”161—transparency regarding the use or outcomes of the mediation process.162

157. See Omer Shapira, A Critical Assessment of the Model Standards of Conduct for Mediators (2005): Call for Reform, 100 MARQ. L. REV. 81, 95-104 (2016) (urging that the Model Standards should be revised to make it clear that mediators owe a duty to the public, not just the parties); see also Alyson Carrel & Lin Adrian, Regulating Mediator Practice, DISP. RESOL. MAG., Fall 2017, at 21, 23 (distinguishing the Model Standards from the mediation statutes and rules developed in Florida; noting that the Florida rules “don’t just discuss promoting public confidence as an aspirational goal but explicitly state that these rules are meant to ‘ensure protection of the participants in mediation and the public.’”).

158. MODEL STANDARDS OF CONDUCT, supra note 141, at Standard III.E. Christopher Honeyman has chronicled situational and structural biases in mediation that are endemic to the process—e.g., a situational bias toward the interests of the party that provided or hired the mediator, a structural bias toward moderates as compared to radicals—that may be best resolved by disclosure. See Christopher Honeyman, Patterns of Bias in Mediation, 1985 MO. J. DISP. RESOL. 141, 142-43, 146.

159. MODEL STANDARDS OF CONDUCT, supra note 141, at Standard III.F.

160. Id. at Standard VII.B.

161. The term “measured transparency” comes from Dispute Resolution Data. See What Does the Data Show?, supra note 96 (“The use of data in international commercial
Standards IV, “Competence,” and VI, “Quality of the Process,” provide for some affirmative ethical obligations regarding the assurance of quality, but their scope is limited to the parties participating in a mediation. For example, Standard IV notes that “[a] person who offers to serve as a mediator creates the expectation that the person is competent to mediate effectively” and urges that a mediator should both attend relevant educational programs and make available to the parties information that is “relevant to the mediator’s training, education, experience and approach in conducting a mediation.” Standard VI provides that a mediator must conduct a mediation “in a manner that promotes . . . party participation [and] procedural fairness.” If a party appears to have difficulty comprehending the process, issues, or settlement options, or difficulty participating in a mediation, then the mediator should explore the circumstances and potential accommodations, modifications, or adjustments that would make possible the party’s capacity to comprehend, participate, and exercise self-determination. These actions certainly are consistent with a mediator’s obligation to protect the integrity of the mediation process, but it is noteworthy that their reach is entirely limited to the mediator’s interaction with the parties participating in mediation.

Standard IX, “Advancement of Mediation Practice,” is the only standard that begins to hint at the value of monitoring mediation and providing information about the process to the larger public. This standard provides that a mediator should “act in a manner that advances the practice of arbitrations and mediations, measured transparency, and the opportunity for new scholarly research has arrived!”). Interestingly, even though Standard IV, Competence, does not specifically reference the need to consider the public and protect the integrity of the mediation process, the Reporter’s Notes observe:

The Model Standards (September 2005) retains the commitment expressed in the 1994 Version that the Standards not create artificial or arbitrary barriers to serve the public as a mediator. But to promote public confidence in the integrity and usefulness of the process and to protect the members of the public, an individual representing himself or herself as a mediator must be committed to serving only in those situations for which he or she possesses the basic competency to assist.

163. MODEL STANDARDS OF CONDUCT, supra note 141, at Standard IV.A.

164. Id. at Standard VI.A.
mediation” and may promote the standard by “[p]articipating in research when given the opportunity, including obtaining participant feedback when appropriate.” Standard V, “Confidentiality,” however, cautions that “[i]f a mediator participates in . . . research or evaluation of mediation, the mediator should protect the anonymity of the parties and abide by their reasonable expectations regarding confidentiality.”

Interestingly, in 2001, the American Bar Association’s House of Delegates adopted standards for the mediation of family and divorce matters that included an appendix with special policy considerations for the state regulation of family mediators and court-affiliated programs. Two of these special considerations make clear that confidentiality could and should co-exist with sufficient transparency to ensure consumer protection. Specifically, the Appendix provides:

. . . Individual states or local courts should set standards and qualifications for family mediators including procedures for evaluations and handling grievances against mediators. In developing these standards and qualifications, regulators should consult with appropriate professional groups, including professional associations of family mediators.

. . . Confidentiality should not be construed to limit or prohibit the effective monitoring, research or evaluation of mediation programs by responsible individuals or academic institutions provided that no identifying information about any person involved in the mediation is disclosed without their prior written consent. Under appropriate circumstances, researchers may be permitted to obtain access to statistical data and, with the permission of the participants, to individual case files, observations of live mediations, and interviews with participants.

165. Id. at Standard IX.
166. Id. at Standard V.A.
The failure of the subsequently adopted 2005 Model Standards to include this sort of clear endorsement of measured transparency for court-connected mediation is both noteworthy and confusing. The International Mediation Institute (IMI) Code of Conduct provides another model for encouraging accountability. Standard 1.3.2 makes mediators’ solicitation of parties’ feedback mandatory.\textsuperscript{168}

There have been efforts to encourage reporting and greater transparency regarding mediation. Not long after the adoption of the 2005 Standards, for example, the ABA Section of Dispute Resolution’s Research and Statistics Task Force, chaired by Professor Lisa Bingham (now Amsler), developed a list of key data elements that every court should collect on mediation programs.\textsuperscript{169} Resolution Systems Institute (RSI), in collaboration with the ABA Section of Dispute Resolution, undertook a multi-year initiative to develop model post-mediation questionnaires\textsuperscript{170} in order to increase public knowledge regarding the incidence and effects of court-connected mediation. In 2012, the ABA Section of Dispute Resolution’s Task Force on Mediator Credentialing recommended that mediator-credentialing organizations provide accessible, transparent systems to register

\textit{Practice]: Model Standards of Practice for Family and Divorce Mediation, AM. BAR ASS’N (Nov. 16, 2017), https://www.americanbar.org/groups/child_law/resources/attorneys/model_standards_ofpracticeforfamiliesindivorcemediation.html (approving these Model Standards); see also Margaret Shaw et al., National Standards for Court-Connected Mediation Programs, 31 FAMILY & CONCILIATIONCTS. REV. 156 (1993) (proposing evaluation and grievance procedures for court mediation programs).

168. Standard 1.3.2, Appointment, provides that “Mediators shall advise parties that they will be invited to offer the Mediator feedback on the process at any stage, including offering written feedback at the conclusion of the mediation,” and Standard 4.4, Feedback, provides:

\begin{quote}
Unless inappropriate in the circumstances, Mediators will, at the conclusion of a mediation, invite the parties and advisers and any co-mediators or assistant mediators, to complete an IMI Feedback Request Form and return it to the Mediator or to the Reviewer indicated by the Mediator in his/her IMI Profile to assist in the preparation of the Mediator’s Feedback Digest.
\end{quote}

complaints, and a majority of the task force also recommended a process to monitor the performance of credentialed mediators.\textsuperscript{171} Over the years, additional efforts have been undertaken by the ABA Section of Dispute Resolution’s Court ADR Committee, the Section’s Mediation Committee, various law schools, and university-related centers to encourage the collection of feedback and standardized data.

Notably, some individual court-connected and non-profit community mediation programs have collected data and undertaken evaluation to improve their services, sometimes on their own initiative, and other times as a result of funders’ requirements.\textsuperscript{172} However, it is primarily the Model Standards’ muted endorsement of transparency and accountability as expressed in the combination of Standards XI and IX that has played out in practice. Most mediators and commercial dispute resolution organizations have expressed relatively little interest in participating in evaluation and research.\textsuperscript{173} In general, therefore, the efforts to encourage data collection, evaluation, and transparency have had little effect.

This paucity of data has mattered. In 2012, the California Legislature tasked the California Law Revision Commission with determining whether a potential revision to the Evidence Code, creating an exception to

Welsh, Here There Be Monsters: At the Edge of the Map of Conflict Resolution, in The Conflict Resolution Practitioner: Monsters in the Waters: Fear and Suspicion Divide the Field of Conflict Resolution 1 (Office of Dispute Resolution, Ga. Supreme Court, 2001) (monograph) (describing challenges in collaborations between researchers and dispute resolution providers to conduct evaluations and empirical research).
\end{quote}
mediation confidentiality, might negatively affect court-connected mediation. The Commission conducted a multi-jurisdictional, comprehensive review of court-connected mediation and reported: “It is clear that mediation is well-established in California. There are many mediators, lots of mediation programs, and numerous mediations. Nonetheless, precise statistical information appears to be scarce.” In considering the lack of data on court-connected mediation in California, the Commission observed:

[E]mpirical research on mediation issues involves significant challenges. The effectiveness of mediation could be measured in a variety of ways; there is no standardized, broadly accepted, and readily administered measuring technique. Collecting data on mediation programs and analyzing such data is . . . expensive, slow, time-consuming, and hard to finance when state budgets are tight and data collection would divert funds and resources away from direct provision of services to the public. In addition, “sound empirical data is necessarily hard to obtain given the confidential nature of most mediation.” In fact, it is even hard to learn how many mediations occur.175

REV. 277, 302-04 (2003) (“I have found little in the way of measurement of dispute resolution processes, with the notable exception of the ex post participant satisfaction surveys that have become so common. . . . Efforts at standardization and consistency in the collection and reporting of longitudinal data are desperately needed.”); Bobbi McAdoo, All Rise, The Court Is in Session: What Judges Say About Court-Connected Mediation, 22 OHIO ST. J. ON DISP. RESOL. 377, 430 (2007) (“In this era of severe budget constraint encompassing the fiscal environment in state and federal government, great creativity will be needed to generate effective systems to monitor and evaluate ADR programs.”); Ignazio J. Ruvolo, Appellate Mediation—“Settling” the Last Frontier of ADR, 41 SAN DIEGO L. REV. 177, 188 n.23 (2005) (“[S]ome programs have been required to limit the resources devoted to the collection of data, thereby making the process of drawing conclusions about the reasons for programmatic success somewhat more conjectural than might be desirable.”); Peter Robinson, An Empirical Study of Settlement Conference Nuts and Bolts: Settlement Judges Facilitating Communication, Compromise, and Fear, 17 HARV. NEGOT. L. REV. 97, 102-03 (2012) (California judicial officers were
Rather than transparency, procedural fairness, or self-determination, confidentiality arguably has emerged as the defining feature of mediation.\textsuperscript{176} At times, mediators’ commitment to confidentiality—exacerbated by legislatures’ and courts’ interpretation and application of the mediation privilege—has even demonstrated the potential to enable bad behavior by parties and lawyers in mediation.\textsuperscript{177}

surveyed on settlement practices in 2000-2004, but results were published in 2012); Jeffrey W. Stempel, \textit{The Inevitability of the Eclectic: Liberating ADR from Ideology}, 2000 J. Disp. Resol. 247, 250; see also Cohen & Thompson, supra note 4, at 52 n.18 (“Since many mediations are private matters, it is difficult to determine the number of mediations conducted in any jurisdiction.”); Jones, supra, at 283 (“Given the importance of process integrity and confidentiality, how can we measure the performance of alternative dispute resolution programs, particularly those that are connected to our formal systems of justice?”); id. at 303 (“We do not even have a good idea about how many mediations are conducted each year.”); Art Thompson, \textit{The Use of Alternative Dispute Resolution in Civil Litigation in Kansas}, 12 Kan. J. L. & Pub. Pol’y 351, 354 (2003) (“[M]uch of the ADR that takes place is never reported.”).

The Commission also noted that:

In 2003, an ABA task force developed a list of data fields the courts could use to determine what ADR data to capture. “The hope [was] that with more similar data collection across court systems, there [would] be more ability to discern the impact of ADR on the justice system as a whole.”

\textit{Cal. Law Revision Comm’n, supra} note 174, at 92 n.510 (quoting McAdoo, supra, at 428 n.270). The Commission also cited Donna Shestowsky, \textit{Disputants’ Preferences for Court-Connected Dispute Resolution Procedures: Why We Should Care and Why We Know So Little}, 23 Ohio St. J. on Disp. Resol. 549, 592 n.158 (2008), and observed that “[i]t is not clear to the Commission whether the ABA effort has had much impact; as best we can tell from extensive reading in the area, the measurement problem persists.” \textit{Cal. Law Revision Comm’n, supra} note 174, at 92 n.510. The Commission further observed that “[i]n California, the Judicial Council similarly prepared a model survey for trial courts to use in collecting ADR data. The Commission does not have information on how extensively the trial courts have used the model survey.” \textit{Id.}

The Commission also noted: “Long-term follow-up (such as checking whether a settlement proves durable) is particularly prohibitive.” \textit{Id.} at 92 n.511 (citing Lynn Kerbeshian, \textit{ADR: To Be Or . . . ?}, 70 N.D. L. Rev. 381, 400 (1994) (“[L]ong-term follow-up is nonexistent.”)).

\textsuperscript{176} See Resnik, \textit{The Contingency of Openness}, supra note 2, at 1683-85 (reporting that research regarding courts’ rules revealed that, “to the extent rules address the public or third parties, the purpose is generally to ensure confidentiality. As currently practiced, ADR makes most of its processes and outcomes inaccessible. Even as ADR takes place inside court houses, it is generally outside the public purview and it displaces public adjudication.”).

\textsuperscript{177} See Nancy A. Welsh, \textit{Musings on Mediation, Kleenex, and (Smudged) White Hats}, 33 U. La Verne L. Rev. 5, 14-18 (2011).
However, there are examples of courts and legislatures requiring confidentiality to co-exist with measured transparency in order to promote accountability and public trust in the integrity and quality of mediation. Perhaps the most notable example involves foreclosure mediation, marked by significant power disparities between repeat-player mortgage holders (i.e., banks, loan servicers) on one hand and unsophisticated homeowners on the other hand. In this context, many states have chosen to require mediator reports regarding the achievement of settlement, the terms of such agreements, and parties’ compliance with the program’s requirements (e.g., authority to settle, document provision, timeliness, etc.). Some states have then made certain information public, while protecting confidentiality in individual cases. The Nevada Supreme Court, for example, decided to “issue[] a report detailing lender compliance with the program’s statutory requirements,” including attendance at mediation, production of required documents, authority to negotiate, and good-faith participation. Other states have published aggregate information regarding foreclosure mediation settlement rates and the types of outcomes achieved. There have been calls for foreclosure mediation programs around the country to collect consistent metrics in order to permit cross-jurisdictional evaluation.

178. See Nussbaum, ADR’s Place, supra note 148, at 1889, 1893 (pointing out how the entrance of new players in the mortgage market, with different incentives, undermined the effectiveness of the procedural safeguards that had existed in the foreclosure process); Jill S. Tanz & Martha K. McClintock, The Physiologic Stress Response During Mediation, 32 OHIO ST. J. ON DISP. RESOL. 29, 52 (2017) (discussing the stress likely experienced by borrowers in foreclosure mediation).

179. See Alan M. White, Foreclosure Diversion and Mediation in the States, 33 GA. ST. U. L. REV. 411, 443-50 (2017) (discussing various states’ reporting requirements for foreclosure mediation, as well as the reporting provided for in “foreclosure resolutions” pursuant to the provisions of the Uniform Home Foreclosure Procedures Act, and their interaction with the confidentiality protections of the Uniform Mediation Act).

180. See Nussbaum, ADR’s Place, supra note 148, at 1936-37, 1950-51.

181. Id. at 1946 (citing Foreclosure Mediation Program, supra note 148 (detailing the extent to which the six primary loan servicers in Nevada (Bank of America, Wells Fargo, JPMorgan Chase, Ally/GMAC, US Bank, CitiGroup) and others complied with statutory requirements of the state foreclosure mediation program)).

182. See id. at 1951; see, e.g., Mónica Tabales Maldonado & Alberto Tabales Maldonado, Compulsory Mediation in Cases of Mortgage Execution: Origin, Effect and Interrelation with the Loss Mitigation Process, 9 UNIV. P.R. BUS. L.J. 36, 46 (2018), 9 No. 1 UPRBLJ 36 (Westlaw) (English translation of Spanish-language title).
and the development of best practices. There have not been calls for an end to the current level of transparency.

It is therefore time for the Model Standards to acknowledge that in certain contexts—i.e., when mediation is imposed by a court, legislature, or contract of adhesion, and mediation’s outcomes are granted expedited enforcement, with scant judicial review—there is an ethical obligation to support measured transparency.

V. Options for the Recognition of an Ethical Obligation to Support Measured Transparency

At this point, it appears that there are at least three different options for acknowledging a duty to the public and the value of transparency.

A. Revision of the Current Model Standards

The first, most obvious option is to revise the current Model Standards. Many years have passed since the last revision, and mediation practice has inevitably evolved. As noted supra, revision of the Model Standards has already been proposed and is being considered. This revision could be made as part of a larger package.

Standard IX, “Advancement of Mediation Practice,” already acknowledges and provides some support for mediators’ role in developing knowledge regarding the practice of mediation in order to advance its quality. This standard could be revised—to recognize a duty to the public and to affirm the value of measured transparency—as follows:

A mediator should act in a manner that advances the practice of mediation and public confidence in it. A mediator promotes this Standard by engaging in some or all of the following:

183. See Nussbaum, ADR’s Place, supra note 148, at 1950-51 (citing MELANCA CLARK & DANIEL OLMOS, U.S. DEP’T OF JUSTICE, FORECLOSURE MEDIATION: EMERGING RESEARCH AND EVALUATION PRACTICES (2011), http://www.justice.gov/atr/foreclosure-mediation.pdf) (noting recommendations of a working group convened by the U.S. Department of Justice to permit evaluation); see also Jennifer Shack & Hanna Kaufman, Promoting Access to Justice: Applying Lessons Learned from Foreclosure Mediation, DISP. RESOL. MAG., Spring 2016, at 16 (observing the importance of collecting information in order to monitor the effectiveness of the foreclosure mediation program); Adam Zimmerman, The Bellwether Settlement, 85 FORDHAM L. REV. 2275, 2281-88 (2017) (describing how anonymous information from bellwether mediations were used to achieve a global settlement).
1. Fostering diversity within the field of mediation.

2. Striving to make mediation accessible to those who elect to use it, including providing services at a reduced rate or on a pro bono basis as appropriate.

3. Participating in research when given the opportunity, including obtaining participant feedback when appropriate.

4. Participating in outreach and education efforts to assist the public in developing an improved understanding of, and appreciation for, mediation.

5. Supporting and complying with reporting requirements that assist the public in developing an improved understanding of, and appreciation for, mediation and its outcomes while also protecting the anonymity of the parties and abiding by their reasonable expectations regarding confidentiality.

6. Assisting newer mediators through training, mentoring and networking.

Revision of the Model Standards will require cooperation from the three organizations that adopted the 2005 version—the ABA, AAA, and ACR. That alone suggests one of the most significant challenges posed by this option. Many within these organizations see no need for revisions to the Model Standards. In addition, in the thirteen years since the adoption of the 2005 Model Standards, the number of mediators and mediation organizations has mushroomed. At least some of these individuals and organizations will want to be consulted as part of any initiative to revise the Model Standards. These additional voices and viewpoints will make the revision process even more complex.

Further, as noted supra, many courts, agencies, and organizations have relied upon the 1994 and 2005 Model Standards as the templates for their own ethical requirements, and they may resist revisiting them. In addition, many mediators are unlikely to perceive a sufficient need for such wholesale revisions. Indeed, some commentators have already expressed such views. 184

Revision of the current Model Standards may represent the best option in an ideal world, but it would present very real logistical and political challenges.

B. The Addition of Commentary to the Current Model Standards

Another option is to supplement the current Model Standards with Explanatory Comments, as is done in other contexts.\(^{185}\) Such Explanatory Comments could consider the application of various standards to mediation, particularly when the process is imposed upon people by the courts or pursuant to mandatory pre-dispute mediation clauses in contracts of adhesion. As this Article has suggested, the imposition of mediation, accompanied by de facto limits on judicial review and expedited judicial enforcement, could trigger a second and more demanding interpretation of the Preamble’s reference to “public confidence in mediation,” various standards’ declaration of the importance of protecting the integrity and quality of the process, and the provisions of Standard IX, “Advancement of Mediation Practice.”

The key question with this option is whether an Explanatory Comment will have any meaningful effect. The ABA Section of Dispute Resolution’s Committee on Mediator Ethical Guidance produces advisory opinions on the application of the Model Standards, with a similar goal of influencing practice while avoiding the logistical and political challenges of revising the black letter. The Committee on Mediator Ethical Guidance issued its first advisory opinion on August 6, 2007, and has continued to issue advisory opinions.\(^{186}\) Although there are occasional references to these opinions,\(^{187}\) it is not clear that they have had a significant effect on mediation practice.

---

185. See Memorandum from Samuel Jackson to ABA Section of Dispute Resolution Council (on file with author).

C. The Creation of Customized Standards for “Imposed Mediation”

Although the Model Standards purport to apply to all forms of mediation, there are also customized ethical standards that have been developed for particular areas of mediation practice. According to the Reporter’s Notes, the joint committee that developed the 2005 Model Standards anticipated such developments.\(^{188}\)

One example of customized standards is the Model Standards of Practice for Family and Divorce Mediation (“Family Model Standards”), referenced supra. Unlike the Model Standards, the Family Model Standards require family mediators to engage in various affirmative actions: “assist[ing] participants in determining how to promote the best interests of children,”\(^{189}\) “recogniz[ing]” family situations involving child abuse or neglect and domestic abuse, “and tak[ing] appropriate steps to shape the mediation process accordingly.”\(^{190}\) The Family Model Standards also require mediators to suspend or terminate mediations when the “mediator reasonably believes that a participant is unable to effectively participate or for other compelling reasons.”\(^{191}\) Two possible reasons are when “the participants are about to enter into an agreement that the mediator reasonably believes to be unconscionable”\(^{192}\) or when “a participant is using the mediation process to gain an unfair advantage.”\(^{193}\) These provisions go

---

\(^{188}\) The Reporter’s Notes, under Guiding Principles, provide: The members of the Joint Committee adopted the following principles to govern their work: . . . B. The Standards should retain their original function of serving as fundamental, basic ethical guidelines for persons mediating in all practice contexts while simultaneously recognizing that mediation practice in selected contexts may require additional standards in order to insure process integrity.

\(^{189}\) Ass’n of Family & Conciliation Courts, Model Standards of Practice, supra note 167, at Standard VIII.

\(^{190}\) Id. at Standards IX and X.

\(^{191}\) Id. at Standard XI.

\(^{192}\) Id. at Standard XI.A.4.

\(^{193}\) Id. at Standard XI.A.6; see also Code of Professional Conduct, supra note 168, at Standard 4.3.2, Termination of the Process.

Mediators shall withdraw from a mediation if a negotiation among the parties appears to be moving toward an unconscionable or illegal outcome. An unconscionable outcome is one which is the product of undue pressure, exploitation or duress. An unconscionable outcome reflects one party’s exploitation of an existing power imbalance to the degree that the resulting agreement “shocks the conscience” and violates accepted legal and cultural
well beyond those contained in the Model Standards applicable to all mediators. As discussed supra, the Family Model Standards also reference principles for the regulation of mediators and court-connected family mediation programs. Particularly relevant are the standards that continue to protect confidentiality in individual cases but provide for monitoring, aggregate reporting, and measured transparency in order to ensure mediation quality and consumer protection.194

As discussed supra, the specialized area of foreclosure mediation has also developed a rebalancing of transparency and confidentiality. Although there are not customized ethical standards for foreclosure mediators, state statutes and court rules have created a sort of workaround to the confidentiality restrictions that might otherwise apply.

The option of creating customized ethics standards for “imposed mediation” is very appealing. It would acknowledge that mediation occurring pursuant to mandates by courts, legislatures, or contracts of adhesion is different, and that its circumstances require a heightened level of public accountability. Thus, there is a need for a targeted, tailored rebalancing in this context between transparency and confidentiality. The Family Model Standards could serve as both precedent and template.

This option likely would encounter its own logistical and political challenges, but they should be much fewer than those that would occur with an attempt to engage in a wholesale revision of the Model Standards. Thus, from a cost-benefit perspective, this is the strongest option. It responds to the particular circumstances that require increased transparency, avoids encroaching on other areas of mediation practice, and is the most likely to be adopted and implemented.
Conclusion

In reviewing and deciding to support the CFPB’s Arbitration Reporting Proposal, the ABA Section of Dispute Resolution found the benefits of the Proposal to be three-fold. First, the availability of redacted filings and other information was intended to equalize to some degree the knowledge of “one shot” users of consumer arbitration in comparison to “repeat players.” The Section concluded that such knowledge was likely to assist these “one shot” users as they considered whether to pursue arbitration, which arbitrators to select, and how to prepare for their arbitration proceedings. Second, the Section found that the availability of this information would permit public

195. See generally Marc Galanter, Why the “Haves” Come Out Ahead: Speculations on the Limits of Legal Change, 9 L. & Soc’y Rev. 95, 97-100 (1974) (noting the significant advantages that repeat players enjoy in comparison to one-time players—e.g., experience leading to changes in how the repeat player structures the next similar transaction; expertise, economies of scale, and access to specialist advocates; informal continuing relationships with institutional incumbents; bargaining reputation and credibility; long-term strategies facilitating risk-taking in appropriate cases; influencing rules through lobbying and other use of resources; playing for precedent and favorable future rules; distinguishing between symbolic and actual defeats; and investing resources in getting rules favorable to them implemented—and contrasting these to disadvantages borne by one-time players—e.g., more at stake in given case; more risk averse; more interested in immediate over long-term gain; less interested in precedent and favorable rules; not able to form continuing relationships with courts or institutional representatives; not able to use experience to structure future similar transactions; limited access to specialist advocates); Lisa B. Bingham, Employment Arbitration: The Repeat Player Effect, 1 Emp. RTS. & EMP. Pol’y J. 189, 195 (1997); Lisa B. Bingham, On Repeat Players, Adhesive Contracts, and the Use of Statistics in Judicial Review of Employment Arbitration Awards, 29 McGeorge L. Rev. 223, 225–27 (1998) (observing that repeat-player employers fare better in arbitration than one-shot employees, that when repeat-player employers lose, damages are lower than for one-time employers, and generally that enforcement of pre-dispute arbitration agreements allows employers to structure the arbitration process to their advantage); Menkel-Meadow, supra note 42. Empirical research consistently indicates that repeat players in consumer arbitration are more likely to “win”—but it must be noted that this is also true in litigation. See Welsh, Class Action-Barring Mandatory Pre-Dispute Consumer Arbitration Clauses, supra note 6, at 419-20 (summarizing empirical research examining the occurrence and potential reasons for repeat-player bias in consumer arbitration). Recent empirical work indicates that this pattern may have more to do with companies’ representation by lawyers who have become extreme repeat players, since individual consumers are very unlikely to be represented by lawyers who are extreme repeat players. See Horton & Chandrasekher, supra note 6. There are now suggestions that one-shot players might increase transparency and improve their experience in consumer arbitration if they are trained to identify key procedural elements and then upload these and other information to an online platform that would be widely accessible. See Amsler, supra note 6.
oversight and enable an overall, systemic picture of the consumer arbitration process’s operation and effects. For example, to the extent that some type of systematic frequency or lack of frequency of appointment of certain arbitrators and the outcomes of those cases could be evaluated, required reporting and publication would provide a means for the CFPB and other public entities to engage in oversight and assessment. Third, the fact of disclosure would make it less likely that dispute resolution providers would engage in behaviors or relationships that raised doubts regarding their impartiality or legitimacy, and transparency would assure parties and the public of such impartiality and legitimacy. Ultimately, the Section found that:

[T]he reporting and publication proposed by the CFPB—and the consequent availability of the information for those participating in consumer arbitration, those researching consumer arbitration, and those overseeing consumer arbitration—will help to protect the integrity of arbitration and, by extension, the integrity of the strong federal policy in favor of arbitration that has been expressed by the Supreme Court.196

The Section also concluded that transparency was particularly important when one of the parties to a dispute was imposing a dispute resolution process upon the other party, and the courts might be asked to enforce, and thus lend their coercive power and legitimacy to, the award produced by the process. These characteristics of mandatory pre-dispute consumer arbitration in the context of financial services and products were particularly important to the Section as it assessed the likelihood that the CFPB’s proposal would assist with achieving fairness, efficiency, accountability, and good governance.197

The Section also observed that dispute resolution organizations, arbitrators, and parties should welcome reporting requirements and potential public scrutiny. Transparency would enable analysis, improvement, and

196. Letter from Nancy A. Welsh, Chair-Elect, ABA Section of Dispute Resolution, to Monica Jackson, Office of the Executive Sec’y, Consumer Fin. Prot. Bureau (July 29, 2016).
comprehension\(^{198}\) of a consumer arbitration system that had been largely opaque.

All of this reasoning applies just as strongly to mediation as it does to arbitration, particularly as mediation is being imposed by courts, legislatures, or contracts of adhesion, and the courts are exercising both deferential review and expedited enforcement of the resulting settlement agreements. In this context, mediators should also welcome a targeted rebalancing of transparency and confidentiality—“measured transparency”—to support the integrity of, and public confidence in, the mediation process. Meanwhile, the current interest in revising the Model Standards of Conduct for Mediators creates the opportunity to achieve such rebalancing through the development of a set of ethics standards customized for imposed mediation.

It is time to establish dispute resolution neutrals’ ethical obligation to support transparency. And mediators can lead the way.
