REPORT

OF

THE SECRETARY OF THE TREASURY.

TREASURY DEPARTMENT,
December 2, 1872.

SIR: Whatever degree of success has attended the administration of the Treasury Department during the year is due largely to the ability and fidelity of the officers and clerks of the several bureaus and divisions. There have been some exceptions to the general good conduct of the working force, but the number of these will not be thought large when it is known that more than three thousand persons are employed in Washington, of whom nearly fourteen hundred are constantly engaged in handling coin, notes, and money securities of the Government.

Many of these persons are paid fair wages for the services rendered; but others, who fill places of great responsibility, are not by any means adequately compensated. Officers and clerks of known ability and established reputation are frequently drawn away by offers of better pay elsewhere. This competition will leave the business of the Department finally in the hands of the less valuable part of its officers.

A sense of justice leads me to recommend an increase of salaries in many cases, including the salaries of the Assistant Secretaries of the Treasury.

Since my last annual report the business of negotiating two hundred million of five per cent. bonds, and the redemption of two hundred million of six per cent. five-twenty bonds, has been completed, and the accounts have been settled by the accounting officers of the Treasury.

Further negotiations of five per cent. bonds can now be made upon the basis of the former negotiation.

I think it expedient, as a means of giving additional value to the bonds authorized by the Funding Act of July 14, 1870, and additional security to the owners, that registered bonds of every issue should be made convertible into coupon bonds at the will of the holder. When this privilege is granted the desire to reconvert them will cease.

The moneys received and covered into the Treasury during the fiscal year ended June 30, 1872, were:

From customs	\$216,370,286 77
Sales of public lands.....	2,575,714 19
Internal revenue.....	130,642,177 72
Tax on national bank circulation, &c.....	6,523,396 39
Repayment of interest by Pacific Railway companies.....	749,861 87
Customs fines, &c.....	1,136,442 34
Fees—consular, patent, land, &c.....	2,284,095 92
Miscellaneous sources.....	4,412,254 71
	<hr/>
Total ordinary receipts.....	364,694,229 91
Premium on sales of coin.....	9,412,637 65
	<hr/>
Total net receipts.....	374,106,867 56
Balance in Treasury June 30, 1871, (including \$18,228 35 received from "unavailable".....	109,935,705 59
	<hr/>
Total available cash.....	484,042,573 15

The net expenditures by warrants, during the same period, were:

For civil expenses.....	\$16,187,059 20
Foreign intercourse.....	1,839,369 14
Indians.....	7,061,728 82
Pensions.....	28,533,402 76
Military establishment, including fortifications, river and harbor improvements, and arsenals.....	35,372,157 20
Naval establishment, including vessels and machinery and improvements at navy yards.....	21,249,809 99
Miscellaneous civil, including public buildings, light-houses, and collecting the revenue.....	42,958,329 08
Interest on the public debt.....	117,357,839 72
	<hr/>
Total, exclusive of principal and premium on the public debt.....	270,559,695 91
Premium on bonds purchased... \$6,958,266 76	
Redemption of the public debt... 99,960,253 54	
	<hr/>
	106,918,520 30
	<hr/>
Total net disbursements.....	377,478,216 21
Balance in Treasury June 30, 1872.....	106,564,356 94
	<hr/>
Total.....	484,042,573 15

From the foregoing statement it appears that the net reduction of the principal of the debt during the fiscal year ended June 30, 1872, was \$99,960,253 54.

The sources of this reduction are as follows :

Net ordinary receipts during the year.....	\$364,694,229 91
Net ordinary expenditures, including interest on the public debt.....	270,559,695 91
	<hr/>
Leaving a surplus revenue of.....	94,134,534 00
Add amount received from premium on sales of gold, in excess of the premium paid on bonds purchased.....	2,454,370 89
Add the amount of the reduction of the cash balance at the close of the year, as compared with same at commencement of year.....	3,371,348 65
	<hr/>
	99,960,253 54
	<hr/> <hr/>

This statement treats solely of the principal of the public debt.

By the monthly statement of the public debt, which includes the principal, interest due and unpaid, and interest accrued to date not due, and deducts the cash in the Treasury as ascertained on the day of publication, the reduction was \$100,544,491 28.

The source of this reduction is as follows :

Reduction in principal account.....	\$99,960,003 54
Reduction in unpaid-interest account.....	3,330,952 96
	<hr/>
	103,290,956 50
Reduction in cash on hand.....	2,746,465 22
	<hr/>
	100,544,491 28
	<hr/> <hr/>

A comparison of the reduction in the principal account as shown by the above tables discloses a difference of \$250, occasioned by an error, recently discovered, and which is fully explained in a note on page 6 of the appendix to this report.

On the basis of the last table the statements show a reduction of the public debt from March 1, 1869, to the present time, as follows :

From March 1, 1869, to March 1, 1870.....	\$87,134,782 84
March 1, 1870, to March 1, 1871.....	117,619,630 25
March 1, 1871, to March 1, 1872.....	94,895,348 94
March 1, 1872, to November 1, 1872, (8 months)	64,047,237 84
	<hr/>
Total.....	363,696,999 87
	<hr/> <hr/>

And a reduction in the annual interest of \$24,187,851.

The receipts during the first quarter of the current fiscal year were—

From Customs.....	\$57,729,540 27
Sales of public lands.....	797,324 57
Internal revenue.....	34,169,047 22
Tax on circulation, &c., of national banks....	3,307,238 69
Repayment of interest by Pacific railways....	119,093 73
Customs fines, &c.....	103,787 30
Consular, patent, and other fees	479,306 03
Proceeds of Government property.....	336,801 88
Miscellaneous sources.....	1,346,257 47
	<hr/>
Net ordinary receipts.....	98,388,397 16
Premium on sales of coin.....	2,426,736 91
	<hr/>
Total receipts.....	100,815,134 07
Balance in Treasury June 30, 1872, including \$1,014 48 received from "unavailable".....	106,565,371 42
	<hr/>
Total available.....	207,380,505 49
	<hr/> <hr/>

The expenditures during the same period were as follows:

For civil and miscellaneous expenses, including public buildings, light-houses, and collecting the revenues	\$18,299,891 28
Indians	3,037,343 83
Pensions	9,135,389 71
Military establishment, including fortifications, river and harbor improvements, and arsenals.	12,876,982 41
Naval establishment, including vessels and ma- chinery and improvements at navy yards.....	7,305,146 48
Interest on the public debt, including Pacific Railway bonds.....	36,196,894 83
	<hr/>
Total, exclusive of the principal and premium, on public debt	86,851,648 54
For premium on purchased bonds....	\$1,702,568 53
For net redemption of the public debt..	16,932,138 72
	<hr/>
	18,634,707 25
	<hr/>
Total net expenditures.....	105,486,355 79
Balance in the Treasury September 30, 1872 ..	101,894,149 70
	<hr/>
	207,380,505 49
	<hr/> <hr/>

For the remaining three-quarters of the current fiscal year it is estimated that the receipts will be :

From customs	\$135,000,000 00
Sales of public lands	1,500,000 00
Internal revenue	74,000,000 00
Tax on national banks	3,000,000 00
Pacific railways	500,000 00
Customs fines, &c	800,000 00
Consular, patent, and other fees	1,700,000 00
Sales of public property	600,000 00
Miscellaneous sources	1,400,000 00
Total	<u>218,500,000 00</u>

For the same period it is estimated that the expenditures will be :

For civil expenses	\$13,000,000 00
Foreign intercourse	900,000 00
Indians	4,000,000 00
Pensions	20,000,000 00
Military establishment	23,000,000 00
Naval establishment	13,500,000 00
Miscellaneous civil	27,800,000 00
Interest on the public debt	71,500,000 00
Total	<u>173,700,000 00</u>

This will leave \$44,800,000 surplus revenue applicable to the purchase or redemption of the public debt.

The amount required for this purpose, under the sinking-fund law, for the year, will be about \$29,200,000.

It is estimated that the receipts for the fiscal year ending June 30, 1874, will be :

From customs	\$200,000,000 00
Sales of public lands	3,000,000 00
Internal revenue	103,000,000 00
Tax on national banks	6,300,000 00
Pacific railways	900,000 00
Customs fines, &c	1,100,000 00
Consular, patent, and other fees	2,300,000 00
Sales of public property	1,500,000 00
Miscellaneous sources	2,200,000 00
Total	<u>320,300,000 00</u>

The foregoing estimates are based upon the amount of revenue collected since the acts of May and June, 1872, went into operation; but the imports have been large, and considerable sums have been obtained by internal revenue officers on account of old taxes and claims; hence it will be wise to leave the sources of revenue undisturbed for the present session.

It is estimated that the expenditures for the same period will be:

For civil expenses.....	\$18,000,000 00
Foreign intercourse.....	1,325,000 00
Indians.....	5,700,000 00
Pensions.....	30,500,000 00
Military establishment, including fortifications, river and harbor improvements, and arsenals.	36,000,000 00
Naval establishment, including vessels and ma- chinery and improvements at navy yards.....	22,500,000 00
Miscellaneous civil, including public buildings, light-houses, and collecting the revenues.....	41,500,000 00
Interest on the public debt.....	98,000,000 00
Interest on Pacific Railway bonds.....	3,875,000 00
Sinking fund.....	29,200,000 00
	<hr/>
Total.....	286,600,000 00
	<hr/> <hr/>
Leaving the estimated surplus revenue.....	\$33,700,000 00

The estimates received from the several Executive Departments show that the following amounts will be required for the same period:

Legislative.....	\$2,973,274 40
Executive.....	17,129,261 90
Judicial.....	3,587,050 00
Foreign intercourse.....	1,326,754 00
Military.....	32,894,854 84
Naval.....	20,154,220 15
Indians.....	5,700,975 28
Pensions.....	30,500,000 00
Public works.....	29,687,345 69
Postal deficiency.....	6,310,602 00
Postal subsidies.....	1,100,000 00
Miscellaneous.....	9,596,974 52
Permanent.....	16,293,163 49
Interest on public debt.....	98,000,000 00
Interest on Pacific Railway stocks.....	3,877,410 72
Sinking fund.....	29,191,369 28
	<hr/>
Total.....	308,323,256 27

The reduction in taxation since the close of the war is estimated to have been—

IN INTERNAL REVENUE:

By the act of July 13, 1866	\$65,000,000
By the act of March 2, 1867.	40,000,000
By the act of February 3, 1868	23,000,000
By the acts of March 31, 1868, and July 20, 1868.	45,000,000
By the act of July 14, 1870.	55,000,000
By the act of June 6, 1872	20,651,000
Total of internal revenue	<u>248,651,000</u>

IN CUSTOMS:

By the act of July 14, 1870	\$29,526,410
By the acts of May 1, 1872, and June 6, 1872	31,172,761
Total of customs	<u>60,699,171</u>
A total reduction of	<u>309,350,171</u>

Since the institution of the sinking fund, in May, 1869, and in accordance with the act of February 25, 1862, there has been purchased on this account, up to and including June 30, 1872, \$99,397,600 in bonds of the various issues known as five-twenties, at a net cost in currency of \$110,997,185 89, or an estimated cost, in gold, of \$94,097,243 82.

In addition to the purchases for the sinking fund, bonds have been purchased to the amount of \$173,237,950, at a net cost, in currency, of \$195,008,288 53, or an estimated cost, in gold, of \$163,376,054 35.

The cost of these bonds, estimated in gold, has varied from \$82 21 per \$100 to \$99 99 per \$100—the most recent purchase being at the rate of \$98 66 per \$100.

The average cost, in gold, of the whole amount of the purchases, up to and including the last day of September, was \$94 64 per \$100.

In this connection I would call attention to the various tables accompanying this report, which furnish elaborate details of the money operations and accounts of the Government.

The condition of our carrying trade with foreign countries is always a subject of interest, and at the present moment it is one of solicitude. The imports and exports of the United States, excluding gold and silver, amounted to \$1,070,641,163, for the fiscal year ending June 30, 1872, and of this vast trade only 28½ per cent. was in American vessels. In the year 1860 nearly 71 per cent. of our foreign commerce was in American ships; but in 1864 it had fallen to 46 per cent., in 1868 to 44 per cent., and

in 1871 to less than 38 per cent. The earnings of vessels engaged in the foreign carrying trade probably exceed one hundred million dollars a year, of which less than one-third is earned under our own flag. The act of Congress allowing a drawback on foreign articles used in the construction of American vessels has given encouragement to ship-building; but I am of opinion that this measure is entirely inadequate. When we consider that nearly three-fourths of the foreign commerce of the country is under foreign flags, it is plain that there can be no considerable and speedy change unless the Government shall act at once and in a liberal and comprehensive spirit.

The rise in the price of iron and the advance in the wages of labor in England during the past year favor the Government and people of the United States; but this advantage, due to natural causes, should not lead us to trust the future to the force of those causes, but should induce us rather to act at once and with vigor. It may happen that we cannot regain the control of the direct trade between Europe and the United States, but there is an immense field to be occupied upon the Pacific Ocean and in the South Atlantic. England controls the markets of the world by controlling the channels of communication, and I am convinced that a wonderful impetus will be given to the agricultural and manufacturing interests of the country by the increase of our commercial marine. Merchants in distant countries must purchase goods at points with which they have frequent and regular communication, and when such communication exists with one country only, the cost of merchandise becomes unimportant, as there are no means of comparison; nor is there opportunity for the advantages of competition. Hence a great producing country can afford to establish and maintain lines of steamships upon the ocean, as the indirect benefits will much exceed the cost.

The details of our trade with foreign countries, as represented by the returns made to the Statistical Bureau, are also unsatisfactory. From these returns it appears that the imports of merchandise for the fiscal year ending June 30, 1872, were \$626,595,077, and the exports estimated in gold, were \$444,046,086, showing a balance against the country of \$182,548,991. This balance is in some degree apparent rather than real. On the 30th of June, 1871, the value of goods remaining in warehouse was \$68,324,659, while on the 30th of June, 1872, it was \$122,211,266, showing an excess at the close of the last fiscal year of \$53,886,607. Deducting this excess, we have a balance based upon the actual consumption of the country of \$128,662,384. From this a further reduction should be made of \$66,133,845, being the excess of exports over the imports of gold. After these deductions there still remains an adverse balance of \$62,528,539. This

adverse balance has been met probably by freight on merchandise carried in American vessels, profits on exports made on account of American merchants and shippers, the sale of bonds abroad, and investments in the United States by inhabitants of other countries.

The exports of merchandise for the year 1872 were \$13,298,933 less than for the year 1871. The exports of wheat, wheat flour, raw cotton, cotton manufactures, gold and silver, fire-arms, manufactures of leather, illuminating oil, and beef, fell off \$82,066,325, while there was a gain of \$68,767,392 in the exports of corn, furs, hides, skins, bacon, hams, lard, leaf tobacco, manufactures of iron, wood, leather, and many minor articles. There was an increase of exports in every branch of manufactures, except cotton, leather, and fire-arms.

The decrease of our exports in wheat and wheat flour was twelve million dollars; raw cotton, thirty-seven million dollars; manufactured cotton, one million two hundred and fifty thousand dollars; gold and silver, eleven million six hundred thousand dollars; fire-arms, twelve million dollars; manufactures of leather, six hundred thousand dollars; illuminating oils, three million five hundred thousand dollars; and beef, two million dollars.

The statistics of imports show an increase of seven million in coffee, eighteen million in sugar, nearly six million in tea, nearly three million in tin plates, more than seventeen million in raw wool, two million in pig iron, ten million in manufactures of iron, five million in manufactures of cotton, four million in manufactures of silk, and about seven million in manufactures of wool.

These statistics are not presented as affording a basis for legislation, but rather because they are exceptional in character, and not likely to be repeated.

During the last year thorough examinations have been made of the Mint at Philadelphia, and of the branch mints at San Francisco and Carson City, and exhaustive reports upon the condition of each, and also upon several questions of a general character connected with the mint service, made by Doctor Linderman and Professor Rogers, are to be printed for the use of the Department and Congress. From these reports it appears that the service is in a satisfactory condition. In the last ten years the commercial value of silver has depreciated about three per cent. as compared with gold, and its use as currency has been discontinued by Germany and some other countries. The financial condition of the United States has prevented the use of silver as currency for more than ten years, and I am of opinion that upon grounds of public policy no attempt should be made to introduce it, but that the coinage should be limited to commercial purposes, and designed exclusively for commercial uses with other nations.

The intrinsic value of a metallic currency should correspond to its commercial value, or metal should be used only for the coinage of tokens redeemable by the Government at their nominal value. As the depreciation of silver is likely to continue it is impossible to issue coin redeemable in gold without ultimate loss to the Government; for when the difference becomes considerable holders will present the silver for redemption, and leave it in the hands of the Government to be disposed of subsequently at a loss.

If the policy should be adopted of issuing silver coin irredeemable, but whose intrinsic and nominal value should correspond to gold, the time must come when the country would suffer from the presence of a depreciated silver currency, not redeemable by the Government nor current in the channels of trade.

Tokens of base coin, except for small denominations, are less convenient than paper, and are subject to many other serious objections. The provision made by the Treasury Department for the redemption of mutilated paper money is much more ample than formerly, and I think it practicable, through the Post Office Department, to make an arrangement by which the whole country shall be supplied with fresh issues of fractional currency.

Therefore, in renewing the recommendations heretofore made for the passage of the Mint bill, I suggest such alterations as will prohibit the coinage of silver for circulation in this country, but that authority be given for the coinage of a silver dollar that shall be as valuable as the Mexican dollar, and to be furnished at its actual cost. The Mexican dollar is used generally in trade with China and is now sold at a premium of about eight per cent. over the actual expense of coining. As the production of silver is rapidly increasing, such a coinage will at once furnish a market for the raw material and facilitate commerce between the United States and China.

It is no exaggeration to say that a necessity exists for a new issue of national bank notes. The reasons for such issue were given in my last annual report.

I take this occasion to call the attention of Congress to a communication made by me to the House of Representatives on the 22d day of March, 1872, (Ex. Doc. 283, 42d Cong., 2d Sess.,) in which I recommended the enactment of a law for the relief of the Treasurer from responsibility on account of the dishonesty of Seth Johnson and Frederick A. Marden, formerly clerks in his office; and also for the correction of certain discrepancies in the public accounts, amounting to \$406 35, that the books of the Department may be made to conform to the facts.

An examination of the affairs of the Office of the Assistant Treasurer at New York, made in September and October last, disclosed a defalcation in the stamp division, in charge of James I. Johnson, of \$185,131 72. The report of the committee explains the course of proceeding by which Johnson was able to embezzle this amount of money.

The report further represents that Mr. Hillhouse, the Assistant Treasurer, cannot be charged properly with any neglect of duty, and in this opinion I concur.

The business of keeping and selling stamps was imposed upon the several Assistant Treasurers by virtue of the authority conferred upon the Secretary of the Treasury in the 6th section of the act of August 6, 1846; but by the terms of that act it was not competent for the Treasury Department to allow the Assistant Treasurer at New York compensation for the labor and responsibility of the stamp division, although the commissions which would have been payable to him at the rate allowed to private parties by the 161st section of the act of 1864, amount to more than five hundred thousand dollars.

The circumstances of this case are such as to justify me in recommending the passage of a law by which Mr. Hillhouse shall be relieved from responsibility in the matter of the defalcation of Johnson.

The report of the Supervising Architect of the Treasury furnishes a concise statement of the cost and condition of the public buildings in charge of this Department. Large sums of money will be needed for the buildings already begun or authorized, and I respectfully advise that, beyond the erection of pavilion hospitals, and a building for the accommodation of the Bureau of Engraving and Printing and the storage of the books and papers of this Department, no new works be authorized at the present session of Congress.

The business of the office of the Supervising Architect of the Treasury is fully equal to the force employed, and the necessary appropriations are so large as to justify Congress in refusing all applications during the present session.

The destruction of the buildings on the easterly side of the new post office in the city of Boston furnishes an opportunity that ought not to be lost for the purchase of the remainder of the square.

An act approved June 8, 1872, authorized and directed the Secretary of the Treasury to purchase a lot of ground in Philadelphia for the accommodation of the post office and United States courts, and to erect a building thereon, the cost of the whole not to exceed the sum of one million five hundred thousand dollars. Under this act, and following the usage of the Department, I appointed a commission of citizens of Philadelphia, who were authorized to receive proposals for the sale to the Government of a suitable lot of land. The report of

the commission has been submitted to the Department, from which it appears that the lot thought to be most desirable, situated on the corner of Chestnut and Ninth streets, can be purchased at a cost of \$925,333 33. It also appears that the cost of a sufficient quantity of land to make the site of the present post office available would exceed half a million dollars.

Accepting the conclusions of the commission as final in reference to the cost of a suitable site, I have declined to proceed further without additional authority from Congress; it being clear that it is impossible to procure land and erect a building for the sum specified in the act.

Similar circumstances have prevented the purchase of land for a public building at Cincinnati.

The increase of books and papers, not in daily or frequent use, is so great as to seriously interfere with the business of the Department. The annual accumulation requires 7,688 cubic feet of space for storage. All the available rooms in the building, including some that might be used for clerks' desks, and portions of the public halls, have been given up for the deposit of such books and papers, and the time has come when other provision should be made. I, therefore, recommend the erection of a brick fire-proof building upon the public grounds south of the Treasury sufficient for storage and for the accommodation of the Bureau of Engraving and Printing. The relief which these changes would afford is essential for the proper transaction of the business of the Treasury Department.

The operations of the Coast Survey, as well as those of the Lighthouse Board, appear to have been economically and efficiently managed.

The Revenue Marine consists of twenty-seven steam and six sailing vessels, carrying sixty-five guns, and manned by one hundred and ninety-eight officers and eight hundred and sixty men. This service has constantly improved in efficiency and in the economy of its management since the summer of 1869. At that time a commission was appointed for the general and professional examination of all the officers employed, and upon their report thirty-nine were discharged, and those who were approved were assigned to duty and given rank, according to their merits. From that time to the present all vacancies in the service have been filled after an examination, and by those found to be best qualified. At the same time a commission was appointed for the entire revision of the service. Their report was submitted to Congress on the 26th of May, 1870. (Ex. Doc 93, 41st Cong., 2d Sess.) The vessels then employed were rated at 9,208 tons. A reduction has already been effected of 657 tons, and the vessels now building and authorized will work a further reduction of 1,232 tons, making an aggregate reduction of 1,889 tons.

The cost of maintaining the Revenue Marine has been reduced from \$1,293,661 67, in 1868, to \$930,249 81 for the year ending June 30, 1872.

Statistical tables prepared from the returns show that, in the essential particulars of assistance rendered to vessels, seizures made, number of vessels examined, and number of lives saved upon the ocean and the lakes, the work performed during the last fiscal year is nearly twice as great as the average for the ten preceding years.

Under existing laws the officers and seamen of the Revenue Marine are entitled to a pension only when they have been wounded or disabled in the line of duty, and whilst cooperating with the Navy during war, and then at the rate established by the act of 1814. When it is considered that this service is constant, and that from the first of November to the first of April in each year the vessels are required to cruise along the coast, and as near the land as possible, within their respective districts, and not to make a port except for supplies or under the pressure of positive necessity, it is clear that their services are not less hazardous than those in which the Navy is engaged in time of peace. I, therefore, recommend that the Navy pension laws be made applicable to the officers and seamen of the Revenue Marine.

The number of commissioned officers is limited by law, and each year adds to those who are disqualified by sickness or unfitted by age for active duty. The hardship resulting from the dismissal of officers under such circumstances is so great that I have declined to exercise a power which may, perhaps, in contemplation of law, be a duty; but in view of the fact that their compensation is small, and the nature of the service such as to bring disease and the infirmities of age upon them prematurely, I think it a plain duty for the Government to provide a retired list so that the active service may be supplied constantly with able and efficient men.

From the appropriation of \$200,000, made April 20, 1871, "for more effectually securing life and property on the coasts of New Jersey and Long Island," seven of the old life-saving station-houses have been repaired and enlarged, and sixty-one new ones have been built, and new apparatus sufficient for ordinary use has been procured for the larger number of them.

A station-house has been erected and furnished at Narragansett pier.

From the appropriation of \$50,000, "for the establishment of life-saving stations on the coasts of Cape Cod and Block Island, R. I., nine houses have been erected on Cape Cod and one on Block Island, and they will be supplied with apparatus and ready for use by the first of January next. An appropriation is required for the support of keepers and crews.

The Block Island station and the station at Narragansett pier should be annexed to the Long Island district.

Twenty-two vessels have been wrecked on the coasts of Long Island and New Jersey since July 1, 1871, valued, with their cargoes, at over \$500,000, on which the loss was about \$200,000. The officers and crews numbered two hundred and six persons, all of whom were saved, and mainly, it is believed, through the agency of the life-saving stations.

I respectfully recommend the extension of the system to the coast in the vicinity of Cape Hatteras.

From the report of the Supervising Surgeon of Marine Hospitals it appears that that branch of the public service is in a satisfactory condition.

During the last fiscal year 13,156 patients were treated in the several hospitals of the country at an average cost of about 97 cents each per day, or a total expenditure of \$396,263 11, against a total expenditure for the preceding year of \$453,082 42, or an average cost per patient of \$1 04 per day.

The increased receipts and diminished expenses for the last fiscal year, as compared with the year next preceding, show a net gain to the Government of \$56,819 31.

During the same period the number of districts in which relief was furnished was greater than ever before, and the salaries of medical officers at several of the principal ports were increased.

The financial improvement shown is due largely to a more careful scrutiny of the applicants for relief, to the rejection of those who were not entitled under the law, and also to greater vigilance in collecting the hospital dues.

The law limits the charge for relief to seamen belonging to foreign vessels to seventy-five cents a day, while the actual cost is nearly one dollar. Authority should be given to the Secretary of the Treasury to fix the charge within certain limits, according to the expenses incurred at the hospitals where relief is furnished.

I renew the recommendation heretofore made for the erection of pavilion hospitals at New York, San Francisco, and Pittsburg. The increase of railway and general business in the vicinity of the hospital at Pittsburg has rendered it unfit for further use.

The Supervising Surgeon recommends the erection in future of pavilion hospitals of wood, with the understanding that after ten or fifteen years' use they are to be destroyed and new ones built in their stead. This recommendation appears to be wise, being at once economical for the Government and advantageous to the patients.

The act of February 28, 1871, to provide for the better security of life on board vessels propelled in whole or in part by steam, has not been in operation a sufficient time to test its value in all respects; but the result in the main is satisfactory. The Supervising Inspector

General, in his annual report, recommends several alterations in the law not affecting its character materially. A bill will be prepared providing for such alterations as, upon further consideration, shall seem expedient.

On the 16th day of May, 1872, I transmitted to Congress a bill entitled "A bill to amend and consolidate the navigation and customs collection laws of the United States," together with a communication explaining the character and purpose of the measure. (Ex. Doc. 290, 42d Cong., 2d Sess.) I respectfully ask the attention of Congress to the bill and the reasons for its passage.

The time has come when the attention of the public is turned naturally to the future financial policy of the country. That policy must rest upon the past and the present.

The war caused three great changes in business and financial affairs that have received the careful consideration of the American people.

I. The country was compelled to impose heavy customs duties upon merchandise, and thus, without general observation and without argument upon the principles involved, the nation entered upon a broad system of protection.

II. The Government issued Treasury notes for general circulation as currency, and prohibited banks of issue by State authority.

III. A system of national banks was established, and their circulation protected by the national credit.

The wisdom of these measures, speaking generally, has been established; and, subject to such changes as the changing condition and opinions of the country and people may demand, they will remain a part of our public policy until the financial consequences of the war disappear. The weight of the national debt has been so great that for more than ten years there has been no opportunity for the practical discussion of the doctrines of protection and free trade, and in that long period of an unchanged protective policy incident to the burdens of the war the nation has advanced rapidly and safely in the development of its natural resources.

Anticipating a condition of peace, we may also anticipate a general reduction in the percentage of customs duties. This reduction, however, should not be measured solely by the wants of the Treasury; but regard should be had also to the condition of the various branches of industry in which the people are engaged. In presence of the fact that the leading pursuits of the country are stronger than ever before in the possession of adequate capital and a supply of intelligent laborers, there may be a moderate reduction from time to time in the rate of duties, as the diminishing expenses of the Government shall permit, without either alarming capital or injuring labor.

For the purposes of government, the principles of political economy are national, and not cosmopolitan. A nation that can produce a given article at less cost than it can be produced elsewhere may wisely accept free trade in it; but a nation having natural advantages for its production, yet destitute of skill in the incident art or trade, must wait for the opportunity that sometimes comes from the calamity of war, or secure a more economical and a more constant support in the policy of its Government. If average natural facilities exist, the period of necessary protection is a short one compared with the lifetime of a nation; while the advantages gained can never be wholly lost. But if reasonable natural facilities do not exist, then a system of duties for protection is a present and future burden without adequate compensation. So varied and rich, however, are the natural resources of the United States, that we either are or may soon be in successful competition with the older and more experienced countries of the world in the production of the chief articles of personal necessity, comfort, and luxury, and of the machinery by which these articles are produced or obtained.

Herein is a sufficient justification for the existing protective system, and for its continuance during the transition period.

Nor is the prospect of ultimate successful competition with other countries disturbed by the circumstance that the wages of labor are higher in this country than in those. If, ten years since, it was the thought of any that the only way to a successful contest with Europe was in the reduction of the wages of labor to the European standard, that thought has disappeared, probably, in presence of the fact that high wages on this side of the Atlantic have stimulated emigration, until there is a near approach to equality in the cost of labor, and of the coëxisting fact that the addition thus made to the number of laborers has only aided in the development of our resources, without yielding in any quarter an excess of products, or retarding in any degree the prosperity of the laboring population.

This prosperity on their part is associated with a higher and constantly improving intellectual and social culture and condition. It being given that an intelligent person has all the special knowledge of an art or trade possessed by the most experienced and best-trained operative, who, outside of this special training and experience, is an ignorant person, and equal advantages of capital and machinery being given also, the intelligent person proceeds to improve and simplify methods of production to such an extent that an addition to his wages of even a hundred per cent. represents but a small part of the advantage gained.

Yet the special training and knowledge of the ignorant man is the basis of the improvements made. This truth, considered first with

reference to a single American laborer and then multiplied many hundred thousand times, represents the advantage of America over Europe and Asia in the contest for final peaceful supremacy in the affairs of the world. Thus is America solving the industrial problem of the ages by extorting cheap production from expensive labor.

The reason for these remarks may be found in the opinion I entertain, that the tariff system of the country has contributed largely to the general prosperity; and that such general and continued prosperity is the only basis on which even a wise financial policy can rest.

In discussing the other changes caused by the war, the issues of United States notes and of notes by the national banks should be considered together; indeed they are necessary parts of our financial system, and neither can be substituted for the other without general disturbance and permanent injury. The national banking system is so far superior to the State bank system, and to any system of private banks, as to render argument in its behalf, in these respects, unnecessary; while the substitution of an equal amount of United States notes as currency would be productive of serious evils and losses.

First. The national banks hold nearly four hundred million United States bonds, which otherwise would be thrown upon the market, absorbing domestic capital, or, if purchased abroad, adding, by the amount of the interest, to the annual balances against us in our account current with other countries.

Secondly. One office of a bank is to aggregate the capital of small possessors, and thereby to furnish means in aid of important commercial and financial undertakings, not only at the centres, but in the remote and newly-settled parts of the country.

Thirdly. The national banks are used as aids to the Government, which otherwise would require a large increase in the number of designated depositaries, and a proportionate increase of the public expenses without the least appreciable advantage.

Fourthly. They facilitate exchanges between different sections of the country, thus diminishing the cost of commercial transactions.

Fifthly. They are generally less disposed than private parties, controlling equal capital, to demand exorbitant rates of interest.

But it does not follow from these views, nor would it follow from those of a similar character which might be presented, that the system is perfect; nor does it follow that the issue of notes directly by the Government should be surrendered and the business of furnishing a currency yielded to the national banks.

The circulation of each bank is fixed arbitrarily by a rule of law. The aggregate circulation is therefore a fixed sum, and consequently

there is practically no reserve to meet the increased demand for money due occasionally to extraordinary events at home or abroad, and arising periodically with the incoming of the harvest. The old State bank system is sometimes commended for the quality termed elasticity; but that quality as found in that system was the principal source of financial disaster. Under that system, in the absence of a present demand for coin, there was practically no limit to the issue of paper currency.

The increase of the circulation was attended and followed by an advance in prices, excessive importations, a consequent demand for coin drawn from the banks to meet balances abroad, a simultaneous reduction of the paper currency, and the consequent distress of merchants and bankers.

As the circulation of a bank is a source of profit, and as the managers are usually disposed to oblige their patrons by loans and accommodations, it can never be wise to allow banks or parties who have pecuniary interests at stake to increase or diminish the volume of currency in the country at their pleasure. Nor do I find in the condition of things a law or rule on which we can safely rely. Upon these views I form the conclusion that the circulation of the banks should be fixed and limited, and that the power to change the volume of paper in circulation, within limits established by law, should remain in the Treasury Department.

A degree of flexibility in the volume of currency is essential for two reasons:

First. The business of the Department cannot be transacted properly if a limit is fixed, and the power to raise the circulation above or reduce it below that limit is denied.

A rule of this nature would compel the Secretary to accumulate a large currency balance and to hold it; as, otherwise, the credit of the Government, in meeting the ordinary daily claims upon it, would be at the mercy of every serious business and political revulsion in the United States or Europe.

Especially would this be true now that our ordinary currency expenditures are greatly in excess of our currency revenue.

Secondly. There is a necessity every autumn for moving the crops without delay from the South and West to the seaboard that they may be in hand for export and consumption as wanted. This work should be done in the main before the lakes, rivers, and canals are closed, and yet it cannot be done without the use of large amounts of currency.

In the summer months funds accumulate at the centres, but the renewal of business in August and September gives employment for large sums, and leaves little or nothing for forwarding the crops in October and November.

Nor would this difficulty be obviated by a permanent increase or a permanent reduction of the volume of currency. The difficulty is due to the natural order of things, and increases with the prosperity of the country as shown in the abundance of its harvests.

The crops cannot be moved generally by the aid of bank balances, checks, and letters of credit, but only by bank notes and United States notes paid at once to the producers. This money finds its way speedily into the channels of trade and to the commercial centres; but if it be allowed to remain for general use, after the reason for its issue has ceased, the volume of currency would be increased permanently and the year following the same process would be repeated with the same results, and thus would the country depart more and more widely from the policy of resumption.

The problem is to find a way of increasing the currency for moving the crops and diminishing it at once when that work is done. This is a necessary work, and, inasmuch as it cannot be confided to the banks, where, but in the Treasury Department, can the power be reposed?

While the currency revenue was in excess of the currency expenses it was practicable to accumulate large balances in the Treasury during the summer, to be used, if necessary, in the purchase of bonds in the autumn, thereby meeting the usual demand for currency at that season of the year.

Hereafter such accumulations must be made by the sale of gold, and the sale of gold in large quantities during the summer, when business is the least active, may not always be consistent with the best interests of the country. Reliance cannot, therefore, be placed upon the ability of the Treasury to accumulate a currency balance each year for the purpose indicated.

The argument in favor of a paper currency, composed in part of United States notes and in part of national bank notes, is strengthened by the aid which may thus be furnished in resuming and maintaining specie payments. In the view I am now to take, I exclude the idea that the Government will ever abandon the issue of national bank notes, and undertake the issue of United States notes in their place. The result of such a policy may be foreseen. The people, deprived of the facilities for business afforded by banks, would seek relief through State institutions, and without much delay Congress would concede to them the right to issue notes for circulation. This concession would be followed by a surrender by the General Government of all control over the paper circulation of the country.

The true policy will be found in continuing the national banking sys-

tem, without, however, yielding to the claim for a material increase of its issues in proportion to the volume of paper in circulation.

There are two effectual and certain ways of placing the country in a condition when specie and paper will possess the same commercial value. By diminishing the amount of paper in circulation, the difference between the commercial value of paper and coin will diminish, and by pursuing this policy the difference will disappear altogether.

All legislation limited in its operation to the paper issues of the banks and of the Government, whether bearing interest or not, and which in its effects shall tend to diminish the market value of coin, will be found, upon analysis, to contain a plan for contracting the volume of paper currency; and all legislation, so limited, which does not contain such a plan, will prove ineffectual.

Accepting this proposition, and believing that the country is not prepared to sustain the policy of contraction, it only remains for me to consider the means by which the value of our currency may be improved.

The basis of a policy of improvement must be found in a sturdy refusal to add to the paper in circulation, until it is of the same value, substantially, as coin.

This being accepted as the settled purpose of the country, there can be no permanent increase of the difference between paper and coin, and an opportunity will be given for the influence of natural causes, tending, upon the whole, to a better financial condition.

We may count, first, among these, the increase of population and its distribution over new fields of business and labor. Secondly, in the South especially, the number of persons having property and using and holding money will increase. Next, we may anticipate a more general use of paper in Texas and the Pacific States, by which, practically, for the rest of the country, the volume of paper will be diminished and the quantity of coin increased—two facts tending to produce an equality of value.

The influence of these natural causes will be counteracted in some degree by the increasing facility for the transfer of money from one point to another, and by the greater use of bank checks and certificates of deposit. The rapid transit of merchandise, in bringing the period of its consumption nearer to the time of its production, is an agency of a similar sort. Giving to these views their full weight, I am prepared to say that the experience of the last three years coincides with the best judgment I can form, and warrants the opinion that under the influence of existing natural causes our financial condition will gradually improve. During the last fiscal year there were several circumstances of an unusual character tending to counteract the natural course of

affairs. Our exports of cotton fell off thirty-seven million dollars, and there were excessive imports of wool, tea, coffee, and sugar.

The stock of wool in warehouse on the 30th of June was sufficient for six months' consumption, of sugar for four and a half months, of coffee for five months, and of tea for twelve months. In the ordinary course of trade, the importation of these articles will be small during the current year, with a consequent favorable effect upon the balance between this and other countries.

This anticipation of the wants of the country, in connection with the decrease of our exports, augmented the balance of trade, created an active demand for coin, and advanced the price.

Notwithstanding these adverse influences, gold has averaged substantially the same premium from January 1 to November 1 of the present year as for the corresponding period of 1871. Not doubting that natural causes will in time produce the result sought, it is yet advisable to bring the power of the Government in aid of the movement as far as practicable.

The revival of our foreign commerce is one instrumentality, and perhaps the most efficient one of all. If the annual earnings of American vessels were eighty million instead of thirty the difference in the amount of exchange available abroad would meet a large part of the adverse balance in ordinary years. The experience of Europe tends to show that the ability of a country to maintain specie payments is due largely to the condition of its foreign trade. Next, every measure which increases or improves the channels of transportation between the seaboard and the cotton and grain-growing regions of the country, or lessens the cost of freight, adds something to our capacity to compete successfully in the markets of the world.

Finally, those measures which encourage American manufactures, especially of iron, wool, and cotton, and discourage the importation of like products, affect favorably the balance of trade and help us towards the end we seek.

This statement, in three parts, is a general statement of a policy that in my opinion will aid the country in reaching a condition when it will be practicable to resume and maintain specie payments.

Anticipating that day, I anticipate also that the burden of resumption will rest upon the Government. There are now more than nineteen hundred banks in the country, and I cannot imagine a condition of things so favorable for a period of years as to enable them at all times to redeem their notes in specie only. Without proceeding to the discussion of the subject in detail, I think that all will have been gained that is of value when the Treasury shall be prepared to pay the demand notes of the Government in coin, and the banks shall be prepared to

pay their notes either in coin or in legal-tender notes; and then our good fortune will clearly appear in this, that our paper currency is not exclusively of national bank notes nor exclusively of United States notes.

GEO. S. BOUTWELL,
Secretary of the Treasury.

HON. JAMES G. BLAINE,
Speaker of the House of Representatives.

Consols of 1867, act of March 3, 1865.....	7,949,500 00	\$1,900 00	7,947,600 00	
Consols of 1868, act of March 3, 1865.....	160,500 00		160,500 00	
Funded loan of 1881, acts of July 14, 1870, and January 20, 1871.....		¶140,330,850 00		140,330,850 00
Totals.....	405,007,307 54	305,047,054 00		
Excess of redemptions.....			254,267,164 25	154,306,910 71
Excess of issues.....			154,306,910 71	
Net excess of redemptions charged in receipts and expenditures.....			99,960,253 54	

* A comparison of the statements of the public debt for July, 1871, and July, 1872, makes the amount of this loan redeemed \$250 less than the amount here given. This error arose from the fact that a certificate for this amount was redeemed and deducted from the debt statement in December, 1869. In January, 1870, an advance was made to the Treasurer for the same certificate, and the amount was again deducted from the debt statement. This made the amount outstanding by the debt statement \$250 less than it should be. The discovery and correction of this error in October, 1871, occasions the discrepancy in the two accounts. † Issued in conversion of compound-interest notes. ‡ Issued in conversion of seven-thirties of 1861, (old caveat cases.) § Issues in conversion of seven-thirties of 1864 and 1865, (old caveat cases.) ¶ Issued in lieu of five-twenties and consols converted and called for redemption.

D.—Statement of the net receipts (by warrants) for the quarter ended September 30, 1872.

warrants.

outstanding warrants are then added, and the statement is by warrants issued from that date. The deducted the amount deposited with the States, \$28,101,644.91, leaving the net available balance, June

TABLE I.—Statement of the differences between the several accounts showing the outstanding principal of the public debt, with an explanation thereof, so far as the examination of the accounts has progressed.

The statement of receipts (Table G) shows the amount which has been covered into the Treasury, as derived from loans and Treasury notes, from the organization of the Government to and including June 30, 1872, to have been.....	\$7,399,588,095 38
The statement of expenditures (Table H) shows the payments from the Treasury for the redemption and purchase of loans and Treasury notes for the same period to have been.....	5,262,441,848 05
Showing the principal outstanding by these tables, June 30, 1872.....	2,137,146,247 33
The actual outstanding principal, at that date, as shown by Tables F and O, and by the debt statement of July 1, 1872, was.....	2,253,251,323 78
Showing.....	116,105,081 45

more outstanding and unpaid principal by the debt statement, and by Tables F and O, than by the receipts and expenditures, Tables G and H. (This amount differs from the amount as given in the finance report of last year (1871) by \$250, which is explained in a note on page 6, *ante*.)

This difference of \$116,105,081.45 is thus explained: The following stocks were issued in payment of various debts and claims, but in the transaction no money ever came into the Treasury. When the stock matured it was paid out of the general funds then in the Treasury. This showed an expenditure where there had been no corresponding receipt, and, of course, a statement of the debt made from the receipts and expenditures on account of loans and Treasury notes would not be correct unless these items were added to the receipt side of the account. This cannot be done until legislation has been had authorizing it:

French farmers-general loan.....	\$153,688 89
French loan of eighteen million livres.....	3,267,000 00
Spanish loan of 1781.....	174,017 13
French loan of ten million livres.....	1,815,600 00
French loan of six million livres.....	1,089,000 00
Balance of supplies due France.....	24,332 86
Dutch loan of 1782.....	2,000,000 00
Dutch loan of 1784.....	800,000 00
Debt due foreign officers.....	16,988 78
Dutch loan of 1787.....	400,000 00
Dutch loan of 1788.....	400,000 00
Interest due on the foreign debt.....	1,771,496 90
Domestic debt of the Revolution, <i>estimated</i>	63,918,475 44

The above are the details (so far as the progress of the examination has developed them) of the item in the finance report of 1871, (page 20,) "Revolutionary debt, *estimated*, \$76,000,000."

Mississippi-purchase stock.....	4,282,151 12
Louisiana-purchase stock.....	11,250,000 00
Washington and Georgetown debt assumed by the United States.....	1,500,000 00
United States Bank subscription stock.....	7,000,000 00
Six per cent. Navy stock.....	711,700 00
Texas-purchase stock.....	5,000,000 00
Mexican indemnity stock.....	303,573 92
Bounty-land scrip.....	233,075 00
Tompkins fraud in loan of 1798.....	1,000 00

The following amounts represent the discounts suffered in placing the loans named; only the money actually received was covered into the Treasury. The difference between this and the face value of the stock issued was the discount. To make the receipts and expenditures on the loan accounts correct, these discounts should be credited to the loans as receipts and charged to a discount account. This also requires legislation to enable it to be done:

Loan of 1796.....	10,000 00
Loan of February, 1813.....	2,109,377 43
Loan of August, 1813.....	998,581 95
Ten-million loan of 1814.....	1,983,895 25
Six-million loan of 1814.....	1,076,826 97
Undesignated stock of 1814.....	93,868 95
Loan of March, 1815.....	588,820 93
Loan of February, 1861.....	2,019,776 10

The foregoing are the details of the difference of \$116,105,081.45, so far as the examination of the public-debt accounts has progressed. There still remains to be explained.....

942,433 83

Which is the resultant error arising out of differences yet to be discovered and reconciled. The full details of this item can only be given after the accounts have all been examined and corrected, and the amount of it may be increased or diminished when the examination of the domestic debt of the Revolution shall have shown what its true amount is.

NOTE.—The bonded debt of the United States has been reduced by the amount of these bonds, which have ceased to bear interest and have been canceled and destroyed. This statement does not include the six-per-cent. bonds converted into fives, nor the redemption of past due and called securities, which have also ceased to bear interest and have been canceled and destroyed. Those items marked (*) are the bonds bought with the proceeds of the interest collected on the bonds previously purchased. These "interest-purchases" were discontinued after the passage of the act of July 14, 1870, (16 Statutes, 272.) authorizing the refunding of the national debt and directing the cancellation and destruction of the bonds purchased. All bonds, whether purchased, redeemed, or received in exchange for other bonds bearing a lower rate of interest, either before or since the date of that act, have ceased to bear interest, and the annual interest-charge has been reduced by the amount of interest that would have been payable on the first two classes, and the difference in rate on the last class, but for such redemption, purchase, or exchange.

LEGAL-TENDER NOTES.							
The act of February 25, 1862, (12 Statutes, 345,) authorized the issue of \$150,000,000 United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denominations, not less than five dollars, as the Secretary of the Treasury might deem expedient, \$50,000,000 to be in lieu of demand notes authorized by the act of July 17, 1861; these notes to be a legal tender. The act of July 11, 1862, (12 Statutes, 532,) authorized an additional issue of \$150,000,000 United States Treasury notes, of such denominations as the Secretary of the Treasury might deem expedient, but no such note should be for a fractional part of a dollar, and	-----	On demand ...	None	Par	450,000,000 00	915,420,031 00	357,500,000 00

R C

not more than \$35,000,000 of a lower denomination than five dollars; these notes to be a legal tender. The act of March 3, 1863, (12 Statutes, 710,) authorized an additional issue of \$150,000,000. United States notes, payable to bearer, of such denominations, not less than one dollar, as the Secretary of the Treasury might prescribe; which notes were made a legal tender. The same act limited the time at which Treasury notes might be exchanged for United States bonds to July 1, 1863. The amount of notes authorized by this act were to be in lieu of \$100,000,000 authorized by the resolution of January 17, 1863, (12 Statutes, 822.)

TEMPORARY LOAN.

The act of February 25, 1862, (12 Statutes, 346,) authorized temporary loan deposits of \$25,000,000, for not less than thirty days, with interest at 5 per centum per annum, payable after ten days' notice. The act of March 17, 1862, (12 Statutes, 370,) authorized the increase of temporary loan deposits to \$50,000,000. The act of July 11, 1862, (12 Statutes, 532,) authorized a further increase of temporary loan deposits to \$100,000,000. The act of June 30, 1864, (13 Statutes, 218,) authorized a further increase of temporary loan deposits to not exceeding \$150,000,000, and an increase of the rate of interest to not exceeding 6 per centum per annum, or a decrease of the rate of interest on ten days' notice, as the public interest might require.

CERTIFICATES OF INDEBTEDNESS.

The act of March 1, 1862, (12 Statutes, 352,) authorized the issue of certificates of indebtedness to public creditors who might elect to receive them, to bear interest at the rate of 6 per centum per annum, and payable one year from date, or earlier, at the option of the Government. The act of May 17, 1862, (12 Statutes, 370,) authorized the issue of these certificates in payment of disbursing officers' checks. The act of March 3, 1863, (12 Statutes, 710,) made the interest payable in lawful money.

FRACTIONAL CURRENCY.

The act of July 17, 1862, (12 Statutes, 592,) authorized the use of postal and other stamps as currency, and made them receivable in payment of all dues to the United States less than five dollars. The fourth section of the act of March 3, 1863, (12 Statutes, 711,) authorized the issue of fractional notes in lieu of postal and other stamps and postal currency; made them exchangeable in sums not less than three dollars for United States notes, and receivable for postage and revenue stamps, and in payment of dues to the United States, except duties on imports, less than five dollars; and limited the amount to \$50,000,000. The fifth section of the act of June 30, 1864, (13 Statutes, 220,) authorized an issue of \$50,000,000 in fractional currency, and provided that the whole amount of these notes, outstanding at any one time, should not exceed this sum.

act of June 30, 1864, (13 Statutes, 218,) authorized the issue of \$200,000,000 Treasury notes, of any denomination not less than \$10, payable not more than three years from date, or redeemable at any time after three years, with interest at not exceeding seven and three-tenths per centum, payable in lawful money at maturity, and made them a legal tender for their face to the same extent as United States notes; \$177,045,770 of the amount issued was in redemption of 5 per cent. notes.

TEN-FORTIES OF 1864.

The act of March 3, 1864, (13 Statutes, 13,) authorized the issue of \$200,000,000 bonds, at not exceeding six per centum per annum, redeemable after five and payable not more than forty years from date, in coin.

FIVE-TWENTIES OF MARCH, 1864.

The act of March 3, 1864, (13 Statutes, 13,) authorized the issue of \$200,000,000 bonds, at not exceeding six per centum per annum, redeemable after five and payable not more than forty years from date, in coin.

FIVE-TWENTIES OF JUNE, 1864.

The act of June 30, 1864, (13 Statutes, 218,) authorized a loan of \$400,000,000, and the issue therefor of bonds redeemable not less than five nor more than thirty (or forty, if deemed expedient) years from date, with interest at not exceeding 6 per centum per annum, payable semi-annually, in coin.

SEVEN-THIRTIES OF 1864 AND 1865.

The act of June 30, 1864, (13 Statutes, 218,) authorized the issue of \$200,000,000 Treasury notes, of not less than \$10 each, payable at not more than three years from date, or redeemable at any time after three years, with interest at not exceeding 7 3-10 per centum per annum. The act of March 3, 1865, (13 Statutes, 463,) authorized a loan of \$600,000,000, and the issue therefor of bonds or Treasury notes. The notes to be of denominations not less than \$50, with interest in lawful money at not more than 7 3-10 per centum per annum.

NAVY PENSION FUND.

The act of July 1, 1864, (13 Statutes, 414,) authorized the Secretary of the Navy to invest in registered securities of the United States so much of the Navy pension fund in the Treasury January 1 and July 1 in each year as would not be required for the payment of naval pensions. Section 2 of the act of July 23, 1868, (15 Statutes, 170,) makes the interest on this fund 3 per centum per annum in lawful money, and confines its use to the payment of naval pensions exclusively.

FIVE-TWENTIES OF 1865.							
The act of March 3, 1865, (13 Statutes, 468,) authorized the issue of \$600,000,000 of bonds or Treasury notes in addition to amounts previously authorized; the bonds to be for not less than \$50, payable not more than forty years from date of issue, or after any period not less than five years; interest payable semi-annually at not exceeding 6 per centum per annum when in coin, or 7 3-10 per centum per annum when in currency. In addition to the amount of bonds authorized by this act, authority was also given to convert Treasury notes or other interest-bearing obligations into bonds authorized by it. The act of April 12, 1866, (14 Statutes, 31,) construed the above act to authorize the Secretary of the Treasury to receive any obligations of the United States, whether bearing interest or not, in exchange for any bonds authorized by it, or to sell any of such bonds, provided the public debt is not increased thereby.	5 or 20 years. CONSOLS OF 1865.							
The act of March 3, 1865, (13 Statutes, 468,) authorized the issue of \$600,000,000 of bonds or Treasury notes in addition to amounts previously authorized; the bonds to be for not less than \$50, payable not more than forty years from date of issue, or after any period not less than five years, interest payable semi-annually, at not exceeding 6 per centum per annum when in coin, or 7 3-10 per centum per annum when in currency. In addition to the amount of bonds authorized by this act, authority was also given to convert Treasury notes or other interest-bearing obligations into bonds authorized by it. The act of April 12, 1866, (14 Statutes, 31,) construed the above act to authorize the Secretary of the Treasury to receive any obligations of the United States, whether bearing interest or not, in exchange for any bonds authorized by it, or to sell any of such bonds, provided the public debt is not increased thereby.	5 or 20 years. THREE PER CENT. CERTIFICATES.

The act of March 3, 1867, (14 Statutes, 558,) authorized the issue of \$50,000,000 in temporary loan certificates of deposit, with interest at 3 per centum per annum, payable in lawful money on demand, to be used in redemption of compound-interest notes. The act of July 25, 1868, (15 Statutes, 183,) authorized \$25,000,000 additional of these certificates for the sole purpose of redeeming compound-interest notes.	Indefinite... CERTIFICATES OF INDEBTEDNESS OF 1870.

The act of July 8, 1870, (16 Statutes, 197,) authorized the issue of certificates of indebtedness, payable five years after date, with interest at 4 per centum per annum, payable semi-annually, principal and interest, in lawful money, to be hereafter appropriated and provided for by Congress. These certificates were issued, one-third to the State of Maine, and two-thirds to the State of Massachusetts, both for the use and benefit of the European and North American Railway Company, and were in full adjustment and payment of any and all claims of said States or railway company for moneys expended (or interest thereon) by the State of Massachusetts on account of the war of 1812-'15.	5 years..... FUNDED LOAN OF 1881.							
<p>The act of July 14, 1870, (16 Statutes, 272,) authorizes the issue of \$200,000,000 at 5 per centum, \$300,000,000 at 4½ per centum, and \$100,000,000 at 4 per centum, principal and interest payable in coin of the present standard value, at the pleasure of the United States Government, after ten years for the 5 per cents; after fifteen years for the 4½ per cents; and after thirty years for the 4 per cents; these bonds to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form, by or under State, municipal, or local authority. Bonds and coupons payable at the Treasury of the United States. This act not to authorize an increase of the bonded debt of the United States. Bonds to be sold at not less than par in coin, and the proceeds to be applied to the redemption of outstanding 5-20's, or to be exchanged for said 5-20's, par for par. Payment of these bonds, when due, to be made in order of dates and numbers, beginning with each class last dated and numbered. Interest to cease at the end of three months from notice of intention to redeem. The act of January 20, 1871, (16 Statutes, 399,) increases the amount of 5 per cents to \$500,000,000, provided the total amount of bonds issued shall not exceed the amount originally authorized, and authorizes the interest on any of these bonds to be paid quarterly.</p>	10 years..... * These figures will be found to vary from those in the statement of the public debt for July 1, 1872. The differences are: In the Central Pacific account this statement is \$764.63 and in the Western Pacific account \$65.18 less than is shown by the debt statement for the same items in the first column, and the same amounts more in the second column. This difference arises out of the issue of \$4,120 in bonds to the first-named road and \$560 in bonds to the last-named, in final settlement of their account. The interest on these bonds was paid on special schedules, and the amount was included in the debt statement as paid, without being shown in the "Interest due and not yet paid" column. The subsequent statements of the debt will be found to agree with this statement.

† In the debt statement for July 1, 1872, these items differ from this statement by \$4,687.50, arising from this amount, earned by the Central Branch Union Pacific, having been credited in the stock-ledger to the Central Pacific. The error was not discovered until the accounts of the several roads were settled in October, 1872, and after that date the error is corrected in the debt statement.

TABLE Q.—Statement showing the reduction of the principal and interest of the public debt of the United States, from March 1, 1869, to November 1, 1872.

	Debt and interest less cash in Treasury.	Decrease of debt during preceding month.	Total decrease from March 1, 1869, to date.	Monthly interest charge.	Decrease in monthly interest charge.	Decrease in annual interest charge.

REPORT OF COMMISSIONER OF INTERNAL REVENUE

REPORT OF COMMISSIONER OF INTERNAL REVENUE.

REPORT

THE COMMISSIONER OF INTERNAL REVENUE

THE COMMISSIONER OF INTERNAL REVENUE

Washington, December 30, 1912.

I have the honor to transmit herewith the report of the Board of Internal Revenue, which was prepared by the Board of Internal Revenue, and which is herewith submitted to you for your consideration.

TABLE A, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE B, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE C, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE D, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE E, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE F, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE G, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE H, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE I, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE J, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE K, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

TABLE L, showing the results of the Board's investigation of the Internal Revenue Service, is herewith submitted to you for your consideration.

REPORT

OF

THE COMMISSIONER OF INTERNAL REVENUE.

TREASURY DEPARTMENT, OFFICE OF INTERNAL REVENUE,
Washington, November 30, 1872.

SIR: I have the honor to transmit herewith the tabular statements made up from the accounts of this Office, which the Secretary of the Treasury is required to lay before Congress, as follows:

Table A, showing the receipts from each specific source of revenue, and the amounts refunded in each collection district, State, and Territory of the United States for the fiscal year ended June 30, 1872.

Table B, showing the number and value of internal revenue stamps ordered monthly by the Commissioner, the receipts from the sale of stamps, and the commissions allowed on the same; also the number and value of stamps for tobacco, cigars, snuff, distilled spirits, and fermented liquors, issued monthly to collectors during the fiscal year ended June 30, 1872.

Table C, showing the territorial distribution of internal revenue from various sources in the United States for the fiscal years ended June 30, 1864, 1865, 1866, 1867, 1868, 1869, 1870, 1871, and 1872.

Table D, showing the aggregate receipts from each collection district, State, and Territory for the fiscal years ended June 30, 1863, 1864, 1865, 1866, 1867, 1868, 1869, 1870, 1871, and 1872.

Table E, showing the total collections from each specific source of revenue for the fiscal years ended June 30, 1863, 1864, 1865, 1866, 1867, 1868, 1869, 1870, 1871, and 1872.

Table F, showing the ratio of receipts from specific sources to the aggregate of all collections for the fiscal years ended June 30, 1864, 1865, 1866, 1867, 1868, 1869, 1870, 1871, and 1872.

Table G, an abstract of reports of district attorneys, concerning suits and prosecutions under the internal revenue laws during the fiscal year ended June 30, 1872.

Table H, an abstract of seizures of property for violation of internal revenue laws during the fiscal year ended June 30, 1872.

Table I, showing the number of proof gallons of spirits in each collection district, State, and Territory in the United States, exclusive of the quantity in internal revenue warehouses, May 1, 1872.

The aggregate receipts from all sources, exclusive of the duty upon the capital, circulation, and deposits of national banks, were for the fiscal years ended June 30—

1870	\$185,235,867 97
1871	144,011,176 24
1872	131,770,946 73

These amounts include sums refunded and allowed on drawbacks.

The decrease in the aggregate receipts for the last two years is due to legislation approved July 14, 1870, which reduced the revenue to the estimated amount of \$55,000,000 per annum, but which did not go into full operation before the close of the fiscal year 1871.

The amount of drawbacks and sums refunded for taxes illegally assessed and collected for the last three years, were as follows:

	Drawback.	Sums refunded.
1870	\$5,838 55	\$196,809 81
1871	22,887 97	617,581 07
1872	13,704 67	587,609 19

The total amount of drawback allowed by this Office prior to June 30, 1872, was \$6,526,514 67, and of sums refunded, \$4,719,806 56. During the fiscal year ended June 30, 1872, drawbacks were allowed only on general merchandise under section 171, act of June 30, 1864, limited by act of March 31, 1868.

TOTAL AMOUNT OF TAXES RETURNED FROM SEVERAL SPECIFIC AND ALL GENERAL SOURCES PRIOR TO JUNE 30, 1872.

The following table exhibits the aggregate amount of taxes returned from the several general sources of revenue from the organization of this Office to the close of the last fiscal year.

Sources.	Total collections from September 1, 1862, to June 30, 1872.
<i>1st. Articles and occupations now taxable, including penalties:</i>	
Spirits	\$336,138,546
Tobacco	200,213,837
Fermented liquors	52,954,800
Banks and bankers	28,644,495
Adhesive stamps	131,673,669
Penalties	7,384,218
	<u>\$757,009,565</u>
<i>2d. Articles and occupations now exempt from tax:</i>	
Manufactures and productions	401,391,295
Gross receipts	55,924,677
Sales	37,558,907
Special taxes not relating to spirits, tobacco, and fermented liquors.....	85,437,647
Income	341,706,036
Special income tax of 1864	29,381,862
Gas	17,912,330
Legacies and successions	14,805,648
Articles in Schedule A	8,964,869
Miscellaneous	8,250,993
	<u>1,001,334,264</u>
Aggregate receipts	<u>1,758,343,829</u>

SPIRITS.

The revenue derived from leading sources under spirits was as follows:

Gallon tax	\$257,862,240
Per diem tax on distilleries	7,360,008
Distillers' special and barrel tax	23,374,443
Retail liquor dealers' special tax	28,618,900
Wholesale liquor dealers' special tax, including tax on sales	11,840,602

TOBACCO.

The tax paid on snuff and the higher grades of manufactured tobacco was \$131,185,501; on smoking-tobacco, \$23,633,146; and on cigars, \$39,753,395. The number of pounds of manufactured tobacco and snuff returned for tax was 602,302,045. The number of cigars on which the tax was paid amounted to 7,758,820,609.

TOTAL RECEIPTS FROM SPECIFIC SOURCES UNDER MANUFACTURES AND PRODUCTS, GROSS RECEIPTS, SALES, SPECIAL TAXES, AND ARTICLES IN SCHEDULE A :

MANUFACTURES AND PRODUCTS.

Boots and shoes	\$14,687,824
Bullion	1,632,796
Candles	1,549,928
Clocks, clock-movements, &c	457,270
Cloth and other fabrics of cotton	38,606,287
Cloth and other fabrics of wool	29,922,434
Clothing, not including boots and shoes	25,422,745
Coal	2,966,961
Confectionery	3,541,773
Cotton, raw	68,072,389
Gunpowder	1,045,395
India rubber	2,169,077
Iron and steel and their manufactures	35,306,728
Leather of all descriptions	14,350,793
Oil distilled from coal and crude petroleum	20,456,552
Paper, including pasteboard, binders' board, &c	4,336,177
Petroleum, crude	2,415,697
Piano-fortes and other musical instruments	1,452,023
Pins	161,426
Salt	1,462,246
Wood-screws	687,296
Silk	1,211,577
Soap	3,971,253
Steam-engines	3,179,781
Sugar, brown and refined	11,818,343
Thread and twine	2,014,243
Turpentine, spirits of	1,097,247

GROSS RECEIPTS.

Express companies	3,882,983
Insurance companies	8,683,902
Railroad companies	32,654,008
Steamboat companies	2,142,845
Telegraph companies	1,549,236

SALES.

Auction	1,931,024
Brokers, commercial	2,932,956
Brokers, sales of stocks, bonds, gold and silver, &c	6,591,375
Dealers' sales	15,741,483
Manufacturers' sales	9,435,986

SPECIAL TAXES.

Apothecaries	413,547
Auctioneers	690,685
Banks and bankers	8,081,818
Brokers of all descriptions	4,518,606
Butchers	1,495,983
Claim agents	396,995
Dealers, wholesale	20,844,383
Dealers, retail	15,092,874
Dentists	399,525
Hotels	4,385,256
Insurance agents	842,976
Lawyers	2,352,505

Manufacturers	\$8,533,656
Peddlers	4,762,640
Photographers	515,704
Physicians and surgeons	3,598,520

ARTICLES IN SCHEDULE A.

Carriages kept for use	2,377,170
Plate of gold and silver	1,606,917
Watches, gold or gilt	2,814,895
Piano-fortes, &c.	1,455,230

INCOME.

Of the \$341,706,036 returned on income prior to June 30, 1872, exclusive of the special income tax of 1864, the sum of \$260,700,986 was paid by individuals; \$29,048,443 were withheld from dividends and additions to surplus of banks; \$5,680,392 from the dividends of insurance companies; \$20,655,808 from dividends of railroad companies; \$9,852,202 from the interest on bonds of railroad companies, and \$13,772,062 from salaries of United States officers and employés.

The following statement shows the number of persons in the United States who paid the income tax from 1867 to 1870, in each of the five classes below named. These returns were made under act of March 2, 1867, which provides that the amount of exemption shall be \$1,000, and the rate of tax 5 per cent:

Classes.	Number of persons assessed for income in—			
	1867.	1868.	1869.	1870.
First class, tax \$20 or less	101,219	100,558	107,997	112,874
Second class, tax over \$20 and not over \$50	68,680	55,949	60,184	68,900
Third class, tax over \$50 and not over \$100	40,899	38,957	41,196	40,839
Fourth class, tax over \$100 and not over \$500	46,055	51,188	45,002	44,732
Fifth class, tax over \$500	9,282	7,965	9,464	9,316
Total	266,135	254,617	272,843	276,661

The following is a similar statement of returns made for the years 1871 and 1872, under act of July 14, 1870, the exemption being \$2,000 and the rate of tax 2½ per cent:

Classes.	Number of persons assessed for income in—	
	1871.	1872.
First class, tax \$20 or less	25,479	22,619
Second class, tax over \$20 and not over \$50	19,795	18,887
Third class, tax over \$50 and not over \$100	12,817	13,355
Fourth class, tax over \$100 and not over \$250	10,742	11,355
Fifth class, tax over \$250 and not over \$500	3,707	4,264
Sixth class, tax over \$500	2,135	2,489
Total	74,777	72,940

No returns for 1872 have been received at the date of this report from the following districts, viz: 1st and 2d Arkansas, 6th Illinois, 7th Indiana, 1st Mississippi, 2d Missouri, Montana, Nebraska, 19th and 28th New York, 7th North Carolina, 1st Ohio, 19th Pennsylvania, 3d Tennessee, and Wyoming.

SPIRITS.

The following is a comparative statement showing the receipts from the several sources under "spirits" during the fiscal years ended, June 30, 1871 and 1872, with the increase and decrease from each source:

Sources.	1871.	1872.	Increase.	Decrease.
Spirits distilled from apples, peaches, or grapes	\$1,236,005 67	\$544,848 83		\$691,156 84
Spirits distilled from materials other than apples, peaches, or grapes	29,921,308 48	32,572,940 16	\$2,651,631 68	
Distilleries, per diem tax on	1,901,602 98	2,010,986 53	109,383 55	
Distillers' special and barrel tax.	5,683,077 31	6,489,786 01	806,708 70	
Wine made in imitation of champagne		20 00	20 00	
Rectifiers	959,800 18	955,704 91		4,095 27
Dealers, retail liquor	3,651,484 73	4,028,604 93	377,120 20	
Dealers, wholesale liquor	2,151,281 06	2,065,563 63		85,717 43
Manufacturers of stills	1,927 49	1,391 66		535 83
Stills or worms manufactured	3,240 00	4,260 00	1,020 00	
Stamps, distillery warehouse	249,699 00	290,264 00	40,565 00	
Stamp, rectifiers	374,723 00	367,424 00		7,299 00
Stamps, wholesale liquor dealers	134,005 00	139,602 75	5,597 75	
Excess of gaugers' fees	13,693 20	4,118 95		9,574 25
Total	46,281,848 10	49,475,516 36	3,992,046 88	798,378 62

Aggregate increase, \$3,193,668, or 6.9 per cent.

The number of distilleries (other than fruit) registered during the last fiscal year was	511
The number of fruit distilleries registered was	3,138
Total	3,649

Of the distilleries, (other than fruit,) 456 were operated during the year, and of the fruit distilleries, 2,676.

The returns to this Office for the last fiscal year show a total production, in taxable gallons, from materials other than fruit, of	68,275,745
From fruit	757,788
Total yearly production	69,033,533

The following tabular statement shows the distribution of distilleries in the various States and Territories:

Statement showing the number of distilleries registered and operated during the fiscal year ended June 30, 1872.

The quantity withdrawn from bond during the same period was..... 64,914,471
The quantity remaining in bond June 30, 1872, was..... 10,103,392
The quantity remaining in bond July 1, 1871, as per present report, less than the quantity stated in the report for 1871, as shown by corrected reports of collectors received subsequent to the publication of the report for 1871, was.....

2,242

The total quantity of spirits in the United States not in internal revenue warehouses on the 1st of May, 1872, was 39,672,197 proof-gallons.

I would recommend that section 54 of the act of July 20, 1868, as amended by the act of June 6, 1872, be further amended so as to authorize you, in a more explicit manner than at present provided, to require export bonds of persons applying to export distilled spirits for the benefit of drawback. It is desirable that the language on this point should be perfectly clear and unquestionable, inasmuch as the exportation of spirits on which the tax has not been paid will be affected thereby as well as that provided for in section 54.

By the act of June 6, 1872, the fees of gaugers and the *per diem* compensation of storekeepers were made payable by the United States without re-imburement by distillers, except by the increased rate of tax on distilled spirits, this increased rate having been determined partly by taking into account the amount heretofore paid for the services of such officers. But experience has already demonstrated that the amount to be paid will be not only greater (notwithstanding my most strenuous efforts to the contrary) than ever before, but also greater in proportion to the quantity of spirits produced.

It is apparent that the retention of spirits in the warehouse after the distiller has ceased operations, extends the time for payment of the tax due, and is therefore for his benefit only. In view of this, and the foregoing statement, I would recommend that when a distiller has ceased operations, the pay of the storekeeper for subsequent services at his distillery warehouse, in consequence of spirits remaining therein, shall be re-imbursed to the United States by the distiller.

FERMENTED LIQUORS.

By the act of June 6, 1872, the act of July 13, 1866, so far as it relates to fermented liquors, was re-enacted with some amendments, made at the solicitation of the principal brewers of the United States, designed to afford brewers better facilities than heretofore for the conduct of their business under internal revenue laws.

These concessions do not appear to have been of a character to endanger the public interests, as the following statement will show:

The tax received on fermented liquors at \$1 per barrel during the first quarter of the fiscal year ended June 30, 1872, was \$2,217,291 93, while the receipts from the same source during the first three months of the present fiscal year amount to \$2,684,241, an increase of \$466,949 07.

The average increase of about a million dollars annually during the last three fiscal years, as contrasted with the stationary character of the receipts during the four years next preceding, is certainly gratifying, but the increase during the first three months of the present fiscal year, as above stated, far exceeds that of any corresponding period in any other year since the organization of this Office.

The tax received on fermented liquors, at \$1 per barrel, was, for the years—

1867.....	\$5,819,345 49	1870.....	\$6,081,520 54
1868.....	5,685,663 70	1871.....	7,159,740 20
1869.....	5,866,400 98	1872.....	8,009,969 72

The number of persons engaged in the manufacture of fermented liquors during the fiscal year ended June 30, 1872, was 3,421, distributed as follows: Alabama, 5; Arizona, 10; Arkansas, 1; California, 226; Colorado, 36; Connecticut, 25; Dakota, 6; Delaware, 2; District of Columbia, 15; Florida, 2; Georgia, 4; Idaho, 12; Illinois, 216; In-

diana, 169; Iowa, 171; Kansas, 46; Kentucky, 46; Louisiana, 16; Maine, 1; Maryland, 72; Massachusetts, 56; Michigan, 189; Minnesota, 114; Mississippi, 2; Missouri, 124; Montana, 36; Nebraska, 23; Nevada, 41; New Hampshire, 5; New Jersey, 83; New Mexico, 8; New York, 479; North Carolina, 1; Ohio, 288; Oregon, 31; Pennsylvania, 443; Rhode Island, 4; South Carolina, 2; Tennessee, 11; Texas, 44; Utah, 16; Vermont, 4; Virginia, 13; Washington, 14; West Virginia, 17; Wisconsin, 292.

I would recommend that sections 18 and 22 be so amended as to provide for packages known as "thirds." The act of March 2, 1867, authorized their use to accommodate brewers west of the Rocky Mountains, who are compelled to send their products from their breweries to the consumer or retailer on the backs of mules; this sized package being specially adapted to such a mode of conveyance. "Thirds" appear to have been omitted in the act of June 6, 1872, through inadvertence, and they should be restored.

The amendments made by the act of June 6, 1872, to section 59 of the act of July 20, 1868, as amended April 10, 1869, relating to the special taxes for selling spirituous and malt liquors and wines, were, it has appeared to me, intended simply to provide that, in addition to the former classes of liquor dealers, there should be two classes at a lower special tax authorized to sell malt liquors only, leaving to the former classes of liquor dealers the privilege of selling malt liquors which they previously possessed; also leaving unchanged the exemption from special tax as wholesale dealers extended to brewers who sold fermented liquors of their own production at the brewery in the original packages. Nevertheless that intention is not so clearly expressed by the language of the section as amended as is desirable in so important a provision of law.

To prevent the injustice which might be done by acting upon a more technical construction of the language used as to the several classes of liquor dealers and malt liquor dealers, I issued on the 30th of September last instructions to assessors and collectors to make assessments and collections in accordance with the above expressed view of the intentions of Congress, until I could bring the question to the attention of that body; and I also suspended the collection of all assessments which had been made contrary to that construction.

In view of this, I would respectfully recommend that the language of the section be made more explicit. I would also recommend that retail dealers in malt liquors be limited in their sales to quantities less than five gallons, and that those selling in quantities of five gallons and upwards be required to pay the wholesale dealer's tax.

TOBACCO.

The total receipts from tobacco for the fiscal year ended June 30, 1872, were \$33,736,170 52. Compared with the total receipts for the fiscal year ended June 30, 1871, the following results are shown:

Year ended June 30, 1872, tobacco—chewing, &c., and snuff.....	\$18,674,569 26
Year ended June 30, 1871, tobacco—chewing, &c., and snuff.....	20,677,717 84
Showing a decrease in class 32 cents of	<u>2,003,148 58</u>
Year ended June 30, 1872, tobacco—smoking, scraps, shorts, &c.....	\$5,896,206 33
Year ended June 30, 1871, tobacco—smoking, scraps, shorts, &c.....	4,882,821 83
Showing an increase in class 16 cents of	<u>1,013,384 50</u>

Year ended June 30, 1872, cigars, cheroots, &c.....	\$7,566,156 86
Year ended June 30, 1871, cigars, cheroots, &c.....	6,598,173 24
Showing an increase on cigars, &c., of.....	967,983 62
Year ended June 30, 1872, received from sale of export stamps.....	\$53,576 25
Year ended June 30, 1871, received from sale of export stamps.....	66,147 00
Decrease from sale of export stamps.....	12,570 75
Year ended June 30, 1872, received from dealers in leaf tobacco.....	\$260,487 62
Year ended June 30, 1871, received from dealers in leaf tobacco.....	221,661 98
Increased collection from dealers in leaf tobacco.....	38,825 64
Year ended June 30, 1872, received from dealers in manufactured tobacco.....	\$1,102,357 89
Year ended June 30, 1871, received from dealers in manufactured tobacco.....	970,017 96
Increased collection from dealers in manufactured tobacco.....	132,339 93
Year ended June 30, 1872, from special taxes of tobacco and cigar manufacturers.....	\$182,816 31
Year ended June 30, 1871, from special taxes of tobacco and cigar manufacturers.....	162,367 33
Increased collection from special taxes of tobacco and cigar manufacturers.....	20,448 98

Showing an increase in the total receipts from the manufacture and sale of tobacco in all its forms, over the receipts from the same sources for the preceding fiscal year, of \$157,263 34.

ANNUAL PRODUCTION.

The quantity of manufactured tobacco represented by the collection of taxes from this source for the fiscal year ended June 30, 1872, is as follows:

	Pounds.
Of chewing tobacco, snuff, &c., class 32 cents.....	58,358,029
Of smoking tobacco, scraps, shorts, &c., class 16 cents.....	36,851,290
Exported to foreign countries.....	9,565,981
Excess in warehouses June 30, 1872, over June 30, 1871.....	2,485,555
Total product for the year.....	107,260,855

The number of cigars, cheroots, &c., on which taxes were collected during the last fiscal year, was 1,527,705,972.

From the above statement it will be seen that the entire product of manufactured tobacco reported for the fiscal year ended June 30, 1872, exceeds the total product of the preceding fiscal year by 1,431,892 pounds, while the aggregate quantity which reached taxation for the last fiscal year was only 73,815 pounds in excess of the quantity which reached taxation the preceding year.

During the last fiscal year the quantity of class 16 cents, or smoking tobacco, was increased by 6,333,654 pounds, while the quantity of class 32 cents, or chewing tobacco, was diminished by 6,259,839 pounds, as compared with the preceding year. This change in the relative proportions of the two classes of tobacco was owing, no doubt, in a great measure, to the agitation of the question of taxation during several

months prior to the passage of the act of June 6, 1872, which provides for a uniform rate of 20 cents per pound on all descriptions of manufactured tobacco, in lieu of a graded tax. The anticipated increase of tax on class 16 cents smoking tobacco greatly stimulated the production and sale of this grade of tobacco during the last months of the year, while the prospect of a decrease of tax on class 32 cents, or chewing tobacco, operated largely to diminish the sale or removal, except in bond, of this grade of tobacco. Since July 1, the time when the new rate of taxation took effect, the sale and removal of plug and other kinds of tobacco on which the tax was diminished has been unprecedentedly large, and the collections for the first quarter of the present fiscal year from tobacco are greatly in excess of those made from the same source during the same quarter for any previous fiscal year.

UNIFORM RATE OF TAX.

So far as I am able to judge, the law providing for a uniform rate of tax on all manufactured tobacco, whether chewing or smoking, is operating very satisfactorily. There is now no reason why revenue officers should examine into the modes of manufacturing tobacco employed by any one, or for opening or examining any package to ascertain the character of its contents. If the package is a legal one, and has upon it a proper revenue stamp denoting the payment of the tax, with such additional marks, brands, and labels as the law prescribes, no officer is authorized to examine it further. Owing to the disturbing causes already referred to which have affected the trade for some months past it is now too early to predict with entire certainty what will be the actual result of the present uniform tax on the amount of revenue to be collected. I have, however, reason to believe that, with the additional safe guards provided by the new law against the sale of manufactured tobacco in fraud of the revenue, and with the taxes imposed upon the sale at retail of raw or leaf tobacco for consumption without its being subjected to any process of manufacture, the collections from tobacco under the uniform rate of 20 cents a pound, which is a reduction of more than six cents a pound from the average rate for the last two fiscal years, will reach nearly if not quite the sums realized for either of the same years. In making this estimate I am relying upon making collections on from eight to ten millions of pounds more of manufactured tobacco in consequence of the restrictions which the act of June 6, 1872, has placed upon the sale, for consumption, of raw or leaf tobacco.

EXPORT BONDED WAREHOUSES AND MANUFACTURED TOBACCO IN BOND.

	Pounds.
There were remaining in store in the several export bonded warehouses on the 1st day of July, 1871.....	5, 650, 597
Placed in bond during the fiscal year ended June 30, 1872.....	21, 194, 662
Making a total of.....	<u>26, 845, 259</u>
There were withdrawn for export during the fiscal year ended June 30, 1872.....	9, 565, 981
Withdrawn on payment of tax during the fiscal year ended June 30, 1872.....	9, 143, 126
Making a total withdrawn during the fiscal year ended June 30, 1872.....	<u>18, 709, 107</u>
And leaving a balance in the warehouses July 1, 1872, of.....	<u>8, 136, 152</u>

By the act of June 6, 1872, the system of export bonded warehouses authorized by the act of July 20, 1868, was abolished, and the several warehouses established under said act are to be discontinued after the expiration of six months from the passage of the first named act. As the average quantity of tobacco withdrawn for export and consumption for the fiscal years ended June 30, 1871, and June 30, 1872, respectively, exceeded twenty millions of pounds, it was thought at the time of the passage of the law that six months would be ample time for the holders of tobacco then in bond, which was considerably less than eight millions of pounds, but increased after the passage of the act to the quantity given above as the balance on the 1st day of July, either to withdraw the same for export, or for sale and consumption, upon the payment of the tax. The reports received from month to month from the collectors in charge of bonded warehouses show that this quantity has been constantly diminishing, so that no great hardship will be imposed upon the owners of this tobacco by requiring them to affix stamps and withdraw the comparatively small quantity remaining in the warehouses at the expiration of the six months which the law allows for closing them out. This view of the case is especially apparent when the fact is taken into consideration that the owners of this tobacco have already had six months' credit for the taxes due on all of it, and on a considerable portion, a much longer time; and also the further fact, that these tobaccos, after having been stamped, can at any time be exported, and the owners obtain a drawback for the amount of tax which shall be shown to have been paid on them. In Baltimore the two warehouses have already been closed out by the action of the warehouse men, and I have given instructions to the different collectors under whose control the other warehouses are, to take the proper steps to close them all out immediately upon the expiration of the time fixed by law, by advertising for sale by the Government all tobacco which shall not then have been withdrawn by the owners.

The act of June 6, 1872, provides two modes for the exportation of manufactured tobacco to foreign countries. First, directly from the manufactory without the payment of any tax; and secondly, from the store or warehouse of the jobber, dealer, or commission merchant, after the tax has been paid, with an allowance of drawback on the presentation of proper evidence that the tobacco has been exported and landed in a foreign country or lost at sea. The few months that have intervened since the adoption of the new system have by no means afforded sufficient opportunity to test its practicability. Thus far, the two systems have both been in operation at the same time, the tobacco stored in warehouses being exported under the regulations in force at the time when the late act was passed, while direct exportations from the manufactories have been made under the new regulations. The two systems operating concurrently have not tended to harmony. I have seen nothing, however, as yet, which leads me to distrust the practicability and complete success of the provisions made by the act of June 6, 1872, for facilitating the exportation of tobacco to foreign countries. Any radical change in the law and regulations touching a business so varied and extensive as is the tobacco trade, requires time for persons engaged in it to accustom themselves to the alteration. For this reason such changes should be as infrequent as possible, and only made upon urgent necessity. That such a necessity existed for abolishing the old system of bonded warehouses at ports of entry, which allowed tobacco to be stored therein for home consumption as well as for export, and to be withdrawn therefrom at any time upon the payment

of the tax, few persons except those who enjoyed the privileges of such warehouses have expressed a doubt. Under the present law the credit system is entirely dispensed with, and no special privileges are given for making a monopoly of the trade in manufactured tobacco. All tobacco is required to have proper stamps affixed, indicating the payment of the tax, before it is removed from the place where it is made, except that which is intended for and actually bonded for export to a foreign country before it leaves the manufactory. This system, it is believed, will greatly widen the field for exportation, since it provides for direct shipments from any district in the country, the manufacturer filing his bonds and completing his shipping papers in his own district. It provides, also, for the shipment of tax-paid tobacco by any person who desires to export, giving him an allowance of drawback for the taxes paid; a privilege which was not allowed under the previous law. Persons having in their possession tax-paid tobacco, however badly damaged and unsalable, even to such a degree as to render it worthless for sale or consumption, can, by exporting the same, always realize therefrom an amount equal to the tax.

NEW DIES FOR CANCELLATION OF STAMPS.

Since the passage of the act of June 6, 1872, which authorizes the Commissioner of Internal Revenue to prescribe such instruments for cancelling stamps for tobacco, &c., as he and the Secretary of the Treasury may approve, a steel die for the cancellation of registered tobacco stamps has been prepared and furnished to every manufacturer of plug and fine-cut chewing tobacco in the country at the expense of the Government. This die is so constructed as to drive several portions of every stamp into the wooden package and lodge them there, so that if the stamp should be taken from the package it would be quite impossible to supply the portions thus driven into the wood to be re-used on any other package; and without the presence of the portions required to be driven into the wood, the fraud would immediately be apparent.

The use of this die is made imperative by regulations, and its operation is very generally satisfactory. With an entire re-issue of tobacco stamps, which has been made within the last year, printed on paper which the Government has made for this special use, and printed with different colored impressions, so as to preclude the possibility of counterfeiting by photography, with a more perfect cancellation effected with the new die, I am not aware that any new or additional device or contrivance of a mechanical nature is required to perfect the machinery which the Government is employing to collect the taxes on tobacco. Some additional device may be required to prevent the re-use of cigar-boxes from which the stamps have not been removed or destroyed. Should any such device hereafter be found which commends itself to the Government, there is authority given in the amended law for its adoption.

The present law relating to tobacco, though not claimed to be perfect, undoubtedly contains in its various provisions the practical results obtained from ten years of experience in internal revenue enactments. Under this law the tobacco business is believed to be safe and prosperous, while equal and ample protection is given to all. For these reasons I advise that there be no additional legislation on this subject at present.

Abstract of cases compromised.

The whole number of cases compromised, as provided under section 102, act of July 20, 1868, during the fiscal year ended June 30, 1872, was 479.

Amount of tax accepted	\$104,612 86
Assessed penalty fixed by law	2,947 99
Specific penalty in lieu of fines, penalties, and forfeitures	129,158 62
Total amount received by compromises	<u>236,719 47</u>

Abstracts of reports of district attorneys for the fiscal year 1872.

SUITS COMMENCED.

Number of criminal actions	4,070
Number of civil actions <i>in personam</i>	1,542
Number of actions <i>in rem</i>	729
Whole number commenced	<u>6,341</u>

SUITS DECIDED IN FAVOR OF UNITED STATES.

Number of criminal actions	1,297
Number of civil actions <i>in personam</i>	1,024
Number of actions <i>in rem</i>	636
Total number of suits decided in favor of United States	<u>2,957</u>

SUITS DECIDED AGAINST THE UNITED STATES.

Number of criminal actions	523
Number of civil actions <i>in personam</i>	196
Number of actions <i>in rem</i>	64
Total number of suits decided against the United States	<u>783</u>

SUITS SETTLED OR DISMISSED.

Number of criminal actions	1,873
Number of civil actions <i>in personam</i>	390
Number of actions <i>in rem</i>	145
Total number of suits settled or dismissed	<u>2,408</u>

SUITS PENDING JULY 1, 1872.

Number of criminal actions	3,668
Number of civil actions <i>in personam</i>	2,009
Number of actions <i>in rem</i>	568
Total number of suits pending July 1, 1872	<u>6,245</u>

Amount of judgments recovered by United States in suits in criminal actions	\$333,930 53
Amount of judgments recovered by United States in suits in civil actions <i>in personam</i>	1,337,361 09
Amount collected on judgments and paid into court in suits in criminal actions	109,939 10
Amount collected on judgments and paid into court in suits in civil actions <i>in personam</i>	443,431 93
Amount collected on judgments and paid into court in actions <i>in rem</i> or proceeds of forfeiture	185,452 08

ABSTRACT OF SEIZURES.

Seizures of property for violation of internal revenue law during the fiscal year ended June 30, 1872, were as follows:

187,619 gallons of distilled spirits, valued at.....	\$211,544 71
9,633 barrels of fermented liquors, valued at.....	47,847 00
102 pounds of snuff, valued at.....	65 85
254,836 pounds of tobacco, valued at.....	72,113 76
1,181,099 cigars, valued at.....	18,274 87
Miscellaneous property, valued at.....	296,417 08
Total value of seizures.....	<u>646,263 27</u>

The following table exhibits a comparison of the receipts from all sources taxable during the last two fiscal years, not already presented in this report:

	Receipts, fiscal year 1871.	Receipts, fiscal year 1872.	Increase.	Decrease.
BANKS AND BANKERS.				
Bank deposits.....	\$2,702,196 84	\$3,643,272 19	\$941,075 35
Bank capital.....	919,262 77	976,092 13	56,829 36
Bank circulation.....	22,781 92	8,864 82	\$13,917 10
Total.....	<u>3,644,241 53</u>	<u>4,628,229 14</u>	<u>997,904 71</u>	<u>13,917 10</u>
INCOME.				
Income from individuals, including salaries.....	15,222,211 94	8,711,250 52	6,510,961 42
Bank dividends and undistributed profits.....	1,542,667 75	2,162,564 31	619,896 56
Railroad companies' dividends and un- distributed profits.....	1,121,439 59	1,851,296 30	729,856 71
Railroad companies' interest on bonds.....	974,345 35	1,291,026 68	316,681 33
Insurance companies' dividends and undistributed profits.....	243,205 21	270,531 14	27,325 93
All other collections from income.....	58,780 91	150,192 83	91,411 92
Total.....	<u>19,162,650 75</u>	<u>14,436,861 78</u>	<u>1,785,172 45</u>	<u>6,510,961 42</u>
Gas.....	2,573,122 92	2,831,718 56	258,595 64
Adhesive stamps.....	15,342,739 46	16,177,320 60	834,581 14

The increase on banks and bankers is \$983,988; on gas, \$258,596; and on adhesive stamps, \$834,581. The decrease in the receipts of income from individuals was \$6,510,961. \$1,785,172 were, however, offset by the increase in the returns from corporations, so that the balance shows a total decrease of only \$4,725,789. The large apparent falling off in the receipts of income from individuals is chiefly owing to a difference in the rate of tax. Of the \$14,434,950, exclusive of the salary-tax returned in 1871, \$10,680,967, or nearly 75 per cent. were collected at 5 per cent. under act of March 2, 1867, while the balance for that year and the whole amount for 1872 were returned under act of July 14, 1870, at 2½ per cent. Estimating 2½ per cent. on the taxable income of the two years, there is a difference of only \$677,781 in favor of 1871. The collections on the annual and monthly lists of 1871 amounted to \$7,625,409. The receipts to date on the lists of 1872 are slightly in excess of eight millions of dollars.

I present herewith a statement of the receipts for the first quarter of the present fiscal year, in connection with those of like character for the corresponding period of the year preceding. Returns from the following districts not having been received at the date of this report are not included in the receipts for the first quarter of the current year,

viz: Nebraska for July, August, and September; 7th Tennessee for September; 4th Texas for July, August, and September, and Utah for September.

Comparative statement showing the collections of internal revenue for the first three months of the fiscal years ending June 30, 1872 and 1873; also the increase and decrease from each source.

Sources of revenue.	Receipts from July 1, 1871, to Sept. 30, 1871.	Receipts from July 1, 1872, to Sept. 30, 1872.	Increase.	Decrease.
SPIRITS.				
Spirits distilled from apples, peaches, or grapes	\$103,672 37	\$288,976 55	\$185,304 18	
Spirits distilled from materials other than apples, peaches, or grapes	7,263,209 00	8,729,472 36	1,466,263 36	
Wine made in imitation of champagne, &c.		22 40	22 40

Dealers in leaf tobacco	30,254 51	29,243 16		1,011 35
Dealers in manufactured tobacco	322,273 72	391,553 31	69,279 59	
Manufacturers of tobacco	5,093 86	2,133 95		2,959 91
Peddlers of tobacco		17,194 77	17,194 77	
Sales of cigars, leaf tobacco, manufactured tobacco, &c.	91,653 96	40,733 56		50,920 40
Total	9,565,382 08	10,046,637 67	572,055 50	90,799 91
FERMENTED LIQUORS.				
Fermented liquors, tax of \$1 per barrel on	2,217,291 93	2,684,241 00	466,949 07	
Brewers' special tax	78,264 09	73,606 17		4,657 92
Dealers in malt liquors		6,039 50	6,039 50	
Total	2,295,556 02	2,763,886 67	472,988 57	4,657 92
BANKS AND BANKERS.				
Bank deposits	1,181,188 50	1,148,215 16		32,973 34
Bank capital	239,909 92	188,182 63		51,727 29
Bank circulation	3,002 70	17,462 79	14,460 09	
Total	1,424,101 12	1,353,860 58	14,460 09	84,700 63
INCOME.				
Income from individuals, including salaries	3,518,466 95	3,318,542 65		199,924 30
Bank dividends and undistributed profits	955,880 03	60,967 36		894,912 67
Railroad companies' dividends and undistributed profits	889,800 38	70,055 29		819,745 09
Railroad companies' interest on bonds	480,569 39	39 67 11		440,899 28
Insurance companies' dividends and undistributed profits	141,612 69	1,636 11		139,976 58
All other collections from income	36,952 89	23,608 10		13,344 79
Total	6,023,282 33	3,514,479 62		2,508,802 71
Adhesive stamps	3,527,479 70	2,664,801 21		862,678 49
Penalties	117,310 36	155,099 30	37,788 94	
Articles and occupations formerly taxed but now exempt	1,262,467 90	674,666 90		587,801 00

The increase on spirits for the above period is \$1,279,273 ; on tobacco, \$481,256 ; on fermented liquors, \$468,331 ; on penalties, 37,789. Total increase, \$2,266,649. The falling off in receipts from banks and bankers is due to provisions in the act of June 6, 1872, one of which raises the exemption of all sums deposited in savings banks, &c., in the name of one person from \$500 to \$2,000, and the other exempts certain borrowed capital.

The decrease in the receipts from income is owing to the expiration of the tax by limitation with the assessment on incomes for the calendar year 1871. The receipts from stamps for the first quarter of the present fiscal year were doubtless diminished in anticipation of the repeal, October 1, ultimo, of all general stamps except those on bank checks, drafts, or orders. The receipts from sources formerly taxed, but now exempt, being collections on old lists, are of course constantly decreasing.

The receipts for the last fiscal year exceeded my estimate by \$6,770,-946 73.

Important changes having been made in the law by act of June 6, 1872, touching spirits and tobacco, it is impossible to state with certainty at this early day how much the receipts for the current fiscal year will be affected by the modified provisions of the law. From the best information now obtainable, I estimate that they will not fall short under the present law of \$110,000,000.

CONSOLIDATION OF DISTRICTS.

The act of June 6, 1872, required the reduction of the internal revenue districts in the United States to not exceeding eighty in number, by uniting two or more districts into one ; and also the reduction of the minor officers in the service to as small a number as would be consistent with their limited duties. Immediately upon the passage of this act general inquiry for information was made with a view to a prompt compliance with the law. This inquiry early developed the opinion of the leading officers in the service, whose positions rendered them impartial in the matter, that to consolidate at once would largely interfere, to the loss of the Government, with the collection of taxes from assessments under repealed laws then in the hands of collectors. These collections could only be made with dispatch and certainty by those acquainted with the special localities and circumstances of tax-payers. To avoid a much greater loss by this untimely disturbance than could possibly be compensated by the consequent reduced expenditure, temporary delay was universally advised and finally determined upon. The interim was used in pushing to a rapid close the collection of these balances. The result has justified the propriety of the delay. It was estimated that by the act of June, 1872, the whole amount of internal revenue, exclusive of the balances under repealed laws, would be about \$110,000,000 per annum ; while the actual receipts for the first quarter of the current fiscal year were at the rate of \$135,400,000, showing several millions of dollars in excess of the estimated receipts, and this very considerably from taxes due under the repealed laws. To have violently taken the lists containing these evidences of taxation out of the hands of almost every two of three collectors and committed them to the care of the remaining one would have introduced dangerous delay in the receipts and would probably have caused large loss at last. The collections have been large, and reflect great credit upon the officers.

The act of June 6 reduced the duties of assessors and assistant assess-

ors so as to leave but *three things*, which could not be done with equal propriety by the collectors and their deputies, two classes of officers remaining, both numerous and expensive, for a work that one class could as well do. The three duties referred to are the assessment of the *deficiency taxes on distillers*, an exceptional tax, only occasionally due, and the *data* for assessing which are always at hand from daily reports in this office. The majority of such assessments being reviewed and re-adjusted under the present system, all of them could as readily be certified from this Office to the collectors in the first instance. This would insure uniformity of adjustment, a thing almost impossible where two or three hundred unassociated minds are reading and interpreting law and regulations. Second, the *special* or license taxes, which are collected as a general rule but once (May) each year. The special tax certificates can be issued in books, as are the spirit and tobacco stamps, and charged to the collectors at their face value, crediting them (collectors) only with cash or the unused certificates returned to this Office. This system works admirably in the matter of spirits and tobacco, and can be very easily adapted to this other source of revenue. The *third*, and only remaining duty with which the collectors might not be entirely intrusted, is the tax on banks and bankers. This tax is payable but twice during each year, and is the sole remaining tax on corporations. The tax upon corporations was at one period all collected directly by this Office, at a time when it extended to railroad, insurance, canal and turnpike companies, in addition to banks and bankers. The history of this class of taxation shows that when so collected it was well collected, and the whole work done by less than fifteen clerks, at an average salary not exceeding \$1,400 per annum each. If fifteen men could collect this tax when it reached \$13,000,000 per annum and embraced five species under the class, all of them requiring monthly returns, it is not seen why a comparatively smaller number may not now manage one-fifth of the class, and only yielding, as estimated for the current fiscal year, \$800,000 in all. It further appeared that the exceptional labor could be done in this Office without increasing its force materially, and thus enable the discharge of the entire body of assessing officers. Inasmuch as the plan of reduction under the act of June 6 only provided *absolutely* for the reduction of some two-thirds of the principal officers, (460 in all,) and left the reduction of the assistants (over 1,300) *discretionary*, it seemed to be the better plan to ask Congress to make the larger reduction and make that absolute. It is not an easy matter to put out of commission a thousand or more officers. Experience has demonstrated that nothing short of unequivocal, inexorable law can surely do it. Discretion admits of doubt and suggests delay.

In view of the great confusion and loss of revenue anticipated by a general disturbance of the collecting offices; the simplicity and security of a system which shall have but one class of officers and those all under bonds; the fact that nothing is left for the assessing class to do that cannot be done either by the collectors or this Office; and that a saving of from one to two millions per annum of expense in salaries, &c., greater than would be effected under the act of June last, can safely be anticipated, I have had prepared the outlines of a law which will give effect to the above idea. This will be presented to the proper committees of the House of Representatives and the Senate immediately upon their assemblage in December proximo. If it is the judgment of Congress that this plan is preferable to that contemplated by the act of June, I ask their early adoption of its provisions, that it may be put into operation completely by the 30th of June, 1873.

In preparing the proposed plan I have consulted freely with the leading officers now in the service, as well as with many of those who heretofore have been prominent in it. Without an exception it has met their hearty concurrence. They have commended it with a view to its simplicity, concentration of responsibility, economy, and the just expectation of the nation that no more officers shall be retained than are clearly necessary for the due enforcement of the law. In this recommendation I have not forgotten that the plan, if accepted by Congress, will bring personal inconvenience to many of the ablest and best citizens of the country, now and for years in the service; and while I express the tribute of this Office to their intelligent, faithful, and efficient discharge of important duties, I cannot but suppose that their individual loss will be largely compensated in the consciousness of a great public gain.

Respectfully,

J. W. DOUGLASS,
Commissioner.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

In preparing the report, I have consulted freely with the leading officers of the service as well as with many of those who have been prominent in it. Without an exception it is my belief that the data furnished is with a few exceptions, generally correct and that the information in the report, that no more officers shall be retained than are clearly necessary for the discharge of the law's requirements. I have not forgotten that the past is a guide for the future, and that the only practical method of doing the work of the office is to have the highest quality of the staff, and this I believe is the only way to have the highest quality of the staff. I have not forgotten that the past is a guide for the future, and this I believe is the only way to have the highest quality of the staff. I have not forgotten that the past is a guide for the future, and this I believe is the only way to have the highest quality of the staff.

Very respectfully,
 J. W. WOODRUFF,
 Comptroller of the Currency.

REPORT OF THE COMPTROLLER OF THE CURRENCY.

REPORT

COMPTROLLER OF THE CURRENCY

TREASURY DEPARTMENT
OFFICE OF THE COMPTROLLER OF THE CURRENCY
WASHINGTON, D. C. 20549

Sir: I have the honor to submit for the consideration of Congress the following report:

The national currency act provides that it shall be the duty of the Comptroller of the Currency to report annually to Congress a summary of the state and condition of all the national banks, explaining their resources and liabilities, as set forth in the reports during the preceding year, that he shall advise, recommend to the act by which the system may be improved, and suggest such other legislation with reference to the affairs of the national banks as may in his judgment be useful. The act also provides that the Comptroller shall be authorized to ascertain in the field and to report upon the state of affairs in that respect, business, and bank capital, and that a new apparatus of investigation and control shall be made as soon as practicable based upon the census of 1914.

The national currency act provides a law on the 25th of February, 1914, and nearly two years have elapsed since the organization of the system. During this period the national currency system has matured and the national currency of the country has increased as rapidly as the present system, and notwithstanding the enormous waste of a projected war, the reduction of nearly two thousand million dollars in the valuation of property by the shock of an inventory (more than compensated, it is true, by the conversion of slaves to freedom) and the collection of \$400,000,000 of dollars of taxes imposed by the National and State Governments, the total amount of 1914 shows an increase of population for the ten years previous of more than seven millions of persons, and an increase in the total wealth of the Nation of nearly fifteen thousand million dollars.

Since the organization of the national banking system, two thousand and sixty national banks have been organized; twenty-one of these have failed, and ninety-six have been voluntarily liquidated, by a vote of two-thirds of the shareholders, under section 43 of the act, leaving nine thousand and forty-four banks in existence on November 1, 1915.

*The amount of national liabilities from 1913 to 1915 inclusive is shown by the following table: Total national liabilities, \$1,277,860,000; Total Federal Reserve Bank liabilities, \$1,040,000,000; Total national liabilities, \$2,317,860,000.

The national currency act for the year 1915 is cited in the same form as 26 U. S. C. 482. The national currency act for the year 1914 was the same as 26 U. S. C. 481. The national currency act for the year 1913 was the same as 26 U. S. C. 480. The national currency act for the year 1912 was the same as 26 U. S. C. 479.

REPORT
OF THE
COMPTROLLER OF THE CURRENCY.

TREASURY DEPARTMENT,
OFFICE OF THE COMPTROLLER OF THE CURRENCY,
Washington, November 20, 1872.

SIR: I have the honor to submit for the consideration of Congress the following report:

The national currency act provides that it shall be the duty of the Comptroller of the Currency to report annually to Congress a summary of the state and condition of all the national banks, exhibiting their resources and liabilities, as returned in different reports during the preceding year; that he shall suggest amendments to the act by which the system may be improved, and present such other information with reference to the affairs of the national banks as may, in his judgment, be useful. The act also provides that the circulation shall be apportioned to associations in the States and Territories upon the basis of population, resources, business, and bank capital, and that a new apportionment of circulation not issued shall be made as soon as practicable, based upon the census of 1870.

The national currency act became a law on the 25th of February, 1863, and nearly ten years have therefore elapsed since the organization of the system. During this period the agricultural products, the manufactures, and the internal commerce of the country have increased beyond any former precedent; and notwithstanding the enormous waste of a protracted war, the reduction of nearly two thousand millions of dollars in the valuation of property by the abolition of slavery, (more than compensated, it is true, by the conversion of slaves to freemen,) and the collection of five thousand millions of dollars of taxes* imposed by the National and State Governments, the census returns of 1870 show an increase of population for the ten years previous of more than seven millions of persons, and an increase in the total wealth of the Union, of nearly fourteen thousand millions of dollars.

Since the organization of the national banking system, two thousand and sixty-one national banks have been organized; twenty-one of these have failed, and ninety-six gone into voluntary liquidation, by a vote of two-thirds of the shareholders, under section 42 of the act, leaving nineteen hundred and forty-four banks in existence on November 1, 1872.

*The amount of national taxation, from 1863 to 1872, inclusive, is shown by the official returns to be as follows: From customs, \$1,573,460,608; from internal revenue, \$1,740,184,621; direct taxes, \$12,699,598.

The taxation not national, for the year 1870, is stated in the census returns at \$281,180,312. Assuming that the taxation "not national" was the same amount annually for the decade, the total taxation collected would be \$6,138,147,947.

The following table* will exhibit the progress of the system from October, 1863, to October, 1872:

RESOURCES.	October, 1863.	October, 1864.	October, 1865.	October, 1866.	October, 1867.

* The tables of which these values are an abstract are found in full on pages 2-9 of the appendix to this report.

† During the years 1863 and 1864 the items of specie and other lawful money were not separated in the bank reports.

‡ The whole amount of circulation issued and unredeemed on November 1, 1872, including circulation of banks which have ceased to do business, was \$342,593,470.

DISTRIBUTION OF THE CURRENCY.

The act of June 3, 1864, limited the issue of notes of circulation to three hundred millions of dollars. The act of March 3, 1865, provided that one-half of this amount shall be apportioned according to "the representative population," and the remainder among associations formed in the different States, District of Columbia, and Territories, "having due regard to the existing banking capital resources and business of each State, District, and Territory." The three hundred millions of circulation authorized were not, however, distributed in accordance with the act of March 3, 1865, already quoted. At the date of the passage of that act, only about ninety-nine millions of dollars had been issued, but contemporary with its passage, an amendment to the internal-revenue law (act of June 30, 1864) was passed, providing "that every national banking association, State bank, or State banking association, shall pay a tax of ten per centum on the amount of notes of any State bank or State banking association, paid out by them after the 1st day of July, 1866." But a subsequent section also provided that State banks

already organized, applying for authority to become national banks before the 1st day of July following, should receive such authority in preference to new associations applying for the same. Under this provision the State associations, whose circulation had been taxed out of existence, generally applied for authority to re-organize as national banks, and the result was that the banks in the Eastern and Middle States obtained a large excess of the amount to which they were entitled in the apportionment.

To remedy this inequality, the act of July 12, 1870, was passed, providing for an additional issue of circulating notes, amounting to fifty-four millions of dollars, to be distributed among those States having less than their proportion, and requiring the cancellation monthly of three per cent. certificates,* not less than the amount of circulation issued, and a new apportionment of the increased circulation as soon as practicable, based upon the census of 1870.

This additional circulation has been distributed to associations already organized, or in process of organization, in the following States and Territories:

States and Territories.	Circulation al- ready issued.	Amount due to banks organized.	Amount due to banks in process of organization.	Total circulation issued and au- thorized.
District of Columbia	\$544,500	\$29,700		\$574,200
Virginia	1,607,520	90,000	\$270,000	1,967,520
West Virginia	443,790	19,800		463,590
North Carolina	1,019,500	189,000		1,208,500
South Carolina	1,544,760	459,300	27,000	2,031,060
Georgia	970,500	18,000	135,000	1,123,500
Alabama	793,180	431,100	297,000	1,521,280
Louisiana	2,584,000	575,000	180,000	3,339,000

The census of 1870 does not furnish the banking capital of the country or sufficient data upon which an estimate can be made of the business of each State or Territory. If the statistics of the agriculture, the manufactures, and the commerce of every State of the Union were at hand, it would be necessary to estimate the proportion to which each branch of

*The amount of three per cent. certificates outstanding on July 1, 1870, was \$45,545,000.

industry would be entitled. No satisfactory basis for this purpose can be obtained, and, after consultation with the Secretary of the Treasury, it was decided that the distribution of the circulation, one-half upon population and one-half upon the resources or wealth* of the country, would comply with both the letter and the spirit of the act more nearly than any estimate not derived from official data.

* The following table contains an estimate of the ratio of circulation to population and wealth in the United States in 1860 and 1870; and a similar estimate for Great Britain and France in 1868:

UNITED STATES, 1860.		UNITED STATES, 1870.	
Population, (census of 1860)	31, 443, 331	Population, (census of 1870)	38, 558, 371

¹ Leone Levi, in his volume "On Taxation," page 5, estimates the wealth of Great Britain, in 1858, at six thousand millions of pounds. Paul Boiteau, in his work, "The Wealth and Finances of France," estimates the wealth of France, in 1865, at two thousand milliards of francs, or, say, four thousand millions of dollars. The estimates of the wealth and circulation of Great Britain and of the population and circulation of France, in 1868, are obtained from H. of R. Ex. Doc. No. 16, Fortieth Congress, third session, pp. 92-3-6.

² *Bank circulation of Great Britain and Ireland, October 1872.*

Bank of England, average for four weeks, ending October 30	£26, 437, 664
Private banks, average for four weeks, ending October 26	2, 853, 723
Joint stock banks, average for four weeks, ending October 26	2, 500, 815
Total	<u>31, 792, 202</u>
Scotch banks, average for month of October	5, 472, 734
Irish banks, average for month of October	7, 593, 784
Total for United Kingdom	<u>£44, 858, 720</u>

The circulation of the Bank of France for week ending October 31, was 2, 618, 663, 911 francs.

Fractional redemptions added	8
	177,000,000	177,000,000	354,000,000	353,917,470

The final distribution of the fifty-four millions will still leave a deficiency of forty millions in different States of the Union, which will require to be filled before the proportion among the several States will be equalized upon the basis of wealth and population. This deficiency arises from the fact that while fifty-four millions of new circulation were authorized, there was, at the time of the passage of the act, a deficiency existing of ninety-four millions of dollars.

Section 6 of the act of July 12, 1870, provides that, after the whole fifty-four millions of circulation shall have been distributed, twenty-five

millions additional shall be withdrawn from banking associations organized in States having an excess, and distributed among States having less than their proportion, first, by reducing, in such States, the circulation of all banks having more than one million of dollars, to that amount; and, secondly, by withdrawing from other banks having a circulation exceeding \$300,000 their circulation *pro rata* in excess of that amount. Under this act it will be the duty of the Comptroller, as soon as the amount of circulation authorized shall have been issued, to make requisition upon the banks indicated as prescribed. The twenty-five millions of circulation would be withdrawn from the following cities and States: From four banks in the city of New York, \$5,018,000; from thirty-six banks in the city of Boston, \$11,403,000; from fifty-three country banks of Massachusetts, \$2,894,000; from fifteen banks in Connecticut, \$2,997,000; from sixteen banks in the city of Providence, \$2,688,000. This would reduce the circulation of all the banks of Massachusetts, of Rhode Island, and of Connecticut to \$300,000, without reference to the business of each. If the banks do not respond to these requisitions—and, as their notes are scattered throughout the whole country, it will be impracticable for them to do so—the Comptroller is required at the end of one year to sell a sufficient amount of bonds and redeem their notes as they come into the Treasury, until the whole amount required shall have been returned. The notes will not come to the Treasury for redemption unless first assorted by the brokers and resold, by them to new national banks about to be organized. This will encourage the objectionable practice of authorizing new national banks with circulation upon the condition that currency shall be purchased of brokers in the market at from four to six per cent. premium—a practice which should not be encouraged or authorized by law. The Comptroller therefore recommends the repeal of this section, and the authorization of the issue of five millions of dollars of additional circulation annually for the next five years, to be distributed among the States which are deficient.

This, with the fifty-four millions of circulation recently authorized, will probably furnish all the additional currency required during the next five years for the establishment of new national banks in the States which are deficient, and virtually inaugurate a free banking system.

The Comptroller also recommends that the law be so amended that national banks may be organized in accordance with its provisions, without circulation, upon the deposit of ten thousand dollars of United States bonds with the Treasurer, instead of the deposit of one-third of the capital paid up, as now required.

Three national gold-banks have been organized in California, under the act of July 12, 1870, with an aggregate capital of \$2,800,000, and circulation \$1,480,000, based upon United States bonds at the rate of 80 cents on the dollar. This currency is redeemable in coin, is more convenient than the coin itself in the transaction of business, and circulates freely at par upon the Pacific coast. Other applications have been received for the organization of similar institutions, and it is probable that this kind of circulation will be considerably increased during the coming year.

The following table will exhibit the number of banks organized, the number closed and closing, and the number in operation, with their capital, amount of bonds on deposit, and circulation, in each State and Territory, on the 1st day of November, 1872 :

States and Territories.	Banks organized.	Closed and closing.	In operation.	Capital paid in.	Bonds on deposit.	Circulation issued.	In actual circulation.
Maine	63	2	61	\$9,225,000 00	\$8,499,250 00	\$9,201,296 00	\$7,612,792 25

* The circulation of the State banks in the year 1862 has been obtained from page 210 of the report of the Secretary of the Treasury on the condition of the banks at the commencement of the year 1863. The returns from Delaware, Maryland, Louisiana, Tennessee, and Kentucky were not complete. The aggregate amount of State bank circulation reported at that time was much greater than at any previous period.

COMPARATIVE TABLE No. 2.—Exhibiting, by States, the amount of authorized circulation, (aggregate, \$354,000,000.) together with the population and wealth in 1870, the authorized circulation per capita, the ratio of authorized circulation to wealth, and the ratio of circulation issued (aggregate \$340,993,470) to capital and to deposits.

	Outstanding and authorized circulation.	Population, 1870.	Authorized circulation per capita.	Wealth, 1870.	Ratio of authorized circulation to wealth.	Ratio of circulation outstanding.	
						To capital.	To deposits.

TAXATION, EARNINGS, AND DIVIDENDS.

The national banks pay the following taxes to the Treasurer of the United States: One per cent. annually on circulation outstanding; one-half of one per cent. annually upon deposits; and one-half of one per cent. annually on capital not invested in United States bonds. These taxes are payable semi-annually. The amount of taxes collected by the Treasurer from January 1, 1864, to January 1, 1872, was as follows:

On circulation	\$19,177,734 54
On deposits.....	18,611,945 72
On capital.....	2,453,025 17
Total.....	<u>40,242,705 43</u>

The national banks, prior to May 1, 1871, also paid to the Commissioner of Internal Revenue a license or special tax of \$2 on each \$1,000 of capital, and an income-tax on net earnings to December 1, 1871. The special or license tax from May 1, 1864, to May 1, 1871, amounted to \$5,322,688.43; the income-tax from March 1, 1869, to September 1, 1871, amounted to \$5,539,289.17. The following table will exhibit the amount of taxes collected from these sources during the years 1870-'71:

Duty on circulation, deposits, and capital.		License-tax on capital.		Taxation of earnings.		Total taxation.
Year ended-	Amount.	Year ending-	Amount.	Year ending-	Amount.	
Dec. 31, 1870	\$6,017,460 34	April 30, 1870	\$866,238 54	Aug. 31, 1870	\$2,696,035 27	\$9,579,734 15
Dec. 31, 1871	6,505,812 11	April 30, 1871	884,016 49	Aug. 31, 1871	1,371,105 31	8,760,933 91
Totals ..	12,523,272 45	1,750,255 03	4,067,140 58	18,340,668 06

The Comptroller, in his report for the year 1867, made careful statements of the taxes on national banks for the year 1866, from which it appears that the banks, during that year, paid over sixteen millions of United States and State taxes, as follows:

To the United States Government.....	\$8,069,938
To the States.....	7,949,451

The amount of taxes paid to the several States was derived from specific returns of about fourteen hundred banks, the minimum rate in each State being calculated for those banks which made no returns. A similar statement for the year ending December 31, 1867, exhibits the following results:

Amount of taxes paid to the United States.....	\$9,525,607 31
Amount of taxes paid to the State authorities.....	8,813,126 92

Aggregate taxes paid..... 18,338,734 23

Or $4\frac{1}{2}$ per cent. upon a capital of \$422,804,666.

The aggregate State tax was believed to be considerably below the actual amount paid. Assuming the amount of State taxes paid by the national banks to be the same as that paid to the United States Government, (which is a moderate estimate,) we shall have the total taxes paid by the national banks during these four years:

1866.....	\$16,019,389 00
1867.....	18,338,734 23
1870.....	19,159,468 30
1871.....	17,529,867 82

The act of March 3, 1869, required specific returns to be made of the dividends and net earnings of the national banks after the declaration of each dividend. From these returns the following table has been prepared, exhibiting the aggregate capital and surplus; total dividends and total earnings of the national banks, with the ratio of dividends to capital; dividends to capital and surplus; and earnings to capital and surplus, for each half-year, commencing March 1, 1869, and ended September 1, 1872.

Period of six months ending—	Number of banks.	Capital.	Average surplus.	Total dividends.	Total net earnings.	Ratios.		
						Dividends to capital.	Dividends to capital and surplus.	Earnings to capital and surplus.

included with the States in which such cities are located.

Complete statistics, in detail, of the capital, surplus, earnings, and dividends by States and cities, will be found on pages 38-44 of the appendix.

The national banks are required to furnish to this office not less than five statements during each year of their assets and liabilities, and also to make specific returns to the Treasurer, semi-annually, of their circulation, deposits, and the average amount of capital not invested in United States bonds. The officers of the United States, and of the different States, whose duty it is to collect taxes, have, therefore, at all times at their command the *data* from which to ascertain the amount of taxes to be collected; and it is believed that there is no other species of capital upon which the tax can be so definitely assessed and so certainly collected as the tax upon the national banks of the country. There is no doubt that in some instances, owing to large deposits in proportion to capital, or to high rates of interest in the new States, large dividends have been declared; but it will be seen from the above table that the average earnings of the national banks, after making a proper allowance for bad debts, are not more than a fair remuneration upon capital. The dividends declared do not probably exceed in the aggregate the dividends under the old State systems, and are far less than the average annual dividends of the English banks.*

It is generally supposed that the circulation issued to the national

* The following statements of ten of the principal banks of London, including their branches, exhibiting the capital, reserve, deposits, net profits, and dividends of each, for the half-year previous to July 1, 1872, have been compiled from Abbott's tables in the London Bankers' Magazine for September:

No. of establishments:	Bank.	Paid-up capital.	Reserve fund.	Total deposits and acceptances.	Net profits.	Rate per cent. per annum of net profit on capital.	Amount of dividend for half year.	Rate per cent. per annum of dividend on capital.

†Public and other deposits, August, 28.

The statistics of the Bank of England and its dividends were obtained from the report of the Bank of England, published in the London Bankers' Magazine for October, 1872. The usual dividends of this bank are 10 per cent. per annum, but the amount has varied for some years past from 8 to 13 per cent.

Similar statistics of 142 of the banks in Great Britain and Ireland, with an aggregate capital of £61,361,531, (or, \$298,622,027,) compiled from a table in the London Economist of October 26, 1872, (pages 345-6,) give the average dividends for the four half-years prior to July 1, 1872, as, respectively, 5.71, 5.95, 6.25, and 6.41 per cent.

banks is a source of great profit; but if the premium upon bonds is considered as an ultimate loss; the profit upon circulation does not exceed 3 per cent. per annum. The chief source of profit in banking, under this as under all other systems, is from deposits, and upon this branch of business an annual tax is already fixed by law. If the system has the advantage of circulation, it is also subject to many restrictions which are considered burdensome, but which give steadiness and strength to the money transactions of the country. While the banks should contribute their proportion to the revenues of the country, they should not, under an imputation of extravagant profits, or an unfounded prejudice, be taxed to a greater degree than other corporations which are even less important to its prosperity.

The consolidation of the bank capital of the country in a sound and conservative system, with proper safeguards and restrictions, is of much greater importance than a penny-wise and pound-foolish imposition of excessive taxation, which will have a tendency to drive those banks that are not over-conscientious out of the system, with the purpose of evading all taxation whatever.

RESERVE.

A good deal of discussion has arisen during the recent stringency in the money market in the city of New York in reference to the provisions of the national currency act, requiring a reserve upon the liabilities of national banks.

The act requires that the country banks shall hold an amount of reserve equal to fifteen per cent. of the entire amount of their deposits and circulation, three-fifths of which reserve may be on deposit with national banks which are their agents in redemption cities. The national banks in the redemption cities must hold a reserve of twenty-five per cent., one-half of which may be on deposit with national banks in New York City.

The reserves of the nineteen hundred national banks located elsewhere than in the city of New York are held to a great extent in that city. For most of the time during the past year, an amount equal to more than one-fifth of the capital of all these national banks has been held on deposit by the national banks of the city of New York to the credit of their correspondents. In many cases these credits amount to twice the capital of the bank with which they are deposited; in other cases the amount of deposits is three, four, and even five times the capital, which amount has been attracted thither largely by the payment of interest on deposits. The failure of one of these New York City banks in a time of monetary stringency would embarrass, if not ruin, many banks in the redemption cities, and, in turn, the country correspondents of these banks would suffer from the imprudence of the New York bank, which would be responsible for wide-spread disaster. It is clear that a bank having such excessive liabilities has no right, even if there were no law, to increase its loans to such an unreasonable extent as to lead to embarrassment if unexpectedly called upon for the reserves of its correspondents. A provision of law prohibiting banks from extending their loans beyond three times their capital would seem to be not unreasonable, but such a provision would be much more restrictive than the present requirements of the law in reference to reserve.

The State laws of Massachusetts and Louisiana, which were in most respects models of a sound system of bank legislation, required an ample reserve to be kept on hand. The laws of the State of New York had

no such restriction. The country banks of that State were, however, required to redeem their notes in the city of New York, in specie, and an examination of their returns will show that while the country banks usually held but a very small proportion (about 2½ per cent.) of circulation and deposits in their vaults, they were forced to keep on deposit with their city correspondents nearly as large a proportion of reserve as under the national system. An examination of the weekly returns made to the clearing-house in New York City will show that the State banks of established reputation in times of monetary stringency hold a sufficient reserve without such provision of law; while the larger proportion of banks, not included in the national system, are continually below a judicious limit. The truth is that the strong and well-managed banks do not need any law in reference to reserve, and do not, therefore, ask for a change of legislation in this respect. The weak banks and those already too largely extended wish to be free from all restrictions. It is the constant tendency of such banks to increase their liabilities. In times of excessive stringency loans are not made by such associations to businessmen upon commercial paper, but to dealers in speculative securities upon short time at high rates of interest; and an increase of call-loans beyond the proper limit is more likely to afford facilities for unwarrantable stock speculations than relief to legitimate business transactions. The law is intended as a wholesome restriction upon national banks, organized in almost every city and village in the Union. Next to the absolute security provided for the crumpled bits of paper in the pockets of every citizen, no provision of the act has done so much to give character and standing to the national banking system as the assurance to the thousands of depositors throughout the country (who, after all, are the chief source of profit to every bank) that a reserve, equivalent to such a proportion of the liabilities of every bank as the experience of years and the fluctuations of business have shown to be necessary, will always be kept on hand to answer the extraordinary and unexpected calls of creditors.

The variations in the liabilities requiring reserve in the banks of the city of New York are very great. The banks outside of New York, during the dull season, send their surplus means to that city for deposit upon interest, to await the revival of business. The banks in the city of New York, at such periods of the year, have no legitimate outlet for these funds, and are therefore threatened with loss. The stock board takes advantage of this condition of affairs, speculation is stimulated by the cheapness of money, and a market is found for the idle funds upon doubtful collaterals, and the result is seen in the increased transactions at the clearing-house, which, during the past year, exceeded thirty-two thousand millions of dollars, or an average of more than one hundred millions of dollars daily—not one-half of which was the result of legitimate business; the total amount of transactions being greater than that of the bankers' clearing-house of the city of London. The evil arises largely from the payment, by the banks, of interest on deposits—an old-established custom which cannot easily be changed by legislation. A considerable portion of these deposits would remain at home if they could be used at a low rate of interest, and made available at any time upon the return of the season of active business. No sure investment of this kind is, however, open to the country banks; and the universal custom is to send forward the useless dollars from vaults comparatively insecure to their correspondents in the city, where they are supposed to be safer, and at the same time earning dividends for shareholders. A Government issue bearing a low rate of interest to be

counted as a certain proportion of the reserve, and an increase of the amount which the country banks are required to keep on hand, is the proper remedy for such a state of things. Such an issue need not result in inflation, for the currency invested would be in the possession of the Government. If the currency is held, the objection is the loss of interest to the Government; but this loss would be no more than a just rebate upon the six millions of dollars of taxation annually paid by the banks to the Government, at a time when almost every kind of internal taxation has been discontinued. Such a reduction of taxation should not be grudgingly made, if the result shall be to give elasticity to the currency, to strengthen and steady the money market, to give additional security to seven hundred millions of dollars belonging to depositors by retaining in the vaults of the banks a large amount of funds for legitimate business purposes, which would otherwise be thrown upon the stock board to unsettle values throughout the country, and alternately increase and depress the price of every commodity.

For the information of those who do not believe that the banks usually hold the requisite amount of reserve, we have prepared tables showing that for the last five years, at from four to five different periods of the year, the banks organized in every State, and in the principal cities of the Union, have been found to hold, in almost every instance, a considerable amount beyond the requirements of law.

Table showing for twenty-two different dates during the five years, 1868-72, the percentage

centum of the aggregate amount of their circulation and deposits. The reserve which the banks in the and deposits. When the amount of reserve is less than the proportion required by law, the ratios are

A law which is so universally observed as to have become a rule with all the cautiously-managed banks of the country should not be repealed without full consideration. Carefully-prepared tables giving further information regarding the reserves of the National Banks will be found in the appendix to this report.

THE CHICAGO FIRE.

The great fire in Chicago, of October 8 to 11, 1871, should be mentioned among the noteworthy events of the year. The buildings occupied by the eighteen national banks in that city were all totally destroyed in the general conflagration, except one, and that one was rendered untenable for some weeks.

The amount of bills receivable held by these banks at that time was more than twenty-one millions of dollars, and the indebtedness to correspondents nearly nine millions, and to individual depositors about seventeen millions. For a time it was thought that they were so seriously crippled that they would be unable to resume business, and it was proposed to open their doors with the offer of payment by installments to their creditors. The contents of their vaults were, however, rescued in good condition, and finally wise and prudent counsels prevailed, owing largely to the presence and advice of my predecessor. Eight days after the conflagration the banks obtained new offices in dwelling-houses distant from their former locations, and opened for the transaction of business. Instead of balances being largely drawn upon, deposits flowed in freely from dealers and correspondents, and at the close of the first day's business the receipts were found to be considerably larger than the disbursements. It was soon ascertained that the immense losses anticipated upon bills receivable would not be experienced, and confidence was restored. The total loss arising from the fire on discounted paper is estimated at about six hundred thousand dollars, and the loss from the destruction of bank-buildings, furniture, and fixtures, at about one hundred and seventy-six thousand dollars. The banks, at the time of this disaster, had accumulated a surplus fund exceeding one-fourth of their aggregate capital, and had at their command a reserve equal to more than thirty per cent. of their liabilities, and consequently were able to resume business without embarrassment. The wisdom of the sections of the law requiring an accumulation of surplus and the holding of reserve could not be better illustrated.

By reference to the abstract of the condition of the national banks of the city of Chicago, on page 38 of this volume, evidence will be found of the steady increase of business in these banks during the past year.*

* Since the above paragraph was written a great conflagration has taken place in Boston, resulting in the destruction of from seventy to eighty millions of property. The facts pertaining to the Boston banks were in many respects similar to those of Chicago. Their aggregate capital was \$48,900,000; their surplus, \$11,440,000; their bills receivable, \$83,327,000; their deposits, \$40,841,000; and their reserve, according to the latest official reports, about twenty-five per cent. of their liabilities. The buildings of seven national banks, out of forty-nine transacting business in the city, were destroyed by the fire, but their cash assets were subsequently recovered. On the second day after the commencement of the fire all the banks but one were represented at the clearing-house, and on the fourth day all of them had resumed business. The aggregate loss upon bills receivable is estimated at from two and a half to three millions of dollars. The losses of the banks are chargeable to surplus, which was in excess of the requirements of the law, and it is not supposed that the regular dividends to shareholders will be materially reduced by the disaster.

USURY.

Charges have been made against several national banks during the past year for receiving usurious rates of interest. These complaints have been made not only against banks in the South and West, where high rates of interest prevail, but also against banks organized in other States, where the usurious rate charged was but slightly in excess of the rate of six per cent., allowed by law. Section 30 of the act provides that when the amount of interest charged is greater than the rate authorized by State law, twice the interest paid may be recovered by the person paying the same; while section 53 provides that the franchises of an association may be forfeited if the directors of a bank knowingly violate the provisions of the act. The original national currency act of February 11, 1863, provided as a penalty for usury the forfeiture of the debt, and section 50 of the same act also subjected the rights, privileges, and franchises of an association to forfeiture for willful violations of the act. It may be doubted, therefore, whether Congress intended to impose a specific penalty involving the loss of the whole debt, and then, in addition, subject the same bank to a forfeiture of charter in a subsequent section, which is applicable to other violations of law. I am informed by gentlemen who participated in the framing of the present national currency act that the forfeiture of twice the amount of interest was regarded as a sufficient penalty for such violations of law, and, at the same time, a sufficient protection to borrowers.

These statements are confirmed by the act of April 22, 1870, "An act to amend the usury laws of the District of Columbia," which provides "that if any person or corporation in this District shall contract to receive a greater rate of interest than ten per cent. upon any contract in writing, or six per cent. upon any verbal contract, such person or corporation shall forfeit the whole of said interest so contracted to be received, and shall be entitled only to recover the principal sum due to such person or corporation." It will be observed that the forfeiture of the interest is the only penalty prescribed by Congress nearly six years after the passage of the national currency act for corporations and individuals in the District of Columbia.

The rates of interest fixed by State laws are not governed by any sound economical or business principles. In three of the New England States* usury laws are abolished, while in the remainder the rate has remained for half a century at a uniform standard, which is less than the present rate of the Bank of England. In Minnesota and Virginia, the rate is limited to twelve per cent.; in Illinois, Wisconsin, and Missouri, to ten per cent.; in Alabama and Ohio, to eight per cent., while in Pennsylvania, Maryland, and Kentucky, the rate is fixed at six per cent. In New York, the taking of an excess beyond the limit of seven per cent. forfeits the whole debt, and subjects the creditor to fine and imprisonment. It would be difficult to give any good reason why the rate of interest should be limited to ten per cent. in the city of Washington, to six per cent. in the neighboring cities of Philadelphia, Baltimore, Wilmington, and Raleigh, and to twelve per cent. across the Potomac, in Alexandria, and in the capital of Virginia. Many of the States have practically repealed their usury laws, while other neighboring States retain upon their statute-books laws which are so continually evaded that they have become obsolete. Savings-banks chartered by Congress, savings-banks, trust-

*The interest laws of Rhode Island, Massachusetts, and Connecticut will be found in the Appendix.

companies, and safe-deposit companies authorized by the legislatures of almost every State of the Union, as well as private bankers, offer for interest on deposits rates nearly equal, and sometimes exceeding the ruling rates allowed by law; and under such circumstances it is difficult to control by legislation the rates of the national banks.

Self-protection stimulates even the most conservative banks to control their own business and retain the accounts of dealers of long standing. The rates of interest charged must correspond in some degree to the supply of money and to the demand. If high rates are paid for deposits, it is with the expectation that the borrower will pay a rate correspondingly high. Hence loans are made to those dealers who will leave the largest proportion of the amount borrowed with the bank for the longest period in the guise of deposits. Banks in New York charge seven per cent., in Philadelphia and Baltimore, six per cent.; but their loans are made chiefly to dealers whose average accounts show balances continually on hand equal to one-eighth or one-fourth of the amount borrowed; while the banks in the South and the West not unfrequently charge the ruling rate without regard to the account of the customer. The expedients for violating the usury laws are so numerous that it may well be doubted whether it would not be better for all parties to allow the rate charged to be regulated by the state of the money market. Under existing laws, in an easy money market, the rate not unfrequently falls below that prescribed by law. If money is scarce, the rate is nominally within the limit, but really regulated in accordance with a previous understanding between borrower and lender.

There are no usury laws in Great Britain, or in the other commercial European states; and the commonwealth of Massachusetts, one of the most prosperous and enlightened States of the Union, has recently abolished* such laws; and it will be found, by reference to the table on page 16, that the earnings of the banks in that State for the four years since the passage of the act, have been even less than in many of the Eastern, Middle, and Southern States, where the rate is fixed at six per cent:

Mr. McCulloch, late Secretary of the Treasury, in his first report, as Comptroller of the Currency, recommended a uniform rate of interest, and expressed the opinion that Congress possessed the power to enact such a law, under the constitutional provision of regulating commerce among the several States. Congress alone has the power to coin money and regulate the value thereof; and if it alone has authority to issue and authenticate the paper currency of the country, there would seem to be no good reason why it should not also provide for its free circulation, which is now impeded by the ever-changing statutes of forty different legislatures.

The penalty for usury should at least be defined, and until this is done the Comptroller will not feel himself called upon to institute proceedings for forfeiture of the charter of a bank for usurious transactions, when it is evident that the business of the association is conducted legitimately and safely in other respects.

SAVINGS-BANKS.

The act of June 17, 1870, provides that savings-banks may be organized within the District of Columbia, under the provisions of section 4 of the act "to provide for the creation of corporations in the District

* Act of March 6, 1867.

of Columbia by general law;" and a subsequent act exempts from taxation the deposits of savings-banks in amounts less than \$2,000. It is claimed that, under this legislation, savings-banks, with capital paid up in full or in part, may be established in the District of Columbia, to be conducted for the benefit of the shareholders. The legislatures of many of the States have authorized the establishment of similar institutions, which, under the act of Congress, are exempt from taxation on deposits, while these identical deposits, if placed to the credit of savings-banks in a national bank, as is frequently the case, are subject to a tax of one-half per cent. per annum. It is evident that Congress intended to discriminate in favor of those institutions which are organized for the purpose of receiving and investing savings for the benefit of depositors, and not of shareholders.

The official reports of the savings-banks in New England show the deposits at the close of the year 1871 to have been \$312,333,479, or more than three times the amount of the aggregate deposits in the national banks. The deposits in the savings-banks of the State of New York, at the same date, were \$267,905,866, a sum also considerably in excess of the deposits of the national banks in that state. A large portion of these are not properly savings-deposits. Savings-banks in some portions of New England, New York, and Pennsylvania, as well as other States, have recently become formidable competitors of the national banks by offering much larger rates of interest for deposits than is usual in well-managed banks.

The proper functions of savings-banks are to make safe and judicious investments of the funds intrusted to them, and at specified times to divide the earnings among the depositors; but for the purpose of attracting the deposits of business men and others, who would otherwise do business with regularly organized banking institutions, the custom prevails, to a large extent, of offering high rates of interest for deposits before dividends have been earned. The result is that savings-deposits are, to a considerable extent, endangered by investments in street-paper, in loans to the managers of such institutions, and in speculative securities.

The savings-banks are among the most important business institutions of the country, and they should be fostered and maintained; but at the same time they should be restricted to a legitimate savings-bank business, and not allowed to encourage violations of usury laws nor to be controlled by the personal interests of shareholders, managers, or trustees. Frequent publications of reports should be required and their affairs subjected to rigid scrutiny from time to time by competent examiners. Special charters, with special privileges for savings-banks and trust companies, should not be granted, but all such institutions should be organized under general laws. The passage of such a law for the District of Columbia, with judicious provisions, would be productive of beneficial results and would afford an example, not only for those States which have no enactments of this kind, but also for the older States, whose present savings-bank laws are liable to great abuses.

LOCKING UP OF GREENBACKS.

The act of February 19, 1869, provides "that no national banking association shall hereafter offer or receive United States notes or national bank notes as security, or as collateral security, for any loan of money, or for a consideration shall agree to withhold

the same from use, or shall offer or receive the custody or promise of custody of such notes as security, or as collateral security or consideration, for any loan of money."

On the 5th of April last the Comptroller was advised that a bank in the city of New York, with a capital of \$1,000,000, and whose average exchanges at the clearing-house did not exceed \$300,000, was that morning creditor at the clearing-house for \$4,770,000. As it was evident that this large credit was not the result of legitimate business, the examiner was directed to make an examination of the bank, which was immediately done, in connection with a member of the clearing-house committee. From the examination, which was thoroughly and carefully conducted, it appeared that deposits had been made in that bank, by one individual, upon the morning of April 5, to the amount of \$4,100,000, the whole of which was drawn out upon the same day, upon the checks of the depositor, in legal-tender notes. The president of the bank denied that the bank had any interest in these transactions, and there was no evidence of any loan, or of advances in any shape, upon these deposits. These transactions were the subject, subsequently, of an investigation by the bank committee of the House of Representatives, and, although it was clear that the spirit of the law had been violated, no evidence could be obtained to warrant the commencement of a suit for the recovery of the penalty prescribed in the act referred to. The investigation undoubtedly had the effect to prevent the repetition of similar transactions; no offenses of this kind, on the part of any national bank, having since been brought to the attention of the Comptroller.

The New York clearing-house association subsequently passed a resolution declaring "that the clearing-house committee be and is hereby directed, whenever it appears, in its judgment, that legal-tender notes have been withdrawn from use through the agency of any bank, member of the association, to make an immediate examination of the bank in question, and should there appear to be complicity on the part of the bank or its officials, to suspend said bank from the clearing-house until action of the association shall be taken thereon."

The withdrawal of currency for illegitimate purposes has, however, since been accomplished without the assistance of the banks.

The rigid enforcement of the resolution of the clearing-house will prevent complicity on the part of the banks in such transactions; and if the New York stock-board and the leading banking-houses will unite with the clearing house, and refuse to transact business with unscrupulous men, who do not hesitate to embarrass legitimate business for the purpose of increasing or diminishing the values of stocks or bonds in which they are temporarily interested, they can do more to prevent such operations than any congressional enactment.

INSOLVENT BANKS.

Twenty-one national banks, organized in eleven different States, with an aggregate capital of \$4,236,100, have failed since the organization of the system in 1863. The total circulation of these banks was \$2,942,793, of which \$2,441,430 has been redeemed in full, leaving a balance still outstanding of \$501,363, which will also be redeemed, upon presentation to the Treasurer of the United States, from the avails of United States bonds held as security for that purpose. Of these banks, five have been finally closed, (two during the past year,) having paid dividends to their creditors, as follows:

Name and location of bank.	Appointment of receiver.	Capital stock.	Amount of claims proved.	Dividends paid.	Remarks.
First National Bank, Attica, New York.	Apr. 14, 1865	\$50,000	\$122,089	<i>Per ct.</i> 58	Finally closed.
First National Bank, Medina, New York.	Mar. 13, 1867	50,000	170,165	38½	Finally closed
Tennessee National Bank, Memphis, Tennessee.	Mar. 21, 1867	100,000	376,932	17½	Finally closed.
Croton National Bank, New York City.	Oct. 1, 1867	200,000	170,752	88½	Finally closed.
First National Bank Keokuk, Iowa.....	Mar. 3, 1868	100,000	205,256	68½	Finally closed.

Six national banks have failed during the past year, as follows :

Name and location of bank.	Appointment of receiver.	Capital stock.	Amount of claims proved.	Dividends paid.	Remarks.
Ocean National Bank, New York City...	Dec. 13, 1871	\$1,000,000	\$1,280,328	<i>Per ct.</i> 70	
Union Square National Bank, New York City.	Dec. 15, 1871	200,000	157,120	100	Claims paid in full.
Eighth National Bank, New York City...	Dec. 15, 1871	250,000	373,936	50	Cash on hand, \$28,474.62.
Fourth National Bank, Philadelphia.....	Dec. 20, 1871	200,000	645,558	100	Claims paid in full.
Waverly National Bank, Waverly, New York.	Apr. 23, 1872	106,100	54,878	100	Claims paid in full.
First National Bank, Fort Smith, Arkansas.	May 2, 1872	50,000	7,633	Cash on hand, \$13,787.95.

Of these banks, the Union Square National Bank, New York, the Fourth National Bank, Philadelphia, and the Waverly National Bank, New York, have paid their creditors in full, a settlement, it is believed, without precedent prior to the establishment of the national system. The Eighth National Bank, New York, has paid a dividend of fifty per cent.; the Ocean National Bank, New York, a dividend of seventy per cent.; and the receivers of the Ocean National Bank, and of the First National Bank of Fort Smith, Arkansas, estimate that the creditors of both of these banks will ultimately receive a dividend of one hundred cents on the dollar. The remaining ten national banks which have failed are as follows :

Name and location of bank.	Appointment of receiver.	Capital stock.	Amount of claims proved.	Dividend paid.	Cash on hand.
Venango National Bank, Franklin, Pa...	May 1, 1866	\$300,000	\$724,010	<i>Per cent.</i>	\$100,347.58
Merchants' National Bank, Washington, D. C.	May 8, 1866	200,000	*37,371.00
First National Bank Selma, Ala.....	Apr. 30, 1867	100,000	303,071	109,264.14
First National Bank, New Orleans, La....	May 20, 1867	500,000	1,116,631	35	187,670.76
National Unadilla Bank, Unadilla, N. Y..	Aug. 29, 1867	120,000	126,760	50,447.39
Farmers and Citizens' National Bank, Brooklyn, N. Y.	Sept. 6, 1867	300,000	1,189,000	92	13,937.89
First National Bank, Bethel, Conn.....	Feb. 28, 1868	60,000	68,986	70	11,668.43
National Bank of Vicksburgh, Miss.....	Sept. 24, 1868	50,000	20,493	12,375.11
First National Bank, Rockford, Ill.....	Mar. 15, 1869	50,000	65,875	19,404.01
First National Bank, Nevada, Austin....	Oct. 14, 1869	250,000	163,314	50	53,150.65

* Also \$50,000 United States six per cent. bonds, on deposit with Treasurer.

The aggregate amount of claims proved against the seventeen national banks which have failed, (excluding the four banks which were Government depositories,) is \$5,205,068; the average dividends, $69\frac{1}{2}$ per cent.; the additional dividends to be declared are estimated at $14\frac{1}{10}$ per cent.; making, in all, dividends in favor of creditors of $84\frac{3}{10}$ per cent., which would leave an average deficiency of $15\frac{7}{10}$ per cent. to be collected of shareholders, as provided in section 50 of the act.

A final dividend in favor of the Farmers and Citizens' National Bank, of Brooklyn, will be made during the present year, of about four per cent., making, in all, dividends from the assets of ninety-six per cent. A final dividend of about forty per cent. in favor of the creditors of the National Unadilla Bank is delayed by a claim in litigation for the value of the bonds deposited as security for circulation in excess of the amount required to redeem its circulating notes, which will probably go to the Supreme Court for final adjudication. An assessment has been made upon the shareholders of the National Bank of Bethel, of $15\frac{1}{2}$ per cent., which, if collected, will pay the creditors in full, without interest, up to the date of the appointment of the receiver. A dividend of more than thirty per cent. will also soon be declared in favor of the creditors of the First National Bank of Nevada. The affairs of the Eighth National Bank of New York, and of the First National Bank of Rockford, Illinois, are involved in litigation, and the date of the final closing of their affairs is uncertain.

The Venango National Bank of Franklin, Pennsylvania; the Merchants' National Bank of Washington, District of Columbia; the First National Bank of Selma, Alabama, and the First National Bank of New Orleans, were United States depositories. The final dividend in favor of the creditors of the First National Bank of Vicksburg has been unexpectedly delayed by the recent presentation of a claim of the collector of internal revenue of that district, in the year 1868. Since that time no losses have occurred to the Government by deposits made in the national banks, although many millions of dollars have been continually on deposit with banks which are designated as depositories. The three first-named banks, at the time of their failure, had a large amount of Government funds on deposit.

The fifth section of the act of March 3, 1797, provides "that when any revenue officer or other person hereafter becoming indebted to the United States, by bond or otherwise, shall become insolvent; or where the estate of any deceased debtor, in the hands of executors or administrators, shall be insufficient to pay all the debts due from the deceased, the debt due to the United States shall be first satisfied; and the priority hereby established shall be deemed to extend as well to cases in which a debtor, not having sufficient property to pay all his debts, shall make a voluntary assignment thereof, or in which the estate and effects of an absconding, concealed, or absent debtor shall be attached by process of law, as to cases in which an act of legal bankruptcy shall be committed."

The Treasurer of the United States claims, under this act, that all deposits in these banks at the time of suspension, belonging to the United States, whether deposited to its credit directly, or to the credit of its disbursing officers, with interest thereon from the date of the failure of the bank, are entitled to priority of payment.

In the case of the First National Bank of New Orleans, other questions have arisen. At the date of its suspension the bank was in charge of officers of the Government, who were also engaged in the settlement of the accounts of a defaulting ex-assistant treasurer of the United

States. The nominal balance to the personal credit of this individual upon the books of the bank was \$315,779.10, and a certified check for this amount was taken from him, and about \$94,000 collected upon it. The Government holds this check, and claims that the balance uncollected shall have priority in payment, the same as if that amount had been on deposit to the credit of the United States. The creditors of the bank, on the other hand, claim that, at the time of the suspension, the bank held legal offsets, and that there was really no balance due upon the check held by the Government. The receiver concurs in this opinion, and if the claim should be presented to him in the usual way for settlement, it would be disallowed.

Unsuccessful attempts have been made to obtain a final decision in the Supreme Court of the United States upon these questions, owing, in part, as is believed, to defects in the present act. A large amount of funds has been on deposit with the Treasurer for the last three years, which will be distributed among the creditors as soon as a decision of the court can be obtained upon these points.

Section 50 of the national currency act provides that the Comptroller shall make a ratable dividend upon all claims which may be proved to his satisfaction or adjudicated in a court of competent jurisdiction; and this is the only existing provision in reference to the method of procedure in the proving of claims against an insolvent bank. The law should be so amended as to define the duties of the Comptroller and of the receiver in proving claims and in prescribing the mode and manner of referring conflicting interests to the proper tribunal for final arbitrament. A bill for this purpose was introduced into the last Congress, reported by the Bank Committee, and referred to the Judiciary Committee of the House of Representatives. The passage of this bill will facilitate the settlement of the affairs of these banks, and simplify the method of procedure in all cases of insolvent banks.

An amendment is also suggested giving authority for the return of the assets of an insolvent bank to an agent of the shareholders upon their unanimous request, after full payment shall have been made to the creditors of the bank.

Where dividends are delayed by reason of protracted litigation, provision should also be made for the investment of the funds on deposit with the Treasurer in interest-bearing securities.

SURPLUS AND SPECIE.

The law requires that every national bank shall carry one-tenth part of its profits to surplus-fund account before the declaration of a dividend, until the same shall amount to 20 per cent. of its capital stock. This wise provision has been generally observed, and the returns show that the banks now have a surplus of more than one hundred millions of dollars, and considerably more than one-fifth of their capital in surplus account. The act also limits the liabilities of any association, person, company, or corporation, for money borrowed, to one-tenth of the capital stock paid in. The Comptroller recommends that this limit be extended to one-tenth of the capital and surplus, which will have a tendency to increase the surplus fund beyond the limit required by the law.

Banks have hitherto been in the habit of reporting, as specie, checks payable in coin. The result is to give an erroneous aggregate of the amount of coin held by the banks, the same amount being reported by the bank holding the coin and the bank holding the check. In the present statement, and in all future statements, the item of coin will include only actual coin and United States coin certificates which are payable on demand at the Treasury.

The following table will exhibit the aggregate amount of specie held by the national banks at the dates mentioned, the coin, coin certificates, and checks payable in coin held by the national banks of the city of New York, being stated separately. The country banks have not heretofore separated coin and coin certificates in their reports :

Date.	Held by national banks in New York City.				Held by other national banks.	Aggregate.
	Coin.	U. S. coin certificates.	Checks payable in coin.	Total.		
Oct. 5, 1868....	\$1,698,623 24	\$6,390,140	\$1,536,353 66	\$9,625,116 90	\$3,378,596 49	\$13,003,713 39

SIINPLASTERS.

The State of Alabama has issued for some years past, in the form and similitude of bank notes, of five different denominations, certificates which read as follows :

"The State of Alabama: Receivable as five dollars in payment of all dues to the State. Montgomery, May 1, 1867.

(Signed)

_____ Governor.

(Signed)

_____ Comptroller of Public Accounts."

On the reverse :

"Receivable in payment of taxes and all dues to the State. Issued under the provisions of the act entitled 'An act to provide for the issue of certificates or receipts by the State,' approved February 19, 1867. The credit and faith of the State of Alabama are pledged for the redemption of this certificate or receipt, as provided for in such act."

A circular was also issued by the governor of Alabama, on July 24, 1867, and is still in circulation, which states that an opinion has been obtained from the Attorney-General of the United States that such receipts or certificates are not subject to the tax of ten per cent. imposed upon the notes of State banks by the act of March 3, 1865, and recommending the co-operation of banks and bankers in giving circulation to the issues referred to. The Constitution of the United States provides that no State shall emit bills of credit, and it has been held by the Supreme Court of the United States, in a famous case,*

* Briscoe vs. Bank of Kentucky, 11 Pet., 257.

that a note of circulation "issued by a State, involving the faith of the State, and designed to circulate as money on the credit of the State, in the ordinary course of business," is a bill of credit. Other decisions of the Supreme Court hold "that certificates issued by a State in sums not exceeding ten dollars nor less than fifty cents, receivable in payment of taxes, the faith and credit of the State being pledged for their redemption, are bills of credit within the prohibition of the Constitution."^{*}

It is clear, therefore, that such certificates are bills of credit, and prohibited by the Constitution. Savings-banks, railroad, municipal, and other corporations in the States of Florida, Georgia, and other Southern States have followed the example of the State of Alabama, and have issued, and are still issuing, a large amount of similar circulation, some in the form of receipts and certificates, and others in the form of railroad tickets, but all issued in the form and similitude of bank notes, and intended to circulate as money. There is no law in existence to prevent the circulation, and no legislative provision for the enforcement of the constitutional prohibition of such issues. The act of July 17, 1862, makes it a penal offense "to make, issue, circulate, or pay any note, check, memorandum, token, or other obligation for a less sum than one dollar, intended to circulate as money, or be received or used in lieu of lawful money." It is recommended that this act be so amended as to prohibit, absolutely, the issue of such circulation, and thus prevent great ultimate loss to the people, among whom such notes are now obtaining extensive credit.

A few national banks have gone into liquidation and reorganized as State banks, retaining their national title. State savings-banks and private companies have also assumed the title of "national." These corporations and companies erect large signs over their doors, issue conspicuous advertisements, and obtain recognition in the counterfeit detectors among lists of national banks, thus transacting business under false colors, which, of itself, should be sufficient to put all business men upon their guard. Such abuses should, however, be prohibited, and the Comptroller recommends the passage of an act prohibiting the use of the word "national" as a title for banks other than those organized under the national currency act.

He also recommends that all officers of national banks, and all Government depositaries, be required to stamp the word "counterfeit" or "illegal" upon all counterfeit and unauthorized issues presented at their counters.

BANKS OF CIRCULATION.

The national currency act is, to a certain extent, deficient in a provision for the prompt closing up of national banks pursuing an illegitimate business. These banks are of two classes. One class organize or attempt to organize and pay up their capital stock with the notes of shareholders instead of cash capital, as required by law. A few such cases have been forced into liquidation by withholding the issue of circulation, and in one instance the Solicitor has been requested to bring a suit for the forfeiture of charter for willful violation of law, as provided in section 53 of the act. In all similar cases hereafter proceedings will be commenced for a like purpose. In other cases, banks which have lost a large portion of their capital refuse to go into liquidation, transacting no business, but in other respects conform to the requirements of

^{*} *Craig vs. Missouri*, 4 Pet., 410; *Byrne vs. Missouri*, 8 Pet., 40.

the law, for the purpose of receiving the interest upon their bonds. The stockholders of these banks, in some instances, have the means to restore the capital, but refuse; in others, a portion of the shareholders desire to pursue a legitimate business, but another portion refuse to respond to assessments. The Comptroller respectfully recommends that in these cases authority be given to withhold the interest upon the bonds, and to commence proceedings for the forfeiture of charter, and that a penalty be imposed. These cases are not numerous, but a remedy is needed to terminate the existence of such associations, and no penalty is too severe for this evasion of the law. With proper legislation, and the co-operation of banks doing a legitimate business, an example may be made of illegitimate institutions, which will prevent the organization of banks without the full amount of capital paid up in cash, as required by law.

EXAMINATIONS.

It is the intention of the Comptroller that every national bank shall be thoroughly examined once a year by a competent bank examiner. Every director and shareholder is personally interested in these examinations, if properly conducted. No well-managed bank will object to a confidential scrutiny of its affairs, but will welcome at all times, as is generally the case, a competent and courteous agent of the Department. Many valuable suggestions may be obtained from the experience of an intelligent examiner, and, in not a few instances, banks have been saved from ruin by timely interference in the correction of abuses. In some instances information is received at this office of violations of law which call for special examinations, but which cannot be made because there is no means of paying the expense of conducting such examinations. If the bank is found in fault, it will respond to an assessment; if not, it should not be subjected to an expense not authorized by law. The Comptroller, therefore, respectfully asks for an appropriation of \$3,000, in order that he may at all times be free to pursue such inquiries as he shall consider expedient for the protection of the creditors of such associations. Prompt action in cases of this kind is very desirable, and the expense incurred is trifling when compared with the public interests involved.

MUTILATED CURRENCY.

Section 24 of the act provides that the worn-out and mutilated circulating notes of the national banks "shall be burned to ashes in the presence of four persons, one to be appointed by the Secretary of the Treasury, one by the Comptroller of the Currency, one by the Treasurer of the United States, and one by the association, under such regulations as the Secretary of the Treasury may prescribe." From the organization of the system in 1863 to November 1, 1872, \$86,695,305, more than one-fourth of the whole amount issued, has been returned to this office for destruction, as follows:

Previous to November 1, 1865.....	\$175,490
During the year ended October 31, 1866.....	1,050,382
During the year ended October 31, 1867.....	3,401,423
During the year ended October 31, 1868.....	4,602,825
During the year ended October 31, 1869.....	8,603,729
During the year ended October 31, 1870.....	14,305,689
During the year ended October 31, 1871.....	24,344,047
During the year ended October 31, 1872.....	30,211,720

It is probable that the amount of mutilated currency to be returned hereafter for re-issue will exceed thirty millions of dollars annually, and that the whole amount of national-bank circulation will be re-issued as

often as once in ten years. An additional force will be required for the careful performance of this duty.

No effort will be spared by the Comptroller to have the provision of the law in reference to the burning of mutilated notes and the prompt issue of new notes in their place strictly executed; and the national banks of the country are urged to send forward such notes as frequently as possible, in order that the currency of the country may be kept in the best possible condition. The officers and depositaries of the United States can render efficient service in purifying the currency, by sorting out all mutilated notes of the national banks and presenting the same to their agents in New York City and elsewhere, for redemption.

THE OFFICE.

The force of this office consists of the Deputy Comptroller, fifty-six male clerks, and twenty-eight female clerks. The work of the office is continually increasing. More than twelve thousand reports of national banks are received annually and carefully scrutinized. More than one hundred million dollars of United States bonds have been received, transferred and deposited with the Treasurer during the past year, and twenty-five millions of dollars of bonds have been withdrawn and surrendered to the banks. Thirty millions of dollars of mutilated currency have been received, counted, and destroyed, and fifty-two millions of dollars of new currency issued to the banks. Many thousands of communications are annually received and promptly answered. If any success shall attend the administration of the responsible duties of the office, the Comptroller will be in a large measure indebted to the industry and efficiency of the Deputy Comptroller, of the competent corps of examiners, and of the chiefs of the different divisions, and to the services of experienced clerks, who have assisted him in the discharge of these duties. A re-organization of the office, with increased pay corresponding to the responsibility of the different positions, would be a proper recognition of services which have too long been well performed without corresponding compensation.

APPENDIX.

Special attention is called to the carefully prepared tables contained in the appendix, exhibiting the aggregate resources and liabilities of all the national banks, yearly, for the last ten years; to tables showing their condition during the present year, for five different periods, arranged by States and redemption cities, and separate statements of every bank of the Union upon the third day of October ultimo; also to tables exhibiting the different kinds of funds held as reserve; the dividends and earnings of the national banks, by States and cities, semi-annually, from March 1, 1869, to August 31, 1872; together with lists of insolvent banks, and banks which have gone into voluntary liquidation, and the amounts and different kinds of United States bonds deposited with the Treasurer as security for circulating notes. The appendix also contains an exhibit of the capital and dividends, semi-annually, for two years, of one hundred and sixteen of the leading banks of Great Britain and Ireland; and the interest laws of Rhode Island, Massachusetts, and Connecticut.

A table of contents will be found on the succeeding page.

JOHN JAY KNOX,
Comptroller of the Currency.

HON. JAMES G. BLAINE,
Speaker of the House of Representatives.

APPENDICES.

APPENDICES.

	Page.
I. Dividends and earnings of the national banks, semi-annually, from March 1, 1869, to August 31, 1872, arranged by States and cities of redemption	104-110
II. Semi-annual dividends of the principal banks of Great Britain and Ireland for 1871-'72	111-113
III. The number and amount of each denomination of notes issued, redeemed, and outstanding November 1, 1872.....	114
IV. The amount and kinds of United States bonds held by the Treasurer as security for the redemption of circulating notes.....	114
V. National banks in liquidation which have voluntarily closed their business.....	115
VI. National banks in voluntary liquidation for the purpose of consolidating with other banks.....	116
VII. National banks in the hands of receivers, and the outstanding circulation of each, November 1, 1872	117
VIII. Reserves of the national banks during the present year, at five different dates.....	118-127
IX. Reserves of the national banks during the five years, 1868-'72, at twenty-two different dates	128, 129
X. The interest laws of Rhode Island, Massachusetts, and Connecticut	130
XI. Names and compensation of officers and clerks.....	131, 132
XII. Expenditures of the office for the fiscal year ending June 30, 1872.	132

Table of the dividends and earnings of the national banks, with their ratios to capital and capital and surplus-fund, for the six months from March 1, 1869, to August 31, 1869.

INTEREST LAWS OF RHODE ISLAND, MASSACHUSETTS, AND CONNECTICUT.

RHODE ISLAND.

AN ACT in relation to interest.

Be it enacted, &c., as follows :

SECTION 1. Interest in rendition of judgments, and in all business transactions where interest is secured or paid, shall be computed at the rate of six dollars on a hundred dollars for one year, *unless a different rate is expressly stipulated.*

SEC. 2. All acts or parts of acts inconsistent herewith are hereby repealed.

Approved March 17, 1865.

MASSACHUSETTS.

AN ACT concerning the rate of interest.

Be it enacted, &c., as follows :

SECTION 1. When there is no agreement for a different rate of interest of money, the same shall continue to be at the rate of six dollars upon one hundred dollars for a year, and at the same rate for a greater or less sum, and for a longer or shorter time.

SEC. 2. It shall be lawful to contract to pay or reserve discount at any rate, and to contract for payment and receipt of any rate of interest : *Provided, however,* That no greater rate of interest than six per centum per annum shall be recovered in any action, except when the agreement to pay such greater rate of interest is in writing.

SEC. 3. Sections three, four, and five of chapter fifty-three of the General Statutes, and all acts and parts of acts inconsistent herewith, are hereby repealed.

SEC. 4. This act shall not affect any existing contract or action pending, or existing right of action, and shall take effect on the first day of July next.

Approved March 6, 1867.

CONNECTICUT.

AN ACT concerning the rate of interest.

Be it enacted, &c., as follows :

SECTION 1. When there is no agreement for a different rate of interest of money, the same shall be at the rate of six dollars upon one hundred dollars for one year, and at the same rate for a greater or less sum, and for a longer or shorter time.

SEC. 2. It shall be lawful to contract or pay or reserve any discount at any rate, and to contract for payment and receipt of any rate of interest : *Provided, however,* That no greater rate of interest than six per centum per annum shall be recovered in any action, except when the agreement to pay such greater rate of interest is in writing.

SEC. 3. That the first, second, third, and fourth sections of an act entitled "An act to restrain the taking of usury," and all acts inconsistent herewith, are hereby repealed.

SEC. 4. This act shall not affect any existing contract or suit now pending.

Approved July 2, 1872.

REPORT

OF

THE FIRST COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT,
First Comptroller's Office, October 24, 1872.

SIR: I have the honor to submit the following report of the operations of this office during the fiscal year ended June 30, 1872.

Number of warrants examined, countersigned, entered upon blotters, and posted in ledgers, viz:

Treasury, proper.....	1,825
Public debt.....	247
Quarterly salary.....	1,737
Diplomatic.....	2,333
Customs.....	4,327
Internal revenue.....	6,008
Judiciary.....	1,642
War, civil.....	60
War, pay.....	3,756
War, repay.....	761
Navy, pay.....	1,376
Navy, repay.....	197
Interior, civil.....	1,801
Interior, pay.....	1,874
Interior, repay.....	112
Appropriation.....	105
Internal revenue, (covering).....	3,791
Customs, (covering).....	1,359
Land, (covering).....	640
Miscellaneous, (covering).....	5,831

Number of accounts received from the First and Fifth Auditors of the Treasury, and Commissioner of the General Land-Office, revised and certified, viz:

Judiciary, embracing the accounts of United States marshals for their fees and for the expenses of the United States courts, of the United States district attorneys, and of the commissioners and clerks of United States courts....	1,927
Diplomatic and consular, embracing the accounts arising from our intercourse with foreign nations, expenses of consuls for sick and disabled seamen, and of our commercial agents in foreign countries.....	1,983
Public lands, embracing the accounts of the registers and receivers of land-offices, and surveyors-general and their deputies, and of lands erroneously sold.....	2,289
Steamboats, embracing accounts for the expenses of the inspection of steam-boats and salaries of inspectors.....	1,458
Mint and its branches, embracing accounts of gold, silver, and cent coinage, of bullion, of salaries of the officers, and of the expenses.....	119
Public debt, embracing the accounts of the United States Treasurer, and the accounts of the assistant treasurers for the redemption of United States stocks and notes, and for payment of interest on the public debt.....	488
Public printing, embracing accounts for printing, for paper, and for binding..	102
Territorial, embracing accounts for the legislative expenses of the several Territories, and the incidental expenses of their government.....	286

Congressional, embracing accounts for contingent expenses and other expenses of the United States Senate and House of Representatives.....	133
Internal-revenue collectors' accounts of the revenue collected, the expenses of collecting the same, their own compensation, and the expenses of their offices.....	3,271
Internal-revenue assessors' accounts for the expenses of levying the taxes, and for their own compensation.....	987
Internal-revenue stamp agents' accounts for the sale of stamps.....	1,185
Internal-revenue miscellaneous accounts for salaries of supervisors, surveyors, detectives, &c.....	1,817
Other miscellaneous accounts, embracing accounts for the contingent expenses of all Executive Departments at Washington, salaries of judges, marshals, district attorneys, &c., &c.....	2,046
Number of letters written on official business.....	11,082
Number of receipts given by collectors for tax-lists examined, registered, and filed.....	3,097
Number of requisitions examined, entered, and reported, viz:	
Diplomatic and consular.....	750
Collectors of internal revenue.....	2,822
Marshals.....	260

In addition to that specified in the foregoing items, a large amount of other work has been done in the examination, registering, and filing of official bonds; the examination and approval of bonds of indemnity; the examination and decision of application for the re-issue of securities in place of those lost or destroyed, and of conflicting claims to Government securities, and the examination and approval of all powers of attorney for the collection of interest and the collection of moneys from the Department.

The accounts of receipts and disbursements kept in this office correspond with those of the Secretary and of the Register, and therefore need not be repeated in this report.

The business of the office continues to be quite as large as formerly, and requires that the force of the office now authorized should be continued.

The aggregate of the items stated in this report is 3,771 greater than that of similar items in the report of last year.

Respectfully submitted.

R. W. TAYLER,
Comptroller.

Hon. GEO. S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE SECOND COMPTROLLER.

THE SECOND COMMISSION OF THE LIBRARY

REPORT OF THE SECOND COMMISSION

REPORT

OF

THE SECOND COMPTROLLER OF THE TREASURY.

TREASURY DEPARTMENT,
Second Comptroller's Office, October 26, 1872.

SIR: I have the honor to submit the following detailed statement of the business operations of this office for the fiscal year ending June 30, 1872:

The aggregate number of accounts of disbursing officers and agents which have been received, as well as those which have been finally adjusted, is as follows:

	6,270
The number of accounts on hand June 30, 1872	238

There was paid into the Treasury of the United States from sources the accounts of which are settled in this office—

On account of customs	\$216,370,286 77
On account of fines, penalties, and forfeitures	674,232 77
On account of steamboat inspections	248,416 45
On account of storage, drayage, &c.	461,409 12
On account of marine-hospital tax	319,823 16
On account of fees, &c.	603,808 01
	218,677,976 23

And there was paid out of the Treasury—

On account of expenses of collecting the revenue from customs	\$6,950,189 81
On account of refunding excess of deposits	2,557,770 83
On account of debentures	591,240 71
On account of building and maintenance of revenue-cutters	1,064,998 79
On account of public buildings	1,510,911 39
On account of construction and maintenance of lights	3,166,461 93
On account of marine hospitals, relief of sick seamen	421,897 03
On account of distributive shares, fines, penalties, and forfeitures	353,427 42
On account of life-saving stations	55,660 16
On account of captured and abandoned property	34,450 01
On account of miscellaneous accounts	125,247 29
	16,832,255 37

The number of estimates received	2,590
The number of requisitions issued	2,472
Amount involved in said requisitions	\$9,365,001 61
The number of letters received	10,110
The number of letters written	11,369
The number of letters recorded	10,975
The number of returns received and examined	4,878
The number of oaths examined and registered	4,274
The number of appointments registered	3,088
The average number of clerks employed	25
The amount involved in this statement	\$245,075,233 26

Very respectfully, your obedient servant,

W. T. HAINES,
Commissioner of Customs.

Hon. GEO. S. BOUTWELL,
Secretary of the Treasury.

Statement of warehouse transactions at the several districts and ports of the United States for the year ending June 30, 1872.

Amount of "lost checks" paid, in accordance with the act of February 2, 1872.....	2,047 35
Miscellaneous credits.....	1,827 48
Total.....	<u>132,369,710 62</u>

Accounts of paymasters on hand, June 30, 1871.....	3,071
Draft-rendezvous accounts on hand, June 30, 1871.....	30
Accounts of paymasters received during the year.....	376
Total	3,477
Accounts of paymasters audited and reported to the Second Comptroller during the year.....	2,336
Draft-rendezvous accounts examined and reported.....	14
	2,350
Accounts of paymasters remaining unexamined, June 30, 1872.....	1,111
Draft-rendezvous accounts on hand, under examination.....	16
Total number of accounts on hand, June 30, 1872	1,127
Number of letters written.....	29,593

During the year the accounts of one hundred and forty-eight paymasters were finally settled under the acts of March 16, 1868, and June 23, 1870. In one hundred and four cases balances amounting to \$57,315.46 were found due to the United States, and were collected and turned into the Treasury. In the remaining forty-four cases, balances aggregating \$17,868.74 were found due the paymasters, and were paid to them.

The accounts of seventy-five paymasters were finally settled, on which there is due the United States \$667,031.35, including \$463,712.79, the amount of J. L. Hodge's defalcation.

The accounts of five paymasters have been prepared for suit, involving an indebtedness of \$33,810.62.

MISCELLANEOUS DIVISION.

The following statement shows the number of money-accounts on hand in this division at the commencement of the fiscal year, the number received and settled during the year, and the number remaining unsettled at the close of the year, together with the expenditure embraced in the settlement:

Ordnance, medical, and miscellaneous accounts on hand, June 30, 1871.....	618
Recruiting accounts on hand, June 30, 1871.....	955
Number of accounts received during the year.....	2,060
Total	3,633
Number of accounts settled during the year.....	1,805
Number of accounts remaining unsettled, June 30, 1871.....	1,828

The amounts involved in the above settlements are as follows:

Number of bounty-claims under act of April 22, 1872, on hand June 30, 1872...	11,183

Total number of claims on hand June 30, 1872..... 42,012

The following statement shows the condition of the claims on hand:

Number of claims suspended awaiting evidence to be filed by claimants or their attorneys.....	27,428
Number of claims ready for settlement.....	3,587
Number of claims unexamined June 30, 1872.....	10,997
Total.....	<u>42,012</u>

PROPERTY DIVISION.

The following statement shows the progress and condition of business in this division:

Number of property-returns of officers on hand June 30, 1872.....	34,558
Number of property-returns of officers received during the year:	
Ordnance, ordnance stores, &c. { Regulars.....	96
Volunteers.....	1,355

Clothing, camp and garrison equipage. {	Regulars.....	4,024	
	Volunteers.....	87	
			5,562
Total			40,120
Number of returns settled during the year.....			23,265
Number of returns on hand June 30, 1872.....			16,855
Number of certificates of non-indebtednes issued to officers.....			723
Amount charged to officers for property not accounted for.....		\$2,749	63
Number of returns registered.....			5,562
Number of letters written.....			9,332
Number of letters recorded.....			5,077

In addition to the above, 214,410 returns rendered by officers of volunteers in previous years, but not heretofore reported, have been settled under the provisions of the act of Congress approved June 23, 1870.

DIVISION OF INQUIRIES AND REPLIES.

The work performed in the division of inquiries and replies during the year ended June 30, 1872, is as follows:

Number of inquiries on hand unanswered June 30, 1871.....	3,666
---	-------

Officers making inquiry.	Number received.	Number answered.
Adjutant General.....	7,048	5,901
Paymaster General.....	310	309
Quartermaster General.....	175	174
Commissary General of Subsistence.....	224	224
Commissioner of Pensions.....	1,025	1,039
Third Auditor.....	1,511	1,488
Fourth Auditor.....	18	25
Freedmen's Bureau.....	118	118
Other sources.....	35,376	20,031
Total	45,805	29,309

Number of inquiries on hand June 30, 1872.....	20,162
Rolls and vouchers copied for the Adjutant-General, Paymaster-General, and Department of Justice	1,116
Rolls and vouchers copied for preservation in this office.....	1,719
Rolls and vouchers partially copied and traced for preservation in this office.....	2,891
Signatures verified.....	3,300
Number of letters written.....	22,152

In addition to the work above reported, a large amount of miscellaneous copying has been done, and the general business of the division has quadrupled since the last report.

DIVISION FOR THE INVESTIGATION OF FRAUDS.

During the year 4,697 cases have been under examination, investigation, and prosecution by this division. Abstracts of facts have been prepared in 476 cases, 316 have been finally disposed of, and 148 cases have been prepared for suit and prosecution through the various United States district courts.

The amounts recovered by suit and otherwise are as follows:

Money recovered by draft, certificate of deposit, and current funds, and turned into the Treasury to be credited to the proper appropriations.....	\$6,521 88
Amount recovered from the Freedmen's Bureau and parties implicated in the prosecution of fraudulent colored claims and turned into the Treasury.....	6,049 09

Money unlawfully withheld by claim-agents and secured to the proper claimants by the interposition of this office	\$4,945 04
Money recovered as interest	1,225 50
Amount of Treasury certificates and checks issued in fraudulent claims recovered and canceled	519 69
Money recovered on forged checks and turned over to United States disbursing officers for appropriate credit	707 13
Money secured to United States Assistant Treasurer, New York, by reclamation upon the bank through which a forged check was negotiated	100 00
Money recovered as fines, but carried to the credit of the judiciary fund	300 00
Total	20,368 33
Amount of bond of indemnity on hand	\$1,700 00

There are now under examination and investigation 4,381 cases, involving forgery, fraud, unlawful withholding of money, overpayments, &c., as follows:

Fraudulent and contested claims in cases of white soldiers, in which settlements had been made prior to notice of fraud or receipt of adverse claims	1,271
Fraudulent and contested unsettled claims in cases of white soldiers	535
Fraudulent and contested claims in cases of colored soldiers, in which settlements had been made prior to notice of fraud or receipt of adverse claims	707
Unsettled claims of widows of colored soldiers involving fraud in the marriage evidence	204
Unsettled contested claims in cases of colored soldiers	276
Unsettled claims in cases of colored soldiers, in which the evidence of heirship is believed to have been manufactured by claim-agents and their abettors	1,064
Cases alleged to have been paid by the Pay Department upon fraudulent papers, and awaiting the action of the Court of Claims	76
Cases involving overpayments to United States Army officers in which civil actions are being instituted for the recovery of the money	248
Total	4,381
Number of claims on hand June 30, 1871	4,036
Number of claims received during the year	661
Number of claims finally disposed of during the year	4,697
Number of claims on hand June 30, 1872	316
Number of claims on hand June 30, 1872	4,381
Number of letters written	4,975

There are also filed in this division a large number of letters and informal complaints regarding the malpractice and swindling operations of attorneys, which have so far been acted upon only with a view of debarring such attorneys from further practice in the prosecution of claims, but which are to be fully acted upon whenever the question of liability shall have been determined by the United States courts in cases of a similar character.

ARCHIVES DIVISION.

The following statement shows the work performed by this division:

Number of accounts received from the Paymaster-General	376
Number of accounts on file awaiting settlement	1,111
Number of confirmed settlements received from the Second Comptroller, verified, briefed, and transferred to permanent files:	
Paymasters'	485
Indian	1,093
Miscellaneous	1,153
Number of paymasters' settlements re-examined	2,731
	2,209

Number of settlements withdrawn and returned to files	3,371
Number of vouchers withdrawn and returned to accounts	43,954
Number of abstracts of accounts bound in covers	323
Number of duplicate bounty vouchers examined for certificates of payment ..	92,062
Number of mutilated muster and pay rolls repaired	16,794
Number of letters written	375

REGISTRY AND CORRESPONDENCE DIVISION.

Statement of work performed by the registry and correspondence division during the fiscal year :

Number of letters received	27,808
Number of letters written	31,103
Number of letters recorded	2,123
Number of letters referred to other bureaus	1,709
Number of dead-letters received and registered	3,247
Number of claims received, briefed, and registered	22,023
Number of miscellaneous vouchers received, stamped, and distributed	61,211
Number of letters, with additional evidence in the case of suspended claims, received, briefed, and registered	19,668
Number of pay and bounty certificates examined, registered, and mailed	7,657
Number of pay and bounty certificates examined, registered, and sent to the Paymaster General, in accordance with joint resolution of April 10, 1869 ..	5,353
Number of reports calling for requisitions sent to the War Department	454

For convenience of reference, I annex the following consolidated statement, showing the various classes of accounts settled in the office, the number of each class on hand at the beginning of the year, the number received and disposed of during the year, and the number on hand at the end of the year; also, the amount involved in settlements:

Description of accounts.	On hand June 30, 1871.	Received during the year.	Disposed of during the year.	On hand June 30, 1872.	Am't involved in settlements.	Number of letters written.
Paymasters	3,101	376	2,350	1,127	\$131,502,191 46	20,593
Indian agents	521	912	653	780	2,243,655 83	1,421
Indian agents, (property)	577	473	321	729		
Indian claims	7	1,049	996	60	3,108,160 49	101,001
Bounty, arrears of pay, &c	39,495	24,687	22,170	42,012	1,278,160 29	
Ordnance, medical, and miscellaneous	618	2,060	1,805	1,828	1,566,924 96	1,897
Regular recruiting	955				5,562	
Volunteer recruiting		34,558	33	14		
Claims for return of local bounty	14					
Ordnance and Quartermaster's Department, (property.)						
Soldiers' Home						
National Asylum						
Total	79,832	35,166	51,607	63,391	141,264,686 60	143,244

Besides the number of letters stated in the above table, there have been written 59,414 relating to the miscellaneous business of the office, making a total of 202,658.

The average number of clerks employed during the year was 269.

The following statements and reports were prepared and transmitted during the year :

Annual report to the Secretary of the Treasury of the transactions of the office during the fiscal year.

Annual statement of the recruiting fund, prepared for the Adjutant General of the Army.

Annual statement of the contingencies of the Army, prepared for the Secretary of War.

Annual report of balances on the books of this office remaining unaccounted for more than one year, transmitted to the First Comptroller.

Annual report of balances on the books of this office remaining unaccounted for more than two years, transmitted to the First Comptroller.

Annual statement of the clerks and other persons employed in this office during the year 1871, or any part thereof, showing the amount paid to each on account of salary, with place of residence, &c., in pursuance of the eleventh section of the act of August 26, 1842, and resolution of the House of Representatives of January 13, 1846, transmitted to the Secretary of the Treasury.

List of employés in this office on September 30, 1871, showing the State or Territory from which each person was appointed to office, the State or country in which he was born, and the compensation given to each, transmitted to the Register of the Treasury in accordance with the acts of Congress of September 5, 1859, and March 2, 1861.

Monthly tabular statement, showing the business transacted in the office during the month and the number of accounts remaining unsettled at the close of the month, transmitted to the Secretary of the Treasury.

Monthly report of absence from duties of employés of this office, with reasons therefor, transmitted to the Secretary of the Treasury.

Pay-rolls, upon which payment was made to the employés of this office, prepared semi-monthly.

Earnest effort has been made to keep up the general work of the office and dispose of the large number of claims for bounty that have been presented under the two acts of April 22, 1872, without an increase of the clerical force. All that was desired has not been accomplished, but there is good reason to expect that those bounty-claims will soon be disposed of.

Much credit is due the gentlemen of the office for their faithful performance of duty.

I have the honor to be, very respectfully,

E. B. FRENCH,
Auditor.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT

OF

THE THIRD AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT,
Third Auditor's Office, August 30, 1872.

SIR: In compliance with instructions from your office and the requirements of law, I have the honor to transmit herewith the following report of the business operations of this office for the fiscal year ended June 30, 1872:

BOOK-KEEPER'S DIVISION.

The duties devolving upon this division are, in general, to keep the appropriation and money accounts of the office.

The annexed statement of the financial operations of the office during the fiscal year ended June 30, 1872, exhibits the amounts drawn on specific appropriations, except those under direction of the Chief of Engineers of the Army, which are aggregated and entered under the general heading "Engineer Department." It also shows the repayments into the Treasury for the same period.

The average number of clerks engaged in this division during the period embraced in this report has been nine, and that number now constitutes the active force of the division.

The number of requisitions drawn on the Secretary of the Treasury by the Secretaries of War and of the Interior for the fiscal year ended June 30, 1872, was 3,341, amounting to \$58,498,475.02, as follows, viz:

	Advances to officers and agents.	Claims paid during the year.	Second and Third Auditor's transfers during the year.	Totals.
Quartermaster's Department, (regular supplies).	\$4,315,744 94	\$285,995 93	\$204,991 15	\$4,806,732 02
Incidental expenses Quartermaster's Department.	1,225,417 95	38,566 09	4,113 88	1,268,097 92
Barracks and quarters.	1,605,876 95	123,240 69	2,093 79	1,731,211 43
Army transportation.	3,697,459 20	1,131,257 75	42,801 50	4,871,518 45
Officers' transportation.		1,471 58	36,778 52	38,250 10

REPAYMENTS.

The number of credit and counter requisitions drawn by the Secretaries of War and of the Interior on sundry persons in favor of the Treasurer of the United States is 709, on which repayments into the Treasury during the fiscal year ended June 29, 1872, have been made through the office of the Third Auditor as follows:

On account of deposits	\$5,943,883 43
On account of Third Auditor's transfers	2,382,409 04
On account of Second Auditor's transfers	273,509 51
On account of War Department transfers	1,212,231 82
Total	<u>9,812,033 80</u>

The aggregate amount of \$3,392,992.90, standing to the credit of 95 "specific appropriations" respectively, has been carried to the surplus fund, by warrant No. 130, dated June 29, 1872.

Report of business transacted in the Third Auditor's Office, United States Treasury, in the year ended June 30, 1872.

QUARTERMASTER'S DIVISION.

The accounts of quartermasters cover a wide and varied range of disbursements and property accountability, embracing disbursements for barracks, quarters, hospitals, store-houses, offices, stables, forage and transportation of all Army supplies, Army clothing, camp and garrison equipage; the purchase of cavalry and artillery horses, fuel, forage, straw, material for bedding, stationery; hired men; per diem to extra-duty men; of the pursuit and apprehension of deserters; of the burial of officers and soldiers; of hired escorts; of expresses, interpreters, spies, and guides; of veterinary surgeons and medicines for horses; of supplying posts with water, and generally the proper and authorized expenses for the movements and operations of an army not expressly assigned to any other department. The "returns" are an account of the disposition made of all property paid for by the Quartermaster's Department, (except clothing, camp and garrison equipage, which are accounted for to the Second Auditor.)

The tabular statement herewith exhibits in a condensed form the results of the labors of the force employed in this division.

Number of letters sent out from the division during the year, 17,444; average number of clerks employed, $94\frac{6}{12}$.

A comparison of the above with my last annual report will show a large increase in the number of accounts and returns received and settled, without a corresponding increase in the amounts involved. This increase is accounted for in this way: Prior to the rebellion, accounts and returns were rendered quarterly, and after administrative action was had by the proper military bureau. Generally each account and return as rendered was transmitted to this office by a separate letter, and in making entries of receipts it became customary to consider a letter of transmittal and an account or return as numerically the same. In consequence of inadequate clerical force to dispose of the largely increased business accumulated in the Quartermaster-General's Office, all the accounts or returns of any one officer which had been examined at the time of transmittal were forwarded with one letter, which circumstance appears to have been overlooked in entering the receipt by this office, as the letters continued to be considered as synonymous with an account, when, in point of fact, the letter covered several accounts—so that the record of receipts really showed the number of letters of transmittal of the Quartermaster-General instead of the number of accounts and returns received. When this was discovered all the unexamined accounts and returns on file in this office were counted, and showed the following result on 31st August, 1871: Quartermaster accounts, per count, 2,683; quartermaster accounts, per register, 465; quartermaster returns, per count, 7,165; quartermaster returns, per register, 2,095; signal-returns, per count, 6; signal-returns per register, 2—so that the number actually on hand exceeded the number as shown by the register as follows: Quartermaster accounts, excess 2,218; quartermaster returns, excess 5,070; signal-returns, excess 4. The accounts of the officers are rendered monthly, and each monthly account is regarded and counted as one account.

SUBSISTENCE DIVISION.

This division audits the accounts of all commissaries and acting commissaries of subsistence in the Army, whose duties are to purchase the provisions and stores necessary for the feeding of the Army, and see to their proper distribution. These commissaries render monthly money-accounts, with proper vouchers, for disbursements of the funds intrusted to them, together with a provision-return, and vouchers showing the disposition of provisions and stores purchased and received during each month. These accounts are received monthly through the office of the Commissary-General of Subsistence, and are every six months (or oftener, if the officer ceases to disburse) examined and audited in this

division, and the money-accounts and vouchers, together with a certified statement of their condition, referred to the Second Comptroller of the Treasury for his decision thereon. Upon their receipt back from the Comptroller with the statement approved, the officers are then officially notified of the result of said examinations and are called upon by this office to adjust or explain any omissions or errors that may have been discovered. The money and provision accounts, together with vouchers and papers belonging thereto, are, after examination, placed in the settled files of this division for future reference and remain permanently in the custody of this office.

Annual report of the subsistence division for the fiscal year ended June 30, 1872.

	Subsistence accounts.			Refugees, Freedmen and Abandoned Lands accounts.		
	Money accounts.		Provision returns.	No.	Amount involved.	Property returns.

Number of vouchers examined, 78,772; difference-sheets written, 860; letters written, 1,069; queries answered, 1,591. Average number of clerks employed, 8.

ENGINEER DIVISION.

This division is employed in the examination of the accounts of the officers and agents of the Engineer Department, who, under direction of the Chief of Engineers of the Army, (except the Superintendent of the Military Academy at West Point, whose disbursements are directed by the Inspector-General,) disburse moneys out of various appropriations—now 248 in number—made from time to time by Congress, for works of a public nature, which may be classed under the following general heads, viz:

The purchase of sites and materials for, and construction and repairs of, the various fortifications throughout the United States;

Construction and repairs of roads, bridges, bridge-trains, &c., for armies in the field;

Surveys on the Atlantic and Pacific coasts;

Examination and surveys of the northern and western lakes and rivers;

Construction and repairs of breakwaters;

Repairs and improvement of harbors, both on sea and lake coasts;

Improvement of rivers and purchase of snag and dredge-boats for the same; and

The expenses of the Military Academy at West Point.

The average number of clerks employed on the division for the year ended June 30, 1870, was three; and the transactions of the division for the same period are shown by the following statement, viz:

	Accounts.		Supplemental and transfer settlements.	
	Number of quarters.	Amount involved.	No.	Amount admitted.
On hand per last report, June 30, 1871.....	141	\$3,405,999 77
Received during the year.....	160	5,899,094 43
Total.....	301	9,305,094 20
Reported during the year.....	212	4,387,023 36	59	\$5,600 24
Remaining on hand June 30, 1872.....	89	4,918,071 84
Total.....	301	9,305,094 20	59	5,600 24

There are now on hand only five quarters of engineer officers' money accounts for periods prior to 1871 unsettled, viz, five of the fourth quarter, 1870.

All of the balances on old accounts (some of them dating back from twenty to forty years) have been re-examined during the year, and either "closed," or where any considerable balance has been found due the United States, the officer, if alive, has been notified; or, if dead, out of the service, or not to be found, the papers have been forwarded to the collection-division.

STATE WAR-CLAIMS DIVISION.

The duties of this division embrace the settlement, under the various acts and resolutions of Congress, of all claims of the several States for costs, charges, and expenses properly incurred by them for enrolling, subsisting, clothing, supplying, arming, equipping, paying, and transporting their troops employed by the United States in aiding to suppress the recent insurrection against the United States. Also, claims on account of Indian and other border invasions.

Number of letters written during the year, 119.

Number of clerks employed during the year, 3.

CLAIMS DIVISION.

The duties of this division embrace the settlement of claims of a miscellaneous character, arising in the various branches of service in the War Department, growing out of the purchase or appropriation of supplies and stores for the Army; the purchase, hire, or appropriation of water-craft, railroad stock, horses, wagons, and other means of transportation; the transportation contracts of the Army; the occupation of real estate for camps, barracks, hospitals, fortifications, &c.; the hire of

employés, mileage, court-martial fees, traveling-expenses, communications, &c.; claims for compensation for vessels, railroad-cars, and engines, &c., lost in the military service; claims growing out of the Oregon and Washington war of 1855 and 1856, and other Indian war claims; claims of various descriptions under special acts of Congress, and claims not otherwise assigned.

The following statements show the business transacted by this division during the fiscal year ended June 30, 1872, and the condition of the business at the commencement and at the end thereof.

1.—Miscellaneous claims.

	Number.	Amount claimed.	Amount allowed.
On hand July 1, 1871.....	5, 024	*\$4, 140, 073 80
Received during the year.....	5, 523	‡3, 148, 673 98

On hand June 30, 1872.....	69	560, 873 07

HORSE-CLAIMS DIVISION.

This division is engaged in settling claims for compensation for the loss of horses and equipage sustained by officers or enlisted men while in the military service of the United States, and for the loss of horses, mules, oxen, wagons, sleighs, and harness, while in said service by impressment or contract.

The number of claims received and docketed during the year is 205, in which the aggregate amount claimed is \$44,790.56. The number settled and finally disposed of during the same period (including those received prior to, as well as during the year) is 386, in which the aggregate amount claimed is \$65,629.57, and on which the aggregate amount allowed is \$44,447.77.

There have been during the year 419 briefs made; 3,016 claims examined and suspended, and 357 claims preliminarily reported to the Second Comptroller.

The following table presents the condition of the business of this division at the commencement and close of the year, as well as its progress through the year:

	Number.	Amount.	Number.	Amount.
Claims on hand July 1, 1871			5,331	\$949,896 66
Claims received during the year			205	44,790 56
Claims reconsidered during the year.....			9	1,367 40
Total			5,545	996,054 62
Claims allowed during the year	311	\$44,447 77		
Rejected on same		7,839 03		
Amount claimed		52,286 80		
Claims disallowed during the year	75	13,342 77		
Deduct as finally disposed of during the year			386	65,629 57
Claims on hand unsettled July 1, 1872.....			5,159	930,425 05

PENSION DIVISION.

The duties devolving upon this division are keeping an account with each Army pensioner of the United States, recording the name, rate, date of commencement, noting every increase, reduction, transfer, remarriage, death and expiration, whether by limitation under existing laws, or on account of the disability having ceased. Also, keeping an account with each pension agent, (of whom there are 59,) charging him with all moneys advanced by the Government, under the several appropriations to pay pensions, receive and register the accounts as sent each month direct to this office, by the agents who have disbursed the money, and properly file them for settlement.

Each voucher is properly examined, and the payment made by the agent is entered on the roll-book opposite the pensioner's name. The act of June 17, 1870, provided that every soldier who lost a limb in the service of the United States might be furnished with an artificial limb, or, if he should so elect, may receive money commutation in lieu thereof. The bills for limbs furnished and the transportation, with the vouchers for money commutation, are all paid by the agents, and are rendered in the same manner as pension vouchers.

Congress under act July 8, 1870, changed the mode of paying pensioners, and authorized payments to be made quarterly, instead of semi-annually as theretofore. This more than doubled the labor of this division, as twice as many vouchers are received, examined, entered, filed and reported to the Second Comptroller.

Congress under act July 12, 1870, required that all accounts shall be settled for each fiscal year, separately, and the balance unexpended shall be covered into the Treasury. So far as it relates to pension agents' accounts, I think this one of the best laws enacted; but, of course, great care has to be exercised to keep the accounts correct. The act of February 14, 1871, granted pensions to the survivors and certain

widows of the war of 1812. This has increased the roll during the past year 20,127.

Congress under act June 8, 1872, amended act 6th June, 1866, which granted to certain disabled soldiers fifteen, twenty, and twenty-five dollars per month, so that now they are entitled to receive eighteen, twenty-four, and thirty-one $\frac{25}{100}$ dollars per month. This necessitates the change and increase of about seventeen thousand pensioners.

Number of pensioners on the rolls at present, as follows :

Revolutionary, half-pay, act 1848, &c	1,732
Invalids and widows, not including children, act July 14, 1862	208,923
War 1812, act February 14, 1871.....	20,127
Total.....	230,782
Number of pensioners who received limbs.....	1,332
Number of pensioners who received commutation.....	8,115

Amount drawn from the Treasury to pay pensions during the year ended June 30, 1872.

Invalids	\$9,532,400
Widows and others.....	18,323,600
War of 1812, act February 14, 1871.....	3,115,500
Total.....	30,971,500

The difference of \$2,309,902.74 between the amounts charged and the amounts reported as disbursed has been deposited and will be placed to the credit of the appropriation.

The following tabular statement shows the amount of business disposed of by this division during the fiscal year ended June 30, 1872 :

	Number.	Amount involved.
Accounts on hand July 1, 1871.....	861	\$32,658,464 89
Accounts received during the year.....	684	28,661,597 26
Total.....	1,545	61,320,062 15
Accounts reported during the year.....	900	40,000,205 68
Accounts remaining unsettled June 30, 1872.....	645	21,319,856 47
Total.....	1,545	61,320,062 15

The accounts on file unsettled are divided as follows, viz :

Accounts of 1871.....	390
Accounts of 1872.....	255
Total.....	645

Pensioners recorded, increased including additional for children of \$2 per month	52,980
Pensions transferred.....	2,298
Pension vouchers examined.....	885,154
Payments entered on roll-books.....	791,603
Pages of difference and miscellaneous copied.....	3,515
Copies of surgeons' certificates furnished Commissioner.....	1,619

The force in this division July 1, 1871, was 31 clerks and 2 copyists. During the year there were added 10 clerks and 1 copyist, which made the whole force June 30, 1872, 41 clerks and 3 copyists.

It is my desire that the work on this division shall be brought up to current work, and with that view 8 more will be added by transfer from another division of the office.

The following tabular statement exhibits the amount paid at the several agencies during the year ended June 30, 1872:

State.	Agency.	Agent.	Invalids.		Act of February 14, 1871. "1812."	Widows and others.	Total.

SOLDIERS' CLAIMS BOUNTY-LAND, AND PENSION DIVISION, WAR OF 1812.

During the fiscal year ended 30th June, 1872, 30,721 pension claims, "act of February 14, 1871," have been examined, certified, and returned to the Commissioner of Pensions for his action.

Eight hundred and ninety-nine bounty-land claims have been examined and returned to the Commissioner of Pensions as above.

COLLECTION DIVISION.

The following statement shows the work of this division during the months named, viz:

Month.	Delinquents recorded.	Delinquents examined.	Entries on register.	Cases examined.	Accounts referred to.	Vouchers examined.	Letters written.	Pages manuscript copied.	Cases referred for suit.

Total.....	2,349	1,259	1,458	1,436	2,650	4,409	1,790	296	2

A reference to previous reports will show that the amount involved in the accounts of quartermasters received in the year 1869 was \$31,816,235.59; in 1870, \$8,154,912.33; in 1871, \$23,126,666.31, and in 1872, \$44,830,613.54. The amount involved in the settlements made in the years named was as follows, viz: in 1869, \$117,504,508.64; in 1870, \$31,045,231.69; in 1871, \$13,984,186.97, and in 1872, \$43,329,640.02. The excess in the amount of settlements in this division in 1872, reported over the previous year, was \$22,752,853.49; nearly 100 per cent. greater, though the force employed was only about 75 per cent. as great as the force then employed. A large number of property-returns of officers of the Army have been settled under the act of June 23, 1870, authorizing the settlement of the accounts of officers of the Army and Navy. Prior to the rebellion it was customary to examine money-accounts and property-returns together; but, by reason of the immense amounts disbursed by officers of the Army during the war, and the possible injuries which might result should settlements be deferred until the returns could be received and examined, they were transmitted to this office separately and examined and adjusted separately in this office. The necessity of such separation does not now seem to exist, and as soon as the accounts and returns now on file are settled, it is proposed to return to the old system and settle the accounts and returns of disbursing officers together, thus insuring greater accuracy and enabling the accounting officers to examine more readily the returns of property in connection with the money-accounts disbursed in its purchase.

Your attention is again respectfully invited to the *absolute* necessity for more file-room in this office. The shelving-room suitable for accounts has long been filled, and there are now some six thousand settlements

lying upon the floors of the large file-room. These papers are of great value to the Government, and should be properly taken care of.

On the 30th of June last, the force of this office was reduced thirty-five clerks, in accordance with recommendation contained in my report of 23d of August, 1871.

Some changes have also been made for the better in the organization of the office, and the work in all the divisions is progressing in a satisfactory manner.

It affords me great pleasure to speak of the interest manifested in its business by all the clerks now employed here, and to commend their general ability, industry, and faithfulness.

Respectfully submitted.

ALLAN RUTHERFORD,
Third Auditor.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE FOURTH AUDITOR.

THE REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE

IN ANSWER TO A RESOLUTION PASSED BY THE HOUSE OF COMMONS
ON THE 12TH MARCH 1871

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE

FOR THE YEAR 1871

PRINTED BY RICHARD CLAY AND COMPANY, BUNGAY, SUFFOLK.

REPORT

OF

THE FOURTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT,
Fourth Auditor's Office, September 25, 1872.

SIR: In accordance with your request of August 8, 1872, that I should forward to you the annual report of the operations of this office for the fiscal year ending June 30, 1872, I have the honor to transmit the following tabular statements in which is embraced the information desired:

I. PAYMASTERS' DIVISION—WILLIAM CONARD, CHIEF.

Statement of accounts, including marine, received and settled in the Paymasters' Division from July 1, 1871, to June 30, 1872, with the amount of cash disbursed in those settled and the number of letters received and written in relation to the same.

PAYMASTERS' AND MARINE ACCOUNTS.

Date.	Accounts received.	Accounts settled.	Letters received.	Letters written.	Cash disbursements.
1871.					
July	50	37	130	142	\$434, 576 02
August.....	19	18	138	148	1, 192, 559 67

VIII.—DISBURSEMENT AND MISCELLANEOUS DIVISION—B. P. DAVIS IN CHARGE.

Statement of the work performed during the fiscal year ending June 30, 1872.

Number of letters written.....	452
Number of dead-letters registered.....	160
Number of checks against accounts ordered.....	365

In addition to the above, Mr. Davis has made up various tabular statements and miscellaneous reports called for by Congress and the Secretary of the Treasury; kept the record of appointments, resignations, removals, and absences; received and distributed the stationery used by the office, and discharged the duties of disbursing-clerk.

The amount of work performed by the office is very satisfactory. The same valuable assistance which I have acknowledged during previous years, on the part of my chief clerk, William B. Moore, esq., I have also received from him during the past fiscal year.

Very truly and respectfully, your obedient servant,
STEPHEN J. W. TABOR,
Auditor.

HON. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT

THE FIFTH AUDITOR OF THE TREASURY

THE FIFTH AUDITOR OF THE TREASURY
OF THE UNITED STATES OF AMERICA
FOR THE YEAR ENDING JUNE 30, 1901

REPORT OF THE FIFTH AUDITOR
OF THE TREASURY
OF THE UNITED STATES OF AMERICA
FOR THE YEAR ENDING JUNE 30, 1901

REPORT

OF

THE FIFTH AUDITOR OF THE TREASURY.

TREASURY DEPARTMENT,
Fifth Auditor's office, October 29, 1872.

SIR: Herewith are submitted the tabular statements of the operations of this office for the year ended June 30, 1872. There have been eleven thousand five hundred and sixty-six letters written, and fifteen thousand four hundred and six accounts adjusted, involving \$720,071,736. 40.

Very respectfully,

J. H. ELA,
Auditor.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE SIXTH AUDITOR.

THE SIXTH EDITION OF THE TREASURY

ON THE 15th DAY OF JANUARY 1870

The Treasury Department has the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the proposed amendments to the Act of March 3, 1879, relating to the duties on spirits of wine, &c. The same have been referred to the proper authorities for their consideration.

REPLY TO THE SIXTH EDITION OF THE TREASURY

The enclosed report and annexed tables show the results of the investigation conducted by the Treasury Department in relation to the proposed amendments to the Act of March 3, 1879, relating to the duties on spirits of wine, &c. The same are submitted for your consideration.

Very respectfully,
Your obedient servant,
J. M. [Name]Assistant Secretary

The above report and annexed tables show the results of the investigation conducted by the Treasury Department in relation to the proposed amendments to the Act of March 3, 1879, relating to the duties on spirits of wine, &c. The same are submitted for your consideration.

REPORT

OF

THE SIXTH AUDITOR OF THE TREASURY.

OFFICE OF THE AUDITOR OF THE TREASURY
FOR THE POST-OFFICE DEPARTMENT,
Washington, D. C., October 17, 1872.

SIR: I have the honor to submit the following report of the business operations of this office for the fiscal year ended June 30, 1872. My forthcoming report to the Postmaster-General will exhibit in detail all that pertains to the financial transactions of the Post-Office Department for the past fiscal year.

Pursuing the plan adopted in presenting my last annual report, I have, as far as practicable, made quarterly exhibits of the work performed, with a view of showing the increase of business.

A comparison of the tables and statements in the present report with those contained in my report for the fiscal year ended June 30, 1871, will show a steady increase of business in every division of the Bureau.

EXAMINING DIVISION—BENJAMIN LIPPINCOTT, PRINCIPAL EXAMINER.

This division receives and audits the quarterly accounts-current of all post-offices in the United States. It is divided into four subdivisions, viz, the opening-room, the stamp-rooms, the examining corps proper, and the error-rooms.

1. *The opening-room.*—All returns, as soon as received, are opened, and, if found in order, according to regulations, are entered on the register, carefully folded and tied, and then forwarded to the stamp-rooms.

The number of quarterly accounts-current received during each quarter of the fiscal year ended June 30, 1872, was as follows:

Third quarter, 1871.....	29, 218
Fourth quarter, 1871.....	29, 846
First quarter, 1872.....	30, 021
Second quarter, 1872.....	30, 119
Total.....	119, 204

2. *The stamp-rooms.*—The quarterly returns received from the opening room are divided alphabetically among eight stamp-clerks, whose duties consist in comparing the stamp-statements of the postmasters in the accounts-current with their own books and the returns made to them from the stamp-division of the finance office, whence stamp-orders are issued and receipts for the same received and forwarded to the stamp-clerks. The returns thus approved or corrected are passed to the examiners. All accounts from offices of the first and second classes are passed through the various subdivisions of the office in advance of

other returns, so that they may reach the chief examiner and his assistant with as little delay as possible.

The number of accounts examined and settled by the stamp-clerks for each quarter of the fiscal year ended June 30, 1872, was as follows:

Third quarter, 1871.....	28, 378
Fourth quarter, 1871.....	28, 806
First quarter, 1872.....	29, 713
Second quarter, 1872.....	29, 920
Total.....	<u>116, 817</u>

3. The examining corps proper is composed of seventeen clerks, among whom the returns received from the stamp-rooms are divided by sections, each comprising several States or parts of States.

The average number to each section is about 1,700. After the examination of the accounts-current and the stamp-account, reviewing and refooting the transcript of mails received, and examining all vouchers belonging to that portion of the work, the balance is drawn on all accounts of the third, fourth, and fifth classes. The returns thus examined and completed are forwarded to the registering division to be entered upon its books.

The number of accounts examined and sent to the registering division for the fiscal year ended June 30, 1872, was as follows:

Third quarter, 1871.....	28, 378
Fourth quarter, 1871.....	28, 806
First quarter, 1872.....	29, 713
Second quarter, 1872.....	29, 920
Total.....	<u>116, 817</u>

4. The error-rooms contain six clerks, who review and re-examine the error-accounts received from the registering division, and forward to each postmaster a copy of his account as stated by him and as audited and corrected by this office.

The number of accounts so corrected and copied for the fiscal year ended June 30, 1872, was as follows:

Third quarter, 1871.....	6, 092
Fourth quarter, 1871.....	7, 928
First quarter, 1872.....	6, 818
Second quarter, 1872.....	6, 683
Total.....	<u>27, 521</u>

Each subdivision reports weekly to the chief examiner, and monthly, through that officer, to the chief clerk, the progress of the work, so that the exact amount of work done by each clerk is clearly ascertained.

All vouchers relative to allowances made by the Post-Office Department for clerk-hire, lights, fuel, rent, stationery, &c., at post-offices of the first and second classes, are forwarded at the beginning of each quarter to the chief examiner and his assistant for examination. A statement is then prepared showing the vouchers received, the amount allowed, and the amount suspended when found to be in excess of the allowance.

On receipt of the returns from the examiners, these accounts are received, and the amount allowable added, and the balance drawn by the chief examiner.

The number of post-offices of the first and second classes which have received allowances for clerk-hire, rent, &c., was 344.

The number of offices of the second class having an allowance for clerk-hire only, was 159.

The number of offices having an allowance for clerk-hire to aid in separating the mails, (independent of the number above stated,) was 348.

Total number of offices of all classes receiving allowances, and approved by the chief examiner, was 851.

The expense-accounts of the offices of the first and second classes were regularly entered by the chief examiner and his assistant on the expense-register, and show quarterly the amount of vouchers received, amount allowed and amount suspended, copies of which were forwarded to each postmaster.

Attached to the examining division is a corresponding clerk, whose duty consists in corresponding with postmasters relative to errors in their accounts-current, and in making day-book entries, &c.

The amount involved in the settlement of the quarterly accounts-current of postmasters during the fiscal year, was as follows:

Third quarter, 1871	\$5,090,791 21
Fourth quarter, 1871	5,407,570 98
First quarter, 1872	5,668,583 18
Second quarter, 1872	5,394,917 30
Total	<u>21,561,862 67</u>

The labors of the examining division for the fiscal year ended June 30, 1872, have been fully completed. All accounts received in proper form have been examined and passed to the registering division. At no period has the work been more perfect in all its details. Not only has there been a decided improvement in the preparation of returns by postmasters, particularly those of first and second class offices, but, by judicious changes in the office, the efficiency of the examining corps has been greatly increased.

REGISTERING DIVISION—F. I. SEYBOLT, PRINCIPAL REGISTER.

This division receives from the examining division the quarterly accounts-current of postmasters, and re-examines and registers them, placing each item of revenue and expenditure under its appropriate head; noting also, in books prepared for the purpose, corresponding with each register, the amount of letter-postage and stamps reported as remaining on hand in each account. The same books also show the proper amount of newspaper-postage and box-rents chargeable to and compensation allowed each office contained therein, and afford a complete check in the settlement of every account.

Upon this division thirteen clerks are employed, and during the fiscal year the number of accounts registered and amount involved therein were as follows:

Third quarter, 1871	29,313,	\$5,119,153 41
Fourth quarter, 1871	29,479,	5,439,572 17
First quarter, 1872	29,696,	5,689,904 58
Second quarter, 1872	30,076,	5,417,146 35
Total	<u>118,564,</u>	<u>21,665,776 51</u>

During the fiscal year, 6,022 circulars were sent to postmasters who had failed to render their quarterly returns.

The number of changes of postmasters, establishment, re-establishment, discontinuance, and change of name of post-office, reported from

the appointment office during the fiscal year and noted by the registers, was as follows :

Third quarter, 1871.....	1, 975
Fourth quarter, 1871.....	2, 235
First quarter, 1872.....	2, 662
Second quarter, 1872.....	2, 975
Total.....	<u>9, 847</u>

The work of this division is fully up to the requirements of the office, the quarterly accounts-current received from every office having been registered to the 30th day of June, 1872, the footings and recapitulations made, and the books prepared for the registration of the accounts for the quarter ended September 30, 1872, as well as the new salary-books for the two years ending 1874.

BOOK-KEEPERS' DIVISION—F. B. LILLEY, PRINCIPAL CLERK.

This division has in charge the ledger-accounts of postmasters, late postmasters, contractors, late contractors, and the general, special, and miscellaneous accounts of the Department.

The work of this division requires the services of fourteen clerks, viz, one principal book-keeper in charge of ledger of general accounts, one assistant principal in charge of cash-book, register of deposits, stamp-journal, ledger of warrants and deposits, and day-book entries on reports approved by the Auditor; eight book-keepers of postmasters accounts, and four of contractors' accounts. The number of ledgers is 52, averaging over 575 pages each, and containing 37,307 current accounts.

The auxiliary, books from which the postings are made quarterly, are as follows: 13 registers of postmasters' accounts, 35 pay-books, 8 journals, 1 register of warrants, 3 registers of Postmaster-General's drafts, 1 stamp-journal, 1 cash-book, 1 deposit-book, 1 Auditor's draft-book, 1 money-order transfer book, 6 mail-messengers' registers, 6 registers of special mail-service, 1 route-agents' book, 1 letter-carriers' book, 1 special agents' fare-book; total, 80 books.

Accounts of offices of the first, second, and third classes, and all contractors' accounts, are balanced quarterly; all others at the end of the fiscal year.

It affords me pleasure to state that the work of this division is in a satisfactory condition, fully up to the requirements of the office.

STATING DIVISION—WILLIAM H. GUNNISON, PRINCIPAL CLERK.

This division has charge of more than thirty-two thousand general postal accounts of present postmasters, and more than eight thousand of late postmasters, subdivided into thirteen sections, varying in number from twenty-eight hundred to twenty-two hundred of the former, and from one thousand to four hundred of the latter.

Each account is stated quarterly from the various records of the office, a comparison of the items made with those of any statements of general accounts rendered by the postmasters, and with the ledgers of the book-keepers, the differences investigated, if possible adjusted, and instructions sent, according to the classification of the office, as to the disposition of the balances as audited. Other duties of the division are, to correspond with postmasters in special cases; to cause drafts to be issued for balances due the United States in cases of continued neglect or refusal to pay, in order that demand for payment may be made on sureties; to record "changes" reported weekly from the appointment office; to have "special" offices made "deposit" also, whenever the quarterly proceeds sufficiently exceed payments for the special mail service; to make reports to the Postmaster-General of failures—to pay quarterly proceeds on collection-orders, to render accounts-current for two or more quarters, to order stamps from the Department, and of new appointees to qualify within a reasonable time.

Accounts of "draft," "deposit," and "collection" offices of the first, second, and third classes have been stated much earlier during the past year than ever before, viz, from the 1st of the second month to the 20th of the third month, in the quarter succeeding that to which the items pertain, owing both to the efficiency of the clerks and the increased facilities for obtaining the various data, thus allowing statements and instructions to reach postmasters in time for examination, and any necessary entries on their own records, before rendering their general accounts for the current quarter. Accounts of postmasters at "collection" offices of the fourth and fifth classes, showing balances of \$10 or more, as stated from the ledgers each quarter, have had the items of the succeeding quarter added from later records; and, whenever the accounts continued to show such indebtedness, special instructions were sent that such amounts be included in the payments for the current

quarter. The remaining accounts of present postmasters at offices of the fourth and fifth classes were stated and balanced with the ledgers to the close of the last fiscal year, before the 31st of January, and where balances of more than \$1 were found due the United States, or balances of more than \$25 due the postmaster, instructions were sent to include the former amounts in their payments at the close of the current quarter, and giving authority to retain the latter from subsequent proceeds of their offices.

Accounts of late postmasters have been fully stated to latest dates audited, in advance of the time usually allowed for adjustment, that the results may be used in the annual report of the office to the Postmaster-General.

By the foregoing system a complete revision of all the general postal accounts, as recorded in the office, is secured each quarter, an adjustment had once a quarter with all postmasters at "draft" and "deposit" offices, and "collection" offices of the first, second, and third classes, numbering forty-five hundred and fifty-five, and at least once a year with all other postmasters, twenty-seven thousand five hundred and ten in number, when their accounts differ materially from those of the office.

Statement of the number of the general accounts of present postmasters, the increase in the number, and the classification of the offices for the fiscal year ended June 30, 1872.

COLLECTING DIVISION—E. J. EVANS, PRINCIPAL CLERK.

The duties of this division are to collect balances due from late and present postmasters throughout the United States, and to attend to the final settlement of the same. The number of clerks employed at this time is twenty, apportioned as follows:

On correspondence, 4. The duties of these gentlemen are to correspond in relation to postmasters', late postmasters' and contractors' accounts, with a view to the collection of balances due the Department, and to

prepare for submission for suit accounts of defaulting postmasters and contractors.

On drafts, 1. His duties are to locate and issue drafts for the collection of balances due by postmasters and contractors, and record the same in the draft-register; and to report to the Post-Office Department for payment all balances due to late postmasters, and record the same in a book kept for that purpose.

On changes, 1. His duties are to record all changes of postmasters reported to this office from the Post-Office Department; to enter drafts paid and file them away; to record all accounts of late postmasters in the book of balances, and to state the final action thereon.

On letter-books, 2. Their duties are to record all letters written, and address and transmit the same; also, to transmit all circulars received by them from the corresponding clerks.

On miscellaneous, 1. His duties are to examine and compare with the ledgers all accounts of late postmasters, and close the same as "uncollectible" or by "suspense," and to assist in the preparation of the Postmaster-General's annual report.

On copying, 11. Their duties are to copy all accounts of postmasters and others, and transmit the same in their respective circulars; to copy changes of postmasters; to prepare salary-books of the various post-offices in the country, and to assist in the adjustment of salaries.

I most respectfully ask your attention to the statement in the accompanying table, exhibiting the aggregate amount of balances due to late postmasters reported to the Post-Office Department. The system adopted by this office of paying credit balances is of recent origin, having been inaugurated under our present management, and is regarded as but just and equitable between the Government and its employés. The large number of cases which appears in this and last year's report explained by the fact that it is the accumulation of many years. Hereafter it is the intention of this office, as far as practicable, to pay all balances due to late postmasters annually. The gentleman to whom this work is assigned is capable and faithful, and, for the manner in which he discharges the business of his desk, is, I think, worthy of special mention.

It gives me pleasure to state that the regulations of the Department requiring current business to be dispatched on the day received are observed by the division generally, but particularly by the men on correspondence, and that they are indefatigable in the performance of the duties intrusted to them, I beg leave to refer to the annexed table as evidence, although it but imperfectly exhibits the actual labor performed.

Statement of business transacted by collecting division.

Accounts of postmasters and contractors.	No.	Amount.
Accounts of postmasters becoming late during the period from July 1, 1869, to June 30, 1871, in charge of the division.....	16, 129

Total number of reports made, 166. Total amount reported, \$306,402.30.

The foregoing statement will in no wise indicate the amount of labor performed by each clerk, or of the division as a whole; 239 letters and reports were written, and each of the 7,115 duplicates was briefed, and the necessary examinations and calculations made on the same.

The number of clerks regularly employed on this division is 4.

PAY DIVISION—C. HAZLETT, PRINCIPAL CLERK.

This division has in charge the settlement and payment of all accounts for transportation of the mails, including railroad companies, steamboat companies, and other mail contractors, special mail-carriers, mail-messengers, railway postal clerks, route agents, special agents, letter-carriers, and all miscellaneous payments.

To this division are also assigned the registration of all warrants and drafts countersigned by the Auditor, and the custody of the archives pertaining to all the branches of the office.

Accounts of contractors settled during the fiscal year ended June 30, 1872.

MONEY-ORDER DIVISION—JOHN LYNCH, PRINCIPAL CLERK.

I regret to state that, in consequence of the great pressure of business in this division, I am unable to present an exhibit of the work per-

formed by *quarters*, and in lieu of such statement the aggregates for the fiscal year ended June 30, 1872, are here given, and a comparison made with the aggregates for the fiscal year ended June 30, 1871:

Number of money-order statements received, examined, and registered during the fiscal year ended June 30, 1872.....		164,996
Number of money-order statements received, examined, and registered during the fiscal year ended June 30, 1871.....		109,221
Increase		55,775
Aggregate of money-orders issued and paid during the fiscal year ended June 30, 1872.....	\$93,432,008 50	
Aggregate of money-orders issued and paid during the fiscal year ended June 30, 1871.....	83,920,276 10	
Increase	9,511,732 40	
Number of paid money-orders received, examined, checked, and filed during the fiscal year ended June 30, 1872.....		2,568,350
Number of paid money-orders received, examined, checked, and filed during the fiscal year ended June 30, 1871.....		2,122,081
Increase		446,269
Number and amount of certificates of deposit registered, compared, and entered during the fiscal year ended June 30, 1872.....	157,706	\$41,120,100 71
Number and amount of certificates of deposit registered, compared, and entered during the fiscal year ended June 30, 1871.....	125,636	30,356,300 51
Increase	32,070	10,763,800 20
Number and amount of transfers and re-transfers registered and filed during the fiscal year ended June 30, 1872.....	6,124	\$1,006,172 50
Number and amount of transfers and re-transfers registered and filed during the fiscal year ended June 30, 1871.....	5,686	793,492 58.
Increase	438	212,679 92
Number and amount of drafts registered during the fiscal year ended June 30, 1872.....	8,802	\$4,052,011 00.
Number and amount of drafts registered during the fiscal year ended June 30, 1871.....	7,348	3,850,238 00.
Increase	1,454	201,773 00
Number of money-orders returned for correction during the fiscal year ended June 30, 1872.....		8,000
Number of money-orders returned for correction during the fiscal year ended June 30, 1871.....		6,803
Increase		1,197
Number of letters written by this division during the fiscal year.....		1,495

In conclusion, it affords me pleasure to state that the clerks and other employés of this Bureau have discharged the duties assigned to them faithfully and efficiently; and the business of the office in every branch is in a very satisfactory condition.

I have the honor to be, sir, your obedient servant,

J. J. MARTIN,
Auditor.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT

THE TREASURY OF THE UNITED STATES

TREASURY OF THE UNITED STATES

Washington, October 20, 1917

1. In accordance with the provisions of the act approved July 1, 1917, the Treasury Department has the honor to submit to you herewith a statement of the condition of the Treasury of the United States as of the close of the fiscal year ending with the month of June, 1917, and of its movement during the year preceding that time, together with recommendations to the Congress and suggestions touching its needs, conduct, and management in the future.

2. The Treasury Department has the honor to acknowledge the receipt of your report of the 10th of October, 1917, and to express its appreciation for the interest and attention which you have shown in the management of the Treasury of the United States. The Department has the honor to acknowledge the receipt of your report of the 10th of October, 1917, and to express its appreciation for the interest and attention which you have shown in the management of the Treasury of the United States.

3. The Treasury Department has the honor to acknowledge the receipt of your report of the 10th of October, 1917, and to express its appreciation for the interest and attention which you have shown in the management of the Treasury of the United States. The Department has the honor to acknowledge the receipt of your report of the 10th of October, 1917, and to express its appreciation for the interest and attention which you have shown in the management of the Treasury of the United States.

4. The Treasury Department has the honor to acknowledge the receipt of your report of the 10th of October, 1917, and to express its appreciation for the interest and attention which you have shown in the management of the Treasury of the United States. The Department has the honor to acknowledge the receipt of your report of the 10th of October, 1917, and to express its appreciation for the interest and attention which you have shown in the management of the Treasury of the United States.

REPORT
OF
THE TREASURER OF THE UNITED STATES.

TREASURY OF THE UNITED STATES,
Washington, October 29, 1872.

SIR: In obedience to statutory provisions, and in compliance with departmental regulations, I have the honor to submit to you, herewith, a statement of the condition of the Treasury of the United States, as it stood at the close of the business of the fiscal year ending with the month of June, 1872, and of its movement during the year preceding that time, together with remarks in regard to the past, and suggestions touching its needs, conduct, and management in the future.

INCREASE OF WORK.

During the past year the labor of the office has been, and continues to be, largely increased. This is due, mainly, to the following causes: To the redemption of old loans, and the change of the mode of paying interest. Payment of the interest on the registered part of the old loans, was made only *semi-annually*, and then on the *simple signing of a prepared list*. On the new loan, it is paid *quarterly* by a *separate draft* for the amount, and payable to the *order of each stockholder*:

To a new requirement, directing the weekly examination, and the giving of an official certificate as to the condition of the accounts of every disbursing officer of the Government, certifying to the Heads of Departments, or the Chiefs of Bureaus thereof, to which such officer may belong, the balance standing to the credit of such officer at the end of each week with the Treasurer, any Assistant Treasurer, designated depository, or national bank, designated as a depository of the United States. This necessitates the examination of one hundred and forty-five lists of reports of the weekly condition of the accounts of these officers, from these various depositories; and of eleven hundred and thirty-five weekly reports of disbursing officers, located in all parts of the Union. A critical comparison is made of the one with the other, and a statement of the condition of the account of each disbursing officer, as reported by the depository, is indorsed upon the back of each disbursing officer's report, stating the difference, if less than the amount reported by him. This statement is then officially certified, and returned to the head of the Department, or the chief of the bureau to which it belongs.

From present indications the work, in addition to the above, will be still further increased in consequence of the more rapid, than heretofore, redemption of mutilated currency of all kinds, superinduced by an act of Congress, that permits the registration of letters to and from this office

free of charge for either *postage or registration*, that contain mutilated currency to, or new currency in return therefor from, the Treasury; and also, by a new arrangement with Adams Express Company, including all companies connecting with that company, by which *five dollars* or more in *fractional currency*, or *fifty dollars* or more in *legal-tender United States notes*, or *mixed of both legal-tenders and fractional currency*, may be forwarded to the Treasury by any corporation, association, officer, or private citizen, and return therefor be made by new currency, or by draft, free of charge to the sender, the whole being at the sole proper charge and expense of the Government. There are still other causes for the increase of the work of the office. Among these is the larger return of the notes of national banks in liquidation.

As new loans will probably be placed, necessitating the redemption of old stocks, there will probably be no decrease of work in the immediate future. It may therefore become necessary to ask for an increase of the working force of the office within the current year. This will, however, not be done if it shall be found possible to conduct the business of the office correctly, and with safety and dispatch, with the force now employed.

CIVIL SERVICE REFORM AND PAY OF EMPLOYÉS.

No matter what plans may be adopted, or what expedients may be resorted to, for reform in the civil service of the Government, the opinion is ventured that there will be no *real reform* until adequate pay is by law provided for those engaged in that service. While the price of everything else, including the wages of labor, whether skilled or otherwise, has advanced enormously, the salaries of nearly all Government officials, save those of the Army and Navy, and of all the clerks, have remained as they were fixed by law when the purchasing power of the dollar was more than double, if not triple, what it now is.

Take, for example, the inspectors of customs—not that their case is a peculiarly hard one, for their wages have been raised one-third, while those of others have remained unchanged, but because this class of men are employed to watch the fountains, and stand sentry at the very portals of our principal sources of revenue. They are now paid only four dollars a day. This is less than is paid to many journeymen mechanics. Does any one, possessing an ordinary portion of brains, believe that under such circumstances the requisite number of honest and competent men can be procured to faithfully perform the arduous and very responsible duties required of these officers? These men have, or should have, families, for the family is ordinarily the greatest security for the man's honesty. With the present pay of these officers, it is barely possible to support a family. What is the probable result? Rather than see their wives and children suffer for the want of the comforts of life, they yield to the temptation that the Government forces upon them; and thus the revenue is defrauded to amounts many-fold that which it would cost for salaries commensurate to the services performed, and the duties required of these important officers. What is said of this class, is true to a degree of almost every civil officer and employé of the Government.

Until demagogues and a hypocritical party press shall cease their clamor for a reduction of salaries, and until legislators shall learn not to be "penny-wise and pound-foolish," there will be little hope for a thorough reform in the civil service of the Government. Another evil is the cry for a reduction of the working force in the public offices. The truth is, that the number of clerks in many of the offices is inadequate to the safe conduct of the public business.

The requirement of too many and various duties of one and the same person, prevents the application of the proper safeguards that prudence demands for the safe transaction of official business. The losses sustained in this office, and the large and more recent one in the office of the Assistant Treasurer in the city of New York, are almost, if not entirely, due to the fact that there was not sufficient help in the offices to secure the necessary checks afforded by the supervision of one man over the acts of another. The want of these needed checks has been the real cause of most if not all of the defalcations that have occurred. The large loss, last year, in the pay-bureau of the Army would not have occurred if the checks of this office that have since been placed upon that had existed at that time. The attempted reform in the reduction of the force of the offices, like that to reduce the pay of those employed therein, is in the direction directly opposite that believed to be the true one for the correct, economical, and safe transaction of the public business.

There is a class of offices that *rich men* will take, for the honor they are supposed to confer upon the holder. There is another class that *dishonest men* strive for and struggle to obtain, because of the "stealings" they hope to "make off" them. As matters are now arranged, an honest, competent *poor man* is debarred and virtually disqualified and disfranchised from holding places of public trust. None but rich men or rascals can now afford to hold any of the public offices that were formerly considered places of high honor. Then offices were conferred upon persons of distinguished honesty and ability, and were coveted by the purest and best men in the land; and office-holders were treated with respect, and were looked up to by whole communities as exemplars of private and public virtue. Now they are looked upon with suspicion and distrust.

It has become fashionable for persons who believe themselves to be reformers, to talk flippantly of the degeneracy of the public morals. It would be well for all such should they set themselves seriously to the examination of the cause, and of themselves as well, and see if they themselves are not to blame for the state of things they so much deplore.

My official life will soon end; I have no personal motives to serve, and can therefore afford, and feel constrained, without fear of demagogues, who hope to make party capital at the people's expense, to tell the honest truth as it has forced conviction upon my mind, after long experience and close observation of the workings of the public service. The conclusion arrived at is, that no real, radical reform in the civil service can be hoped for until the holding of a public office shall be considered as conferring honor upon the possessor, and the office-holder be an honor to the people he represents and serves. This, it is believed, can only be brought about by the payment of such salaries as will draw into the public service, from the more lucrative pursuits of private life, competent and honest men, every way fit for and worthy of places of honor and trust.

If our form of government is to fail, it is hoped that it may be by a bloody revolution, rather than by the corruption that it is feared will be brought into its system by the payment of low salaries to a low order of men holding its public offices. And, just here, I desire again to call attention to and reiterate all that has heretofore been said on this subject in my last and in former reports, and in an especial manner so far as the pay of the *personnel* of this office is concerned. Another year's experience has more than ever satisfied me of the correctness of the views therein set forth. But for an annual extra compensation allowed

to certain employés in this office, it would not be practicable to transact the public business pertaining thereto.

LOSSES.

In my annual report for 1869 it was stated that in the eight years and more that the Treasury of the United States had "been in my charge, during which time money transactions were had that foot on the books of the office at a sum exceeding forty-four thousand million dollars," and that "notwithstanding the fact that vast sums of money have been, and are every day, handled by hundreds of persons in this office, yet not one cent has, up to this time, been lost to the people of the United States on account of the management of the Treasury, or on account of the conduct of any employés in this office." And I went on to say that I felt "that such good fortune cannot last always. The bark of the most fortunate and skillful mariner may at last be wrecked on some hidden rock. The law of chances is now strongly against me. I therefore now, more than ever, feel an anxious desire to retire from the perilous position that I hold." The painful forebodings that then oppressed me have been verified, and came to pass within the past year.

Soon after my return from Europe, where you had sent me to aid in the negotiation of the new loan, the dreadful discovery was made that two of the officers attached to this Bureau had robbed the Government of \$62,000. Both these men had been in the office for many years. They came in with the highest recommendations for capacity, honesty, and integrity. Both of them had families of their own, and they were connected with families of the highest respectability and character. Both were members of Christian churches. Their personal behavior, conduct, and bearing in the office were such as to place them above suspicion, and to induce their promotion, through all the four grades of clerkships, to the responsible offices which they held when they yielded to temptation and fell.

Frederick A. Marden, the chief of the division of accounts, whose duty it was, in part, to pay the salaries of all the employés of this office, with the connivance of Seth Johnson, the assistant paying-teller, managed to embezzle \$12,000. Seth Johnson not only assisted Marden in perpetrating the fraud, by taking his checks on the Treasury where he had no funds, and concealing the fact by counting the checks as cash, but he himself purloined \$50,000, and covered it up by making false entries in his books. The accounts of these two defalcations now stand as follows:

Frederick A. Marden's defalcation	\$12,000 00	
Recovered from back salary	\$134 24	
Cash returned.....	322 98	
Proceeds of United States bond.....	128 81	
	<hr/>	586 03
		<hr/>
		\$11,413 97
Seth Johnson's defalcation	50,000 00	
Recovered from back salary.....	111 95	
Lockwood & Co., New York.....	1,868 04	
Fant, Washington & Co., Washington.....	10,125 81	
	<hr/>	12,105 80
		<hr/>
		37,894 20
		<hr/>
Unrecovered aggregate of both defalcations.....		49,308 17
		<hr/>

It came out, on the investigation, that Seth Johnson had lent John F. Cowen a sum of money, which, at the time of the exposure, with in-

terest, amounted to \$3,700. To secure the payment of that sum, Mr. Cowen left with the Assistant Treasurer bonds of the Cincinnati and Terre Haute Railroad Company, of the par value of \$4,000. Default having been made in payment of the notes to which these bonds were collateral, they are now the property of the United States. The market value of the bonds is not known. Whatever amount is realized from their sale will be deducted, and will reduce Johnson's defalcation by that amount.

Mortifying as all this is, yet, when compared with other ordinary money transactions, and by the laws of chances, the wonder is that it has not been much worse. When it is considered that the money transactions of the Treasury foot many millions of dollars every business day in the year, and that the losses, as compared with the footings of the books, do not amount to one ten-thousandth of one per cent. on the gross amount, it will be believed that this is a less percentage of loss by defalcations and through dishonesty than occurs from the same causes in the ordinary transactions of private business. The defalcations in banks and other moneyed institutions for the same time would show a percentage vastly in excess of those that have happened in the Treasury during the last eleven years. As an instance, a bank with a capital of only \$150,000, that was for many years in charge of myself as its executive officer, and during all that time never lost a cent, has, since I came here, lost by the defalcation of its cashier, a sum nearly equal to all the losses by defalcations that have occurred in this office since it has been in my control. I do not make this statement in excuse for my misfortunes from the acts of others, but to show that, in large business transactions, losses are inevitable.

COMPARISON OF RECEIPTS AND EXPENDITURES.

By an examination of the tables of receipts and of expenditures by warrants, that immediately follow this report, and by a comparison with the like tables of the preceding fiscal year, it will be found that the payments for the reduction of the Public Debt, and for the payments of the interest on the same, have fallen off, for this, as compared with the preceding year, \$39,199,719.29. It will also be found that there has been a decrease of gross receipts, as follows: On account of Internal Revenue, of \$12,455,975.91; from sales of war materiel, \$2,138,079.69; and from miscellaneous sources, of \$4,989,055.45. And that there has been an increase of gross receipts from the Interior Department, of \$2,546,310.41; from the Navy Department, of \$52,544.86; from sale of lands, of \$187,067.51, and from customs, in gold, of \$10,099,878.72. It will be found that there has been an increase of gross expenditures for pay of the Judiciary, of \$767,857.66; on account of foreign intercourse, of \$303,442.54; for expenditure for the Treasury proper, of \$420,604.86; for the collection of customs, of \$612,215.94; for quarterly salaries, of \$7,944.01; for the civil branch of the War Department, of \$195,665.42; on account of the Navy, of \$1,871,327.64. And that there has been a decrease of gross expenditures for the Army of \$2,565,914.31; for the Interior Department, of \$3,729,450.33; for the Treasury Interior, of \$140,403.09; for collection of the internal revenue, \$1,457,922.49.

The duty collected from national banks on their capital, circulation, and deposits, in addition to taxes collected by the collectors of internal revenue, amounted in this fiscal year to..... \$6,505,812 21
 In the preceding fiscal year to..... 6,017,460 34

The increase of duty collected this year over last was. 488,351 87

The securities left on deposit with the Treasurer, by national banks, at the close of the fiscal year, were as follows:

To secure the redemption of circulating notes.....	\$380,440,700
To secure public deposits.....	15,759,000
To secure subscriptions to the funded loan.....	3,878,300
	<hr/>
Total par value of securities held.....	400,078,000
	<hr/>

The last item has since been entirely withdrawn, as all the subscriptions to the loan of 1881 have been paid. On November 28, 1871, the deposits on account of the subscriptions, in United States stocks, amounted to \$57,267,400. On that day, the face value of the United States bonds belonging to national banks, deposited in a single vault of the Treasury, was over four hundred and fifty millions, and their market value over five hundred million dollars.

The "conscience fund" was increased during the year in various sums, aggregating \$2,997.42; and now amounts to \$129,144.77. These contributions have been made by persons who thus acknowledged not only their indebtedness, but their willingness to pay the Government what they owed it. On the other hand, the United States is indebted to individuals on various accounts, but principally for unclaimed interest on bonds. Governments should set an example of honesty to the people. The withholding of the amount of an honest indebtedness is as dishonest as, and more mean than, an absolute refusal to pay. It is therefore recommended that there shall be prepared and published, after the close of every fiscal year, a list of all unclaimed balances due from the Government that have remained upon the books of the Department for two years or more; said list to state the names of the persons to whom moneys are due, and the amount due each respectively.

In the tables that are hereunto appended will appear, in gross and in detail, the business and work of this office for the last fiscal year, and, to some extent, for former years; together with the amounts of funds received, and the particular sources of income, and the money expended, and on what account, and for what purpose paid out. Also, the issue of new and the redemption of old paper money; as well as the securities held in trust for national banks, and the notes of such banks as are in liquidation, that have been redeemed; together with various other matters of interest relating to the business operations of the Treasury of the United States.

All of which is submitted by,

Your obedient servant,

F. E. SPINNER,

Treasurer of the United States.

Hon. GEORGE S. BOUTWELL,

Secretary of the Treasury.

APPENDIX.

A.—GENERAL TREASURY.

I.—RECEIPTS AND EXPENDITURES.

1.—Receipts and expenditures by warrant.

The books of the office were closed June 30, 1872, after the entry of all moneys received and disbursed on authorized warrants within the fiscal year, as follows:

Receipts.

Received from—	Net receipts.	Counter-warrants.	Repayments.	Totals.
Loans	\$305,047,054 00	\$161,030 00	\$305,208,084 00

Carried to unavailable late depository United States, Baltimore, Maryland				3,104 64
Balance in Treasury June 30, 1872				106,551,641 24
Gross expenditures for fiscal year				819,825,349 14

NOTE.—The above balance in Treasury June 30, 1872, differs from that of the Secretary and Register as follows:

Balance as above.....		\$106,551,641 24
Deduct amount received from United States depository, St. Croix, not charged by Secretary in this fiscal year.....		1,014 48
		<hr/> 106,550,626 76
Add amounts credited to unavailable in above statement, not credited in the account of the Secretary—		
Late United States depository, Mobile	\$10,625 54	
Late United States depository, Baltimore	3,104 64	
		<hr/> 13,730 18
Balance as per statement of Secretary.....		<hr/> <hr/> 106,564,356 94

Repay covering-warrants represent repayments of money advanced to disbursing officers, and proceeds of sales of stores, both of which are credited to the appropriations from which the moneys were advanced.

Counter-warrants represent moneys returned to appropriations, which moneys had previously been expended on some other account.

2.—Warrants.

The receipts, as stated in the foregoing table, were carried into the Treasury by 12,450 covering warrants, which is 1,127 more than were issued during the preceding year. The payments were made on 27,020 authorized warrants, for the payment of which there were issued 31,757 drafts on the Treasury and the various branches thereof. This is an increase of warrants issued over the number issued during the preceding year of 1,309, but a decrease of 2 in drafts drawn.

3.—Receipts and Expenditures by Ledger.

The actual receipts and expenditures during the fiscal year, as per Cash Ledger were as follows:

	Cash, Dr.	
Cash Ledger Balance, June 30, 1871.....		\$112,685,027 73
Semi-annual Bank Duty.....	6,521,875 80	
Five-Twenty Bonds.....	5,000 00	
Bonds, Funded Loan of 1881.....	138,876,950 00	
Interest, on Funded Loan of 1881.....	1,182,550 71	
Conscience Money.....	2,997 42	
Coin Certificates.....	63,229,500 00	
Customs.....	216,375,291 24	
Legal-Tender Notes.....	69,599,804 00	
Fractional Currency.....	31,816,900 00	
Internal Revenue.....	130,642,418 33	
Sales of Public Lands.....	2,589,113 21	
Premium on sales of Coin.....	9,692,209 99	
Patent fees.....	706,978 26	
Fines and penalties.....	726,524 18	
Indian Trust fund.....	362,447 80	
Miscellaneous Interest.....	281,949 21	
Miscellaneous Revenue.....	4,054,160 61	
War.....	6,349,083 27	
Navy.....	1,119,723 22	
Prize Captures.....	187,386 95	
Profits on Coinage.....	192,301 97	
Pacific Railroad repayments.....	749,861 87	
Repayments, (chiefly pension agents).....	4,242,032 29

Depository United States, Santa Fé	298,745 19
Depository United States, Tucson	37,346 48
<hr/>	
With Depositories	1,665,850 22
With 125 National Bank Depositories	4,239,603 92
<hr/>	
Total amount in all offices to credit of disbursing officers	<u>17,357,792 16</u>

2.—*Reports.*

Statement of the reports of disbursing officers United States, received and examined at the Treasurer's office, and returned to the various Departments to which the disbursing officers belong.

From December 2, 1871, to June 29, 1872, inclusive, there were received at this office 13,929 reports of 1,135 disbursing officers, for examination, as follows:

244 Quartermasters United States Army.
296 Commissaries United States Army.
62 Paymasters United States Army.
96 Officers of the Engineer Corps, United States Army.
54 Recruiting Officers United States Army.
29 Ordnance Officers United States Army.
6 Surgeons United States Army.
1 Superintendent Military Academy.
2 Officers of the Signal Corps:
4 Officers of the Freedmen's Bureau.
34 Paymasters and Pay Inspectors United States Navy.
208 Collectors of Internal Revenue.
88 Collectors of Customs.
3 Disbursing Clerks.
8 Disbursing Agents.

IV.—TRANSFERS OF FUNDS.

To facilitate payments at points where the moneys were needed for disbursements, transfer letters, transfer orders, and bills of exchange were issued during the fiscal year, as follows:

2,178 letters on National Banks	\$41,876,960 38
359 transfer orders on National Banks	6,745,302 89
64 bills of exchange on Collectors of Customs	300,000 00
792 transfer orders on Treasurer, Assistant Treasurers, and Depositories	227,228,575 00
<hr/>	
3,393 transfers, amounting to	<u>276,150,838 27</u>

Of which amount there was in coin.....	\$86,803,000 00
And in currency.....	189,347,838 27
Total.....	276,150,838 27

V.—UNAVAILABLE FUNDS, JUNE 30, 1872.

Currency:

First National Bank, Selma, Alabama.....	\$59,978 07
Venango National Bank, Franklin, Pennsylvania.....	217,391 38
Total amount with National Banks.....	\$277,369 45
Deficit at New Orleans, (Whitaker's).....	675,270 22
Deficit at Louisville, (stolen).....	9,000 00
Deficit at Louisville, (Bloomgart's).....	11,083 52
Deficit at Santa Fé, (J. L. Collins').....	30,058 83
Total with Assistant Treasurers and Depositories.....	725,412 57
Total Currency.....	1,002,782 02

Coin:

Balances from previous to the outbreak of the rebellion:	
United States Branch Mint, Charlotte, North Carolina.....	32,000 00
United States Branch Mint, Dahlonega, Georgia.....	27,950 03
Depository United States, Galveston, Texas.....	778 66
Total Coin.....	60,728 69
Total.....	1,063,510 71

This amount has been reduced since the close of the fiscal year, by \$20,073.52, being the amount of the deficits at Louisville, Kentucky, (less \$10 additional deficit at New Orleans,) from which the Depository United States at Louisville was relieved by act of Congress.

VI.—NATIONAL BANK DEPOSITARIES.

The business transactions between the Treasury and National Banks as depositaries have been for the fiscal year as follows:

Balances brought from last year's account.....	\$7,197,115 04
Receipts during the last fiscal year.....	106,104,855 16
Receipts during the same period for fractional currency.....	2,994,444 10
Total.....	116,296,414 30
Payments during the last fiscal year.....	\$108,518,541 30
Balance due the United States, June 30, 1872.....	7,777,873 00
Total.....	116,296,414 30
Payments through expresses, at Government expense.....	\$6,745,302 89
Payments without expense to the Government.....	101,773,238 41
Total.....	108,518,541 30

VII.—OUTSTANDING LIABILITIES.

Amount covered into the Treasury to July 1, 1871.....	\$241,975 19
And in the last fiscal year.....	21,974 92
Total.....	263,950 11
There has been paid to various parties entitled to receive the same, to July 1, 1872.....	\$38,633 05
Unclaimed balance remaining in the Treasury.....	225,317 06
Total.....	263,950 11

VIII.—CONSCIENCE FUND.

Amount received from various persons from December 1, 1863, to July 1, 1871.....	\$126, 147 35
And in the last fiscal year.....	2, 997 42
Total amount received since November 30, 1863.....	<u>129, 144 77</u>

IX.—OPEN ACCOUNTS.

With Assistant Treasurers.....	9
With Designated Depositories.....	10
With United States Mints.....	10
With National Bank Depositories.....	157
With Disbursing Officers.....	107
Impersonal Accounts.....	169

B.—POST-OFFICE DEPARTMENT.

I.—RECEIPTS AND EXPENDITURES.

The receipts and expenditures for and on account of the Post-Office Department for the fiscal year have been as follows:

Cash, Dr.

Balance from last year's account.....	\$297, 539 43
Receipts:	
At Washington.....	\$92, 867 42
At Boston.....	518, 275 94
At Baltimore.....	130, 572 64
At Charleston.....	58, 358 72
At New York.....	7, 557, 962 96
At New Orleans.....	128, 025 07
At Philadelphia.....	467, 748 56
At Saint Louis.....	175, 375 03
At San Francisco.....	236, 655 61
Depositary, Buffalo, New York.....	3, 560 25
Depositary, Louisville, Kentucky.....	122 48
Depositary, Cincinnati, Ohio.....	50 00
Depositary, Mobile, Alabama.....	42, 271 64
Depositary, Pittsburgh, Pennsylvania.....	1, 160 89
First National Bank, Galveston, Texas.....	2, 637 25
First National Bank, Helena, Montana Territory.....	256 00
First National Bank, Knoxville, Tennessee.....	329 92
First National Bank, Leavenworth, Kansas.....	102 74
First National Bank, Nashville, Tennessee.....	54 15
First National Bank, Memphis, Tennessee.....	2, 598 02

	<hr/>
Amount discounted before July 1, 1871	\$215, 531 39
Amount discounted for last fiscal year	12, 200 94
	<hr/>
Total amount of discounts to July 1, 1872, as above	227, 732 33
	<hr/>

III.—DESTRUCTION OF PAPER MONEY.

1.—Number of notes destroyed.

There have been destroyed, since the commencement of the rebellion, paper representing moneys, as follows:

Old Demand Notes:	
Five Dollars	4, 353, 353 $\frac{1}{2}$
Ten Dollars	1, 999, 922 $\frac{1}{2}$
Twenty Dollars	908, 892
	<hr/>
Total number of notes destroyed	7, 262, 168
	<hr/>
Legal-Tender Notes, new issue:	
One Dollar	25, 348, 743 $\frac{1}{2}$
Two Dollars	15, 039, 741
Five Dollars	15, 087, 976 $\frac{1}{2}$
Ten Dollars	8, 144, 545
Twenty Dollars	3, 422, 788
Fifty Dollars	520, 152
One Hundred Dollars	335, 106
Five Hundred Dollars	109, 572
One Thousand Dollars	151, 075
	<hr/>
Total number of notes destroyed	68, 159, 699
	<hr/>

Legal-Tender Notes, series of 1869 :	
One Dollar.....	3,916,470
Two Dollars.....	2,469,116
Five Dollars.....	43,256
Ten Dollars.....	83,761
Twenty Dollars.....	12,423
Fifty Dollars.....	4,644
One Hundred Dollars.....	1,687
Five Hundred Dollars.....	2,065
One Thousand Dollars.....	232
Total number of notes destroyed.....	6,533,704
One-Year Notes of 1863 :	
Ten Dollars.....	617,962
Twenty Dollars.....	819,378
Fifty Dollars.....	164,436
One Hundred Dollars.....	136,212
Total number of notes destroyed.....	1,737,988
Two-Year Notes of 1863 :	
Fifty Dollars.....	135,591
One Hundred Dollars.....	96,642
Total number of notes destroyed.....	232,233
Two-Year Coupon Notes of 1863 :	
Fifty Dollars.....	118,007
One Hundred Dollars.....	144,738
Five Hundred Dollars.....	80,597
One Thousand Dollars.....	89,285
Total number of notes destroyed.....	432,627
Compound-Interest Notes :	
Ten Dollars.....	2,318,006
Twenty Dollars.....	1,498,702½
Fifty Dollars.....	1,212,300
One Hundred Dollars.....	449,823
Five Hundred Dollars.....	135,625
One Thousand Dollars.....	39,409
Total number of notes destroyed.....	5,653,865½
Fractional Currency, First Issue :	
Five Cents.....	24,091,063
Ten Cents.....	28,476,213
Twenty-Five Cents.....	16,662,758
Fifty Cents.....	15,240,794
Total number of notes destroyed.....	84,470,828
Fractional Currency, Second Issue :	
Five Cents.....	41,726,362
Ten Cents.....	52,424,389
Twenty-Five Cents.....	27,545,314
Fifty Cents.....	11,537,171
Total number of notes destroyed.....	133,233,236
Fractional Currency, Third Issue :	
Three Cents.....	16,917,923
Five Cents.....	10,397,293
Ten Cents.....	157,098,717
Fifteen Cents.....	18
Twenty-Five Cents.....	119,796,336
Fifty Cents.....	70,967,942
Total number of notes destroyed.....	375,178,229

Fractional Currency, Fourth Issue, first series :

Ten Cents.....	148,454,941
Fifteen Cents.....	17,300,891
Twenty-Five Cents.....	89,617,302
Fifty Cents.....	17,452,370
Total number of notes destroyed.....	<u>272,825,504</u>

Fractional Currency, Fourth Issue, Second Series :

Fifty Cents.....	32,660,182
------------------	------------

Coin Certificates, old issue :

Twenty Dollars.....	45,290
One Hundred Dollars.....	113,971
Five Hundred Dollars.....	17,984
One Thousand Dollars.....	59,961
Five Thousand Dollars.....	64,583
Ten Thousand Dollars.....	2,500
Total number of notes destroyed.....	<u>304,289</u>

Coin Certificates, series of 1870 :

Five Hundred Dollars.....	7,911
One Thousand Dollars.....	18,356
Five Thousand Dollars.....	5,794
Ten Thousand Dollars.....	5,190
Total number of notes destroyed.....	<u>34,251</u>

REPORT
OF
THE REGISTER OF THE TREASURY.

TREASURY DEPARTMENT,
Register's Office, November 15, 1872.

SIR: I have the honor to submit my annual report of the transactions of this Bureau for the last fiscal year.

Among the duties of this office, is that of furnishing the various and oftentimes voluminous statements from the books of this office required by the different Bureaus, members of Congress, and the public generally. These statements frequently embrace the transactions of previous years, sometimes running back even to the formation of the Government. As our centennial anniversary is at hand, it appears to me that a properly classified and arranged published statement of the receipts and expenditures of the Government, showing the amount expended under each head of appropriation, arranged in tabular form, from the inception of the Government, embracing the period of one hundred years, would be of incalculable advantage as a complete and accurate record of the fiscal transactions of the Government, as well as a statistical work of rare value.

I would respectfully suggest the following plan of the work:

RECEIPTS to be classified under two general heads, *current or ordinary*, and *extraordinary*.

FIRST.—Current or ordinary to embrace the current and usual annual sources of revenue under the following sub-classifications, viz:

CUSTOMS.—Receipts from each collection district, arranged by States, from customs, steamboat fees, fines, penalties, and forfeitures, surplus emoluments, coastwise intercourse, labor, drayage, and storage, &c.

LANDS.—Receipts from lands arranged by States, registers and receivers' fees, and all other receipts arising from the sales of lands.

DIPLOMATIC.—Receipts from consular fees, consular receipts, &c.

COURTS.—Receipts from fines, penalties, and forfeitures; surplus emoluments, &c.

TRUST FUNDS.—Receipts from interest on stocks and proceeds of sale of bonds held in trust.

MINTS AND ASSAY OFFICES.—Receipts from bullion deposits, profits on coinage, sweeps, &c.

SALES OF GOVERNMENT PROPERTY.—Receipts from sales of custom-houses, marine hospitals, waste paper, old materials, &c.

MISCELLANEOUS.—Embracing receipts from various current sources which cannot be readily classified.

SECOND.—*Extraordinary* to embrace receipts arising from extraordinary sources and intended to be applicable to meet certain emergencies that have arisen or may arise, under the following sub-classification:

LOANS.—Receipts from each loan, stating also for what purpose the loan was effected.

LOANS.—*Premiums* showing the amount of premium received from each loan.

LOANS.—*Interest* showing the amount of interest received from each loan.

INTERNAL REVENUE.—Receipts from each district, arranged by States, from internal revenue, from tax on circulation of national banks, from direct tax, and all other sources of internal revenue.

MILITARY.—Receipts from captured and abandoned property, from confiscations, from commutation from drafted persons, from deserters, &c.

NAVY.—Receipts from sales of prize-vessels, sales of vessels condemned for being engaged in the slave-trade, &c.

It is purposed to give only a general outline of the plan of classification. As the work progresses it will probably be found expedient to vary somewhat, to amplify, to condense, or otherwise modify any general plan laid down, in order that the largest and most varied amount of information may be classified in the most concise and satisfactory manner, aggregating, as far as practicable, the receipts from sources of a like character together.

Expenditures to be classified as follows:

CIVIL.—Embracing the legislative, executive, judiciary, and territorial, classifying first all compensation accounts, second all miscellaneous and contingent, and sub-classified as follows:

LEGISLATIVE.—Senate, House of Representatives, Library of Congress, Botanic Garden, Public Printing, and Court of Claims.

EXECUTIVE.—Executive proper, Department of State, Treasury Department, Independent Treasury, Interior, Internal Revenue, War Department, Navy Department, Post-Office Department, Agricultural Department, &c.

JUDICIARY.—Expenses of courts, compensation of judges, marshals, attorneys, &c.

TERRITORIAL.—Compensation of governor, judges, &c.; compensation and mileage of members, contingent expenses.

CUSTOMS:

GENERAL ACCOUNTS.—Expenses collecting revenue, revenue-cutter service, &c., arranged by ports.

REFUNDING ACCOUNTS.—Repayments to importers, debentures and drawbacks, and all other refunding accounts.

PUBLIC BUILDINGS.—Repairs, furniture, and repairs, fuel and miscellaneous items for public buildings.

CUSTOM-HOUSES.—Expenses for construction and repair, arranged by States.

MARINE HOSPITALS.—Expenses for construction and repair, arranged by States.

LIGHT-HOUSE ESTABLISHMENT.—Expenses for construction and repair, arranged by States.

MISCELLANEOUS, embracing such accounts as cannot readily be classified.

INTERNAL REVENUE:

GENERAL ACCOUNT.—Expenses collecting and assessing the internal revenue, arranged by districts.

REFUNDING ACCOUNTS.—Allowance or drawbacks, and all other refunding accounts.

MISCELLANEOUS, embracing such accounts as cannot readily be classified.

INTERIOR, (CIVIL:)

SURVEYS.—Expenses of surveys of public lands.

REFUNDING ACCOUNTS.—Repayment for lands erroneously sold, arranged by States; deposits by individuals for expenses of surveys, and all other refunding accounts.

FIVE PER CENT. FUND of the net proceeds for the sales of public lands arranged by States.

MISCELLANEOUS, embracing such accounts as cannot readily be classified.

PUBLIC BUILDINGS.—Expenditures on account of the public buildings in Washington; 1st, all compensation accounts; 2d, all for repairs; 3d, all construction accounts.

IMPROVEMENT OF AVENUES, STREETS, ETC.—1st, compensation accounts; 2d, all for repairs; 3d, all construction accounts.

PRESIDENTIAL.—1st, all compensation accounts; 2d, all for repairs; 3d, for refurnishing; 4th, for construction.

MISCELLANEOUS, embracing such accounts as cannot readily be classified.

MINT ESTABLISHMENT, expenses of buildings, compensation accounts, wages of workmen, contingent and miscellaneous.

COURT-HOUSE, POST-OFFICE, cost of sites, expenses of buildings, repairs, contingent and miscellaneous.

COAST SURVEY, classified under the appropriate heads.

INTERIOR, arranged under the general heads of *pensions* and *Indians*.

MILITARY ESTABLISHMENT, arranged by Bureaus, giving details of the expenditures for forts, improvement of harbors and rivers, arranged by States.

NAVAL ESTABLISHMENT, to be arranged by Bureaus.

PUBLIC DEBT.—Expenditures on account of the public debt, classified under the heads of *principal*, *premium*, and *interest*.

As in the receipts it is only proposed to give a general outline of the plan of classification, the detail of the work will necessarily modify any general plan that might be laid down. It would be the aim of those engaged in the compilation to so classify and arrange both the receipts and expenditures from 1776 to 1876, so as to condense such items as are of minor importance, and to amplify and enlarge upon such as are frequently required.

In connection with the foregoing I would respectfully suggest the propriety of establishing in this Bureau a division of reports and statements, the duties of which would be—

First. The compilation and preparation of the receipts and expenditures for publication annually in accordance with the law of Congress of December 30, 1871.

Second. Furnishing the statistical information annually required from this office for the estimates of appropriations, finance report, and Register's report.

Third. Compiling the various statements required by the governmental Departments, members of Congress, &c.

Fourth. The compilation, as above suggested, of the receipts and expenditures of the Government from 1776 to 1876, inclusive.

The want of a properly organized division, under the head of a competent person, to whom all letters of inquiry requiring statistical information could be referred, and whose duty it would be to furnish the multifold and valuable information annually required, has long been felt to be desirable instead of the present method of referring sometimes to one clerk and sometimes to another, resulting in frequent apparently incongruous and contradictory statements upon the same subject.

There are at present engaged upon the three first-mentioned objects a force of four clerks. Should this force be increased to six clerks, and a division, as suggested, established, the work could readily be accomplished without adding greatly to the expenses of the Bureau. It seems to me that the benefits to be derived are so apparent and so great that the additional expenses should not prevent the adoption of a plan which, if adopted, is calculated to secure uniformity and correctness in all reports emanating from this office.

Not presuming to assume that these suggestions are the best that could be devised to secure the object in view, I yet think them worthy of being submitted for your consideration, and hope they may meet your sanction and approval.

The report of business transacted is submitted under the head of the division to which it appertains.

DIVISION OF RECEIPTS AND EXPENDITURES—J. H. BEATTY, CHIEF OF DIVISION.

The following statement exhibits the work of the division for the year:

The number of warrants issued during the year for civil, diplomatic, miscellaneous, internal revenue, and public debt expenditures was.....	19,951
In the preceding year.....	19,032
Increase	919
The number of warrants issued for receipts from customs, lands, direct tax, internal revenue, and miscellaneous sources, was.....	11,330
In the preceding year.....	10,024
Increase	1,306
The number of warrants issued for payments and repayments in the War, Navy, and Interior (Pension and Indian) Departments, was.....	8,185
In the preceding year.....	7,977
Increase	208
The number of journal pages required for the entry of accounts relating to the civil, diplomatic, internal revenue, miscellaneous, and public debt receipts and expenditures was.....	4,236
In the preceding year.....	4,027
Increase	209
The number of drafts registered was.....	34,604
In the preceding year.....	29,186
Increase	5,418
The number of certificates furnished for the settlement of accounts was....	10,464
In the preceding year.....	9,537
Increase	927
The number of accounts received from the offices of the First and Fifth Auditors and Commissioner of the General Land Office, was.....	24,448
In the preceding year.....	20,984
Increase	3,464

The work of compiling the receipts and expenditures of the Government is being kept up as far as the settlement of the public accounts will permit.

The manuscript for the fiscal year ending June 30, 1870, will be ready for the printer by the 1st of December next.

In the report for 1871 your attention was called to the fact that the work of this division has been materially increased by the act of July 12, 1870. The experience of the past year has demonstrated that this increase has been much greater than anticipated, involving nearly a third more labor to the division, while the force remains substantially the same as it was prior to the passage of the law.

LOAN DIVISION—HARTWELL JENISON, CHIEF OF DIVISION.

The amount of bonds issued during the fiscal year was :

Original issues	\$133, 433, 730
Coupon-bonds converted into registered	36, 919, 800
Transfers	156, 476, 150
Total	<u>326, 829, 680</u>

The amount of bonds canceled during the year was :

Coupon-bonds exchanged for registered	\$36, 919, 800
Registered bonds transferred	156, 476, 150
Coupon and registered bonds redeemed	208, 693, 500
Total	<u>402, 089, 450</u>

The total number of coupon and registered bonds issued during the year was..	176, 715
Total number canceled	<u>324, 323</u>

This embraces only a portion of the actual redemptions during the year, as the bonds pass through the hands of the accounting officers before reaching this office.

About \$50,000,000 coupon-bonds, purchased by the Secretary, have been received, registered, canceled, and turned over to the burning committee. These bonds are first canceled by the assistant treasurer, before transmittal to the Treasurer. They also receive additional cancellation in every stage of accountability, rendering any improper use of them impossible.

The vault account shows that there have been received from the Bureau of Printing and Engraving 44,766 sheets of registered bonds, amounting to \$301,225,000; and 209,500 sheets of coupon-bonds of the funded loan of 1881, amounting to \$142,300,000, of which there is \$80,061,550 still on hand; 21,436,550 signed and sealed, and ready for delivery.

The payment of interest on the funded loan of 1881, by coin checks, meets with general approval.

Heretofore, only the names of the payees on the consolidated interest schedules have been printed, but for the next January dividend, payable at New York, the whole of the schedule will be printed, thus materially reducing the great amount of clerical work, heretofore necessary, both here and in the office of the assistant treasurer.

The following statement shows the number of cases, number and amount of registered and coupon-bonds issued and canceled during the fiscal year:

Statement showing the number of cases, number and amount of registered and coupon bonds issued and canceled during the year ending June 30, 1872.

REGISTER.

NOTE AND COUPON DIVISION—LEWIS D. MOORE, CHIEF OF DIVISION.

The following is a statement of the work performed in this division during the fiscal year:

Treasury notes (upper halves) counted, assorted, arranged, registered, and examined:	
854 One-year five per cent. Treasury notes.....	\$18,070
125 Two-year five per cent. Treasury notes.....	8,100
18 Two-year five per cent. (coupon) notes	1,600
<u>997 Total</u>	<u>27,770</u>
Three-year six per cent. Treasury notes:	
216 notes act of March 3, 1863	\$8,170
6,391 notes, act of June 30, 1864	183,100
<u>6,607 Total</u>	<u>191,270</u>

Gold certificates:	
26,410 act of March 3, 1863.....	\$52,179,000
Five and six per cent. interest notes (whole) received from the Comptroller, counted, verified, and delivered to the United States Treasurer:	
7,604 notes, amounting to	\$219,040

Seven-thirty coupon Treasury notes received, counted, assorted, arranged, registered, examined, and compared:

5 notes act July 17, 1861.....	\$3,200
199 notes act June 30, 1864, (1st series).....	21,350
260 notes act March 3, 1865, (2d series).....	47,900
568 notes act March 3, 1865, (3d series).....	52,500
<u>1,032 Total</u>	<u>124,950</u>

Five-twenty and other bonds registered, examined, scheduled, compared, and delivered to the committee:

	Amount.	Coupons Attached.
1,339 bonds act June 14, 1858.....	\$1,339,000	\$10,200
1,016 bonds act June 22, 1860.....	1,016,000	936
1,098 bonds act February 8, 1861.....	1,098,000	24,151
9,756 bonds act July 17 and August 5, 1861.....	6,034,350	194,489
<u>13,209 Total</u>	<u>9,487,350</u>	<u>229,776</u>

Detached Coupons:	
Number counted, assorted, and arranged numerically.....	4,880,624
Registered.....	4,431,806
Examined and compared.....	11,766,285

NOTES AND FRACTIONAL CURRENCY DIVISION—CHARLES NEALE, CHIEF OF DIVISION.

The following statement exhibits the number of notes and amount of fractional currency, Treasury notes, national-bank notes (of such banks as are broken or have gone into voluntary liquidation) counted, examined, canceled, and destroyed, by burning, during the fiscal year, viz:

	Number of notes.	Amount.
Legal-tender notes.....	8,645,319	\$58,064,960
Legal-tender notes, (series of 1869).....	4,956,173	9,313,118
National-bank notes.....	412,100	2,887,300
Demand notes.....	709	5,860
Postal currency.....	136,000	22,000
Fractional currency, (second issue).....	192,000	27,300
Fractional currency, (third issue).....	6,698,000	1,537,300
Fractional currency, (fourth issue).....	118,672,000	18,492,000
Fractional currency, (fourth issue, second series).....	19,448,000	7,724,000
<u>Total</u>	<u>159,160,301</u>	<u>100,073,738</u>

Discounted money, counted by the committee, and record kept in this office, viz:

Legal-tender notes	\$107,958 00
Legal-tender notes, (series 1869)	15,768 00
Demand notes	24 25
Postal currency	197 00
Fractional currency, (second issue)	156 06
Fractional currency, (third issue)	25,237 09
Fractional currency, (fourth issue)	5,659 64
Fractional currency, (fourth issue, second series)	1,038 95
Total	156,038 99
The number of notes counted this year was	159,160,301 00
The number of notes counted last year was	152,837,601 00
Showing an increase of	6,322,700 00
The amount of the notes counted this year was	\$100,073,738 00
The amount of the notes counted last year was	147,334,359 40
Showing a decrease of	47,260,621 40

TONNAGE DIVISION—W. P. TITCOMB, CHIEF OF DIVISION.

The tonnage employed in foreign trade has decreased 14,495 tons, and the tonnage employed in home trade has increased 169,634 tons, making a total increase in the tonnage of the country of 155,139 tons, as shown in the following table:

	1871.		1872.	
	Vessels.	Tons.	Vessels.	Tons.
Registered, (foreign trade)	2,721	1,425,142	2,699	1,410,647
Enrolled and licensed, (home trade)	26,930	2,857,465	28,415	3,027,099
Total	29,651	4,282,607	31,114	4,437,746

The comparison of the various classes of vessels is as follows:

	1871.		1872.	
	Vessels.	Tons.	Vessels.	Tons.
Sailing-vessels	17,298	2,286,155	17,655	2,325,375
Steam-vessels	3,567	1,087,637	3,753	1,111,552
Barges	1,472	260,343	1,621	296,106
Canal-boats	7,314	648,472	8,085	704,713
Total	29,651	4,282,607	31,114	4,437,746

This shows an increase in the number of vessels of each class as well as in the aggregate.

The proportion of the steam tonnage of the country employed in foreign trade is 15 per centum.

The increase in the aggregate tonnage of the country during the fiscal year—1,463 vessels, 155,139 tons—is made up as follows:

The sailing tonnage has increased 39,220 tons; the steam tonnage

has increased 23,915 tons; the barge tonnage has increased 35,763 tons; and the canal tonnage has increased 56,241 tons.

SHIP-BUILDING.

The total amount of tonnage built in the country during the last two years, with the numbers of vessels and amount of tonnage of each class, is shown below:

	1871.		1872.	
	Vessels.	Tons.	Vessels.	Tons.
Sailing-vessels	756	97, 176	645	76, 291
Steam-vessels	302	87, 842	292	62, 210
Barges	229	46, 822	168	24, 534
Canal-boats	468	41, 386	538	46, 017
Total	1, 755	273, 226	1, 643	209, 052

The amount of tonnage built during the year ended June 30, 1872, was 64,174 tons less than during the preceding year. The number of vessels built was smaller by 112.

The number of vessels built, and the amount of tonnage of each class, (with the exception of canal-boats,) are less than in 1871.

The canal-boat tonnage built is greater by 70 boats—4,631 tons.

The following statement exhibits the amount of tonnage built within the several grand divisions of the country during the past two years:

	1871.	1872.
Atlantic and Gulf coasts	\$150, 925	\$125, 820
Pacific coast	5, 394	2, 276
Northern lakes	43, 897	44, 612
Western rivers	73, 080	36, 344
Total	273, 226	209, 052

The number of iron vessels built during the year is the same as during the preceding year, but the tonnage is less.

Below is shown the tonnage of iron vessels built in the United States from 1868 to 1872:

	Tonnage built.				
	1868.	1869.	1870.	1871.	1872.
Sailing-vessels	None.	1, 039	679	2, 067	None.
Steam-vessels	2, 801	3, 545	7, 602	13, 412	12, 766
Total	2, 801	4, 584	8, 281	15, 479	12, 766

Of the iron vessels built during the past year one, a propeller of 1,156 tons, built at New York, was designed for foreign trade, and one iron steamer was built at Wilmington, Delaware, destined for Brazil. The remainder were for the home trade.

THE FISHERIES.

The tonnage engaged in the cod and mackerel fisheries and whale fisheries during the years 1869, 1870, 1871, and 1872 is as follows:

	1869.		1870.		1871.		1872.	
	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.	Vessels.	Tons.
Cod and mackerel	1,714	62,704	2,292	91,460	2,426	92,865	2,385	97,546
Whale fisheries	311	70,202	209	67,954	249	61,480	217	51,608

The tonnage employed in the cod and mackerel fisheries has increased somewhat for the past three years.

The following table shows the amount of tonnage employed in the cod and mackerel fisheries, with the percentage belonging in each State:

State.	Tons.	Per cent.
Massachusetts	68,263	70
Maine	18,780	19.2
Connecticut	4,392	4.5
New Hampshire	3,419	3.5
New York	1,815	1.9
Rhode Island	867	0.9
Total	97,546	100

The amount of tonnage employed in the whale fisheries continues to decline. The whole amount on the 30th day of June, 1872, was 217 vessels, 51,608 tons; a decrease since 1871 of 32 vessels, 9,881 tons, as shown below:

Ports.	1871.		1872.	
	Vessels.	Tons.	Vessels.	Tons.
New Bedford	187	51,442	166	44,320
New London	22	3,877	19	3,113
Barnstable	20	1,939	19	1,671
Edgartown	5	1,854	4	1,296
Nantucket	5	729	3	467
Salem and Beverly	5	785	2	348
Sag Harbor, N. Y.	2	261	2	261
San Francisco	3	602	2	132
Total	249	61,489	217	51,608

From the above statement it will be seen that 85 per cent. of the tonnage employed in the whale fisheries hails from New Bedford.

In closing I deem it proper to state that the organization of the Bureau remains substantially the same as at the date of my last report, except in the tonnage division. Joseph Nimmo, jr., esq., having resigned to accept of the office of supervising inspector of steamboats, W. P. Titcomb, esq., of the loan division, has been promoted to that office.

The aggregate number of persons employed in this Bureau at this date is 223, showing a reduction of 12 since June, 1871, and it will be

my aim to keep the number as low as may be consistent with the prompt performance of official duties.

I take great pleasure in bearing testimony to the general good conduct and efficiency of those engaged in the public service in this Bureau.

I remain, with great respect, your obedient servant,
JOHN ALLISON.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

Statement of the number of persons employed in each district of the United States for the collection of customs, during the fiscal year ending June 30, 1872, with their occupation and compensation, per act of March 3, 1849.

REPORT

OF

THE SOLICITOR

DEPARTMENT OF JUSTICE,
OFFICE OF THE SOLICITOR OF THE TREASURY,
Washington, D. C., November 13, 1872.

SIR: I have the honor to transmit, herewith, seven tabular statements, exhibiting the amount, character, and results of the litigation, under the direction of this Office for the fiscal year ending June 30, 1872, so far as the same are shown by the reports received from the United States attorneys for the several districts. These tables embrace respectively:

1. Suits on custom-house bonds.
2. Suits on transcripts of accounts of defaulting public officers, excepting those of the Post-Office Department, adjusted by the accounting officers of the Treasury Department.
3. Post-office suits, embracing those against officers of the Post-Office Department, and cases of fines, penalties, and forfeitures, for violation of the postal laws.
4. Suits for the recovery of fines, penalties, and forfeitures under the customs revenue and navigation laws.
5. Suits in which the United States are interested, not embraced in the other classes.
6. Suits against collector of cutsums, and other agents of the government, for refund of duties and acts done in the line of their official duty.
7. A general summary or abstract of all the other tables.

An examination of this summary will show that the whole number of suits commenced within the year was 1854, of which—

295 were of class 1, for the recovery of.....	\$1,350,773 62
115 were of class 2, for the recovery of.....	2,767,857 36
207 were of class 3, for the recovery of.....	39,760 23
432 were of class 4, for the recovery of.....	3,189,421 71
596 were of class 5, for the recovery of.....	1,219,372 19
209 were of class 6.....
Making a total sued for, as reported, of.....	8,567,185 11

Of the whole number of suits brought, 593 were decided in favor of the United States; 23 were adversely decided; 258 were settled and dismissed; in 12 penalties were remitted by the Secretary of the Treasury; leaving 968 still pending.

Of those pending at the commencement of the year, 357 were decided for the United States; 75 were decided adversely; 858 were settled and dismissed; and in 8 penalties were remitted by the Secretary of the Treasury.

The entire number of suits decided, or otherwise disposed of during the year, was 2,184; the whole amount for which judgments were ob-

tained, exclusive of decrees *in rem*, was \$942,365.67, and the entire amount collected from all sources was \$1,000,422.41.

The following tables exhibit a comparative view of the litigation of the last year, and the next preceding one:

Date.	In suits commenced during the fiscal years ending June 30, 1871, and June 30, 1872.								
	Aggregate sued for.	Aggregate in judgments for the United States.	Collected.	Decided for the United States.	Decided against the United States.	Settled and dismissed.	Remitted.	Pending.	Total number of suits brought.
June 30, 1871...	\$12,604,601 01	\$280,410 97	\$586,271 76	493	24	367	9	1,203	2,116
June 30, 1872...	8,567,185 11	397,949 82	478,450 65	593	23	256	13	968	1,854

Date.	In suits commenced prior to the fiscal years ending June 30, 1871, and June 30, 1872.					Proceedings in all suits.			
	Aggregate of judgments in old suits.	Decided for the United States.	Decided against the United States.	Settled and dismissed.	Collections in old suits.	Total number of suits disposed of.	Total number of judgments in favor of United States.	Whole amount of judgments.	Whole amount collected.
June 30, 1871..	\$908,058 20	566	183	1,142	\$703,657 30	2,804	1,059	\$1,188,469 17	\$1,289,929 06
June 30, 1872..	544,415 85	357	75	858	521,971 78	2,124	950	942,365 67	1,000,422 41

I am, very respectfully,

E. C. BANFIELD,
Solicitor of the Treasury.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

No. 1.—Report of suits on custom-house bonds instituted during the fiscal year ending June 30, 1872, in the several United States courts, and of proceedings had during said period in suits which were instituted prior thereto.

REPORT OF THE SUPERVISING ARCHITECT.

REPORT

THE SUPERVISING ARCHITECT OF THE TREASURY

UNITED STATES DEPARTMENT OF THE TREASURY
OFFICE OF THE SUPERVISING ARCHITECT
WASHINGTON, D. C., JANUARY 18, 1872

It is the duty of the Architect to submit the following statement of the progress of the work of the office during the past year, and to the Secretary of the Treasury, and to the public, in the form of a report.

The work of the office during the past year has been devoted to the execution of the plans for the construction of the new building for the Treasury Department, and to the supervision of the work of the contractors engaged in the execution of the same. The work of the office has also been devoted to the execution of the plans for the construction of the new building for the Department of the Interior, and to the supervision of the work of the contractors engaged in the execution of the same.

The work of the office during the past year has also been devoted to the execution of the plans for the construction of the new building for the Department of Justice, and to the supervision of the work of the contractors engaged in the execution of the same. The work of the office has also been devoted to the execution of the plans for the construction of the new building for the Department of the Navy, and to the supervision of the work of the contractors engaged in the execution of the same.

The work of the office during the past year has also been devoted to the execution of the plans for the construction of the new building for the Department of the Army, and to the supervision of the work of the contractors engaged in the execution of the same. The work of the office has also been devoted to the execution of the plans for the construction of the new building for the Department of the State, and to the supervision of the work of the contractors engaged in the execution of the same.

The work of the office during the past year has also been devoted to the execution of the plans for the construction of the new building for the Department of the War, and to the supervision of the work of the contractors engaged in the execution of the same. The work of the office has also been devoted to the execution of the plans for the construction of the new building for the Department of the Marine Corps, and to the supervision of the work of the contractors engaged in the execution of the same.

The work of the office during the past year has also been devoted to the execution of the plans for the construction of the new building for the Department of the Coast and Geodetic Survey, and to the supervision of the work of the contractors engaged in the execution of the same. The work of the office has also been devoted to the execution of the plans for the construction of the new building for the Department of the Mint, and to the supervision of the work of the contractors engaged in the execution of the same.

The work of the office during the past year has also been devoted to the execution of the plans for the construction of the new building for the Department of the Public Buildings, and to the supervision of the work of the contractors engaged in the execution of the same. The work of the office has also been devoted to the execution of the plans for the construction of the new building for the Department of the Public Works, and to the supervision of the work of the contractors engaged in the execution of the same.

The work of the office during the past year has also been devoted to the execution of the plans for the construction of the new building for the Department of the Public Health, and to the supervision of the work of the contractors engaged in the execution of the same.

REPORT
OF
THE SUPERVISING ARCHITECT OF THE TREASURY.

TREASURY DEPARTMENT,
OFFICE OF SUPERVISING ARCHITECT,
October 18, 1872.

SIR: I have the honor to submit the following statement of the business transacted by this office since the date of my last report, and of the progress and condition of the public works under its charge.

Sites have been purchased for the custom-house, court-house, and post-office buildings, at Chicago, Illinois, Saint Louis, Missouri, and Trenton, New Jersey, and the custom-house at Rockland, Maine. A fine and valuable site has been presented by the city of Hartford, Connecticut, and accepted, subject to the approval of the title by the Attorney-General.

Proposals were invited for a site for the proposed new Government building at Cincinnati, but it has been found impossible to obtain proposals for a piece of property well located and of suitable size. The commissioners report that it will be necessary to postpone further action until authority can be obtained from the State to condemn the property required.

Proposals have also been invited for the purchase of sites for proposed Government buildings at Fall River, Massachusetts, Utica, New York, Philadelphia, Pennsylvania, Port Huron, Michigan, Little Rock, Arkansas, and Sacramento, California.

Plans have been prepared and work commenced upon the custom-house at Chicago, Illinois, and on the extension of the court-house and post-office at Indianapolis, Indiana. Plans have also been prepared for the court-house and post-office at Trenton, New Jersey, and work will be commenced as soon as the title is approved by the Attorney-General.

The custom-houses at Cairo, Illinois, and Machias, Maine, have been completed, and are now occupied. The custom-houses at Astoria, Oregon, and Saint Paul, Minnesota, and the Marine Hospital at Chicago, Illinois, are nearly completed, and will be ready for occupancy at an early day. The remodeling of the custom-house at Baltimore, Maryland, is also completed, together with the extension of the post-office toward Second street. The remaining wing is nearly completed, and will be finished at an early day.

The custom-houses and post-offices at New London, Connecticut, and Bristol and Newport, Rhode Island, have been remodeled and thoroughly repaired. Plans have been prepared for remodeling that portion of the custom-house in Philadelphia, Pennsylvania, assigned to the use of the Assisant Treasurer, and the work is now in a satisfactory state of progress.

Work has been continued on the post-office and sub-treasury Boston, Massachusetts; court-houses and post-offices at New York City, New

York, Knoxville, Tennessee, and Columbia, South Carolina; on the custom-houses and post-offices at New Orleans, Louisiana, Portland, Oregon, Omaha, Nebraska; the custom-house at Charleston, South Carolina, and the United States Branch Mint at San Francisco, California.

Repairs, more or less extensive, have been made on the following buildings, viz: Custom-houses at Boston, Massachusetts, Dubuque, Iowa, Milwaukee, Wisconsin, New Haven, Connecticut, New York City, New York, Pittsburgh, Pennsylvania, Philadelphia, Pennsylvania, San Francisco, California, Saint Louis, Missouri, and Toledo, Ohio; court-houses at Boston, Massachusetts, and Philadelphia, Pennsylvania, and old post-office and sub-treasury, New York.

No action has been taken in regard to the court-house and post-office at Raleigh, North Carolina, the cost of the structure being limited to the sum of \$100,000, which is an amount entirely inadequate for the construction of a suitable building. It should be borne in mind that the cost of building is greater in such locations than in the principal cities of the Eastern and Western States. I recommend that no action be taken until the limitation on the cost of the building be increased to a sum that will enable the Department to erect a suitable, satisfactory, and substantial building, which cannot, in my opinion, be accomplished for a less sum than \$250,000.

I desire to renew the recommendations contained in my last annual report, to which I respectfully refer, in regard to the purchase of the Battery in New York, and the erection thereon of a suitable building for the customs department in that city, including a barge office, appraiser's stores, and custom-house, and to say that, in my opinion, no public buildings are more urgently needed at the present time.

I also desire to renew my recommendations for the purchase of the Merchants' Bank property in Baltimore, which joins and, in fact, forms a part of the custom-house building.

I also desire to renew my recommendations in regard to the iron building at New Orleans, intended for a marine hospital. The locality in which it is erected is, as I have previously stated, an unsuitable and unsatisfactory one. It would require to complete the building more than double the amount necessary to erect a suitable, convenient, and well-arranged hospital, of the pavilion plan, and would be inferior thereto. The building is rapidly falling into decay, and is, in its present condition, a disgrace to the Government. It should be completed, sold, or given to the city of New Orleans without delay.

I would also renew my recommendation that authority be obtained to sell the marine hospital at Pittsburgh, and to erect a pavilion hospital instead thereof. The building is in a dilapidated condition, and would require a very large sum to place it in repair, after which it would be of comparatively little value for hospital purposes, the defects in its plan being radical.

I desire most earnestly to recommend that an appropriation be obtained for re-building the east front and the center wing of the Treasury building, which would increase the capacity of those portions of the building nearly one-half, and would furnish very material relief to the overcrowded condition of the Treasury Department. In case this suggestion is approved, I would recommend that the entire granite work be cut, before the destruction of the old building is commenced, in which event the building could be rebuilt and ready for occupancy in a very short space of time, not exceeding two years. An examination of the building will show that the reconstruction is only a question of time, as

the material of which the old building was constructed is entirely worthless, and is rapidly disintegrating. The rooms are also small, badly lighted, and without any proper means of ventilation, and are in every respect unsuitable for office purposes.

The business of the office has, as a rule, progressed during the past year in a very satisfactory manner. The principal obstacles have arisen from the difficulty of obtaining competent, industrious, and reliable superintendents, without which it is utterly impossible for this office to control the cost of work or to secure a vigorous prosecution of the same.

I also desire to say that the employes in this office have been harder worked and have performed a greater average amount of labor than any other bureau of the Department. Their duties are mostly of a technical nature, and their places are much more difficult to fill than ordinary clerkships. Many of the salaries paid are entirely inadequate to the duties required. In this connection I desire to call special attention to the salary of the assistant supervising architect, which is entirely disproportionate to the capacity required and the duties that devolve upon that office, and I most earnestly recommend that the salary be increased to an amount sufficient to make it an inducement for a competent gentleman to secure and retain the position.

In conclusion, I have to express my thanks for the kind consideration I have received from you during the past year, and remain,

With very great respect, your obedient servant,

A. B. MULLETT,
Supervising Architect.

Hon. GEO. S. BOUTWELL,
Secretary of the Treasury.

Tabular statement of custom-houses, marine hospitals, court-houses, post-offices, branch mints, &c., under charge of this office, exhibiting the contract price of construction, actual cost of construction, cost of alterations and repairs, total cost of the work, including alterations and repairs to June 30, 1872, cost of site, and date of purchase.

Nature and location of work.	Contract price of construction.	Actual cost of construction.	Cost of alterations and repairs.	Total cost of work to June 30, 1872.	Cost of site.	Date of purchase.	Remarks.

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE

REPORT OF THE CHIEF OF THE BUREAU OF STATISTICS.

REPORT

OF THE BOARD OF STATISTICS

The Board of Statistics has the honor to acknowledge the receipt of the report of the various departments of the Government, and to present to the public a summary of the results of their operations during the year ending on the 31st day of December, 1881.

REPORT OF THE BOARD OF STATISTICS

The Board of Statistics has the honor to acknowledge the receipt of the report of the various departments of the Government, and to present to the public a summary of the results of their operations during the year ending on the 31st day of December, 1881.

In addition to the regular reports of the various departments, the Board has also received reports from the various State and Territorial Governments, and from the various foreign countries, which have been published in the various issues of the Board's publications.

The Board has also received reports from the various departments of the Government, and from the various State and Territorial Governments, and from the various foreign countries, which have been published in the various issues of the Board's publications.

The Board has also received reports from the various departments of the Government, and from the various State and Territorial Governments, and from the various foreign countries, which have been published in the various issues of the Board's publications.

REPORT

OF THE

CHIEF OF THE BUREAU OF STATISTICS.

TREASURY DEPARTMENT,
Bureau of Statistics, November 4, 1872.

SIR: I have the honor to submit the following report of the operations of this Bureau during the fiscal year ended June 30, 1872:

CLERICAL FORCE.

The clerical force of the Bureau at the close of the year consisted of twenty-nine male and eight female clerks, who were employed as follows:

Division.	Name of chief.	Number of clerks.		
		Male.	Female.	Total.
Examination	J. N. Whitney	4	1	5
Compilation	Thomas Clear	14	2	16
Tonnage and immigration	L. F. Ward	3	1	4
Registry of merchant marine	J. B. Parker	3	1	4
Revision, translation, and miscellaneous	A. W. Angerer	2	1	3
Publication and miscellaneous	James Ryan	1		1
Library and files	E. T. Peters	1	1	2
Stationery, pay, property, and copying	J. D. O'Connell	1	1	2

In addition to the female clerks above designated, one has charge of the correspondence.

At the present time the clerical force consists of one chief clerk, thirty male and nine female clerks, one of the latter being assigned from another Bureau.

WORK OF THE BUREAU.

The peculiar and varied character of the work performed in the Bureau renders it impossible to furnish a tabular statement of its nature and extent.

Division of examination.—The following embraces a part of the work performed in this division:

Number of pages of letters written	5,314
Letters acknowledged	2,317
Acknowledgments of statements written	6,300
Statements examined	2,130
Statements called for	929
Statements corrected by correspondence	1,503

The above figures give, however, a very inadequate conception of the critical and elaborate examination of the various monthly and quarterly

returns from the various custom-houses, or of the variety of work of a miscellaneous character performed in that division.

Compilation.—This division is divided into sections, embracing, respectively, statistics of home consumption, indirect and *in transitu* trade, and of merchandise warehoused and withdrawn from warehouse.

It is impossible to present any statement which will give an adequate idea of the amount of labor performed by the clerks employed in the compilation of statistics of commerce in this division.

Immigration and navigation.—The difficulties of obtaining accurate statistics of the nationality and occupation, as well as the sex, &c., of each immigrant to this country, have been increased by the larger volume of immigration and by the carelessness of those who originally record the *data*. Special efforts have been made to induce an improvement in this direction, which have only been partially successful. Exertions have been made to secure for publication accurate statistics of the departure of emigrants from this country, not entirely without success, but rendered difficult by the absence of compulsory legislation.

The compilation of statistics of navigation forms a considerable part of the work of this division, which has been increased by their publication monthly, instead of quarterly as formerly.

Numbering of vessels, tonnage, &c.—During the year official numbers were assigned to about 2,900 vessels, which involved a considerable amount of labor in carefully searching the previous records to avoid duplication, in filling up and forwarding notices to the owners, and entering the awards upon a manuscript list as well as upon the permanent records of the office. The compiling, copying, proof-reading, and distribution of the last annual list of merchant-vessels, and the usual compilations for the monthly and annual reports of the Bureau, with a variety of miscellaneous work, fully occupied the remaining time of the clerks of this division.

A statement showing the number of vessels and amount of tonnage belonging to the several custom-districts of the United States, on the 30th of June, 1872, geographically classified, is appended to this report. The aggregate tonnage of the country was 4,150,033, a net increase over that at the close of the preceding fiscal year of 38,621 tons and 521 vessels.

Revision and translation.—The large and increasing amount of statistics compiled for publication and in response to requests for information, renders the work of revision one of great magnitude. Receiving periodically, as this Bureau does, the statistical publications of various countries in continental Europe, which contain information of great value, the translation previous to publication, in addition to the translation of other information, adds very considerably to the work performed in this division.

Publication, library, and miscellaneous.—A detailed mention of the variety of work performed in these divisions would occupy too much space. It is sufficient to say that the duties of the clerks so employed are onerous and responsible.

PUBLICATIONS OF THE BUREAU.

Monthly reports of commerce and navigation.—The monthly reports of this Bureau have, as heretofore, been regularly published. Compiled at the earliest date possible after the receipt and correction of the returns, they have, no doubt, been printed as early as the arrangements of the Congressional Printing-Office would permit.

It is to be regretted that the returns cannot be obtained and published as early as is done in England; but this will be impossible while the area of our territory is so extensive, and our customs-districts so remote. Custom-house returns can be conveyed from the most distant part of the United Kingdom to London in a few hours, while for transmission from Alaska and Santa Fé to Washington, several weeks' time is usually required. A single district, like that of Texas for instance, covers an extent of territory equal to the area of England, including within its limits several remote out-ports from which reports must be received at the principal office at the port of entry of the district before monthly statements can be prepared and transmitted by the collector. If, however, the statements could be earlier received, their immediate publication prior to the correction of the numerous errors which they contain, would be deemed unwise, as tending to mislead. And while it is admitted that the monthly reports are not published so promptly as in some European countries, the undersigned is convinced from his personal observation, as well as by the admission of Government officials abroad, that in accuracy of statement the statistics of commerce and navigation, as prepared by this Bureau, are in a high degree satisfactory, and will favorably compare with most carefully prepared and trustworthy publications of other countries.

In addition to the usual statistics, miscellaneous information of great interest is published in each number, and every effort made to give the monthly increased value.

Annual report of commerce, immigration, and navigation.—The volume for the fiscal year 1871 was, in consequence of extra exertions, compiled and sent to the Congressional Printer sufficiently early to hope for its presentation to Congress in a printed form in December. But the pressure of other work upon the Congressional Printing-Office at that season, enhanced by the great amount of labor required in the composition and printing of over 800 pages of rule-and-figure work, caused some delay in its completion and distribution. The statements for the fiscal year 1872 have also been compiled and sent to the printer at the usual period; and every effort will be made to furnish the *data* to Congress early in the ensuing session.

List of merchant-vessels of the United States.—The fourth annual statement of "vessels registered, enrolled, and licensed, under the laws of the United States, designating the class, name, and place of registry," as well as the official number and signal letters awarded to each vessel, was prepared agreeably to the requirements of the act of July 28, 1866, and 2,500 copies published for distribution to the officers of customs, the commanders of United States war-vessels, and the largest merchant vessels engaged in the foreign trade, as well as to the principal ship-owners.

History of the customs-tariff legislation of the United States.—During the period under review, I had the honor to submit to you a special report on the above subject. The following extract from the introductory paragraph will partially explain the reasons why I charged myself with this extra-duty:

Regarding it as being within the legitimate province of this Bureau to furnish any statistics of public utility, especially such as may supply the *data* needed in national legislation, and aware of the absorbing interest which attaches to a discussion of questions affecting the customs tariff, I have deemed it my duty to anticipate and make provision for the calls for information which, no doubt, will soon be made.

Its reception, when published, by members of Congress and others, who stated that it supplied a want long felt, and the demand for its

distribution, not only at home, but abroad, confirmed the views expressed in the above extract.

In view of the fact that urgent requests for copies of this report have been made beyond the ability of the Bureau to supply, it is to be regretted that the resolution of the House Printing Committee to print seven thousand extra copies for distribution was not reported at a period of the session sufficiently early to insure its passage.

Personal requests from our commercial representatives in Europe were made to the undersigned for copies of this document with its appended "statement of the rates of duties under the several tariff acts from 1789 to 1870," which they averred would prove of great value to the legations and consulates of the United States.

Special report on immigration.—Ten thousand copies of this report having been printed by order of Congress for gratuitous distribution in the United Kingdom of Great Britain and Ireland, a considerable part has been sent to the consuls of the United States and others for circulation; and the undersigned, while recently in that country, made such arrangements as will insure their distribution in those places where it is believed the information will be of most service. The value of this document, and its influence in affording such information as has led to the movement of a desirable class of emigrants to this country, have been felt and acknowledged. The only drawback is the absence of funds to pay for its transmission to intending emigrants, by mail or otherwise, from Liverpool or Glasgow, to which places steamship lines have, when requested, carried the books from New York free of charge. Congress also ordered the publication of the report in the German and French languages, and the distribution of ten thousand copies of each to the countries in Europe where those languages are spoken. A translation into the German language was made in this Bureau. When ready for delivery, the edition in French will be sent to Havre and Antwerp, and that in German to Bremen or Hamburg; and efforts have already been made, to some extent, by the undersigned, and will, in the future, be exerted to have them conveyed to the interior of France, Belgium, Switzerland, Germany, and Austria. But the benefits expected from such publication cannot be realized unless funds be provided for the transmission of these books into the remote districts of the countries named, more especially of Germany, from which country the emigration of its people is not encouraged. Many copies might be so circulated, during the exposition at Vienna, as to reach interior portions of German and French speaking countries. The appropriation of a few hundred or even a few thousand dollars for the purpose indicated would, no doubt, prove a profitable investment.

The total number of persons of foreign birth who, in the year ended June 30, 1872, decided to make the United States their future home is 404,806, an increase of 83,456 over the immigration of the fiscal year 1871, of which 49,442 were males. The largest increase from any country was 58,555 from Germany, while from England the excess over the previous year was 13,234, and from Ireland 11,293. The increase from France was nearly 200 per cent., being 3,137 in 1871, and 9,317 in 1872. If the average value of an immigrant, as stated by the undersigned in the report above referred to, be \$800, the increment to our national wealth from this source in the past year amounts to \$66,764,800, while the aggregate economical value of the total addition to our population reaches the sum of \$323,844,800. Surely, so large an addition to our national wealth will justify the expenditure of a few hundred dollars for the dif-

fusion of such information as will serve to increase the volume of this tide of immigration.

The recommendation to publish an edition of at least 5,000 copies in the Danish-Norwegian language, which was submitted last year, is again renewed, and the conviction more strongly entertained that the distribution of such an edition in Scandinavian countries would yield a rich return.

STATISTICS OF INDUSTRY AND OF TRANSPORTATION.

In two previous reports, to which attention is invited, the obstacles which prevented the obtaining the above statistics were mentioned and the fact deplored. In view of the fact that such statistics are obtained by many of the governments of Europe, it is humiliating to confess that the statistics of industry are here only obtained decennially, there being no legislation to compel annual returns to the Government of the United States.

It is especially desirable to obtain information regarding the movement of the crops toward the sea-board, and of merchandise into the interior; and from the data cheerfully furnished during the past year by officers of railroads, in response to circulars from this Bureau, it is believed that it will be able, before long, to publish valuable statistics of transportation.

INTERNATIONAL STATISTICAL CONGRESS.

Having been appointed by the President official delegate to the eighth session of the international statistical congress, the chief of this Bureau left New York for St. Petersburg in June last to attend the sittings of that body. Although the official report of his action will be made to the Department of State, it will not be inappropriate to refer here briefly to his labors as a member of that congress, especially as he was chiefly engaged in the sections, respectively, of commerce and industry. In the former section he was a member of the committee charged with the preparation of a plan for the uniform nomenclature and classification, for international purposes, of mercantile commodities to be used in the published statements of external commerce, and in the movement of merchandise by railways and on navigable waters. The report of the committee on this subject was subsequently adopted by the congress. The want of a uniform classification and a uniform nomenclature in the various branches of statistics has long been felt and deplored, rendering extremely difficult a comparison of the statistical results obtained by different countries; and the supply of this deficiency is a subject which has long enlisted the earnest efforts of the leading statisticians of the world.

In the section on industry much time was also devoted to the preparation of a uniform classification, for international purposes, of the various elements which enter into industrial statistics.

STATISTICS OF LABOR.

During his visit to Europe, for the purpose above indicated, the undersigned employed his time, before and after the meeting of the congress, in investigating the cost and condition of labor in those branches which compete with similar industries in the United States. Although such an investigation formed no part of his duties, either as delegate to

the international statistical congress, or as chief of the Bureau of Statistics, and although no funds were provided by the Treasury to defray the expenses necessarily incurred in obtaining the desired information, yet as such *data* were called for by a large number of members of Congress, and sought with avidity by the public, he charged himself with this task and personally visited the most important manufacturing localities in Great Britain, Belgium, and Germany. In England he visited Liverpool, Birkenhead, Birmingham, Wolverhampton, Sheffield, Manchester, Halifax, Bradford, Leeds, Nottingham, and other places in their vicinity, as well as the "black country," and other iron-producing regions. In Scotland the iron-ship building works on the Clyde, and the manufactories of Glasgow and Dundee, occupied his chief attention. On the continent he visited Antwerp, Brussels, Liege, Seraing, Huy, Namur, Charleroi, and Jumet, in Belgium; Aix-la-Chapelle, Cologne, Dusseldorf, Eberfeld, Barmen, Crefeld, Essen, and the coal and iron districts in its vicinity, in Rhenish Prussia; Chemnitz, Dresden, and Leipsic, in Saxony, with Berlin, Frankfort, and other Prussian cities; also a number of smaller places in the several countries named. Among the most prominent industries examined on the continent may be mentioned the renowned steel-works of Mr. Krupp, at Essen; the iron and machine works of the John Cockerill Company, at Seraing; the paper-mills at Huy, and other places; the glass, iron, and coal productions of the Charleroi district; and the various manufactories in and near Chemnitz.

In France, owing to the unsettled state of the labor market, but few facts were obtained, and those chiefly in Paris, Lyons, and in those districts in the northern part of that country in which the textile fabrics and iron are chiefly produced.

In Russia the chief towns which he visited were St. Petersburg, Cronstadt, Moscow, Nijni-Novgorod, and Warsaw, none of which, except the first named, have important industries. Russia iron, the superior quality of which is universally known, being manufactured in a remote portion of Europe, the cost of production is not easily ascertained.

From some other parts of Continental Europe information was obtained through correspondence relative to the cost of labor and of subsistence.

The inquiries made in the places named embraced not only the rates of wages and the weekly earnings of male and female employés in the various industries pursued, but the cost of the chief articles of subsistence, the weekly expenditures for food, room-rent, &c., and the condition and habits of the working people as to health, comfort, education, and temperance.

Owing to the recent decided advance in the cost of labor in Europe, the published statistics on this subject were rendered comparatively valueless. If it were deemed important that the rates of wages which ruled during the past season, and which still prevail, be ascertained, extraordinary means must be resorted to; and it is manifest that the desirable result could only be accomplished through personal investigation and inquiry. The obtaining of such information was necessarily attended with difficulties, but these had to be met and surmounted. If the *data* thus personally obtained, at no small cost of labor and money, be not so full as may be desired, they are as a whole more accurate, and consequently more trustworthy than can be gathered from other sources.

The information already in the possession of the undersigned, supplemented by the facts which may yet be obtained from Europe and

America, will be compiled at as early a period as his official engagements will permit.

SALARIES OF OFFICERS.

In bearing testimony to the industry and efficiency of the clerks and other employés of this Bureau, the undersigned cannot close this report without again inviting your attention to the insufficient salaries paid to the officers. The responsible duties and exhaustive labors of the chiefs of division and other officers justly entitle them to a more adequate compensation than the salaries of clerks of the fourth class. It is respectfully urged, therefore, that several of these officers receive the salary of head of division, as provided by law for the Office of Internal Revenue.

Very respectfully, yours,

EDWARD YOUNG,
Chief of Bureau.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT

THE BUREAU OF THE WILT

The following is a report of the Bureau of the Wilt, showing the results of the operations of the Bureau during the year ending 1881. The Bureau was organized in 1878, and since that time has been engaged in the study of the Wilt, and the collection and preservation of its remains. The Bureau has been successful in its operations, and has collected a large number of specimens of the Wilt, which are now in the possession of the Bureau. The following is a list of the specimens collected by the Bureau during the year ending 1881:

1. A large number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

2. A number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

3. A number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

4. A number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

5. A number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

6. A number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

7. A number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

8. A number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

9. A number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

10. A number of specimens of the Wilt, collected from the various localities in the Wilt, and preserved in the collection of the Bureau.

REPORT
OF
THE DIRECTOR OF THE MINT.

MINT OF THE UNITED STATES,
Philadelphia, September 30, 1872.

SIR: I have the honor to submit the following report of the operations of the Mint and branches during the fiscal year ending June 30, 1872.

The deposits of bullion and the coinage of the past fiscal year compare very favorably with those of the previous year. The increase is satisfactory and encouraging.

The deposits of bullion at the Mint and branches during the fiscal year were as follows: Gold, \$40,382,551.98; silver, \$10,119,414.15; total deposits, \$50,501,966.13. Deducting from this total the re-deposits or bars made at one branch of the Mint and deposited at another for coinage, the amount will be \$46,417,453.84.

For the same period the coinage was as follows: Gold coin, number of pieces, 1,096,415—value, \$20,376,495; unparted and fine gold bars, \$15,816,692.73; silver coin, number of pieces, 9,591,362—value, \$3,029,834.05; silver bars, \$10,391,945.32; nickel, copper, and bronze, number of pieces, 3,635,500—value, \$23,020. Total number of pieces struck, 14,323,277; total value, \$49,737,987.10.

The distribution of the bullion received and coined at the Mint and branches was as follows:

Philadelphia.—At Philadelphia, gold deposited, \$2,318,773.78; gold coined, \$2,053,145; fine gold bars, \$98,125.16; silver deposited and purchased, \$2,000,623.86; silver coined, \$1,979,327.55; silver bars, \$72,976.95; nickel, copper, and bronze coinage, \$123,020. Total deposits of gold and silver, \$4,319,397.64; total coinage, \$4,326,594.66; total number of pieces, 10,465,737.

San Francisco.—At the branch mint, San Francisco, California, the gold deposits were \$25,351,270.74; gold coined, \$25,344,840.22; silver deposited and purchased, \$1,039,822.43; silver coined, \$1,137,240.04. Total deposits and purchases, \$26,391,093.17; total coinage, \$26,482,080.26; total number of pieces, 3,593,200.

New York.—The assay office in New York received during the year, in gold bullion, \$7,302,344.89; in silver bullion, including purchases, \$2,868,986.71; total value received, \$10,171,331.60. Number of fine gold bars stamped, 11,139—value, \$7,110,853.76; number of fine silver bars stamped, 16,531—value, \$2,267,940.80. Total value of gold and silver bars stamped, \$9,378,794.56.

Denver.—At the assay office, (late branch mint,) Denver, Colorado, the deposits for unparted bars were: Gold, \$985,228.27; silver, \$16,336.54; total deposits, \$1,001,564.81. As heretofore, this institution is

engaged in melting, assaying, and stamping gold and silver bars bearing the Government stamp of their weight and fineness. This office fully meets all the demands of the mining interests of Colorado, and is efficiently and economically conducted.

Charlotte.—The deposits at the branch mint at Charlotte, North Carolina, have not increased during the past year. They are assayed and returned to depositors in the form of unparted bars. The superintendent is sanguine in the belief that the deposits for the present year will exhibit a decided increase. The deposits for bars during the fiscal year were: Gold, \$16,277.94; silver parted from gold, \$213.96; total deposits, \$16,491.90.

Dahlonaga and New Orleans.—The branch mints at these places have very properly been abandoned. Certainly no present necessity, local or national, requires their re-opening or re-establishment.

Carson City.—This branch mint has been most successful in its operations during the past year. The great increase of deposits during the past over the fiscal year ending June 30, 1871, is deserving of especial notice, and is evidence of the rapid development of the rich mineral resources of that region. The deposits during the year were: Gold, \$4,371,573.55; gold coined, \$533,350; silver deposits and purchases, \$4,192,863.14; silver coined, \$95,006.50; unparted and fine bars, \$7,869,287.53. Total deposits and purchases, \$8,564,436.69; total number of pieces, 264,340.

From this statement we have the gratifying fact that the deposits of gold and silver bullion, in value, during the fiscal year have exceeded those of the past \$6,269,942.04, an increase nearly threefold. Full confidence in the future of this branch mint is felt and expressed by its energetic superintendent. The following extracts from the annual report of the superintendent speak for themselves, and his recommendations for an increase of clerical force and salaries are fully approved. He says that—

The business has steadily increased during the past year, and now exhibits an extent and promise of permanence which are highly gratifying, the last three months of the year having shown an average of over one million of dollars per month. * * *

From these statements it will be seen that the value of the gold and silver deposits during the year 1871-'72 was \$8,564,436.69; and during the year 1870-'71 was \$2,294,494.45, and that the work executed during the two periods amounted for 1871 and 1872 to \$8,497,644.03, and for the year 1870-'71 to \$2,253,235.05, having nearly quadrupled during the past year. * * *

I beg again to submit the necessity of increasing the clerical force by the appointment of an additional clerk in the treasurer's office, at a salary of \$1,800 per year. During the past year it has frequently happened that the statements and accounts from the treasurer's office could not be made up and forwarded to the Department at Washington as promptly as they should have been, from the insufficient force in the treasurer's office. * * *

I have, also, to renew the recommendation made in my report for the fiscal year 1870-'71, of an increase in the salaries of the chief clerk and treasurer's clerk, whose compensation is quite inconsistent with the duties and responsibilities of their positions. These are as onerous as those of any department of this branch mint, and require, for their proper fulfillment, persons of good business qualifications. The efficient and satisfactory manner in which the duties of their positions have been discharged by the chief clerk and acting treasurer, entitles them, I feel, to an advance of their salaries to \$2,500 per year, each. * * *

In relation to the future productiveness of the mines in connection with the deeper workings, he says:

The past year's experience on the Comstock lode has established a point upon which there had hitherto been some uncertainty in the public mind, and some among experts in mining matters, viz, that in the deeper workings of the mines, deposits of ore are reached even more extensive and rich than are found nearer the surface. This has created great faith in the permanence of the lode, and greater confidence in exploring and working it. The developments in the lowest levels of some of the prominent

mines at a depth of 1,500 feet, have given a fresh impetus to work upon the lode. Many partially-prospected claims upon which work had been for some time suspended have again been opened; new and extensive hoisting-machinery provided, and some are already showing veins of pay matter.

All the suggestions of this report are judicious, and worthy of consideration. The efficiency and economy exhibited in the management of this branch deserve commendation.

The early completion of the new branch-mint building at San Francisco is most desirable, as also important and necessary. Every effort should be made to complete it at the earliest day practicable. The work is progressing rapidly, and, with the energy already exhibited, the building will soon be ready for occupation.

Boise City.—The assay office in Boise City, Idaho, is now in active operation. In March, 1872, the first deposits were received, and from that time to the close of the fiscal year ending June 30, 1872, the total amount was: Gold, \$37,082.81; silver parted from gold, \$567.51; total deposits, \$37,650.32. These deposits were assayed, and returned in the form of stamped unparted bars to the depositor.

The superintendent in his report suggests that the general business of the office, including assaying, would be much increased "if that office were directed by the Secretary of the Treasury to issue drafts or certificates of deposit upon the Treasury or assistant treasurers of the United States in payment for deposits, as authorized by the 5th section of the act of Congress, of February 19, 1869, establishing that office." A favorable contract could be made with the express companies to transport the bullion to Philadelphia, and the cost thereof deducted from depositors.

The superintendent also refers to the fact that he has no bullion-fund out of which depositors can be paid, and that in returning the unparted bars he is compelled to give to the depositor the "assay chips," or to pay the value of such "chips" out of his private funds, to be reimbursed by the sale of the chips. This should be avoided, and he asks "that the Boise City assay office be placed on an equal footing with the others in this respect." Approving of his suggestions, I ask for them the favorable consideration of the Department and Congress. The salaries of the officers in that office are so undeniably inadequate, that I earnestly recommend their increase. The assayer (who is also superintendent) receives \$1,800 currency; the assayer in a private office in the vicinity receives \$3,000 in gold. Equal scientific knowledge and greater responsibility should command at least equal compensation. This new institution will, it is hoped, greatly aid in developing the mineral wealth of Idaho, and promote and encourage its general productive industries.

REDEMPTION OF COPPER, NICKEL, AND BRONZE COINS.

The redemption of the copper, nickel, and bronze coins by the Treasurer at the Mint, under the act of March 3, 1871, during the year ending June 30, 1872, was, in tale or nominal value, \$475,352.31.

The following statement shows the different kinds of the small coins redeemed during the year:

Statement of the amount and kind of each denomination of base coins redeemed at the Mint of the United States during the fiscal year ending June 30, 1872, under the act of March 3, 1871.

Denominations and kinds.	Number of pieces.	Value.
Copper one-cent pieces.....	1, 796, 641	\$17, 966 41
Nickel one-cent pieces.....	8, 343, 767	83, 437 67
Bronze one-cent pieces.....	7, 405, 794	74, 057 94
Bronze two-cent pieces.....	3, 125, 247	62, 504 94
Nickel three-cent pieces.....	673, 040	20, 191 20
Nickel five-cent pieces.....	4, 343, 883	217, 194 15
Total for the year.....	25, 648, 372	475, 352 31
Redeemed prior to June 30, 1871.....	10, 615, 899	178, 133 75
	36, 364, 271	653, 486 06

During the same period large orders were received for the bronze and copper-nickel coins, and the issue of the same on orders is constantly increasing. From present indications the issue of these coins will in the future exceed their redemption.

The alloy of the minor coinage has been duly assayed and regularly reported by the assayer of the Mint. The legal proportions of the constituent metals have been properly maintained.

ABRADED COINS AS A LEGAL TENDER.

The subject of the abrasion of coins, and at what limit abraded coins should cease to be a legal tender, has recently attracted much attention. The importance of the questions involved in the consideration of the subject will be at once recognized by all intelligent men.

In my last annual report I referred to this subject at length. To the views then expressed, and suggestions made, I now ask a careful attention.

TOKEN COINAGE.

Having heretofore stated my views on the convenience and necessity of a "silver token coinage," I would refer to what has been said on this subject in previous reports.

CHLORINE PROCESS.

By the authority of the Secretary of the Treasury, and with the consent of the proprietor of the chlorine process for refining and separating gold and silver, arrangements have been made for testing the same on a large scale. The necessary room has been secured in the Mint building, the apparatus provided, and when properly arranged the business of refining will commence. The experience of our Mint, and of other mints that have extensively used this process, leads to the belief, the almost irresistible conclusion that it will supersede all others within the scope of its adaptation. For a full explanation of the process, its economy and general adaptation to the required result, I respectfully refer to my remarks on this subject in my last report.

TABLE OF FOREIGN COINS.

The statement of the weight, fineness, and value of foreign coins, required by law to be made annually, will be found appended to this report. The additions will be found in this annual statement.

REVIEW OF FOREIGN COINS.

A regular part of every annual report of the Mint consists of a statement in regard to the denominations, weight, fineness, and value of foreign gold and silver coins. This is a requirement of law, and serves various useful purposes.

It will be proper, however, at this time, in addition to the statistical tables which give these details, to enlarge somewhat upon foreign systems and practice of coinage, especially as we have lately received a large accession of specimens of recent issue. These comprise not only the gold and silver but also the finishing out (*d'appoint*) of each series in copper or other cheap metal, which last, rarely departing from home, is more difficult for us to obtain than the costlier kinds. In a commercial sense, the lowest grade of foreign currency is of no importance to us, but it is quite important we should know what rules are observed abroad in regard to such issues, what kinds of metal are used, what sizes represent a given value, and to what degree of minuteness the sizes are carried, as also the general style of device and appearance. No collection of coins is complete without them. I will, therefore, offer some miscellaneous remarks, as may be called for in each series.

Austria.—As in other nations of Europe, the coinage of this empire has been, during the last few years, in a state of transition, we might say almost of confusion. There are three series of gold coins, of different bases, and as many of silver, without respect to the differences of device and inscription growing out of the severance of Hungary from Austria proper. They still coin the gold ducat and the quadruple ducat, but they have recently discontinued the souverain and introduced the four-florin or ten-franc piece, corresponding to the same coin issued in France and some other countries.

The fourfold ducat, (*vierpache ducaten*), or quadruple, is a beautiful and remarkable coin, and I wish to notice it particularly, because it fulfills certain conditions which have heretofore been spoken of, by which coins can be protected from the most dangerous kind of tampering or fraud. It has a larger diameter than our double eagle, and is of finer metal, and yet has less than half the value of that coin. Of course it is proportionately thin, but this tenuity entirely sets at naught the cunning villainy of sawing out the interior and inserting a disk of inferior metal, by which a few of our coins have been turned into frauds. If it be said that a thin coin cannot well bring up the devices in a coining-press, these perfectly-struck pieces furnish a reply. On the other hand, it must be allowed that there are advantages in having a good body for the coin, and it is not intended to argue the question, but merely to present the point in passing.

The last annual statement of Austrian coinage shows considerable activity, though not what we might expect from a rich and populous empire. This falling off appears to be true at the present time of all the mints in Europe, except those of London and Berlin.

When Austrian rule extended over a part of Italy, there were five mints in the whole realm; now there are three, in Austria, Hungary, and Transylvania. The coins struck in Hungary, though similar in denominations and value to those of Austria, bear the language of the Magyars.

The new gold pieces, one marked eight florins, the other four florins, the latter alone having been struck so far, are intended as an offering to the scheme of international currency, being concurrent with the gold coins of France, Belgium, Italy, and Sweden. It will serve a commer-

cial, but hardly a domestic use, in Austria, since it is not strictly on a par with four silver florins, but is to be rated by agreement of parties. The ducat series, also, is mainly for foreign trade.

It is surprising that Austria and other German powers still keep up the system of making *billon* coins, base mixtures of silver and copper, which look very well with their whitened surface when they first leave the mint, but soon acquire a mongrel hue, by no means so agreeable as mere copper. By far the largest part of mint work in Austria, in 1870, was upon these pieces of twenty and ten kreutzers. There is a very large profit on them, as compared with the whole florin piece. The latter is coined at the rate of 90 florins to one kilogram of fine silver. The base pieces are at the rate of 150 florins to the kilogram. This new proportion was introduced in 1868.

It is a curious fact that the thaler or dollar of the Empress Maria Theresa, originally bearing date 1780, has always been a favorite at the eastern ports of the Mediterranean, and for that reason has continued to be coined for that trade ever since. We have a fine specimen coined in 1871, but dated 1780.

It is worth while to notice, for its bearing on an interesting controversy in mint legislation, in which strong minds have taken opposing sides, that in 1868 there was a coinage of some millions of this "Levant thaler," mainly to supply the needs of the English army going to the Abyssinian war, not, indeed, to be spent in that far-off country, but at places along the road. Now, if it were the law in Austria to coin *without charge*, it would be an exhibition of liberality hard to account for, to help the British government in that way, and not quite fair toward the opposite party in Africa. Yet we would be doing the same thing by making silver dollars to pass in China or India, and dimes for the West Indies and South America, and gold coin for any foreign use, without deducting something for the manufacture. England is doing this in sending her gold coin abroad simply as so much bullion, paying the cost of the coinage out of her treasury, whereby she has indeed the honor of seeing her sovereign's image and superscription in all lands, and of making a universal commercial currency. Still it is desirable and just to promote the coinage of gold and silver by making the charge as light as possible.

Germany.—The new gold coins of the German empire are the pieces of twenty marks and ten marks, at the rate of 125.55 pieces of ten marks to be coined out of one mint pound (half kilogram) of gold, nine-tenths fine; the larger piece in proportion. This makes the piece of twenty marks to weigh 7.965 grams, or 122.92 grains troy, and its value \$4.76.2. (Ten marks, \$2.38.1.) This does not harmonize with any system, English, French, Austrian, or American, and seems to be a declaration against international standards. A very large issue of this money has commenced, the material for which is in a great degree derived from the melting down of coins which lately bore the head of Napoleon. A change in the balance of trade, or the influx of Germans, may bring this coin to us in quantities. At present we must be limited to specimens.

It may seem a small matter, and yet it is significant, that this new money displays the effigy of the Emperor without the wreath of laurel on the brow. It was there recently, while he was King of Prussia, but the change of state seems to have brought with it an advance of popular ideas. Monarchs are not as far above their subjects as formerly. Indeed, it is stated that the new coining-die was engraved with this ancient mark of distinction on the one hand and subjection on the other, but

the Emperor forbade its use, and insisted on appearing without crown or laurel.

It is plainly the intention that both gold and silver shall be legal tenders in all payments; yet the two do not fit neatly together. The piece of ten marks is to be equal to $3\frac{1}{2}$ silver thalers, or $5\frac{1}{2}$ florins of South Germany, or 8 marks $5\frac{1}{2}$ schillings of Hamburg. That rate makes the Prussian thaler equal to 71.46 cents (gold) of our money, which is just about what it would be worth in gold in the bullion-market of London. The proposed new coinage-charges on gold, when reduced to intelligible terms, are about $\frac{2}{7}$ of one per cent. for twenty-mark pieces, and $\frac{3}{7}$ for ten-mark pieces.

Of the lesser German states, Wurtemberg, Bavaria, Baden, Hanover, and others, we have recent specimens in silver and copper. They are chiefly interesting for two reasons: that this is the last of them, on account of being merged in the new empire; and that they are such perfect specimens of the minting art. In this latter respect they must claim the victory over the coins of much larger countries. Perhaps their mints have so little to do that they can afford to do it as if a prize awaited them. However, the German states, and some of the Italian, have long held this superiority.

Russia.—Very little is to be said of the coinage of this vast empire. Platinum is no longer used, and even gold is scarce, although this is largely a gold-producing country. The smaller silver coins show a notable reduction of weight, following the principle of making them tokens, and not of full value.

Sweden.—We have the novelty of a gold *carolin*, or piece of ten francs, according to the French standards. It bears no relation to the usual silver currency of the country.

France.—No gold coinage is executed here at present. The silver remains as before, with a return to the republican dies of 1848, and the vast female head which symbolizes liberty.

Spain.—The coins of this country show the changes of history and of monetary names and devices. The head of Isabella is followed by the full-length recumbent figure of republican Spain, stretched out from the Pyrenees to the straits of Gibraltar. This is displaced by the new series of King Amadeo I. Formerly the *escudo* was a gold money, intended to be equal to two dollars. In later times it has been the normal money of account, and represented both in gold and silver, being worth about half a dollar. But now, in 1869-'70, we have the *peseta*, or pistareen, parallel with the franc, and taking rank as the normal piece. It is divided centesimally, so that there are silver pieces of fifty centesimos, and copper down to one cent. The old Spanish dollar has been brought down to a level with the French piece of five francs. It is called five *pesetas*.

The coins of *Denmark* and *Belgium* require no special notice. Nickel has been used in the inferior Belgian currency for about twelve years.

Italy.—A change to the lira system was made in the papal coins in 1869; but now that coinage is entirely superseded, and the money of the kingdom substituted.

England continues to take the lead in the amount of coinage. Until recently no official annual report of minting operations was issued, but now there is such a document, containing much valuable information, not confined to the account of British moneys. The mint-officers are thoroughly imbued with the spirit of improvement.

The mints of Sydney and Melbourne, in Australia, contribute largely to swell the aggregate of gold coin. The last named, which is near the

gold-fields, has recently gone into operation. Engraved views of the interior of this mint, which have lately reached us, evince perfection of art and completeness of arrangement. We are surprised, unreasonably, of course, at such results in what was regarded as the end of the earth only a few years since.

The Anglo-Indian mints of Calcutta and Bombay show, by their annual reports, much activity and a large amount of work, especially in silver. Great system is manifest, and the average fineness is identical with the legal standard, or as nearly so as can anywhere be shown.

Japan.—By one of those immense strides which have signalized this country of wonderful progress, a new mint and a new series of coin have been established, taking rank with the foremost. The former master of the Anglo-Chinese mint at Hong-Kong has taken charge of the mint of Japan. It is all the more honorable to the government of that empire that it is ready to make use of aid from abroad so long as it may be needed. The gold and silver series are almost coincident with our own in weight and fineness, except the lower class of silver. There are five denominations of gold coin, and as many of silver. They have been thoroughly examined and tested by the proper officers of this mint, and a detailed report upon them was made in May last. It will be seen by the annexed tables that the gold piece of twenty *yen* is nearly parallel with our piece of twenty dollars. Under this are the denominations of ten, five, two, and one *yen*. In silver there is the piece of one *yen*, or dollar, for commercial use, and not for home currency; below this the fifty, twenty, ten, and five *sen*, a word corresponding to *cents*. These four pieces are only 800 fine. The values are given in the tables.

We have new coins of other nations and provinces also, most of which are interesting to the numismatist rather than to the trader. Those of *Finland*, *Servia*, and *Roumania* are rarely seen here.

MEDAL DEPARTMENT.

This department has been in successful operation during the year. A large number of medals have been made and sold, and the demand is constantly increasing. This department does honor to the Government, and should be continued and encouraged.

THE MINT-CABINET.

The cabinet of coins and medals continues to attract large numbers of visitors. The full set of the new and improved coins of the Japanese empire was presented to the cabinet by the Emperor of Japan, through the recent embassy from that country. They have been placed in juxtaposition with the ancient coins of Japan, and mark at once the great improvement in their coinage, and the advancing civilization of that people.

The cabinet, in its collection of the new and the old, the present and the past, is a place of much interest to the antiquarian and numismatist. The centuries of the past speak to the present through their coins and medals. Valuable additions have been made to the collection of coins during the year. The annual appropriation for this cabinet should be increased.

STATISTICAL TABLES.

The statistics relating to the deposits of bullion and coinage at the

Mint of the United States and branches will be found in the tables hereto annexed. They are prepared with care, and are believed to be accurate.

I am, sir, very respectfully, your obedient servant,

JAS. POLLOCK,

Director.

Hon. GEORGE S. BOUTWELL,

Secretary of the Treasury, Washington, D. C.

LIST OF TABLES IN APPENDIX.

- A.—Statement of bullion deposited at Mint of the United States and branches during fiscal year ending June 30, 1872.
- B.—Statement of gold and silver of domestic production, deposited at Mint of United States and branches during the fiscal year ending June 30, 1872.
- C.—Statement of coinage at Mint of United States and branches during the fiscal year ending June 30, 1872.
- D.—Coinage at Mint of the United States, from organization to close of fiscal year ending June 30, 1872.
- E.—Coinage at branch mint, San Francisco, from organization to June 30, 1872.
- F.—Coinage at branch mint, New Orleans, from organization to January, 1861.
- G.—Coinage at branch mint, Dahlonega, Georgia, from organization to February 28, 1861.
- H.—Coinage at branch mint, Charlotte, North Carolina, from organization to March 31, 1861.
- I.—Coinage at assay office, New York, from organization to June 30, 1872.
- K.—Coinage at branch mint, Denver, Colorado, from organization to June 30, 1872.
- K.—Coinage at branch' mint, Carson City, Nevada, from organization to June 30, 1872.
- K.—Coinage at assay office, Boise City, Idaho, from organization to June 30, 1872.
- L.—Summary exhibit of coinage at Mint and branches to close of year ending June 30, 1872.
- M.—Gold of domestic production deposited at Mint of United States to close of year ending June 30, 1872.
- N.—Same at branch mint, San Francisco, to June 30, 1872.
- O.—Same at branch mint, New Orleans, to January 31, 1861.
- P.—Same at branch mint, Dahlonega, Georgia, to February 28, 1861.
- Q.—Same at branch mint, Charlotte, North Carolina, to June 30, 1872.
- R.—Same at assay office, New York, to June 30, 1872.
- S.—Same at branch mint, Denver, Colorado, to June 30, 1872.
- S.—Same at branch mint, Carson City, Nevada, to June 30, 1872.
- S.—Same at assay office, Boise City, Idaho, to June 30, 1872.
- T.—Summary exhibit of gold deposited at Mint of United States and branches to June 30, 1872.
- U.—Statement of amount of silver coined at Mint of United States, and branches at San Francisco, New Orleans, and Carson City, under act of February 21, 1853.
- V.—Statement of amount of silver of domestic production deposited at the Mint of the United States and branches, from January, 1841, to June 30, 1872.
- W.—Statement of gold and silver deposited at Mint of United States and branches for coinage to June 30, 1872.
- X.—Statement of weight, fineness, and value of foreign gold coins.
- Y.—Statement of weight, fineness, and value of foreign silver coins.

B.—Statement of gold and silver of domestic production deposited at the Mint of the United States; the branch mint, San Francisco; assay office, New York; branch mints, Denver, Charlotte, Carson City; and assay office, Boise City, during the fiscal year ending June 30, 1872.

Description of bullion.	Mint of United States, Philadelphia.	Branch mint, San Francisco.	Assay office, New York.	Branch mint, Denver.	Branch mint, Charlotte.	Branch mint, Carson City.	Boise City Assay office.	Total.

A statement of foreign gold and silver coins, prepared by the Director of the Mint, to accompany his annual report, in pursuance of the act of February 21, 1857.

EXPLANATORY REMARKS.—The first column embraces the names of the countries where the coins are issued; the second contains the name of the coin, only the principal denominations being given. The other sizes are proportional; and when this is not the case the deviation is stated.

The third column expresses the weight of a single piece in fractions of the troy ounce, carried to the thousandth, and in a few cases to the ten thousandth of an ounce. The method is preferable to expressing the weight in grains for commercial purposes, and corresponds better with the terms of the Mint. It may be readily transferred to weight in grains by the following rules: Remove the decimal point; from one-half deduct four per cent. of that half, and the remainder will be grains.

The fourth column expresses the fineness in thousandths, *i. e.*, the number of parts of pure gold or silver in 1,000 parts of the coin.

The fifth and sixth columns of the first table express the valuation of gold. In the fifth is shown the value as compared with the legal contents or amount of fine gold in our coin. In the sixth is shown the value as paid in the Mint, after the uniform deduction of one-half of one per cent. The former is the value for any other purposes than recoinage, and especially for the purpose of comparison; the latter is the value in exchange for our coins at the Mint.

For the silver there is no fixed legal valuation, the law providing for shifting the price according to the condition of demand and supply. The present price of standard silver is 123½ cents per ounce, at which rate the values in the fifth column of the second table are calculated. In a few cases, where the coins could not be procured, the data are assumed from the legal rates, and so stated.

X.—Gold coins.

REPORT ON THE PROGRESS OF THE WORK DURING THE YEAR 1900

REPORT
THE COMMISSIONER OF INDIAN AFFAIRS

REPORT OF COMMISSIONER OF INDIAN AFFAIRS.

REPORT

THE COMMISSIONER OF INDIAN AFFAIRS

DEPARTMENT OF THE INTERIOR
WASHINGTON, D. C., August 1, 1887

Very respectfully referring to your communication of August 1st, 1887, setting forth the report of the Indian Commissioner of the United States to Indian Affairs, I have the honor to acknowledge the receipt of the same and to inform you that the same has been forwarded to the proper authorities for their consideration. I have the honor to acknowledge the receipt of your letter of August 1st, 1887, and to inform you that the same has been forwarded to the proper authorities for their consideration.

Very respectfully,
W. H. SMITH,
Secretary of the Treasury

DEPARTMENT OF THE INTERIOR
WASHINGTON, D. C., August 1, 1887

I have the honor to acknowledge the receipt of your communication of August 1st, 1887, and to inform you that the same has been forwarded to the proper authorities for their consideration. I have the honor to acknowledge the receipt of your letter of August 1st, 1887, and to inform you that the same has been forwarded to the proper authorities for their consideration.

Very respectfully,
R. A. WALLACE,
Commissioner

Hon. E. D. Smith,
Secretary of the Treasury

REPORT
OF
THE COMMISSIONER OF INDIAN AFFAIRS.

DEPARTMENT OF THE INTERIOR,
Washington, D. C., September 3, 1872.

SIR: Respectfully referring to your communication of August 8, 1872, asking to be furnished the usual annual statement of the liabilities of the United States to Indian tribes, I have the honor to state that the subject was referred to the Indian Office on the 10th ultimo, and herewith to inclose a copy of the Commissioner's report and the statement requested in your letter.

Very respectfully, yours,

W. H. SMITH,
Acting Secretary.

The Hon. SECRETARY OF THE TREASURY.

DEPARTMENT OF THE INTERIOR,
OFFICE INDIAN AFFAIRS,
Washington, D. C., September 2, 1872.

SIR: I have the honor to transmit herewith a statement showing the present liabilities of the United States to Indian tribes under stipulations of treaties, &c., to be forwarded to the Secretary of the Treasury, to accompany his report on the state of finances.

Very respectfully, your obedient servant,

F. A. WALKER,
Commissioner.

Hon. C. DELANO,
Secretary of the Interior.

Statement showing the present liabilities of the United States to Indian tribes under stipulations of treaties, &c.

REPORT OF THE SUPERINTENDENT OF THE
UNITED STATES COAST SURVEY.

REPORT

COMPLETION OF THE GREAT STATES COAST SURVEY.

U. S. DEPARTMENT OF COMMERCE,

WASHINGTON, D. C., AUGUST 30, 1897.

THE report of the progress of the Great States Coast Survey during the year 1896, has been prepared in accordance with the requirements of the Department of Commerce, and is published as a part of the annual report of the Survey.

In all the previous seasons, parties were sent to the coast and within certain limits the progress of the Survey has been reported in the annual reports of the Survey. The progress of the Survey during the year 1896 is reported in this report. The progress of the Survey during the year 1896 is reported in this report. The progress of the Survey during the year 1896 is reported in this report.

REPORT
OF THE
SUPERINTENDENT OF THE UNITED STATES COAST SURVEY.

COAST SURVEY OFFICE,
Washington, D. C., September 30, 1872.

SIR: I have the honor to present an abstract showing the places at which the work of the survey has been in progress, within the year, on the Atlantic, Gulf, and Pacific coasts of the United States.

In all the northern sections parties are yet in the field, and will so continue until the approach of winter, when transfers will be made for resuming operation in the southern sections of the coast.

The details of the work done by each of the parties will be given, as heretofore, in my annual report, after the receipt of statements showing the results of the present season in the northern sections.

Surveying-parties are now engaged either in triangulation, topography, or hydrography on the coast of Maine, at Bass Harbor, Mount Desert Island; at Blue Hill Bay; on the islands between it and Isle au Haut Bay; and in the vicinity of Castine, for the survey of the east side of Penobscot Bay; on the west side of that bay above and below Belfast; and in Penobscot Bay north of Islesborough; on the western side of the Kennebec, in Maine, for the determination of geographical points, and for like service in New Hampshire. Special astronomical observations have been made at Cambridge, Massachusetts, to determine the precise relation in longitude between points in the United States and points in Europe; one of the parties in that service occupied a station on St. Pierre, Miquelon Island. The magnetic elements have been determined at stations on the coast of Massachusetts.

Special examinations have been made to verify the sailing-directions for harbor charts of the coast of New England. The tides have been recorded constantly during the year at North Haven, in Penobscot Bay, and at the Charlestown navy-yard. A hydrographic party is now at work near the Monomoy Shoals, and off-shore soundings have been continued along the northern sections of the coast. The plane-table survey of the coast of Rhode Island is in progress near Perrysville, west of Point Judith, and also the detailed survey of New Haven Harbor. Views have been drawn for the charts of several harbors between Portland and New York. Special hydrographic investigations are in progress in New York Harbor and in the adjacent waters; and the tides have been steadily recorded at Governor's Island. Field-parties are completing the shore-line survey at the south end of Lake Champlain, and others are sounding its northern branches.

Triangulation is in progress near Barnegat, and plane-table work and hydrography near Little Egg Harbor, on the coast of New Jersey. Points have been determined for the construction of a comparative chart of the Schuylkill River at Philadelphia, for which the soundings were made last winter, and the magnetic elements have been determined in that vicinity, and also at Washington City. The tides have been regularly

recorded at Old Point Comfort, Virginia. Geodetic reconnaissance is in progress near Harper's Ferry. The detailed survey of the James River, Virginia, has been extended upward to Warwick River; that of Pamlico River, at Washington, North Carolina, has been completed, and also that of the lower part of Pungo River, and the vicinity of Cedar Island, in the lower part of Pamlico Sound. In that sound, the main triangulation has been extended and progress has been made in the soundings. Cape Hatteras has been included in a resurvey which revealed changes in contour; and recent soundings develop the dangers to navigation at the Hatteras Shoals. Plane-table work has been completed at Bear Inlet and Brown's Inlet, on the coast of North Carolina; and the several channels leading into Cape Fear River have been sounded. Little River entrance, near the boundary-line of South Carolina, has been examined, and much of the coast-line traced southward to connect with a detailed survey which now includes the shores of Winyah Bay. The survey of the Sea Islands and channels between Coosaw River and Broad River, South Carolina, has been well advanced toward completion; and the sea-water channels inside of Saint Simon's Island, on the coast of Georgia, and between Talbot Island and Saint John's River, have been sounded. Latitude, azimuth, and the magnetic elements were determined at a station on Saint Simon's Island. The measurement of a primary base-line near Atlanta, Georgia, and the determination of points in geodetic connection with the line, are now in progress.

Along the eastern coast of Florida the survey south of Matanzas Inlet, including the branches of Matanzas River, is well advanced toward Mosquito Inlet. Below Cape Canaveral, a shoal has been developed near Indian River Inlet. Soundings have been continued in the approaches to the Florida Reef and in the Gulf of Mexico; and the in-shore hydrography has been completed at the eastern approach of Saint George's Sound, as also the survey of the Gulf coast between Saint Andrew's and Mobile entrance, including Choctawhatchee Bay. The hydrography has also developed the approaches from deep water to the Mississippi Delta, and the vicinity of Trinity Shoal off the coast of Louisiana. In the Mississippi River the survey has advanced from Magnolia upward to Jesuit Bend, including determinations for latitude and azimuth. On the coast of Texas the hydrography has been continued in San Antonio and the adjacent bays; and the longitude of Austin has been determined.

Sherman Station, in Wyoming Territory, and Verdi, on the Union Pacific Railroad, in Nevada, have been occupied as points in the geodetic connection between the Atlantic and Pacific coasts, and collateral observations of much interest have been recorded.

On the western coast of the United States the following sites have been, or will be occupied in prosecuting the field and hydrographic operations now in progress in accordance with the plan of work for the season. The parties are all in the field, and will, as heretofore, report their results at the end of October.

Progress has been made in the hydrographic reconnaissance between Panama and San Diego. The station near Cape San Lucas, at which the transit of Venus was observed in 1769, will be determined in latitude and longitude. At San Diego the tides have been constantly recorded. The survey of the coast of California will be resumed at San Pedro Bay; that of the Santa Barbara Islands has been continued; and the crest-line of the mountains which range along the Santa Barbara Channel has been traced. Reconnaissance has determined suitable points

for the triangulation between Santa Barbara and Monterey; the survey of the coast is well advanced between Point Conception and Point Arguello; also south of San Luis Obispo, toward Point Sal, and south of San Simeon; and the latitude and azimuth will be determined, if practicable, at both stations before the close of the season. In the operations of the year are included the survey of the South Farallon Island, and the outline of sand-drift on the San Francisco peninsula; the contour of Table Mountain, north of the Golden Gate; comparative soundings at San Francisco entrance, and the tides of the year at that port. Cordell's Bank will be developed by soundings in the course of the season; at Mendocino Bay latitude and azimuth will be determined, and the survey in progress in that vicinity will be extended northward. Magnetic observations will be made generally at stations which may be occupied by the astronomical party. Soundings have been made to develop a bank off Cape Mendocino; the survey of the coast below Shelter Cove is in progress; latitude and azimuth will be determined there, and longitude at Eureka, when the telegraph reaches that place. Soundings are in progress along the coast of California between Shelter Cove and Rocky Point; the survey is extending south of the False Klamath River, California, and along the coast of Oregon north of Chetko River. At Astoria the tides of the year have been recorded, and longitude will be determined when telegraphic facilities reach that port. The survey of both shores of the Columbia River has been continued, and that of Shoalwater Bay, in Washington Territory. At False Dungeness the astronomical station has been connected with the triangulation of the Strait of Fuca, and Smith's Island has been occupied for completing the main triangulation which embraces the waters of Washington Sound. The plan for this season includes, also, determinations of latitude and azimuth at Steilacoom and Dwamish Bay; the selection of a site for a base-line on Whidbey Island, and triangulation for extending the survey in Puget Sound.

On the coast of Alaska good progress has been made in the hydrographic reconnaissance. Observations of much importance have been made on the tides and currents, and a number of geographical points have been determined.

The office operations in drawing and engraving have kept up with the results in field-work and hydrography. Twenty new charts have been published, and nine others, which show extensive additions in comparison with their first issue. Fifty charts, of which thirteen were commenced within the year, have been in hand in the drawing-division. Of the engraved charts 11,500 copies have been printed and distributed. Ninety of the manuscript maps on file in the archives have been copied within the year, to meet calls for information. As these usually pertain to places near the more important ports, a few of the topographical sheets, showing much variety in details, have been reproduced by lithography. The process is cheap, and its extension is under advisement, as affording means of special usefulness in the inception of local improvements, in which success must depend on accurate information in regard to the surface-contour.

Tide-tables for the ensuing year have been prepared, and will be published as heretofore.

Respectfully submitted.

BENJAMIN PEIRCE,
Superintendent United States Coast Survey.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

REPORT OF THE LIGHTHOUSE BOARD

LIGHT-HOUSE BOARD OF THE UNITED STATES

Created in conformity with the act of Congress approved April 20, 1816.

REPORT OF THE LIGHT-HOUSE BOARD FOR THE YEAR 1870.

1871

The Government has the honor to acknowledge the receipt of the report of the Light-House Board for the year 1870, and to express its appreciation of the labors of the Board in the discharge of their duties.

COMMISSIONER OF COMMERCE

REPORT OF THE LIGHT-HOUSE BOARD.

WASHINGTON

LIGHT-HOUSE BOARD OF THE UNITED STATES.

(Organized in conformity to the act of Congress approved August 31, 1852.)

LIST OF MEMBERS.

Hon. GEORGE S. BOUTWELL, *Secretary of the Treasury, ex-officio President.*
Professor JOSEPH HENRY, LL.D., *Secretary Smithsonian Institution.*
Brevet Major-General A. A. HUMPHREYS, *Chief of Engineers, United States Army.*
Brevet Major-General J. G. BARNARD, *Colonel of Engineers, United States Army.*
Professor B. PEIRCE, LL.D., *Superintendent Coast Survey.*
Rear-Admiral T. BAILEY, *United States Navy.*
Rear-Admiral HENRY WATKES, *United States Navy.*
Rear-Admiral CHARLES S. BOGGS, *United States Navy.*
Major GEORGE H. ELLIOT, *Corps of Engineers, United States Army.*

CHAIRMEN OF COMMITTEES.

Finance—General HUMPHREYS.
Engineering—General BARNARD.
Experiments—Professor HENRY.

Lighting—Professor PEIRCE.
Floating Aids—Rear-Admiral BAILEY.

The Chairman and Secretaries are *ex-officio* members of all committees.

MEMBERS OF THE BOARD EMPLOYED IN THE OFFICE.

Professor JOSEPH HENRY, *Chairman.*
Rear-Admiral CHARLES S. BOGGS, *United States Navy, Naval Secretary.*
Major GEORGE H. ELLIOT, *Corps of Engineers, United States Army, Engineer Secretary.*

CLERKS.

ARNOLD B. JOHNSON, *Chief Clerk.*

WM. D. O'CONNOR.
BRUCE SMALL.
MRS. E. J. BEARE.

FRANK BAKER.
ALBERT H. SAWYER.
SAMUEL STONE.

PAUL J. PELZ, *Chief Draughtsman.*

CLERKS TEMPORARILY DETAILED FROM OTHER OFFICES.

H. C. JOHANNES.
E. P. RANKIN.
Miss MAY E. COLE.

Z. B. BROOKE.
HENRY KALLUSSOWSKI.

REPORT
OF
THE UNITED STATES LIGHT-HOUSE BOARD.

TREASURY DEPARTMENT,
Office of the Light-House Board, August 31, 1872.

Hon. GEORGE S. BOUTWELL, *Secretary of the Treasury* :

SIR : The following report of the operations of this Board during the last year is respectfully submitted :

There are now in the Light-House Establishment of the United States :

ON THE ATLANTIC COAST.

Sea-coast lights	61
Harbor and river lights.....	262
Light-ships	21
Fog-signals, operated by steam or hot-air engines	17
Day or unlighted beacons.....	284
Buoys actually in position.....	2,232

ON THE COAST OF THE GULF OF MEXICO.

Sea-coast lights	18
Harbor and river lights.....	31
Light-ships	1
Fog-signals, operated by steam or hot-air engines	2
Day or unlighted beacons.....	68
Buoys actually in position.....	205

ON THE PACIFIC COAST.

Sea-coast lights	18
Harbor and river lights.....	7
Light-ships	none
Fog-signals, operated by steam or hot-air engines	7
Day or unlighted beacons.....	1
Buoys actually in position.....	81

ON THE NORTHERN AND NORTHWESTERN LAKES.

Lake-coast lights.....	82
Harbor and river lights.....	94
Light-ships	none
Fog-signals, operated by steam or hot-air engines	7
Day or unlighted beacons.....	1
Buoys actually in position.....	214

TOTALS FOR THE ENTIRE ESTABLISHMENT.

Sea and lake-coast lights	179
Harbor and river lights.....	394
	—
Total light-houses	573
	==
Light-ships	22
Fog-signals, operated by steam or hot-air engines	33
Day or unlighted beacons.....	354
Buoys actually in position.....	2,762

The number of light-keepers now in service is 809.

It has been the endeavor of the Board to conduct the administration of the establishment at all times with the most rigid regard to true economy and efficiency, holding officers and light-keepers to the strictest personal responsibility in the performance of duty; making frequent supervisory visits to, and examination of, works of construction and repair, and requiring inspections and reports, at short intervals of all existing light-houses, light-ships fog-signals, beacons, and buoys in position. The light-houses and light-ships (so far as the exhibition of efficient lights is concerned) are, it is believed, equal to any in the world, and those beacons and buoys actually in position are efficient day-marks to guide clear of the obstructions for which they were established.

The detailed statements under the heads of the twelve geographical districts into which the United States Light-House Establishment is divided, based mainly upon the annual reports of the engineers and inspectors, embrace the work which has been done since the last annual report, the works now in progress, those for which there are existing appropriations, (but which are not yet executed,) and those for which appropriations for their early erection are recommended to Congress.

It will be seen that while the lights and other aids are in a condition of efficiency, so far as they are required to meet the wants of the mariner, there are many stations at which reconstructions and renovations are greatly needed. The necessity for these arises from the natural decay of old buildings, some of them dating back into colonial days, and the erosion of sites, so greatly exposed to the action of storms, winds, and heavy seas, as are most of the light and beacon stations, during the equinoctial and winter seasons.

The new lights recommended for appropriations were, many of them, recommended in our last annual report and in the reports of preceding years; and it will be observed that of the eight new sea-coast lights recommended, four are north of Cape Hatteras, viz: two at Cape Elizabeth, coast of Maine, (reconstruction—built in 1828); one at Monomoy Point, coast of Massachusetts, (a very important light for the immense commerce which passes through Vineyard Sound,) and one at a point midway between Cape Henry and Body's Island, coast of North Carolina. During the last year an important step has been taken in lighting the previously unlighted coast of eighty miles between Capes Charles and Hatteras, by the construction of the light-house at Body's Island, and there remains forty miles of this dangerous coast yet unlighted.

The necessity of a light-house at the third point mentioned will be manifest by referring to the remarks under the head of *Body's Island*, in the fifth district, where it will be seen that in the thirteen months during which that light-house has been under construction, the loss of property by wrecks in the vicinity has been more than \$130,000, or

more than the cost of the light-house. The great number of wrecks occurring along this dangerous part of our coast, owing to the peculiar currents which set against it, has for many years attracted attention, and there should be no delay in completing its illumination.

On the completion of the light-house recommended to be placed between Cape Henry and Body's Island, there will be no unlighted space on our Atlantic coast from the mouth of the river St. Croix, on our northern frontier, to Cape Hatteras.

South of this cape the board have estimated for four primary or sea-coast lights, viz: at Morris Island, coast of North Carolina; at Tybee Island, coast of Georgia; at Mosquito Inlet, coast of Florida, and on the "Fowey Rocks," one of the great reefs off the coast of Florida. Also for the completion of six others now under construction at the following points, viz: Hunting Island, coast of South Carolina; Alligator Reef, one of the Florida reefs; Saint Augustine, coast of Florida; Trinity Shoal and Timbalier, Gulf of Mexico, and Matagorda Island, coast of Texas.

The southern portions of our sea-coast are not so thickly inhabited as the northern, and the lights are not therefore of so much benefit for local commercial purposes; but it must be remembered that our great sea-coast lights everywhere, are for the benefit of the commerce of all sections and all countries. The commerce between the great commercial centers and the West Indies, South America, the Gulf of Mexico and California, passing along our southern coast is immense, and no part of our sea-coast is more dangerous to lives and treasure, on account of the great shoals and reefs which extend to long distances into the ocean. The other lights recommended in the report are for our harbors and for the northern and northwestern lakes, and are made necessary by the increasing wants of commerce.

You will observe that for several of our light-stations the board have recommended the erection of powerful fog-signals. The great loss of life and property through shipwrecks and collisions, caused by vessels getting out of their courses in foggy and thick weather, is attracting attention throughout the world, and the board is not only placing as many of these most useful aids to navigation as its appropriations will allow, but it is experimenting, with a view of obtaining more powerful machines, which can be heard with certainty above the noise of the surf and the storm. The problem is one of much more difficulty than the lighting of our coasts, and it is attracting the attention of light-house engineers abroad as well as in this country; but it is believed that our present signals—the trumpet, the whistle, and the syren—all operated by steam or hot-air engines, though not as powerful as are desired, are by far the best in the world.

There is a small estimate for a light and fog-signal at the mouth of the river Columbia, Oregon, which the board deems of importance, and to which it desires to call the attention of Congress. The trade into the River Columbia is rapidly increasing, and the entrance is unusually dangerous, on account of its very bad bar, and the dense fogs which envelope it at almost all seasons of the year.

The south channel, which is now almost exclusively used, has no aid to navigation whatever, except its buoys and the light at Cape Disappointment, which are of no assistance in foggy weather.

At the last session of Congress the following provisions of law were made, which have very greatly assisted the board in the construction of its works, viz:

* * * * *

Appropriations for light-house purposes shall be available for expenditure for two years after acts of legislatures ceding jurisdiction over sites: *Provided, however,* That this section shall not apply to any general appropriations for light-house purposes: *And provided further,* That in no case shall any special appropriation be available for more than two years without further provision of law; and the unexpended balances of appropriations for special works under the Light-House Board made by the act approved March third, eighteen hundred and seventy-one, entitled "An act making appropriations for sundry civil expenses of the Government for the fiscal year ending June thirtieth, eighteen hundred and seventy-two, and for other purposes," are hereby re-appropriated for the purposes therein specified:

Provided, That all appropriations for public buildings under the Treasury Department shall hereafter be available immediately upon the approval of the acts containing such appropriations.

Under the law which required appropriations to be limited to one year, and that all balances were then to revert to the surplus fund, it was found almost impossible to carry on our works satisfactorily and economically.

Light-house works of construction cannot be carried on safely and with economy north of Chesapeake Bay during the winter months, nor on the southern coast during the months when epidemics almost always prevail, more or less severely. Besides these drawbacks and difficulties, these works, from their greatly exposed positions on the sea or lake coast, require not only to be built of the best and most durable materials that can be procured, but those materials ought not to be put together too hurriedly; and hence, as a rule, the large and expensive structures require a much longer time than one year to commence and complete them properly, and with this view it is earnestly recommended that *all light-house appropriations for special works shall in future laws be made available for two years after acts of appropriation and cessions of jurisdiction by the States, provided that no appropriation shall be available for more than two years.*

In regard to the general estimates for repairs of light-houses, for supplies (including oil, &c.) for light-ships, and for buoys, the board has to say that it has always been the custom of this office, in preparing the annual estimates for supporting the existing and authorized aids to navigation, and the construction of new ones, to make as close a calculation of items, quantities, and prices as the information at hand would allow, and to endeavor to so manage the disbursements as at all times to have ample funds available to supply any losses and repair any damage, however serious, to which this service is so peculiarly liable during the winter months.

For *repairs and incidental expenses of light-houses* we have estimated the same amount (\$225,000) as was estimated last year. Congress failed to appropriate the whole amount of this estimate by \$25,000, and, in consequence, many of our old light-houses and sites were not repaired and protected as was required by economical considerations, and the cost this year for the same will be enhanced.

For *expenses of fog-signals* we have estimated the same amount as last year, viz, \$50,000.

For the *salaries of light-keepers* the estimate is \$535,800, and the increase is owing to the increase in the number of light-keepers authorized by the appropriations for new lights. There are in actual employment and required for new lights appropriated for, 893 light-keepers, and the average pay authorized by law is \$600 per annum.

For *supplies of light-houses* the estimate is \$360,837, and the increase is due, as above, to the increased number of lights authorized by law.

For the *expenses of light-ships* the estimate is \$217,732 50; and the

decrease is owing to the substitution during the last year of screw-pile light-houses for light-ships in two instances, and of shore range-lights for a light-ship in the remaining case.

For *expenses of buoyage* our estimate is \$300,000, and the increase is due to the increased demand for these aids to navigation, the decay of those in use, and losses by ice and storm.

The application, by your direction, of the new rules of the civil service to the Light-House Establishment will greatly increase its efficiency.

The board is of the opinion that of all the branches of the civil service of the Government, there is none in which it is more important to have men of ability, integrity, and experience.

We have, as we have stated, about eight hundred principal and assistant light-keepers distributed among our five hundred and ninety-five light-houses and light-ships, and the number is increasing from year to year as new light-houses are constructed.

These keepers are scattered along our coasts, many of them in exposed positions, of which examples are our rock light-houses, such as Minot's Ledge, off the coast of Massachusetts, and the reef light-houses off the Florida coast. Many of them, especially those on the capes of our Pacific coast, are hundreds of miles away from civilization, and the supervising officers can inspect them only at long intervals. Theirs is a life of exposure and hardship, and they should be strong and able-bodied. They should be honest, for they have charge of, in the aggregate, a large amount of Government property. They should have sufficient intelligence and skill to manage our delicate and costly lenses and the machinery connected therewith, as well as the steam machinery of our fog-signals. At many of our distant stations, if, through the carelessness or incapacity of a keeper, these are disarranged, the light may not be exhibited or the signal sounded for weeks before repairs can be made, and commerce can have that security which should be assured to it. On the intelligence, fidelity, and experience of the keepers depend the thousands of lives and millions of property which are nightly approaching, leaving, or sailing along our eight thousand miles of sea, gulf, and lake coasts.

In the light-house service of other countries which have the same excellent system of illumination as our own, (the Fresnel,) the keepers when appointed are young men who have been required to pass medical and intellectual examinations, and they remain in service during good behavior. In Great Britain their moral characters must be vouched for by the clergymen of their parishes. There is promotion for merit, and when superannuated they are pensioned.

Previous to your administration political considerations governed, in a great measure, the appointment and discharge of keepers, and even up to this time it has been found impossible to eradicate all the evils of this custom.

While it cannot be expected to introduce at once all the reforms which would place our light-house service, as far as the character of the keepers is concerned, in as high a condition as those of some other countries, it is to be hoped that, while the nomination (which is now a virtual appointment) is not removed from the collector of customs, to whom it is now confided, so much of reform may be continued as will require that every applicant shall pass a competitive examination before a board composed of experienced officers of the light-house service, before appointment, and that, when once in service, the commerce of the country may have the benefit of his experience and his ambition to

do well, which will result when he finds that he has hope of promotion, and that he will be subject to discharge only for dereliction of duty.

During the last year the following changes have occurred in the board :

Rear-Admirals Shubrick and Stribling, both long connected with the board, (the former having been its chairman from its establishment in 1852, and the latter a member since 1866,) having retired, were succeeded by Rear-Admirals Bailey and Walke, and Professor Henry was elected chairman.

Rear-Admiral Jenkins, a member and naval secretary of the board since its establishment, (except for a few years during the war,) and to whom the present efficiency of the light-house service is in a very great degree due, retired from the board in February last, having been ordered to the command of the Asiatic fleet, and was succeeded by Rear-Admiral Boggs. The other members of the board (viz, Professor Henry, General Humphreys, General Barnard, Professor Peirce, and Major Elliot, engineer secretary,) remain as at the date of the last annual report.

Lieutenant-Colonel Williamson, of the Corps of Engineers of the Army, for many years light-house engineer on the coast of California, and one of the board's most zealous and efficient officers, was relieved from light-house duty in May last, on account of ill-health, having been granted leave of absence in Europe by the War Department.

The board has to deplore the loss by death of one of its officers during the last year, Commodore Macomb, inspector of lights in the fourth district, who died at Philadelphia on the 15th of the present month.

While the board recognizes the great value of most of the officers who have been detailed by the War and Navy Departments to report to you for duty under its direction, it is due to the memory of the late Commodore Macomb to bear witness to the ability which he always displayed in the discharge of his duties and in his intercourse with this office.

FIRST DISTRICT.

The first district extends from the northeastern boundary of the United States (Maine) to, and including, Hampton Harbor, New Hampshire, and includes all the aids to navigation on the coasts of Maine and New Hampshire.

Inspector.—Commander A. E. K. Benham, United States Navy, until December 17, 1871; Commander Thomas O. Selfridge, United States Navy, present inspector.

Engineer.—Lieutenant-Colonel J. C. Duane, Corps of Engineers, brevet brigadier-general, United States Army.

In this district there are :

Light-houses and lighted beacons	49
Light-ships	none
Fog-signals operated by steam or hot-air engines	8
Day or unlighted beacons	51
Buoys actually in position	351
Spare buoys, for relief and to supply losses	322
Tender (steam) Myrtle, for engineer's construction and repairs, (used also in second district;) launch Mary	2
Tender (steamer) Iris, buoy-tender	1
Tender (sail) repair-schooner Wave	1

The following numbers, which precede the names of stations, correspond with those of the Light-house List of the Atlantic, Gulf, and Pacific Coasts of the United States, issued January 1, 1872.

3. *Little River, west side of entrance to harbor of Little River, Maine.*—A fog-bell tower has been erected, and a fog-bell operated by Stevens's striking apparatus has been placed at this station.

6. *Nash's Island, off the mouth of Pleasant River, Maine.*—There is required at this station a new lantern, deck, and parapet, also repairs on tower.

———. *Burntcoat Harbor, Swan's Island, coast of Maine.*—Two range-lights have been erected at this important harbor of refuge during the year, and have been lighted.

25. *White Head, Penobscot Bay, Maine.*—Extensive repairs of the keeper's dwelling have been made, a fog signal-house 24 feet by 23 feet, of stone, has been erected, a pier or wharf of stone 45 feet by 25 feet by 23 feet high, with a wheeling stage connecting it with the coal-shed, have been built.

34. *Manheigan Island, Manheigan Island, Maine.*—A steam fog-whistle has been established at this station in place of a Daboll trumpet, which has been removed to Portland Head.

40. *Seguin, on Seguin Island, off the mouth of river Kennebec, Maine.*—The upper part of the tower at this station leaks badly. The stone parapet should be replaced by one of iron. There will be required an iron parapet, deck, and lantern-base.

41. *Half-Way Rock, near Portland, Maine.*—This station was lighted for the first time on the 15th of August, 1871. A boat-slip and masonry boat-house have been built.

42. *Cape Elizabeth, near Portland, Maine.*—These towers were built of rubble-stone in 1828, and are now in such condition that it has become necessary to rebuild them. An estimate is submitted for the erection of two new towers.

44. *Portland Head, near entrance to Portland Harbor, Maine.*—The Daboll trumpet, which was removed from Manheigan, has been established at this station.

49. *Whale's Back, near Portsmouth, New Hampshire.*—A new tower has been erected at this station, and the light is now exhibited from it.

50. *Portsmouth Harbor, New Hampshire.*—The old dwelling has been taken down and a new one erected on the same foundation.

REPAIRS.

At each of the following-named light-stations in the first district there have been repairs and renovations more or less extensive during the year:

1. *St. Croix, on Dochet's Island, river St. Croix, Maine.*
2. *West Quoddy Head, west entrance to Passamaquoddy Bay, Maine.*
3. *Little River, west side of entrance to harbor of Little River, Maine.*
4. *Libby Island, entrance to Machias Bay, Maine.*
5. *Moose Peak, on Moose Peak Head, Maine.*
6. *Nash's Island, west end of Moose Peak Reach, Maine.*
7. *Narraguagus, entrance to Narraguagus Bay, Maine.*
8. *Petit Menan, on Petit Menan Island, Maine.*
9. *Prospect Harbor, east side of entrance to Prospect Harbor, Maine.*
12. *Winter Harbor, west side of Winter Harbor, Maine.*
13. *Mount Desert, on Mount Desert Rock, Maine.*
14. *Baker's Island, southwest side of entrance to Frenchman's Bay, Maine.*
15. *Bear Island, east side of entrance to Northeast Harbor, Maine.*
16. *Bass Harbor Head, east side of entrance to Bass Harbor, Maine.*

17. *Eggmoggin*, near east end of Eggmoggin Reach, Maine.
18. *Saddleback Ledge*, in Isle-au-Haut Bay, Maine.
19. *Heron Neck*, west entrance to Carver's Harbor, Maine.
20. *Deer Island*, west entrance to Thoroughfare, Maine.
21. *Eagle Island Point*, west side of Isle-au-Haut Bay, Maine.
22. *Pumpkin Island*, west entrance to Eggmoggin Reach, Maine.
23. *Matinicus Rock*, off Penobscot Bay, Maine.
26. *Owl's Head*, west side of Muscle Ridge Channel, Penobscot Bay, Maine.
27. *Brown's Head*, south side of west entrance to Fox Island Thoroughfare, Maine.
28. *Negro Island*, south side of entrance to Camden Harbor, Maine.
29. *Grindel's Point*, north side of entrance to Gilkey's Harbor, Maine.
30. *Dice's Head*, north side of entrance to Castine Harbor, Maine.
31. *Fort Point*, west side of entrance to Penobscot Bay, Maine.
32. *Tenant's Harbor*, south side of entrance to Tenant's Harbor, Maine.
33. *Marshall's Point*, east entrance to Herring Gut Harbor, Maine.
34. *Manheigan Island*, off George's Islands, Maine.
35. *Franklin Island*, on east side of west entrance to George's River, Maine.
36. *Pemaquid Point*, on Pemaquid Point, Maine.
37. *Burnt Island*, west side of entrance to Townsend Harbor, Maine.
38. *Hendrick's Head*, east side of entrance to Sheepscoot River, Maine.
39. *Pond Island*, west side of entrance to River Kennebec, Maine.
40. *Seguin*, off River Kennebec, Maine.
42. *Cape Elizabeth*, on southwest side of Casco Bay, Maine.
44. *Portland Head*, on southwest side of entrance to Portland Harbor, Maine.
45. *Portland Breakwater*, on outer end of breakwater, Portland Harbor, Maine.
46. *Wood Island*, west side of entrance to River Saco, Maine.
47. *Goat Island*, east side of entrance to Cape Porpoise Harbor, Maine.
48. *Boone Island*, off York Harbor, Maine.
51. *Isle of Shoals*, on White Island, off Portsmouth, New Hampshire.

The following-named light-stations in the first district require repairs to be made during the current and ensuing year :

3. *Little River*, west side of entrance to Harbor of Little River, Maine.
6. *Nash's Island*, off the mouth of Pleasant River, Maine.
18. *Deer Island Thoroughfare*, on Mark Island, western entrance of Deer Island Thoroughfare, Maine.
33. *Franklin Island*, on east side of western entrance to George's River, Maine.
40. *Cape Elizabeth*, on southwest side of Casco Bay, Maine.

LIGHT-SHIPS.

There are no light-ships in this district.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

- West Quoddy*.—Ten-inch steam-whistle, in good condition.
Petit Menan.—Ten-inch steam-whistle, in good condition.
Matinicus.—Ten-inch steam-whistle, in good condition.
White Head.—Ten-inch steam-whistle, in good condition.
Manheigan.—Six-inch steam-whistle, in good condition.

Seguin.—Ten-inch steam-whistle, in good condition.

Cape Elizabeth.—Ten-inch steam-whistle, in good condition.

Portland Head.—Daboll air-trumpet, in good condition.

DAY, OR UNLIGHTED BEACONS.

Names and positions of the day, or unlighted beacons, in the first district:

Jerry's Point, Portsmouth Harbor, New Hampshire.

South Beacon, Portsmouth Harbor, New Hampshire.—Stone beacon, in good condition.

North Beacon, Portsmouth Harbor, New Hampshire.—Wooden mast, in good condition.

Willey's Ledge, Portsmouth Harbor, New Hampshire.—Iron spindle, in good condition.

York Ledge, off river York, Maine.—Iron spindle, in good condition.

Fishing Rocks, Kennebunkport, Maine.—Iron spindle, broken off, spar-buoy substituted.

Stage Island Monument, entrance to river Saco, Maine.—Stone tower, 40 feet high, in good condition.

Sharp's Rocks, entrance to river Saco, Maine.—Iron socket and wooden shaft, socket broken off, spar-buoy substituted.

Back Cove Beacon, Portland Harbor, Maine.—Pile-beacon, in good condition.

White Head Ledge, in White Head passage to Portland Harbor, Maine.—Iron spindle, slightly bent, in good condition otherwise.

Trott's Rock, in White Head passage, Maine.—Iron spindle, broken off within a few feet of the ledge.

Mark Island Monument, Casco Bay, Maine.—Stone tower, 50 feet high, in good condition.

Black-Jack Rock, river Kennebec, Maine.—Iron socket, wooden shaft, socket broken.

Seal Rock, river Kennebec, Maine.—Iron spindle, copper cylinder, in good condition.

Lee's Rock, river Kennebec, Maine.—Iron socket, wooden shaft, socket broken, spar-buoy substituted.

Ram Island Ledge, river Kennebec, Maine.—Iron socket, wooden shaft, in good condition.

Winslow's Rocks, river Kennebec, Maine.—Iron socket, wooden shaft, socket broken off, spar-buoy substituted.

Ames' Ledge, river Kennebec, Maine.—Iron socket, wooden shaft, in good condition.

Beef Rock, river Kennebec, Maine.—Iron socket, wooden shaft, in good condition.

Lime Rock, Back River, Maine.—Iron socket, wooden shaft, in good condition.

Carleton's Ledge, Back River, Maine.—Iron socket, wooden shaft, in good condition.

Clough's Rock, river Sheepscot, Maine.—Iron socket, wooden shaft, in good condition.

Merrill's Ledge, river Sheepscot, Maine.—Iron socket, wooden shaft, in good condition.

Yellow Ledges, Penobscot Bay, Maine.—Iron shaft, copper cylinder, in good condition.

Garden Island Ledge, Penobscot Bay, Maine.—Iron shaft, copper cylinder.

der, and one ball. Shaft good, lower part of cylinder partially broken away, and ball gone.

Otter Island Ledge, Penobscot Bay, Maine.—Iron shaft, copper cylinder, and two balls. Shaft bent, lower part of cylinder partially broken away, and one ball gone.

Ash Island Point, Penobscot Bay, Maine.—Iron socket, wooden shaft, in good condition.

Dodge's Point Ledge, Penobscot Bay, Maine.—Wooden shaft attached to stump of iron spindle, in good condition.

Pottersfield Ledge, Penobscot Bay, Maine.—Stone beacon, in good condition.

Lowell's Rock, Penobscot Bay, Maine.—Iron spindle and cage, in good condition.

Seals' Ledge, Penobscot Bay, Maine.—Iron spindle and cage, in good condition.

Harbor Ledge, Penobscot Bay, Maine.—Stone beacon, in good condition.

Shipyards Ledge, Penobscot Bay, Maine.—Iron spindle, broken off, not necessary.

Fiddler's Ledge, Penobscot Bay, Maine.—Stone beacon. Two or three stones of the upper course are out of place; otherwise in good condition.

North Point of Northeast Ledge, Camden Harbor, Maine.—Iron spindle, in good condition.

Morse's Point Ledge, Camden Harbor, Maine.—Iron spindle, in good condition.

Hosmer's Ledge, Castine Harbor, Maine.—Stone monument, in good condition.

Steel's Ledge, Belfast Harbor, Maine.—Stone beacon, in good condition.

Fort Point Ledge, river Penobscot, Maine.—Stone beacon, in good condition.

Odom's Ledge, river Penobscot, Maine.—Stone beacon, in good condition.

Buck's Ledge, river Penobscot, Maine.—Iron beacon, in good condition.

Centre Harbor Ledge, Edgemoggin Reach, Maine.—Iron socket, wooden shaft, in good condition.

Ship and Barges, Blue Hill Bay, Maine.—Iron socket, wooden shaft, in good condition.

Bunker's Ledge, Mount Desert, Maine.—Stone beacon, in good condition.

Half-Tide Ledge, Narraguagus Harbor, Maine.—Iron socket, wooden shaft, in good condition.

Norton's Reef, Pleasant River, Maine.—Iron tripod, shaft, and ball, in good condition.

Snow's Rock, Moosepeak Reach, Maine.—Iron socket, wooden shaft, in good condition.

Gilchrist's Rock, Moosepeak Reach, Maine.—Iron shaft and ball, in good condition.

Moose Rock, Moosepeak Reach, Maine.—Iron tripod, in good condition.

Western Bar, Lubec Narrows, Maine.—Wooden crib filled with stone, in good condition.

The Ledge, river Saint Croix, Maine.—Wooden crib filled with stone, in good condition.

DEPOT.

A wharf at the light house depot at House Island, Portland Harbor, Maine, has been built during the year. Experiments with, and tests of steam and air fog-signals have been made at this depot since the last annual report, and are now in progress. Two steam fog-signals have been sent to the eighth light-house district, and a duplicate machine has been sent to Boston light-station, second district.

SECOND DISTRICT.

The second district extends from Hampton Harbor, New Hampshire, to include Gooseberry Point, entrance to Buzzard's Bay, and embraces all the aids to navigation on the coast of Massachusetts.

Inspector.—John G. Walker, United States Navy, until May 1, 1872; Commander George H. Perkins, United States Navy, present inspector.

Engineer.—Lieutenant-Colonel J. C. Duane, Corps of Engineers, brevet brigadier-general, United States Army.

In this district there are :

Light-houses and lighted beacons.....	56
Light-ships, (in position)	8
Light-ships, (for relief)	2
Fog-signals operated by steam or hot-air engines.....	2
Day or unlighted beacons.....	49
Buoys actually in position.....	506
Spare buoys for relief and to supply losses.....	375
Tender (steam) Verbena	1
Tender (sail) Florida.....	1

The numbers preceding the names of stations correspond with those of the "Light-House List of the Atlantic, Gulf, and Pacific Coasts of the United States," issued January 1, 1872.

52. *Newburyport, Massachusetts.*—A frame dwelling for the keeper has been erected.

— *Newburyport range-lights.*—Negotiations are in progress for obtaining titles to the range-light sites in this harbor, and as soon as obtained the work of erecting suitable buildings will be commenced.

58. *Cape Ann, Thatcher's Island, Massachusetts.*—As there are now five keepers for the two lights and steam fog-signals at this station and but two dwelling-houses, a new dwelling for the principal keeper is required.

64. *Hospital Point, Salem Harbor, Massachusetts.*—A wooden dwelling for the keeper and a brick tower have been erected. The light, which has been exhibited from a temporary building, has been removed to, and is now established on, the new tower.

65. *Fort Pickering, Salem Harbor, Massachusetts.*—A wooden dwelling for the keeper and a concrete and iron tower have been erected. The light, which has been exhibited from a temporary structure, has been removed to, and is now established on, the new tower.

66. *Derby Wharf, Salem Harbor, Massachusetts.*—A permanent building of brick has been erected, and the light, which was exhibited from an old building near by, has been removed to it.

70. *Boston, Massachusetts.*—A Daboll fog-trumpet has been established at this station, and a duplicate machine furnished.

75. *Duxbury Pier, Plymouth Harbor, Massachusetts.*—This light-house was completed last season, and the light first exhibited September 15, 1871.

— *Wood End, Cape Cod, Massachusetts.*—Preparations are being made for the erection of a light-house at this place.

82. *Nanset Beach, Cape Cod, Massachusetts.*—The dwelling-house should be enlarged, or a small cottage built for the accommodation of the assistant keeper, as the building now occupied is entirely too small.

88. *Monomoy Point, Cape Cod, Massachusetts.*—The last annual report of the Light-House Board contains the following statement in relation to increasing the efficiency of this light:

Monomoy Point.—The light at this station, which is of the fourth order, on a tower about 40 feet high, was originally intended as a guide to *Old Stage Harbor*. The harbor has been filled with sand, and cannot now be entered, and the light is therefore of no further use for that purpose. But, inasmuch as nearly all vessels (both steamers and sailing) plying between New York and the eastern ports pass this point, and have now no other guide than the light-ships, which cannot be seen a sufficient distance, it is considered a matter of the greatest importance that this light should be replaced by one of sufficient power to guide vessels safely through this intricate passage. For this purpose, there is recommended a second-order fixed light, varied by red flashes, for which an estimate is submitted.

— *Point Gammon, near Hyannis, Massachusetts.*—This old lighthouse site has been disposed of at public sale.

91. *Nantucket, Island of Nantucket, Massachusetts.*—The beacon has been removed to the new site, and a keeper's dwelling erected.

106. *Holmes's Hole, Inner Harbor, Massachusetts.*—The lantern has been taken off and stored at the Wood's Hole Depot, and the land and buildings disposed of at public sale.

— *Holmes's Hole, (East Chop,) Massachusetts.*—A private light-station near Holmes's Hole, Vineyard Sound. Three 21-inch reflectors have been loaned to the keeper.

REPAIRS.

At each of the following-named stations, in the second district, there have been repairs more or less extensive during the last year:

54. *Ipswich*, entrance to Ipswich Harbor, Massachusetts.
56. *Annisquam*, entrance to Ipswich Harbor, Massachusetts.
57. *Straitsmouth*, Straitsmouth Island, Massachusetts.
58. *Cape Ann*, Massachusetts.
60. *Eastern Point*, Gloucester Harbor, Massachusetts.
61. *Ten-Pound Island*, Gloucester Harbor, Massachusetts.
62. *Baker's Island*, Salem Harbor, Massachusetts.
67. *Marblehead*, Marblehead Harbor, Massachusetts.
68. *Egg Rock*, off Nahant, Massachusetts.
69. *Minot's Ledge*, Boston Bay, Massachusetts.
71. *Narrows*, Boston Harbor, Massachusetts.
72. *Long Island Head*, Boston Harbor, Massachusetts.
73. *Plymouth*, Plymouth Harbor, Massachusetts.
76. *Race Point*, Cape Cod, Massachusetts.
77. *Long Point*, Cape Cod, Massachusetts.
78. *Mayo's Beach*, Wellfleet Bay, Massachusetts.
79. *Billingsgate*, Wellfleet Harbor, Massachusetts.
80. *Sandy Neck*, Barnstable Bay, Massachusetts.
81. *Cape Cod*, (Highlands Truro) Massachusetts.
- 82, 83, 84. *Nauset Beach*, (beacons,) Cape Cod, Massachusetts.
- 85, 86. *Chatham*, Cape Cod, Massachusetts.
87. *Pollock Rip*, light-ship, Massachusetts.
88. *Monomoy Point*, Cape Cod, Massachusetts.
89. *Shovelful Shoals*, light-ship, Massachusetts.
90. *Handkerchief*, light-ship, Massachusetts.
91. *Nantucket*, (Great Point,) Massachusetts.
92. *Sankaty Head*, Nantucket, Massachusetts.

93. *Nantucket*, South Shoal, light-ship, Massachusetts.
94. *Gay Head*, Martha's Vineyard, Massachusetts.
95. *Brant Point*, Nantucket Harbor, Massachusetts.
96. *Nantucket*, range-beacon, Massachusetts.
97. *Nantucket*, cliff, range beacon, (front,) Massachusetts.
98. *Nantucket*, range-beacon, (rear) Massachusetts.
99. *Bass River*, Vineyard Sound, Massachusetts.
100. *Bishop and Clerk's*, Vineyard Sound, Massachusetts.
101. *Hyannis*, Hyannis Harbor, Massachusetts.
102. *Cross Rip*, light-ship, Massachusetts.
103. *Cape Poge*, Martha's Vineyard, Massachusetts.
104. *Succonnessett*, light-ship, Massachusetts.
105. *Edgartown*, Edgartown Harbor, Massachusetts.
106. *Holmes' Hole*, (west chop,) Vineyard Haven Harbor, Massachusetts.
107. *Nobsque Point*, Wood's Hole Harbor, Massachusetts.
108. *Tarpaulin Cove*, Naushon Island, Massachusetts.
109. *Vineyard Sound*, light-ship, (Sow and Pigs,) Massachusetts.
110. *Hen and Chickens*, Light-ship, Massachusetts.
111. *Cuttyhunk*, Buzzard's Bay, Massachusetts.
112. *Dumpling Rock*, Buzzard's Bay, Massachusetts.
113. *Clark's Point*, New Bedford Harbor, Massachusetts.
114. *Palmer's Island*, New Bedford Harbor, Massachusetts.
115. *Ned's Point*, Mattapoisett Harbor, Massachusetts.
116. *Bird Island*, Sippican Harbor, Massachusetts.
117. *Wing's Neck*, Buzzard's Bay, Massachusetts.

The following-named light-stations in the second district require repairs to be made during the current and ensuing year :

57. *Straitsmouth*, Straitsmouth Island, Massachusetts.
77. *Long Point*, Cape Cod, Massachusetts.
116. *Bird Island*, Sippican Harbor, Massachusetts.
111. *Cuttyhunk*, Buzzard's Bay, Massachusetts.
91. *Nantucket*, (Great Point,) Massachusetts.
88. *Monomoy Point*, Cape Cod, Massachusetts.
99. *Bass River*, Vineyard Sound, Massachusetts.
82. *Nauset Beach*, (beacons,) Cape Cod, Massachusetts.
86. *Chatham*, Cape Cod, Massachusetts.
105. *Edgartown*, Edgartown Harbor, Massachusetts.
103. *Cape Poge*, Martha's Vineyard, Massachusetts.
- *Wood End Bar*, Provincetown Harbor, Massachusetts.

LIGHT-SHIPS.

87. "*Pollock Rip*," off *Chatham, Massachusetts*.—This vessel was carried by the ice in March last among the breakers of Great Round Shoal, and was rescued with great difficulty by the tender *Verbena*, with the loss of her moorings. She was supplied with new moorings, and returned to her station within two days from the time she was carried away. The cost of repairs, new moorings, &c., was \$1,765.38.

89. "*Shovelful*," on *Shovelful Shoal, off Chatham, Massachusetts*.—This vessel parted her moorings on account of the ice on the 7th March, and was towed into Vineyard Sound by United States revenue steam-cutter *Mahoning*. She was supplied with new moorings and returned to her station on the 12th of the same month. Cost of repairs and fittings, including new moorings, was \$1,858.40.

90. "*Handkerchief*," on *Handkerchief Shoal*, in *Vineyard Sound*.—This vessel was taken to New Bedford on the 22d of June, and is now being thoroughly repaired, at an estimated cost of \$7,500.

93. "*Nantucket Shoals*," *New South Shoal*.—This vessel broke adrift in a severe gale on the 5th March, experienced much heavy weather, and was driven far to the southward, arrived at Tarpaulin Cove on the 16th, then was towed to New Bedford, and all damages made good—supplied with new moorings, and returned to her station on the 25th of the same month. The cost of all the repairs, including the new moorings, amounted to \$2,705.23.

102. "*Cross Rip*," off *Cross Rip Shoal*, in *Nantucket Sound*.—This vessel will soon require extensive repairs, and will be brought in for the purpose as soon as a relief light-vessel is available. Cost of repairs and fittings amounted, during the past year, to \$168.77.

104. "*Succonnessett*," between *Succonnessett* and *Eldridge Shoals*, *Nantucket Sound*.—This vessel was taken into port in December last, and her station temporarily supplied by the York Spit light-ship No. 24. After a careful examination, it was thought expedient to repair her, as her services were absolutely necessary, Congress having failed to pass the appropriation asked for at the last session for a new light-ship. She is now being thoroughly repaired, at an estimated cost of \$6,000.

109. "*Vineyard Sound*," (*Sow and Pigs*), on *Succonnessett Shoal*, western entrance to *Vineyard Sound*.—This vessel is in good order generally, but will require repairs during this fiscal year. Cost of repairs and fittings amounted, during the past year, to \$607.81.

110. "*Hen and Chickens*," entrance to *Buzzard's Bay*.—This vessel is in good condition, and will require a new foremast before the winter sets in. Cost of repairs and fittings during the past year was \$337.12.

Relief No. 9.—This vessel has had her upper works recalced; is now in excellent order; at present she is on the *Handkerchief Shoal*. Expenses of repairs and outfits for the last year, \$532.90.

Relief No. 29.—This vessel was repaired and put in good order last autumn, at cost of \$2,658.57, and is now on the *Succonnessett Shoal*.

FOG-SIGNALS OPERATED BY STEAM OR HOT AIR ENGINES.

Cape Ann, Massachusetts.—A steam fog-whistle.

Boston, Massachusetts.—An air-trumpet.

DAY OR UNLIGHTED BEACONS.

Names and positions of the day or unlighted beacons in the second district:

No. 1. *Old Cock*, *Buzzard's Bay*, *Massachusetts*.—Iron spindle 36 feet high, with cage at top.

No. 2. *Egg Island*, *Buzzard's Bay*, *Massachusetts*.—Granite cone, with iron spindle and vane at top.

No. 3. *Range Beacon*, *Fairhaven*, *Fort Point*, *Massachusetts*.—Iron triangular pyramid 40 feet high.

No. 4. *Cormorant Rocks*, south side of northeast entrance to *Mattapoisett Harbor*, *Buzzard's Bay*, *Massachusetts*.—Iron spindle, cage at top.

No. 5. *Lone Rocks*, northeast entrance to *Wood's Hole*, *Massachusetts*.—Iron spindle, cage at top.

No. 6. *Collier's Lodge*, entrance to *Centreville Harbor*, *Vineyard Sound*, *Massachusetts*.—Granite base, iron spindle, ball, and vane.

No. 7. *Great Rock*, west of *Point Gammon*, *Vineyard Sound*, *Massachusetts*.—Iron spindle, cage at top.

No. 8. *Hyannis Breakwater, east end, Massachusetts.*—Wooden spindle, four arms, and cask at top.

No. 9. *Sunken Pier, northeast part of Bass River Bar, Massachusetts.*—Wooden spindle, cask at top.

No. 10. *Spindle Rock, entrance Edgartown Harbor, Massachusetts.*—Iron spindle, cask at top.

No. 11. *Billingsgate Shoal, Massachusetts.*—Old site, timber beacon, with masts and slats.

No. 12. *Egg-Island Rock, entrance Wellfleet Harbor, Massachusetts.*—Wooden spindle, cask at top.

No. 13. *Duxbury Beacon, Massachusetts.*—Square granite and granite post at top.

No. 14. *Breakwater Beacon, Massachusetts.*—Square granite, with wooden spindle and cage.

No. 15. *Hogshead Beacon, Massachusetts.*—Iron spindle, with arm, cask, and cage at top.

No. 16. *North Beacon, entrance Scituate Harbor, Massachusetts.*—Iron spindle, with two rounds.

No. 17. *South Beacon, entrance Scituate Harbor, Massachusetts.*—Iron spindle, with two lozenges.

No. 18. *Londoner, off Thatcher's Island, Cape Ann, Massachusetts.*—Iron spindle, with cage at top.

No. 19. *Point Alderton, Massachusetts.*—Square granite pyramid, with cone at top.

No. 20. *False Spit, Massachusetts.*—Granite base, with iron spindle and cage at top.

No. 21. *Spit Beacon, Massachusetts.*—Square granite pyramid.

No. 22. *Nix's Mate, Massachusetts.*—Square granite base, with octagonal pyramid.

No. 23. *Great Farm Bar, Massachusetts.*—Square granite base, and granite cone, with iron spindle and cage at top.

No. 24. *Deer Island Point, Massachusetts.*—Square granite pyramid.

No. 25. *Bird Island, southeast point of Bird Island, Massachusetts.*—Iron spindle, with cage at top.

No. 26. *Sunken Island, Massachusetts.*—Granite base, with wooden spindle and cage at top.

No. 27. *Pig Rock, Massachusetts.*—Granite pyramid, with wooden spindle and cage at top.

No. 28. *Half-tide Rock, Massachusetts.*—Wooden shaft, with cask at top.

No. 29. *Cat Island, Massachusetts.*—Wooden spindle.

No. 30. *Marblehead Rock, Massachusetts.*—Conical granite, with wooden spindle.

No. 31. *Little Aquavitæ, entrance to Salem Harbor, Massachusetts.*—Granite, with wooden spindle and cage at top.

No. 32. *Great Aquavitæ, entrance to Salem Harbor, Massachusetts.*—Granite, with wooden spindle and cage at top.

No. 33. *Hardy's Rock, Massachusetts.*—Wooden spindle, with two triangles at top.

No. 34. *Bowditch Beacon, Massachusetts.*—The angular pyramid of granite, with wooden spindle and cage at top. Fallen down; should be rebuilt.

No. 35. *Half-way Rock, Massachusetts.*—Granite beacon, in ruins.

No. 36. *Little Haste, Massachusetts.*—Wooden mast, cask at top.

No. 37. *Abbott's Monument, Massachusetts.*—Square granite, with wooden mast and cask at top.

No. 38. *Monument Bar, Massachusetts*.—Square wooden crib filled with stone, mast and cage at top.

No. 39. *Ram's Horn, Massachusetts*.—Square wooden crib filled with stone, wooden shaft at top.

No. 40. *Lobster Rocks, Beverly Harbor, Massachusetts*.—Stone, with wooden spindle.

No. 41. *Black Rock, Gloucester Harbor, Massachusetts*.—Iron spindle, with cage at top.

No. 42. *Harbor Rock, Gloucester Harbor, Massachusetts*.—Iron spindle, with ball and cage at top.

No. 43. *Five-Pound Island, Gloucester Harbor, Massachusetts*.—Granite base, with iron spindle and ball at top.

No. 44. *Lobster Rock, Annisquam, Massachusetts*.—Square granite beacon is being rebuilt.

No. 45. *Lane's Point, Massachusetts*.—Square wooden beacon.

No. 46. *Point Neck Rocks, Massachusetts*.—Iron spindle, with ball at top.

No. 47. *Black Rocks, Newburyport Harbor, Massachusetts*.—Iron spindle, with cask at top.

No. 48. *North Pier, Newburyport Harbor, Massachusetts*.—Wooden crib filled with stone.

No. 49. *South Pier, Newburyport Harbor, Massachusetts*.—Wooden crib filled with stone.

DEPOT.

At Wood's Hole depot some repairs required on the wharf have been made. An adjoining lot of land has been purchased, and a frame building which stands on this lot has been repaired, and is now occupied by the lampist.

TENDERS.

The *Verbena* (steam) proving insufficient for the buoy-service of the second district, the schooner *Florida* (captured during the war and turned over at New Orleans for light-house purposes) was sent to Boston. Very soon after her arrival she capsized in a heavy squall off Boston Bay and foundered, and, with her cargo of coal for the light-houses in the vicinity, was a total loss. The crew were saved.

THIRD DISTRICT.

The third district extends from Gooseberry Point, Massachusetts, to include Squam Inlet, New Jersey, and embraces all the aids to navigation on the sea and sound coasts of Rhode Island, Connecticut, and New York; Narragansett and New York Bays; rivers Providence and Hudson, Whitehall Narrows, and Lake Champlain.

Inspector.—Commodore James H. Strong, United States Navy.

Engineer.—Colonel I. C. Woodruff, Corps of Engineers, brevet brigadier-general, United States Army.

In this district there are:

Light-houses and lighted beacons	125
Light-ships, (in position)	6
Light-ships, (for relief)	3
Fog-signals, operated by steam or hot-air engines	7
Day or unlighted beacons	41
Buoys actually in position	436
Spare buoys, (for relief and to supply losses)	436
Buoy-tenders (steam) Putnam, Cactus	2

Tender (steam) for engineer's constructions and repairs, Mistletoe	1
Launch (steam) for engineer's constructions and repairs, Rose	1
Supply-vessels (schooners) for supplying the light-houses of the Atlantic and Gulf coasts, Pharos and Guthrie.....	2

The numbers preceding the names of stations correspond with the Light-house List of the Atlantic, Gulf, and Pacific Coasts, and the Northern and Northwestern Lakes of the United States, issued January 1, 1872.

— *The Whale, Narragansett Bay, Rhode Island.*—This is a reef of rocks awash at all stages of tide, and a dangerous obstruction to navigation in the approach to the west channel of Narragansett Bay. This channel is habitually used by the daily line of Providence steamers which pass the locality during the night, carrying large numbers of passengers and valuable freights, and it is recommended that a light and fog-bell be erected on the ledge. The estimate of the engineer of the district for the structure is \$35,000, which is embraced in the estimates of the board.

119. *Beaver Tail, Rhode Island.*—The annual report of last year stated that a steam fog-signal (syren) would be erected at this station during the season. The examination of the locality for water for the use of the steam-engine proved entirely unfavorable, and sufficient water could not be collected from the roofs of the buildings and from the surface of the ground into cisterns, except at great expense. It was, therefore, decided to retain the character of the present signal, an air-trumpet, operated by a hot-air engine, but to increase very materially the power, by duplicating the engine and attaching a third reservoir to the apparatus, which it is believed will render the signal fully effective.

The housing, as well as the apparatus, is well advanced, and will be erected and put in operation as early as the middle of September.

— *Muscle Bed Beacon, Narragansett Bay, Rhode Island.*—In the annual report of last year it is stated as follows:

The construction of a light-house on Hog Island Reef has been petitioned for during several years past, but hitherto Congress has not granted an appropriation therefor. The erection of a portable light and a fog-bell on the existing stone-tower on the Muscle Bed, one-half mile distant, on the opposite side of the channel, at a cost of \$3,000, will, it is believed, obviate the necessity for this light-house, which would be a very expensive structure.

The steamboat company at Fall River keep a light and fog-signal at Hog Island Reef for their own benefit, and for that of others using the channel to Fall River, and it is deemed proper that the expense for the maintenance of a light and signal at this locality should devolve upon the Light-House Establishment. The recommendation for an appropriation is therefore renewed.

128. *Conimicut, River Providence, Rhode Island.*—In the annual report of last year, it was stated that—

When the light on the shoal off Conimicut Point was lighted as a substitute for the light on the main-land, at Nayat Point, (distant about one mile,) the only available means of attending upon it was to allow the keeper to retain the dwelling at the old light-station, and to visit the new light by boat. The land constituting the site of the old light-station at Nayat Point is valuable, and would bring at public sale a good price. The old tower is not worth the cost of tearing down, and the dwelling not having been repaired, in anticipation of an appropriation for completing the building at Conimicut Point, to include a proper dwelling for the keeper, it now becomes necessary, either to make considerable expenditure upon the Nayat Point dwelling, or ask for a special appropriation for the necessary protection-pier against running ice, and for a dwelling at that light-station. The estimated cost of the work is \$30,000.

The recommendation is renewed.

— *Bullock's Point, River Providence, Rhode Island.*—The beacon,

heretofore a day-mark, will be lighted by the 1st of October next, an appropriation of \$1,000 having been made for the purpose at the last session of Congress, on the petition of persons interested in the navigation of the channel, and after favorable reports from the inspector and engineer of the district had been made, to whom the subject was referred for examination.

129. *Sabin's Point, River Providence, Rhode Island.*—The contractor for this structure has made good progress with the work. The foundation and pier are completed, and the dwelling is advanced as far as the second story. It is contemplated to exhibit the light at the station by the 1st of October next.

130. *Pumham Rock, River Providence, Rhode Island.*—The light was first exhibited at this station on the 1st of December last. A boat-house and landing are needed, the estimate of which is \$1,200.

131. *Fuller's Rock, River Providence, Rhode Island.*—During the construction of this beacon it was lighted by a steamboat company for the benefit of the navigation of the channel to Providence. The failure of the contractor to comply with the terms of this contract has made it necessary to reject the work.

132. *Sassafras Point, River Providence, Rhode Island.*—During the construction of this beacon it was lighted by a steamboat company for the benefit of the navigation of the channel to Providence. In consequence of the failure of the contractor to comply with the terms of this contract, payment has not been made for the work.

133. *Point Judith, Rhode Island.*—In accordance with the recommendation in the last annual report an appropriation of \$5,000 was made at the last session of Congress for a steam fog-signal. The construction of this signal is in progress. It will be of that class characterized a syren, and of the first order. The housing is nearly completed, and the signal will be in operation early in September. The present signal will be retained as a spare apparatus, to be sounded in case of accident to the new one.

134. *Block Island, (north end,) eastern entrance to Long Island Sound.*—The sand-drifts threatened serious damage to the dwelling by the encroachment of the chasm, caused by the high winds. Partial remedies have been made by grading and facing the surface of the site in the immediate vicinity of the dwelling, and upon the north or exposed side with paving-stone. The work is not yet finished, and with the view of completing it, an appropriation recommended in the last annual report was made at the last session of Congress.

— *Block Island, (south end,) eastern entrance to Long Island Sound.*—An appropriation of \$75,000 was made by the last Congress for a light-house and fog-signal at this locality, under a petition of persons interested in the navigation of this part of the coast: A preliminary survey of the southeast end of the island has been made, and a site favorable for the service of a steam fog-signal—a syren; a pond of fresh water being upon the site recommended, has been selected. Plans for the light-house and for fog-signal are in progress.

136. *Montauk Point, (New York,) eastern end of Long Island.*—The appropriation for the repairs of this station, and for the erection of a fog-signal as recommended in the last annual report, having been made, immediate measures will be taken for carrying into effect the object intended. It is proposed to erect a signal operated by a hot-air engine; in consequence of the difficulty of obtaining sufficient water for steam purposes; no other engine than that operated by hot air could be adopted at this locality.

141. *New London, Connecticut.*—The fog-signal having been in use fifteen years, needs renewing, and an estimate of \$4,500 is submitted for the purpose.

143. *Race Rock, Long Island Sound, New York.*—The proposals for the construction of the foundation and pier of this structure were so excessive in rates, and so much above the amount of the appropriation on hand, that no more than the landing and the enrockment of the foundation, and two courses of the pier, could be contracted for. This embraces 8,000 tons of dimension-stone, weighing from eight to ten tons each, for the enrockment alone. The landing has been commenced, and good progress made upon it.

The riprap foundation, consisting of ten thousand tons of riprap stones, irregular in shape, and weighing from three to five tons on an average, was completed in November last, and remained without displacement during the storms of winter and spring, and no appearance of settling is manifest. An appropriation for continuing the construction of the pier and erecting the dwelling is required, and the sum of \$75,000 is estimated, basing the estimate upon the proposal of the lowest bidder for the work now under contract.

144. *Little Gull Island, Long Island Sound, New York.*—This station needs an appropriation of \$5,000 for completing the landing, reference to which was made in the last annual report. There is special need for the facilities of a landing for the reason that the shelter from the sea is so limited that the difficulty of landing supplies of the station, including a large quantity of coal for the steam fog-signal, is unusually great. The recommendation for the appropriation of \$5,000 for completion of the landing is renewed.

147. *Long Beach Bar, Long Island, New York.*—The breakwater, for which an appropriation of \$20,000 was made, is under contract, and the iron-pile light-house will be placed under its shelter from the floating ice-fields that threaten destruction to buildings of this class, without such protection, in northern climates. The past winter endangered the structure, and the alarm of the keeper and his assistant was so great as to cause its desertion for two nights, during which no light was exhibited nor fog-bell sounded. The above light-house was completed, and the light exhibited for the first time, on the 1st day of December, 1871. The station is provided with a fog-bell struck by machinery.

150. *Calves Island, River Connecticut.*

151. *Brockway's Reach, River Connecticut.*

152. *Devil's Wharf, River Connecticut.*

The foundations of these structures are liable to disturbance by the river-currents, and efforts have been made to prevent their being undermined by throwing at their base riprap stone. There is now required for protection of the last-named structure a large quantity of stone; for this purpose, and for the protection of all these foundations, the sum of \$2,500 is recommended to be appropriated.

155. *Faulkner's Island, Long Island Sound, New York.*—The wasting away of the clay-bank continues slowly during the freezing and subsequent thawing of the soil. The beach requires to be protected at an estimated cost of \$2,500, which is recommended to be appropriated.

156. *New Haven Harbor, Connecticut.*—In answer to a resolution of Congress relating to the transfer of the light-house to Southwest Ledge, under date of April 16, 1872, it is stated as follows:

Southwest Ledge lies in the middle of the main ship-channel into New Haven Harbor, and forms a great danger to navigation. There are but 7 feet 6 inches of water on the rock at mean low water, and the question is between the removal of the rock by the

Engineer Department of the Army, and the erection by the board of a light and fog-signal to keep vessels from running upon it and other dangerous rocks in the vicinity. The main light at the entrance is now at Five-mile Point, on the mainland, on the east side of the harbor, and distant one mile from, and inside of Southwest Ledge. It was established in 1805, and last refitted in 1855. There is no doubt but that a light in the channel on this ledge would serve the interests of navigation better than the present light, and that it and a fog-signal also placed on the rock would be of more benefit to commerce than the removal of the ledge, since vessels could always run for the light, and keep clear of all the many dangers to navigation, which it will be observed exist at the entrance to New Haven Harbor. A light-house at Southwest Ledge would involve a very large expense on account of its submarine foundation, and the strength which would be required to resist the large fields of ice by which it would be assailed. The expense is estimated at \$117,800.

158. *Stratford Point, Connecticut*—The buildings of this station are very old and unfit for occupation. An estimate for a suitable dwelling over which the tower may be placed, was submitted in the last annual report. It is recommended that the amount then submitted be appropriated, viz, \$15,000.

—, *Stratford Point Shoal, Long Island Sound, New York*.—A special report was called for from the engineer of the district, with estimate of cost for a structure to supersede the light-ship. After a preliminary survey of the Middle Ground, he proposed to erect a light-house thereupon, and to discontinue the light-ship. The character of the formation is deemed suitable for a structure, the foundation of which should be riprap of large irregular blocks of granite from three to five tons each in weight. The least depth of water found at low tide is 5 feet 5 inches. An area of 100 feet diameter gives an average depth of 8 feet of water. The Middle Ground is composed of large gravel, unyielding to the iron rod driven by hand. The estimated cost of the structure is \$125,000.

160. *Bridgeport Harbor, Connecticut*.—The iron-pile light-house adopted for this locality has been completed and occupied by the keeper. The light has been exhibited in the new structure since November, 1871. A stone breakwater surrounding the light-house and protecting it from the floating ice-fields has recently been constructed. The light in the old structure has been discontinued.

161. *Penfield Reef, Connecticut*.—The foundation of riprap was laid during the previous season, and stood uninjured throughout the winter gales. The landing, wharf, and pier are in progress of construction under contract, and will be completed so far this season as to admit of the commencement of the dwelling, which is also under contract. The contractor for the pier, owing to his want of adequate means, has delayed the work, and the forbearance of the engineer toward him has alone prevented the annulling of his contract and the commencement of suit to recover the amount of the bonds.

162. *Old Field Point, Long Island, New York*.—Measures have been taken for the purchase of a right of way from the station to the public highway, there being two land-holders from whom the purchase must be made. Difficulties of removing claims have postponed the matter until next autumn, when it is believed satisfactory purchase may be concluded.

163. *Black Rock, Connecticut*.—The buoy-shed and wharf have been completed, coal-bins and derrick erected, and the station put in readiness for the storage of buoys, coal, and other articles to be used as an auxiliary depot for the district. The tower and keeper's dwelling (erected in 1808) are in an advanced state of decay, and need rebuilding. The new structure may be planned with the tower over the keeper's dwelling, and erected at a cost of \$9,500.

165. *Lloyd's Harbor, Long Island, New York.*—The sea-wall built only the previous season has been damaged by the ice of last winter, but measures will be taken to repair the same with the means on hand, as it is believed that the cost will be small.

— *Hart Island, Long Island Sound, New York.*—An appropriation having been made for a light-house at this station, the preliminary examination and survey have been made, and plans prepared for foundation, pier, and dwelling, preparatory to advertising for the construction.

169. *Sand's Point, Long Island, New York.*

173. *Great West Bay, Long Island, New York.*

174. *Fire Island, Long Island, New York.*

A special appropriation having been made for the repair of these stations measures will be speedily taken to place them in a good condition, and to repair the inclosures before the winter sets in.

176 and 177. *Highlands of Navesink, New Jersey.*—Application has been made to the Light-House Board to cause the substitution of a revolving light in one of the towers, and the question is now under consideration.

179. *East Beacon, Sandy Hook, New Jersey.*—The abrasion of the beach at this station is increasing; since the last annual report was submitted the abrasion has been about 80 feet. This increase was anticipated, as will be seen by the report referred to, and is due to the erection of the jetties for its protection near the fort, which cut off the supply of sand from the eastward. It is necessary that recourse be had to similar works to protect the light-house property, for which the estimate rendered last year of \$20,000 is renewed.

185. *Elm Tree Beacon, New York Bay, New York.*—The abrasion of the beach at this station is caused by a long wharf on the northward, which is struck by the rolling seas from the southeast, which diverts their course to the beach, and creates a violent disturbance; at the same, on the cessation of the storm, the usual littoral accretion is cut off by the same wharf and retained to the northward. The small jetty constructed on the south line of the station had been damaged by the sea, and a breach made severing its connection with the shore. This breach is in progress of repairs as well as general repairs of the jetty. It is likely that recourse must finally be had to a riprap along the entire front of the station for its preservation.

187. *Princess Bay, New York Bay, New York.*—The progress of the protecting wall commenced last season has been slow. The contractor having lost a capacious barge on the occasion of a storm, considerable delay has ensued in the work, and less than 500 feet of the wall has been completed. The work is in progress, and so far as built has produced good results.

188. *Fort Tompkins, New York Bay, New York.*—The plans for the light-house appropriated for at the last session of Congress have been made, and the work will be put under contract for completion before the winter season. As the station lies within the inclosure of the defensive works, the space occupied will be reduced to the smallest limit, and the plans contemplate the placing of the tower over the keeper's dwelling. The old site will then be relinquished for the purposes of a battery.

195. *West Point, River Hudson, New York.*—The rebuilding of the beacon is progressing, and will be completed at an early day. The site of the beacon is connected with that of the former stake-light, and no change in the sailing directions is made.

196. *Esopus Meadow, River Hudson, New York.*—The new light-house,

with tower over the keeper's dwelling, is nearly completed, and the light will probably be exhibited during the month of August. The distance from the old light-house site is small, and no important change in sailing directions is made.

198. *Saugerties, river Hudson, New York.*—The old light-house dwelling at this place has been sold, and the proceeds of the sale deposited and carried to the surplus fund.

— *Middle Ground, near Hudson, River Hudson, New York.*—The preliminary survey of the site has been made, and the plans have been prepared.

201. *Stuyvesant, River Hudson, New York.*—The old dwelling has been refitted, with the view of using it as a store-house for the river Hudson beacons during the winter season on the suspension of navigation. The roadway has been raised above the level of the freshets, and a small bridge built, with projection of piles against the bridge and its approaches.

202–213. *River Hudson Beacons, New York.*—Ten crib and stone piers for the portable beacons have been rebuilt during the past season, and the beacons reset on the opening of navigation. One of the sites, that of 209, *Cow Island*, has been encroached upon by the freshets, some 25 feet of the island having been washed away. A pile protection will be necessary to save the foundation from entire destruction. 211, *Van Wies Point* beacon, is also being undermined by the waves caused by the passing steamers. For its protection 100 tons of stone are needed.

— *Whitehall Narrows, Lake Champlain, New York.*—Eight of the beacons were removed during the winter and replaced after the ice disappeared. The recommendation to replace two stake lights by portable beacons, in the last annual report, is renewed, the estimated cost of same being \$1,600.

Two stake-lights, maintained at the expense of the commerce through the Narrows, should be assumed by the Light-House Establishment and portable beacons placed in their stead. The cost of the two will be \$1,600.

446. *Crown Point, Lake Champlain, New York.*—The buildings authorized by the appropriation of the last session of Congress will be erected, and all the necessary repairs will be attended to during the present season.

447. *Barber's Point, Lake Champlain, New York.*—The contract for the erection of the dwelling and tower is being carried out, with a prospect of completing the work before the close of navigation; but it is questionable whether the light can be exhibited before next season.

448. *Split Rock, Lake Champlain, New York.*—The boat-house and ways, with capstan and rigging, authorized by the special appropriation of last year, have been constructed.

449. *Juniper Island, Lake Champlain, New York.*—The boat-house and wharf authorized by the appropriation of March 3, 1871, were completed during the past season.

450, 451. *Burlington Breakwater, Vermont.*—The extension of the breakwater by the Engineer Department of the Army northward has been postponed, and in consequence thereof that end of the work has been marked by a portable beacon instead of erecting the dwelling contemplated by the appropriation of March 3, 1871. This, however, answers every purpose that is needed, although it is not so convenient for the keeper to serve the beacon.

452. *Colchester Reef, Lake Champlain, Vermont.*—The past winter has subjected the structure, so recently built, to a severe test. The fields

of ice have caused some injury, and the foundation is said to have settled. The examination has not thus far been made by the engineer of the district, and the precise extent of the injury is not known.

453. *Bluff Point, Valcour Island, New York.*—The title to the site not having been declared valid by the proper authorities, no measures have been taken to commence the work, a contract for which was made in anticipation of such declaration.

456. *Cumberland Head, Lake Champlain, New York.*—Negotiations are yet pending for the purchase of the land on the lake shore for the purpose of removing trees that obstruct the light from the channel to the northward.

458. *Isle La Motte, Lake Champlain, New York.*—The recommendation for a dwelling at this station, at an estimated cost of \$8,000, in the last annual report, is renewed.

REPAIRS.

At each of the following stations in the third district, repairs, more or less extensive, have been made during the year :

121. *Neiport, Rhode Island.*
122. *Rose Island, Rhode Island.*
127. *Warwick Neck, Rhode Island.*
128. *Conimicut, Rhode Island.*
133. *Point Judith, Rhode Island.*
135. *Watch Hill, Rhode Island.*
136. *Montauk Point, New York.*
140. *North Dumpling, Long Island Sound.*
141. *New London, Connecticut.*
144. *Little Gull Island, New York.*
145. *Gardiner's Island, New York.*
154. *Horton's Point, New York.*
155. *Faulkner's Island, New York.*
162. *Old Field Point, New York.*
163. *Black Rock, Connecticut.*
165. *Lloyd's Harbor, New York.*
166. *Norwalk Island, Connecticut.*
168. *Execution Rocks, New York.*
169. *Sands' Point, New York.*
170. *Throgg's Neck, New York.*
171. *North Brother Island, New York.*
173. *Great West Bay, New York.*
174. *Fire Island, New York.*
- 176-177. *Highlands of Navesink, New Jersey.*
178. *Sandy Hook, New Jersey.*
181. *Conover Beacon, New Jersey.*
188. *Fort Tompkins, New York.*
189. *Robbins's Reef, New York.*
194. *Stony Point, New York.*
196. *Esopus Meadows, New York.*
197. *Rondout, New York.*
198. *Saugerties, New York.*
200. *Coxsackie, New York.*
201. *Stuyvesant, New York.*
- 430-445. *Whitehall Narrows, New York.*
446. *Crown Point, New York.*
449. *Juniper Island, New York.*

- 450, 451. *Burlington Beacons*, Vermont.
 457. *Point au Roches*, New York.
 459. *Windmill Point*, New York.

The following-named stations in the third district require repairs to be made during the current and ensuing year:

121. *Newport Harbor*, Rhode Island.
 124. *Poplar Point*, Rhode Island.
 125. *Prudence Island*, Rhode Island.
 126. *Bristol Ferry*, Rhode Island.
 127. *Warwick Neck*, Rhode Island.
 134. *Block Island*, Rhode Island.
 146. *Plum Island*, New York.
 149. *Saybrook*, Connecticut.
 150. *Calves Island*, Connecticut.
 151. *Brookway's Reach*, Connecticut.
 152. *Devil's Wharf*, Connecticut.
 158. *Stratford Point*, Connecticut.
 163. *Black Rock*, Connecticut.
 169. *Sand's Point*, New York.
 173. *Great West Bay*, New York.
 174. *Fire Island*, New York.
 178. *Sandy Hook*, New Jersey.
 182. *Chapel Hill*, New Jersey.
 184. *Waackaack*, New Jersey.
 192. *Passaic*, New Jersey.
 197. *Rondout*, New York.
 198. *Saugerties*, New York.
 199. *Four-Mile Point*, New York.
 200. *Coxsackie*, New York.
 201. *Stuyvesant*, New York.
 209. *Cow Island*, New York.
 211. *Van Weis Point*, New York.
 249. *Juniper Island*, New York.

The following-named stations in the third district are not mentioned elsewhere:

120. *Lime Rock*, Newport Harbor, Rhode Island.
 123. *Dutch Island*, Narragansett Bay.
 137. *Stonington Harbor*, Connecticut.
 139. *Morgan's Point*, Connecticut.
 148. *Ceder Island*, New York.
 157. *New Haven Long Wharf*, Connecticut.
 167. *Great Captain Island*, Long Island Sound.
 183. *Point Comfort Beacon*, New Jersey.
 190. *Bergen Point*, New Jersey.
 191. *Corner Stake*, New Jersey.
 193. *Elbow Beacon*, New Jersey.

LIGHT-SHIPS.

118. "*Brenton's Reef*," on *Brenton's Reef*, off entrance to *Newport Harbor*, Rhode Island.—This vessel is now undergoing repairs at *New London*, and her place is supplied by *Relief No. 19*.

138. "*Eel Grass*," on *Eel-Grass Shoal*, in *Fisher's Island Sound*, *Connecticut*.—This is a third-class light-ship formerly stationed in *Roanoke Sound*, *North Carolina*. A screw-pile light-house having been erected there, her services were no longer necessary, and she was removed to this station, and will probably last for two or three years.

142. "*Bartlett's Reef*," off *New London*, *Connecticut*.—This vessel requires her upper deck to be calked; otherwise she is in good condition.

153. "*Cornfield Point*," *Long Island Sound*, off mouth of *Connecticut River*.—This vessel, which was removed from *Eel-Grass Shoal*, is in good condition, except damage amounting to \$175, caused by being run into by the schooner *J. G. Drew*, of *Belfast, Maine*. This damage is now being repaired.

159. "*Stratford*," on "*Middle Ground*," *Long Island Sound*, off *Stratford Point*.—This vessel is in fair condition, but in a few years she will require rebuilding, as will be observed elsewhere in this report. It is recommended that a fourth order light be erected on this shoal, as being more economical and far more durable than a light-ship.

175. "*Sandy Hook*," off *New York Bay*.—This vessel, stationed seven miles outside of *Sandy Hook*, has been repaired during the last year, at a cost of \$17,159.60. A new mooring-chain, costing \$1,158.80, has been supplied. She is now in excellent condition. A "Thiers automatic fog-signal, bilge-pump, and ship ventilator" has been placed on the vessel for experiment and test-trial. It has been found successful as a bilge-pump and ventilator, and will be retained. As a fog-signal it did not prove satisfactory.

Relief No. 19.—This vessel is in good condition, and is now on *Brenton's Reef*, off *Newport*, while the vessel belonging to that station is being repaired.

Relief No. 20.—This vessel, which is also in good order and ready for any emergency, is now at the light-house depot at *Staten Island*, *New York Harbor*.

Relief No. 25.—The condition of this vessel, owing to age and service, is found on a strict examination to be so bad as to render her unworthy of further repairs; she has been removed from *Cornfield Point* and taken to *New London*, *Connecticut*, and her sale is recommended.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

119. *Beaver Tail*, *Rhode Island*.—First-class Daboll trumpet.

133. *Point Judith*, *Rhode Island*.—Third-class Daboll trumpet.

141. *New London*, *Connecticut*.—Third-class Daboll trumpet.

144. *Little Gull Island*, *New York*.—Second-class syren, (in duplicate.)

164. *Eaton's Neck*, *New York*.—Second-class syren, (in duplicate.)

168. *Execution Rocks*, *New York*.—Second-class Daboll trumpet, (in duplicate.)

179. *Sandy Hook*, entrance to *New York Harbor*.—First-class syren, (in duplicate.)

DAY OR UNLIGHTED BEACONS.

All the beacons in the third district comprised in the following list are in good condition, unless otherwise stated:

1. *East Lime Rock*, near *Newport*.—A granite structure, surmounted by a spindle and cage.

2. *South Point*, *Rose Island*, *Narragansett Bay*.—Granite structure, surmounted by a spindle and cage.

3. *Half-way Rock, three-fourths of a mile southward of Prudence Island Point, Narragansett Bay.*—Spindle and square cage.

4. *Bullock's Point, Narragansett Bay.*—Stone beacon with iron spindle. This beacon will be lighted under an appropriation of the last session of Congress for the purpose.

5. *Pawtuxent Beacon, Narragansett Bay.*—Of stone, surmounted by a black ball.

6. *Punham Beacon, River Providence.*—A stone beacon, with vane and black ball.

7. *Muscle Bed, east side of the channel, below Bristol Ferry, Rhode Island.*—A stone beacon, with iron spindle and day-mark.

8. *Borden's Flats, opposite Fall River.*—A stone beacon, with iron column and day-mark.

9. *Castle Island, near north end of Hog Island, Bristol Harbor.*—A stone beacon, surmounted by a red ball.

10. *Allen's Rock, River Warren.*—Stone beacon, one-eighth of a mile north of Adams's Point.

11. *Warwick or Spindle Rock, west channel of Narragansett Bay, and entrance to Greenwich Harbor, between Warwick Neck and Pojack Point.*—Iron spindle, with square wooden cage.

12. *White Rock Beacon, at the entrance of Wickford Harbor, Narragansett Bay.*—Stone beacon, with iron column and day-mark.

13. *Watch Hill Spindle, entrance to Fisher's Island Sound from light-house, southwest by south three-fourths of a mile.*—Stands on a rock which is bare at low water, and is surmounted by a cage.

14. *Sugar Reef Beacon, Fisher's Island Sound.*—Iron pile-beacon, with cage-work day-mark in the form of a cone.

15. *East or Catumb Reef Spindle, entrance to Fisher's Island Sound by Lord's Channel, one and one-fourth miles east of east point of Fisher's Island.*—An iron pile-beacon, with square cage-work.

16. *West or Wicopesset Spindle Rock, entrance to Fisher's Island Sound by Lord's Channel, northwest of east spindle, two-thirds of a mile.*

17. *Latimer's Reef, Fisher's Island Sound, one mile northwest of east point of Fisher's Island, and three-fourths of a mile southeast of Eel Grass Shoal light-vessel.*—An iron spindle, bearing a square cage-work.

18. *Ellis's Reef, Fisher's Island Sound, three-fourths of a mile northwest of Eel Grass Shoal light-vessel.*—An iron spindle with a square cage-work.

19. *Ram Island Reef, Fisher's Island Sound, one-half of a mile southeast of Ram Island.*

20. *Spindle on The Whale, River Mystic.*—An appropriation of \$5,000 has been made for substituting a stone-beacon for the iron spindle destroyed by ice. The structure is under contract, and will be completed before the season of fall gales.

21. *Crook's Spindle, River Mystic.*—Is an iron spindle, with keg on top.

22. *Groton Long Point, Fisher's Island Sound.*—An iron spindle, bearing a case-work in the form of an inverted cone.

23. *Sea Flower Beacon, Fisher's Island Sound, Connecticut.*—An appropriation of \$4,200 has been made for rebuilding this beacon. It is under contract, and will be completed at an early day.

24. *Black Ledge, entrance to New London Harbor, Connecticut.*—The iron spindle on this ledge was carried off during the last season subsequent to submitting the annual report. It is recommended that a stone beacon of a substantial kind be substituted for the iron spindle, for which an estimate of \$5,500 is submitted for the beacon and the renewal

of the iron shaft bearing a cage-work, formed by two cones connected at the vertices.

25. *Saybrook Beacon, River Connecticut*.—Stone beacon, with globe, on Saybrook Bar.

26. *Hen and Chickens, Long Island Sound*.—Iron spindle, bearing a square cage, painted black.

27. *Branford Reef Beacon, Long Island Sound*.—Granite beacon, surmounted by an iron shaft bearing a black day-mark.

28. *Quix's Ledge, entrance to New Haven Harbor, Connecticut*.—An iron spindle, with a cask on top. Stands on a rock which is dry at half tide.

29. *Southwest Ledge Spindle, entrance to New Haven Harbor, Connecticut*, marked by a second-class buoy.

30. *Stratford River Beacon, entrance to River Stratford*.—Granite beacon, with iron column and mark.

31. *Inner Beacon, Bridgeport Harbor, Connecticut*.—A frustum of a square pyramid of wood, surmounted by a wooden mast, with a cask painted black.

32. *Outer Beacon, Bridgeport Harbor, Connecticut*.—The same as the inner beacon.

33. *Black Rock Beacon, Long Island Sound*.—An iron pile-beacon, with a cage on top.

34. *Southport Beacon*.—Granite beacon, with iron column and day-mark.

35. *Southport Breakwater Beacon*.—Granite beacon, with iron column and day-mark.

36. *Norwalk Beacon, southwest of Norwalk Island, Connecticut*.—A granite structure, supporting a shaft and day-mark of iron.

37. *Great Reef, off Norwalk Island, entrance to Norwalk Harbor*.—A wooden spindle, with cage day-mark.

38. *Sand's Spit Beacon, Sag Harbor, Long Island, New York*.—The contractor for building this beacon has not placed the same on the site designated, nor has he built it in accordance with agreement. Payment has therefore been withheld until he complies with the contract, or until an adjustment for the value of the work executed can be concluded between him and the engineer of the district that may be satisfactory to the Light-House Board. The contractor has been notified to this effect.

— *Oyster Pond Point, Plum Gut, entrance to Gardiner's Bay*.—An appropriation of \$5,000 has been made for a beacon of granite as a substitute for the iron spindle destroyed by ice. The structure has been put under contract, and will be completed before the season of autumn gales.

40. *Success Rock, Long Island Sound*.—An iron shaft, with conical cage-work.

41. *Romer Shoal Beacon, New York Bay*.—The riprap protection for this beacon, authorized by the appropriation of March 3, 1871, has been made, and consists of 950 tons of granite blocks of large irregular shape. The painting of the upper section of the tower remains to be done.

42. *Mill Reef Beacon, Kill van Kull, opposite New Brighton*.—This is a sheet-iron beacon, filled in with concrete, and secured to a granite base. It is conical in shape, and supports an iron shaft with an iron cage on top.

LIGHT-HOUSE GENERAL DEPOT, AT STATEN ISLAND, NEW YORK HARBOR.

This depot contains the manufacturing establishment, vaults for the storage, and apparatus for photometrical tests, of oil, and store-houses for the general supplies, &c., for the service of the lights in the Atlantic,

Pacific, Gulf and Lake coasts of the United States. The office building has been completed, and occupied by the engineer and inspector of the third district during the last fiscal year. The dwelling of the inspector has been repaired, and occupied by him. The other buildings have been repaired; also the fences and wharves, including additional piling for the convenience of the tenders in coaling, &c. One derrick of ten tons' lifting capacity has been erected on one of the wharves, and another of similar capacity is in readiness to be erected on the other wharf. The grounds have been partly graded and drained. The coal-bin has been enlarged to increase the capacity for 400 tons additional of coal. A new boiler has been supplied for the workshop, and the old one repaired and ready for resetting as a duplicate or reserve. The oil-vaults will soon undergo considerable repair, rendered necessary by defective drains, the capacity of which were found to be insufficient, and with so little declivity that the filling up by sediment has been rapid. Drains of 18 inches radius and semicircular in form have been authorized by the board, as also drains in the rear of the vault, and lateral drains to connect with the large 12 and 18-inch drains of the grounds. This will involve considerable expense. For this purpose and for the completion of the grading and drainage of the grounds, the construction of a large cistern for collecting the rain-fall from the buildings now mostly wasted, and which can be utilized for the use of the light-house tenders, the sum of \$10,000 will be required, and is recommended to be appropriated.

The following is a statement of the number of boxes, barrels, packages, &c., containing articles of supply and outfit for light-stations, and received at and shipped from light-house general depot, Tompkinsville, Staten Island, from July 1, 1871, to July 31, 1872, inclusive:

	Boxes.	Barrels.	Packages, cases, &c.	Totals.
Received	3, 136	2, 918	5, 542	11, 596
Shipped	2, 832	2, 663	5, 058	10, 553
Total	5, 968	5, 581	10, 600	22, 149

Lenses received from France and delivered from light-house depot, Staten Island, from July 1, 1871, to June 30, 1872.

FOURTH DISTRICT.

The fourth light-house district extends from Squam Inlet, New Jersey, to and including Metomkin Inlet, Virginia. It includes the sea-coast of New Jersey below the Highlands of Navesink, the bay coasts of New Jersey and Delaware, the sea-coasts of Delaware and Maryland, and part of the sea-coast of Virginia.

Inspector.—Commodore William H. Macomb, United States Navy, till his death, August 12, 1872; Captain Reigart B. Lowry, United States Navy, present inspector.

Engineer.—Colonel I. C. Woodruff, Corps of Engineers, brevet brigadier-general, United States Army.

In this district there are:

Light-houses and lighted beacons.....	18
Light-ships, (in position)	2
Light-ships, (for relief)	1
Buoys actually in position.....	111
Spare buoys for relief and to supply losses.....	66
Tender (steam) Violet	1

The numbers preceding the names of stations correspond with those of the Light-House List of the Atlantic, Gulf, and Pacific Coasts of the United States, issued January 1, 1872.

214. *Barneгат, sea-coast of New Jersey.*—The semi-monthly measurements along the beach near the light-house have been continued throughout the year, and there have been no important changes in the water-lines along the light-house lot. Thus far the works of protection have proved a success.

• 215. *Tucker's Beach, sea-coast of New Jersey.*—In September last the color of the tower and keeper's dwelling were changed from gray to red, to serve better as a day-mark for passing vessels.

216. *Absecum, sea-coast of New Jersey.*—The semi-monthly measurements along the beach in the vicinity of the light-house have been continued throughout the year, and favorable changes in the beach have been found to have taken place along the entire front of Atlantic City. There has been a gradual widening of the beach on the ocean-front, and at the point of the inlet. The north-channel cut of the inlet has been buoyed, and is now used by the largest vessels entering the harbor, as it is a more direct course in and out of the inlet.

The time is not distant when the south channel will be closed; it is a crooked and narrow one, and the strength of the current in the ebb-tide is not so great as formerly. It is reported that most of the vessels, passing in and out of the inlet, go through the north channel, and recently a schooner of 260 tons, loaded with ice for Atlantic City, draw-

ing 8½ feet water passed in through the north channel at about half-tide. It is a matter of regret that possession of the necessary land along the inlet front cannot be obtained for the works of protection of the beach. From careful examinations it is manifest that if small stone jettées were placed along the inlet, a much greater quantity of the ebb-tide water would be thrown through the north channel, and the time would not be long before the south channel would be closed. At the present time no fears need be apprehended for the safety of the light-house site. The color of the tower was changed in September last, to better serve as a day-mark for passing vessels, as follows: the lower section for 52 feet from the base, white; the middle section 52 feet, red; and the upper section, including the lantern, parapet, and gallery-railing, white. The authorities of Atlantic City have not yet furnished the deed from the property owners for the occupation of the land required for sites, &c., for works of protection. The mayor states that there is now but one person to sign the grant, to enable him to have the papers prepared giving possession to the Government for commencing the work.

—*Hereford Inlet, sea-coast of New Jersey, ten and three-quarters nautical miles north of Cape May's light-house.*—Congress at its last session having appropriated \$25,000 for erecting a light-house at or near this point, measures will be taken without delay to locate its site, and make arrangements for the purchase of a suitable piece of ground, with the necessary steps for the cession of jurisdiction by the legislature of New Jersey to the Government of the United States.

219. *Cape Henlopen, sea-coast of Delaware, entrance to Delaware Bay.*—Trouble has been anticipated at this station by the encroachment of the "Big Sand Hills" near it. There are changes constantly going on, but no serious inconvenience has yet resulted from them, nor is it thought there will be as long as the space between the tower and dwelling is kept open by removing the sand as fast as it accumulates.

220. *Cape Henlopen Beacon, Delaware Bay.*—On the 28th of July last the building was struck by lightning, and it tore off the cornice of the building, but did no other damage.

221. *Delaware Breakwater, Delaware Bay.*—A new frame structure for the fog-bell and striking-machinery has been erected. The bell and machinery have been thoroughly cleaned, the machinery has been repaired, the motive weight has been reduced about 600 pounds, and the fog-signal is now in good condition.

—*Mispillion, Delaware Bay.*—Congress, at its last session, appropriated \$5,000 for re-establishing the small light-house at this point, and it will be commenced at an early day.

—*Light-houses at Cross Ledge Shoal, Ship John Shoal, and Bulk-head Shoal, Delaware Bay and River.*—During the last session of Congress a petition was received for lights at Ship John Shoal and Bulk-head Shoal, in the river Delaware, of which the following is a copy:

PHILADELPHIA, January, 1872.

To the Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury:

The aids to navigation in the Delaware River and Bay, which have long been insufficient, are now, when steamships are to a great extent superseding sail-vessels, altogether inadequate to the requirements there. These ships run at all seasons of the year, and at all hours, by night as well as by day, and the buoys which mark the shoals and serve, when they can be seen, as guides to the mariner in keeping the channel, are useless in dark nights always, and in winter they are deceptive and dangerous; for at that season the drift-ice which covers these waters changes the location of some of these buoys and sweeps others entirely away. Experienced mariners, convers-

ant with the navigation here, are, therefore, clearly of opinion that permanent light-houses are the most efficient guides to navigation in the long and intricate channels of the Delaware, and the only ones that are available at all times and all seasons of the year. The last annual report of the Light-House Board (pages 27 and 28) recognizes this fact by its recommendation of a light-house in place of the light-ship on the Cross Ledge, which is often displaced by drifting ice, and also recommends the erection of a light-house on Tinicum Island, above Chester. These recommendations, if carried into effect, will be great and permanent benefits to the commerce of this port; but there is also urgent need of light-houses at other points, viz, at the Ship John Shoals, at Reedy Point, and at the upper end of the Bulk-head Shoals.

The undersigned corporations and citizens of Philadelphia, interested in its commerce, respectfully ask your attention to the foregoing statements, and earnestly request you to institute such measures as will supply the requisite aids to the navigation of our river and bay as herein set forth.

JOEL PARKER,

Governor of New Jersey.

JAMES PONDER,

Governor of Delaware, and others.

The question as to the necessity of these lights, and their cost, was submitted to the district officers, and in their replies it was stated that there was great necessity for the lights at the points named, and more so now than formerly, on account of the greater number of steamers navigating the river and bay at all hours of night and day; and when there is floating ice, the buoys being either cut off or drifted from proper positions, and during darkness invisible, the soundings cannot be taken, the lead frequently lighting on the cakes of ice, while the vessel in motion is liable to run on shore before getting another cast of the lead; whereas, were lights in their positions they could steer their courses.

The necessity for a light on Ship John Shoals is to guide vessels up the channel and prevent them from getting ashore on Ship John Shoals and the one opposite, the tide being such as to drift them at times on either shoal. This drifting is frequently experienced in this part of the channel.

On the north end of Bulk-head Shoals, a light is necessary to further show the channels past Bulk-head Shoals, and in order that vessels may shape their course past Deep-Water Point.

In view of the fact that neither the light-house at Ship John Shoals nor Bulk-head Shoals can be constructed in a single fiscal year, and the impossibility of leaving either structure in an unfinished condition over winter without a probability of the loss of the whole of it by the ice, making it necessary to use one entire season, including spring, summer, and fall, (parts of two fiscal years,) for its erection at the site, after the preparation of the material during the previous season, it is earnestly recommended that the appropriation for Ship John Shoals and Bulk-head Shoals, if Congress should deem it proper to make them, in view of the facts presented in the accompanying reports, shall be available during two entire fiscal years.

It was further stated that the cost of each light-house would be \$125,000.

The want of a light-house at Cross Ledge Shoals, in Delaware Bay, is very great, for the reasons, 1st, that the light-ship now stationed there is often driven from her moorings by fields of ice, endangering her own safety and (by absence from her station) the safety of commerce. 2d. The erection of a light-house to take the place of the light-ship, would save the very considerable expense of her crew, and the repairs which from year to year are necessary, and involve much expense. The policy of the board is to replace, in all cases where it is possible, our light-ships by light-houses on the shoals which the former are intended to mark, being more certain in their service and involving much less

expense for maintenance. The board recommends appropriations for the erection of lights at Cross Ledge, Ship John, and Bulk-head Shoals, the estimated cost of which is \$125,000 each.

226. *Mahon's River, Delaware Bay.*—As was stated in the last annual report, the abrasion of the marsh in which this light-house stands is so great as to compel a change of site. There is a good location about a quarter of a mile north of the present site, which will serve equally well the purposes of navigation. If all the material can be prepared ready to commence the work of erection of the structure at the site by the 1st of July next, the whole can be completed ready for lighting by the following November. If a site and right of way can be purchased, at a moderate cost, the amount asked for by the board, viz, \$15,000, will be sufficient to erect a building.

Proposed light-house, Reedy Point, Delaware Bay.—An appropriation of \$3,000 for a beacon-light on this point was approved on the 3d August, 1854. The price asked by the owners for the necessary site, with the right of way, was \$3,000, being the whole amount appropriated, which was allowed to revert to the Treasury, as the demands of the owners were considered unreasonable. During the last year petitions for this light have been received; but it is believed that a sixth-order lens light placed on the south end of Pea Patch Island (Fort Delaware) would serve the purpose of navigation as well. To construct a suitable structure, including the lens, will cost about \$8,000, and an estimate therefor is presented.

REPAIRS.

At each of the following-named light-stations in the fourth district there have been repairs and renovations more or less extensive since the last annual report.

- 214. *Barnegat*, sea-coast of New Jersey, Barnegat Inlet.
- 215. *Tucker's Beach*, sea-coast of New Jersey, Little Egg Harbor Inlet.
- 216. *Absecum*, sea coast of New Jersey, Absecum Inlet.
- 218. *Cape May*, sea-coast of New Jersey, entrance to Delaware Bay.
- 219. *Cape Henlopen*, sea-coast of Delaware, entrance to Delaware Bay.
- 220. *Cape Henlopen Beacon*, entrance to Delaware Bay.
- 221. *Delaware Breakwater*, Delaware, entrance to Delaware Bay.
- 223. *Maurice River*, New Jersey, mouth of River Maurice, entrance to Delaware Bay.
- 229. *Reedy Island*, Delaware, Delaware Bay.
- 230. *Christiana*, Delaware, mouth of River Christiana, Delaware Bay.
- 231. *Fort Mifflin*, Pennsylvania, River Delaware.
- 233. *Fenwick Island*, sea-coast of Delaware.

The following named light-stations in the fourth district require repairs during the ensuing year:

- 218. *Cape May*, sea-coast of New Jersey.
- 222. *Brandywine Shoal*, Delaware Bay.
- 223. *Maurice River*, New Jersey, Delaware Bay.
- 224. *Egg Island*, New Jersey, Delaware Bay.
- 226. *Mahon's River*, Delaware, Delaware Bay.
- 227. *Cohansey*, New Jersey, Delaware Bay.
- 228. *Bombay Hook*, Delaware, Delaware Bay.
- 231. *Fort Mifflin*, Pennsylvania, Delaware Bay.

The following are names of light-stations in the fourth district not mentioned elsewhere in this report:

234. *Assateague*, about two miles from the southwest point of Assateague Island, Virginia.

LIGHT-SHIPS.

217. "*Five-Fathom Bank*," on *Five-Fathom Bank*, off the capes of the *Delaware*.—This vessel is in excellent condition, and well adapted for the position. During the month of March she parted her moorings and drifted from her anchorage. The United States revenue steamer *Colfax*, while on a cruise, took her in tow and replaced her on her station. A new chain (made at the Washington navy-yard and purchased from the Navy Department) and a mushroom anchor of 4,000 pounds have been supplied, and will make her moorings more secure than before.

225. "*Cross Ledge*," on *Cross Ledge Shoal*, in *Delaware Bay*.—No repairs have been made on this vessel since the last annual report, and she is in good condition. She was driven from her station by the ice during the month of December, 1871, and took refuge under the Delaware Breakwater, where she remained until February 28, 1872, when she was replaced on her station. March 6th she was driven again from her anchorage and took refuge in Maurice River Cove, and was replaced on her station a few days after. The erection of a light-house, to replace the light-ship on this dangerous shoal, is strongly recommended, as will be observed elsewhere in this report.

Relief light-ship, No. —, is in good condition, and ready for service at the depot at Christiana.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

There are no fog-signals operated by steam or hot-air engines in this district.

DAY OR UNLIGHTED BEACONS.

There are no day or unlighted beacons in this district.

DEPOT.

Christiana, Delaware.—The construction of the wharves and buildings for fitting this station for a buoy-depot and a winter harbor for light-vessels, reported in operation in the last annual report, was continued until the 1st of last November. The depot consists of two wharves on Christiana River, and a large store-house for one of the wharves. This wharf extends from the front of the store-house into the river a distance of 164 feet (to 8 feet of water at ordinary low tide) by a width of 32 feet. The store-house is 50 feet by 140 feet, on plan, and two stories of 8 feet in height to the eaves of the roof. The first or lower floor is divided into two parts. The front room is 50 by 63 feet, designed for storing miscellaneous articles. The balance, 50 by 77 feet, is fitted with a coal-bin, skids for second and third class iron buoys, and space for storing spar-buoys, ballast, balls, chains, &c. This apartment has a well-constructed brick water-cistern of 5,000 gallons capacity, and is supplied by rain-water from the roof. The second story is in one room, with suitable stairway leading from first story. A railroad track from the outer end of the wharf, and two cars for transporting supplies into the building, have been supplied. The other wharf is completed, and

extends from the proposed front of the building in its rear into the river a distance of 140 feet (to 8 feet water at ordinary low tide) by a width of 32 feet. The piles for the foundation of the store-house in rear of this wharf are all driven and girdage logs placed. The design for this building is in plan 50 by 150 feet, and one story of 10 feet in height to take in first-class buoys. It is recommended that an appropriation be made for its completion. To erect the building the cost is estimated at \$10,000. This will provide room for storage of first-class iron buoys, which the other store-house is not designed for.

FIFTH DISTRICT.

The fifth district extends from Metomkin Inlet, Virginia, to include New River Inlet, North Carolina, and embraces part of the sea-coasts of Virginia and North Carolina, the sounds of North Carolina, Chesapeake Bay, and the Rivers James and Potomac.

Inspector.—Commodore Fabius Stanley, United States Navy.

Engineer.—Major Peter C. Hains, Corps of Engineers, brevet lieutenant-colonel, United States Army.

In this district there are—

Light-houses and lighted beacons	69
Light-ships, (in position)	1
Light-ships, (for relief)	0
Fog-signals operated by steam or hot-air engines	0
Day or unlighted beacons	100
Buoys actually in position	634
Spare buoys for relief and to supply losses	264
Tender (steam) Heliotrope, (buoy-tender)	1
Tender (steam) Tulip, for engineer's construction and repairs	1
Tender (sail) Maggie, (buoy-tender)	1
Tender (sail) Spray, engineer-tender for construction and repairs	1

The numbers preceding the names of stations correspond with the Light-House List of the Atlantic, Gulf, and Pacific Coasts of the United States, issued January 1, 1872.

237. *Cape Henry on south side of main entrance to Chesapeake Bay, Virginia.*—Under instructions from the Light-House Board, the engineer of the district visited this station and made a personal examination of the tower and keeper's dwelling, with the view of determining what repairs or alterations are necessary at the station. The tower is a frustum of an octagonal pyramid, built on a raised foundation of loose stone some 30 feet above the level of the sea. The masonry of the outside is a soft sandstone, with an inside brick cylinder, the latter having been built in 1857, at which time the station was last refitted. Of the eight faces of the tower, six of them show on the outside large cracks or openings, extending from the base upward. Four of them are apparently less dangerous than the other two, and alone would not warrant any great apprehensions of danger, but the latter, viz, those on the north and south faces, where the strength of the masonry is lessened by openings for windows, are very bad, extending from the base almost to the top of the tower. These cracks cannot be seen on the inside, on account of the brick cylinder, (which is of more recent construction than the outside masonry,) and doubtless terminate at the air-space between the outer and inner walls. At present the tower is in an unsafe condition, and there is no way of repairing the damage satisfactorily, and a new one must be built. This old tower has done good service, having been built in 1791, and is now the oldest tower on the coast south of Cape Henlopen; but it has seen its best days, and now, from age and per-

haps defective workmanship, it is in danger of being thrown down by some heavy gale.

The light is of the second order, and cannot be seen as far at sea as its importance in respect to location demands. It is undoubtedly one of the first lights, in point of importance, on the coast. A new tower should be built at this station without delay, and the light made of the first order. A good site can be had near the present location, on Government land, and materials for building purposes can be landed without difficulty. It also should be noted that the keeper's dwelling is in a dilapidated condition, and at too great a distance from the tower to insure proper attendance. It is a frame building, and is now more than thirty years old. It is too small for the number of keepers at this station, and should be enlarged. At present it affords very poor protection to the keepers from inclemency of the weather in winter. A new dwelling is an absolute necessity for this station.

It is estimated that the cost of a first-order tower, with lens, keeper's dwelling, &c., complete, will be, at this place, \$85,000, and an appropriation of \$50,000 is asked to commence the work.

238. "*The Thimble*," entrance to Hampton Roads, Virginia.—This light-house is designated to take the place of the Willoughby Spit light-ship, which is in need of extensive repairs. It is located on the shoalest point of Horseshoe Bar, at the entrance to Hampton Roads, called "*The Thimble*," which is the source of great danger to vessels navigating the bay, and others coming in from sea, this being particularly the case at night, when the buoy which has heretofore marked this shoal could not be seen.

After duly advertising for bids, a contract was made August 31, 1871, with the lowest bidder to furnish the iron-work to be used in the foundation at this new light-house, but the impracticability of having it ready in time to plant the piles during the working season of that year, necessitated a delay until May of the present, the exposed locality rendering it necessary to secure a season of calm weather in order to build the platform from which the work of screwing the piles into the shoal is carried on. While the iron-work was in process of construction, the frame of the superstructure was prepared at the depot at Lazzaretto Point, Maryland. The material was shipped to its destination the latter part of May, and on the 10th of June the platform completed. As was anticipated, the shoal proved to be very hard, consisting of fine compact sand, which rendered the process of screwing in the piles very slow. Further delay was experienced by the breaking of a cast-iron column used as a follower on the pile, when the top of the latter reaches nearly the level of the platform and prevents the working of the levers; and also by the breaking of one of the screws, owing to a defective casting. The damage in each case was repaired with the least loss of time practicable, and the work resumed. The last pile was planted on the 1st of August, and it is expected that this structure will be finished by October 1, 1872. This will enable the light-ship to be withdrawn, and there will then be no light-ship in service in this district. The light will be of the fourth order.

241. *Lambert's Point*, on the shoal off Lambert's Point, River Elizabeth, Virginia.—The screw-pile light-house, for which an appropriation was made by act of Congress approved March 3, 1871, was finished in May last. The original plan of a light-house on six piles was modified, in order to make use of some iron piles that were on hand. It is now a square house on five piles, and shows a red light of the fifth order. The

station is provided with a fog-bell which strikes by machinery in foggy weather every ten seconds.

245. *Deep Water Shoals, River James, Virginia.*—This light-house was painted throughout, and had other repairs made to it. The piles of the old light-house, which was destroyed by ice in 1866, were taken out and sent to the depot at Lazaretto Point, where they will be available for other works in the district or for dumb-beacons.

— *Solomon's Lump, in Kedges Strait, between Tangier Sound and Chesapeake Bay.*—In compliance with a resolution of the House of Representatives, an examination and report to Congress was made, during the last session, upon the necessity and expediency of establishing a light to mark the shoal known as Solomon's Lump, in Kedges Strait, between Tangier Sound and Chesapeake Bay. Solomon's Lump is a point of land on the north end of Evans Island. There is a shoal that extends out a considerable distance from this point in a northerly direction, and is a source of danger to vessels navigating Kedges Strait at night. Near its extreme point is the regular channel. The shoal itself has not more than about 5 feet water on it to a point near the red buoy, which marks its extreme northerly end. At night this buoy cannot be seen a sufficient distance to be of any use. The only light in this vicinity is that on Fog Point, about one and one-fourth miles in a west-southwest direction, but, on account of its distance and location, it affords no security to vessels from going ashore on the reef off Solomon's Lump. The light at Fog Point was established in 1827, before the introduction of the screw-pile system of light-houses, and though it has served to mark the entrance to Kedges Strait for a long time, it is of little value as compared with other positions that could have been selected for a screw-pile structure, which would not only have marked the entrance to the strait, but would have been a guide all the way through. A light established on the shoal off Solomon's Lump, near its extreme point, and in 5 feet water, or on the shoal on the opposite side of the channel would accomplish both these objects, and render navigation through Kedges Strait safe at all times. As the sailing course in either direction would be a straight line passing just north of the light-house at Solomon's Lump, in case a light was established there, that at Fog Point would be no longer of use, and could be discontinued. It would, therefore, not increase the number of lights, nor add anything to the annual cost of maintenance. An appropriation of \$15,000 is, therefore, asked to establish a light-house off Solomon's Lump to take the place of that at Fog Point.

260. *Point Lookout, on the north side of the entrance to River Potomac, Maryland.*—Under instructions from the Light-House Board, the engineer of the district has commenced the work of establishing a large fog-bell on the north side of the mouth of the river Potomac, under the general appropriation for fog-signals. This is a very desirable aid to navigation, and will be equally valuable to vessels navigating the bay and river.

264. *River Choptank, opposite the entrance to the Rivers Choptank and Treadhaven, Maryland.*—A contract was made in March, 1871, for the construction of this light-house, which was not completed until the 23d of December, partly owing to the character of the foundation, which was very hard, and to the want of experience on the part of the contractor in this kind of work. The light-house stands on ten wooden piles encased in cast-iron. Six of the piles form the foundation for the light-house proper, the other four being fender-piles, serving as ice breakers. The superstructure is an hexagonal frame building, with a lantern on the top, and shows a light of the sixth order. The light-

house stands in 11 feet water, mean tide, on a shoal about one and one-half miles from Benonis Point. As soon as the light-house was completed, the light-vessel, which was formerly stationed in this vicinity, was permanently withdrawn. This station is provided with a fog-bell, struck by machinery, at intervals of ten seconds.

265. *Thomas's Point, north side of mouth of South River, Maryland.*—It will be observed by reference to the Coast Survey chart of the Chesapeake Bay that the light-house at Thomas's Point, on the north side of South River, from four miles south of entrance to Annapolis Harbor, Maryland, can serve but poorly its purpose as a warning of the dangerous shoal that makes out from it a distance of one and one-quarter miles into the bay. This light-house was built in 1825, before the introduction of the system of light-houses in the water on iron piles. Its present location is such that little use can be made of it at night, and in times of foggy or thick weather it is utterly useless. Under no circumstances can vessels drawing more than 8 feet water pass within one and a quarter miles of it, as the shoal is continuous, and has on it only that depth at the outer extremity, and less between this point and the shore. The outer extremity of the shoal is only marked by a buoy, and it is a matter of frequent occurrence to see vessels ashore here. The ineligibility of its present location is frequently a source of complaint by mariners. This is particularly the case when coming up the bay, as the course is changed twice after passing Sharp's Island, and approaching Thomas's Point.

A light-house on the point of the shoal, in 8 feet water, which will be distant from the shore about one and a quarter miles, is recommended for this place. The new light-house should be provided with a fog-bell, the want of which is another defect at the old station, as the distance from the track of vessels going up or down the bay is so great that it would be useless if put there, as it could not be heard. This station is also in a bad state of repair. The rain, in windy weather, beats through the old masonry of the tower, flooding the inside of the structure, and frequently damaging the material in charge of the keeper.

If a light-house were built at the place referred to, viz, near the outer extremity of the shoal, and provided with a fog-bell, it would supply a defect long felt by the commerce of Chesapeake Bay, and render the maintenance of an almost useless light unnecessary. It is recommended, therefore, that an appropriation be made to build a light-house on Thomas's Point Shoal, supplied with a fog-bell, to take the place of a light-house on Thomas's Point. The estimated cost is \$20,000.

268. *Love Point Shoal, mouth of River Chester, Maryland.*—An appropriation of \$15,000 was made last year by Congress for a light-house on the shoal at the mouth of river Chester, near the north end of Kent Island, the exact location of which was fixed at a point on the shoal in 10 feet water, mean tide, distant from the north end of Love Point about one and a quarter miles in a northeasterly direction. The light-house is a duplicate of that erected in the river Choptank. A contract was made for the construction of this work, (after public advertisement for bids,) and it was expected that the work would have been completed the fall of last year. Unforeseen delays, however, were experienced by the contractor, in consequence of which it was found necessary to defer work till the spring of the present year. The lateness of the season, and several severe gales, however, caused further delay, so that it was not finished till August 1. The light was exhibited August 15. A fog-bell, struck by machinery, at intervals of five seconds, is provided.

— *Craighill Channel Range Beacons, Chesapeake Bay, Maryland.*—

An appropriation was made by Congress at its last session for two beacon-lights to mark the range of the channel just below the mouth of the river Patapsco, which is being widened and deepened, under appropriations by Congress. The plans are now being prepared, after which the work of building will be commenced without unnecessary delay. The range will mark a channel which is perfectly straight, has deep water, and will shorten the distance to the port of Baltimore, for large vessels, by several miles.

— *Shipping Point, River Potomac, Virginia.*—Plans and specifications are being prepared for the small light, for which an appropriation was made, to mark the entrance to the anchorage of Shipping Point, river Potomac, Virginia. Some delay will doubtless be experienced, however, owing to the fact that an act of the State legislature will be required, ceding jurisdiction over this site before any work can be done. Steps will be taken at an early day to secure the necessary legislation in the case.

— *A first-order light-house at or near Poyner's Hill, a point about midway between Cape Henry and Body's Island light-house, sea-coast of North Carolina.*—The attention of Congress was drawn in the last annual report to the importance of speedily establishing a light-house to illumine the dark space of forty miles on the coast of Virginia and North Carolina between Body's Island and Cape Henry.

The recommendations contained in that report are again referred to, and the earnest attention of Congress called to the importance of establishing this needful light-house. The distance from Body's Island to Cape Henry is eighty miles, of which there is an unlighted space of forty miles. The land along the coast in this vicinity is low and in many places without trees, so that even in day-time there is danger of vessels getting into unsafe proximity to the coast before becoming aware of it. This danger is enhanced by the fact that vessels bound around Cape Hatteras from the northern and eastern ports keep well to the westward, in order to avoid the strong current of the Gulf Stream, and for the additional reason they have a favorable current of about a mile an hour, nearly as far as Hatteras, and a smoother sea in bad weather; but in the absence of powerful sea-coast lights sufficiently near each other to give warning of approach to danger, many vessels laden with valuable lives and cargoes are in danger of being lost between these points. It is now believed that the construction of this tower should be no longer delayed. A glance at the chart of the coast will show its importance. An appropriation therefor of \$50,000 is accordingly submitted to commence the work.

An appropriation was made about ten years ago for this light, but the money reverted to the Treasury. The light-house should be similar to that building at Body's Island, with a focal plane 150 feet above the sea, and visible at a distance of eighteen nautical miles. It is estimated that the total cost of a first-order light-house at this place will be \$95,000.

288. *Body's Island, sea-coast of North Carolina.*—After having contracted with the lowest bidders for furnishing material to be used in this structure, a working party was dispatched to build the necessary temporary quarters, store-house, roadway, &c., for landing and taking care of material. This having been done, work on the tower was commenced the latter part of November, 1871, and has steadily progressed since that time. The prevalence of storms in this vicinity has, however, retarded its progress to some extent, as was anticipated. The tower and keeper's dwelling are now well advanced toward completion. The

lantern was set in August, and the light will be exhibited for the benefit of commerce October 1, 1872.

The difficulty of landing material at this station necessitated the erection of a derrick in Roanoke Sound, in 6 feet water, at which vessels could lie and be discharged of the stone used in the foundation. This was successfully accomplished at little expense, though some delay was experienced owing to the want of promptness on the part of contractors for some of the material used in the structure. This work is built of the most substantial and durable material. It is 150 feet high, and will show a light of the first order, which can be seen about eighteen nautical miles. The base of the tower is a frustum of an octagonal pyramid, built of granite, surmounted by a brick shaft of the form of a frustum of a cone. The establishment of this light will supply a want long felt by the commerce of the country, as may be readily seen from the number of wrecks that have been strewn along the beach, from time to time, for twenty miles to the south, and the same distance north of the light-house. Efforts have been made to secure a correct list of the vessels that have gone ashore near this station, and the damage sustained by each, but up to the present time a full authentic list has not been obtained.

The following is a list of vessels that have gone ashore in this vicinity since the work of building the light-house was commenced, with such particulars as to tonnage, damage, &c., as could be ascertained :

List of vessels that have gone ashore at Body's Island, North Carolina, since the new light-house was commenced in July, 1871, as near as can be ascertained.

Name.	Class.	Tonnage.	Cargo.	Where bound.	When wrecked.
Muscovado.....	Brig.....	160	Sugar.....	Baltimore.....	July 23, 1871.
Marion.....	Schooner..	350	Iron.....	Savannah, Ga...	August 20, 1871.
Sarah Peters.....	Brig.....	180	Furniture, &c.	Savannah, Ga...	December 13, 1871.
Baltic.....	Bark.....	360	Ballast.....	Saint Mary's, Fla.	February 7, 1872.
Willie.....	Schooner..	164	Sugar.....	Baltimore.....	February 14, 1872.
	Schooner..		Coal.....	South.....	March —, 1872.

The Marion escaped with a loss of \$8,000; the rest were total wrecks. If \$15,000 is allowed as the average value of each vessel, and \$10,000 the average value of cargo, we have in less than one year, viz, from June, 1871, to March, 1872, a loss to the commerce of the country of \$133,000, without taking into consideration the probable loss of life. Here is a loss of more than enough to build the light-house. Further comments on the importance of this structure, and the one (for which an appropriation is asked) between it and Cape Henry, are deemed unnecessary.

A complete record of all vessels that have gone ashore near Body's Island since the old light-house was destroyed by the confederates has been sought, but there seems to have been no authentic record kept by any of the inhabitants in the vicinity, and the information to be obtained is only vague, and to an extent unreliable, but it is well known that many valuable vessels, cargoes, and lives have been lost there every year.

299. *Roanoke Marshes, North Carolina, on the east side, and about in the middle of the narrow channel connecting Pamlico and Croatan Sounds, North Carolina.*—It was built in 1860, on what was at that time a marsh, which was dry or nearly so at low water. The foundation consists of seven wood piles covered with cast iron, the latter, when the structure

was first built, being screwed into the ground several feet. Since then the marsh has been washed away so that there are now 10 feet water at the light-house. The piles being of wood, as soon as they were exposed, by the washing away of the shoal below the depth covered by the cast-iron sleeve, were attacked by worms. In order to save the light-house from falling, three coppered piles were driven at each angle of the structure, capped by heavy squared timbers. A short time ago a raft drifted against the light-house and carried away three of the coppered piles above referred to. The house has settled some inches on the west side, and though the damage sustained by the striking of the raft has been repaired, it is not considered in a safe condition, nor can it be made so except at great expense, for which an appropriation would be necessary. It will be cheaper in the end to build a new structure, and an appropriation for this purpose is recommended. The estimated cost of a light-house near the present site, but in about 6 feet water, is \$15,000.

304. *Cape Lookout, near the extremity of the Cape, North Carolina.*—The repairs and renovations authorized by act of Congress will be taken in hand without delay. They are much needed, the keeper's dwelling being in a very dilapidated condition.

REPAIRS.

During the year repairs and renovations, more or less extensive, have been made at each of the following-named light-stations in the fifth district:

- 235. *Hog Island, Virginia, west point of Hog Island, Great Matchepungo Inlet.*
- 236. *Cape Charles, Virginia, entrance to Hampton Roads.*
- 237. *Cape Henry, Virginia, entrance to Hampton Roads.*
- 240. *Crane Island, screw-pile light-house, Virginia, mouth of river Elizabeth.*
- 242. *Naval Hospital light, Virginia, on wharf at Naval Hospital, river Elizabeth.*
- 246. *Jordan's Point, Virginia, river James.*
- 247. *Cherrystone, Virginia, mouth of Cherrystone Inlet, Chesapeake Bay.*
- 248. *Back River, Virginia, entrance to Back River.*
- 249. *York Spit, screw-pile light-house, Virginia, easterly end of York Spit, entrance to river York.*
- 250. *New Point Comfort, Virginia, entrance to Mobjack Bay, Chesapeake Bay.*
- 251. *Wolf Trap, screw-pile light-house, Virginia, Wolf Trap Shoal, Chesapeake Bay.*
- 252. *Stingray Point, Virginia, mouth of River Rappahannock, Chesapeake Bay.*
- 253. *Windmill Point, screw-pile light-house, Virginia, Windmill Point Shoals, Chesapeake Bay.*
- 254. *Watt's Island, Virginia, Tangier Sound, Chesapeake Bay.*
- 255. *Jane's Island, screw-pile light-house, Maryland, Tangier Sound, Chesapeake Bay.*
- 256. *Somer's Cove, screw-pile light-house, Maryland, Tangier Sound, Chesapeake Bay.*
- 257. *Smith's Point, screw-pile light-house, Virginia, mouth of River Potomac, Chesapeake Bay.*
- 258. *Fog Point, Maryland, Smith's Island, Chesapeake Bay.*

259. *Clay Island*, Maryland, Tangier Sound, Chesapeake Bay.
260. *Point Lookout*, Maryland, entrance to River Potomac, Chesapeake Bay.
261. *Hooper's Straits*, screw-pile light-house, Maryland, off mouth of River Honga, Chesapeake Bay.
262. *Cove Point*, Maryland, mouth of River Patuxent, Chesapeake Bay.
263. *Sharp's Island*, screw-pile light-house, Maryland, mouth of River Choptank, Chesapeake Bay.
265. *Thomas's Point*, Maryland, north side of mouth of South River, Chesapeake Bay.
266. *Greenbury Point*, Maryland, mouth of River Severn, Chesapeake Bay.
267. *Sandy Point*, Maryland, Chesapeake Bay.
269. *Seven Foot Knoll*, screw-pile light-house, Maryland, mouth River Patapsco, Chesapeake Bay.
272. *Fort Carroll*, Maryland, River Patapsco.
273. *Hawkins's Point*, Maryland, River Patapsco.
275. *Leading Point*, screw-pile light-house, Maryland, River Patapsco.
276. *Lazaretto Point*, Maryland, River Patapsco.
277. *Pool's Island*, Maryland, off mouth of River Gunpowder, Chesapeake Bay.
278. *Turkey Point*, Maryland, mouth of the River Elk, head of Chesapeake Bay.
279. *Fishing Battery*, Maryland, mouth of River Susquehanna, Chesapeake Bay.
280. *Havre de Grace*, Maryland, Concord Point, mouth of River Susquehanna, Chesapeake Bay.
281. *Piney Point*, Maryland, River Potomac.
282. *Blackistone's Island*, Maryland, entrance Clement's Bay, River Potomac.
283. *Lower Cedar Point*, screw-pile light-house, Virginia, Yates's Shoal, River Potomac.
284. *Upper Cedar Point*, screw-pile light-house, Maryland, off mouth Tobacco River.
285. *Fort Washington*, Maryland, River Potomac.
286. *Jones Point*, Virginia, River Potomac, near Alexandria.
289. *Cape Hatteras*, North Carolina, Cape Hatteras.
296. *Neuse River*, North Carolina, west side of entrance to River Neuse.
297. *Pamlico Point*, North Carolina, south side of entrance to River Pamlico, Pamlico Sound.
299. *Koanoke Marshes*, screw-pile light-house, North Carolina, east side of channel connecting Pamlico and Croatan Sounds.
301. *North River*, screw-pile light-house, North Carolina, on bar at entrance to North River. A fog-bell has been placed at this station.
302. *Wade's Point*, screw-pile light-house, North Carolina, west side of River Pasquotank, Albemarle Sound.

The following are the names of the light-stations in the fifth district not mentioned elsewhere:

239. *Old Point Comfort*, Virginia, entrance to Hampton Roads.
243. *White Shoals*, Virginia, River James.
244. *Point of Shoals*, Virginia, River James.
270. *North Point*, (lower,) Maryland, entrance to River Patapsco, Chesapeake Bay.

271. *North Point*, (upper,) Maryland, River Patapsco, Chesapeake Bay.
287. *Bowler's Rock*, screw-pile light-house, Virginia, River Rappahannock.
290. *Cape Hatteras Beacon*, North Carolina, Cape Hatteras.
291. *Ocracoke*, North Carolina, entrance to Ocracoke Inlet.
292. *Southwest Point Royal Shoal*, screw-pile light-house, North Carolina, Pamlico Sound.
293. *Northwest Point Royal Shoal*, screw-pile light-house, North Carolina, Pamlico Sound.
294. *Harbor Island*, screw-pile light-house, North Carolina, between Pamlico and Core Sounds.
295. *Brant Island Shoal*, screw-pile light-house, North Carolina, Pamlico Sound.
298. *Long Shoal*, screw-pile light-house, North Carolina, east end of Long Shoal, Pamlico Sound.
300. *Croatan*, screw-pile light-house, North Carolina, Pamlico Sound.
303. *River Roanoke*, screw-pile light-house, North Carolina, near mouth of River Roanoke.

LIGHT-SHIPS.

238. "*Willoughby Spit*," entrance to Hampton Roads, Virginia.
The completion of the screw-pile light-house on "*The Thimble*" shoal will enable the board to remove this light-ship on the 1st of October next. This is the only light-ship in the fifth district.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

There are no fog-signals operated by steam or hot-air engines in this district.

DAY OR UNLIGHTED BEACONS.

Names and positions of the day or unlighted beacons in the fifth district:

- Smith's Point*, port side of mouth of River Potomac, old tower.
- Bodkin's Point*, south side of mouth of River Patapsco, old tower.
- Day's Point*, half a mile from Day's Point, River James, iron shaft with cage on top.
- Woodstock*, entrance into Bell's Bay, &c., North Carolina.
- Hunting Quarter*, Core Sound, mid-channel, spar with barrel.
- Wilson's Bay*, Core Sound, mid-channel, spar with barrel.
- Piney Point*, Core Sound, mid-channel, two spars with barrels.
- Yellow Shoal*, Core Sound, mid-channel, spar with barrel.
- There are, besides the above-named beacons, forty stake-beacons planted to mark channels in Core Sound and other places.

DEPOTS.

Lazaretto Point, River Patapsco, Maryland.—A large number of spar-buoys were manufactured to supply the places of those lost or rendered unseviceable in the northern part of the district. The stone sea-wall was repaired, and the place put in good condition. During the winter the frame-work of the screw-pile light-houses was prepared here.

Portsmouth, Virginia.—The buoy depot at Portsmouth, Virginia, was finished about seven months ago, and it is now in full working order.

It is in good condition, well kept, and admirably adapted to its purposes; a great saving to the Government not only in rents, but in protection to public property.

SIXTH DISTRICT.

The sixth district extends from New River Inlet, North Carolina, to and including Cape Canaveral light-house, Florida, and embraces part of the coast of North Carolina, the coasts of South Carolina and Georgia, and part of the coast of Florida.

Inspector.—Captain Richard T. Renshaw, United States Navy, until January 18, 1872; Commander Charles S. Norton; United States Navy, present inspector.

Engineer.—Major Peter C. Hains, United States Engineers, brevet lieutenant-colonel, United States Army.

In this district there are:

Light-houses and lighted beacons, (including those in process of construction)	36
Light-ships	4
Fog-signals operated by steam or hot-air engines	0
Day or unlighted beacons	43
Buoys actually in position	224
Spar-buoys, (for relief and to supply losses)	22
Tenders (steam) Alanthus (buoy-tender) and Dandelion, (used in engineer's constructions and repairs)	2
Tender (sail) Mignonette, (used in engineer's constructions and repairs)	1

The numbers preceding the names of the stations correspond with those given in the "List of Light-Houses, Lighted Beacons, and Floating Lights of the Atlantic, Gulf, and Pacific Coasts of the United States," published January 1, 1872.

307. *Oak Island beacons, at the south entrance to River Cape Fear, North Carolina.*—These beacons mark the range over the bar at the Oak Island entrance to river Cape Fear. They are, however, badly located, being so near each other that considerable deviation from the true course is necessary to make them appear to separate. The front beacon is an open-frame frustum of a square pyramid resting on a rail tramway, which allows of its being moved to the right or left, to suit the changes in the channel. The rear light is placed on a wooden tower, immediately over the center of the keeper's dwelling. The shore-line at this place, as at many others on the southern coast, is not permanent, being washed away by the abrasive action of the sea. The latter has gradually encroached upon the land, till at present the high-water mark is only a few feet from the front beacon, which renders it in imminent danger of being destroyed in any southeasterly gale. The two beacons being already so close together as to have their usefulness seriously impaired, the front beacon cannot be moved back any farther. To move both would be an expensive undertaking at this place, and would necessitate the discontinuance, for a time, of the lights; besides, there is no appropriation available. It would be more satisfactory, and doubtless cheaper in the end, to build two new frame beacons detached from the keeper's dwelling. The present ones could then remain as they now are until the new ones are established. By this means the change would cause no inconvenience to commerce, and such locations and relative elevation could be given them as would make them much more useful than they now are.

It is very important that this range be well maintained, as the channel which it marks is the most reliable, permanent, and the deepest of

the several entrances to River Cape Fear. An appropriation of \$4,000 is therefore asked to re-establish the range.

314. *Morris Island range-beacon, (rear.) south end of Morris Island, South Carolina.*—There are two beacons on Morris Island, both of which are very low. They answer their purpose very well, however, so far as marking the line of range for crossing the bar of the main ship or "Pumpkin Hill Channel" into Charleston Harbor; but it is highly important, also, that one of these beacons should be made to answer the purpose, in addition, of a sea-coast light. This cannot be done by using either of the present towers. The front beacon has on it a light which can be seen from any direction at sea; the rear one has only a small angle of visibility, being intended only to mark a range-line. The former can only be seen at the level of the sea at a distance of five miles, or, estimated from the deck of a vessel 15 feet above the level of the sea, a distance of nine and a half miles; and the light being only of the fifth order, and red, is not visible at this distance, except on very clear nights.

Previous to the war, there was a sea-coast tower and light at this station, and the same reasons that existed for establishing it then, exist still. It will be observed, by reference to the chart, that along the coast, from Cape Romain to the River Saint John continuous shoals extend out from the main-land to a considerable distance, in many places reaching out as far as six and seven miles. Timely warning of their proximity is necessary for the safety of the lives and cargoes of the large number of vessels that pass them. This can only be given by the establishment of sea-coast lights, or by placing light-ships outside of them. The latter is by far the most expensive plan, besides being open to serious objections. The present light, owing to want of sufficient range, leaves a dark space on the South Carolina coast, between it and Hunting Island, which should be lighted. This can and should be done by making a new rear tower on Morris Island, 150 feet above the sea, and establishing on it a first-order sea-coast light. It is estimated that the cost of making this change would be \$85,000, for which an appropriation is asked.

316. *Sullivan's Island range-beacons, Charleston Harbor, South Carolina.*—An appropriation was made by act of Congress approved March 3, 1871, for range-beacons to guide into Charleston Harbor, after passing the bar of the main ship-channel. At the date of last report plans and specifications were prepared, but, owing to certain laws of the State of South Carolina, a satisfactory title to a site on Sullivan's Island could not be obtained without further legislation on the part of the State. As this would have caused considerable delay, and might not have been obtained after all, and as, under the act approved July 12, 1870, the appropriation would revert to the Treasury at the end of the fiscal year, application was made to the War Department for permission to establish the beacons on the land held by the Government at Fort Moultrie. This permission was given, but the location was hardly as good as might have been obtained elsewhere, under more favorable circumstances. So far, however, as its value to commerce is concerned, the range is a good one. The front beacon is a frame structure resting on the parapet of the fort. The rear one is an open-frame square pyramid. The keeper's dwelling is detached. The beacons and dwelling were finished in June, and the lights exhibited July 15. On the same night the light of the Weehawken light-ship was discontinued, and, a few days after, the vessel was withdrawn.

The "Weehawken," light-ship marked the wreck of the monitor of that

name; this obstruction has been partially removed, and the remainder, it is reported, has sunk deeply into the sand. The lights of the Sullivan's Island range are red. Besides marking the range from Pumpkin Hill Bar, they mark a good range over the Southwest Bar, so that vessels coming up from southerly ports can enter Charleston Harbor at night, without the necessity of going up to the main ship-channel, thereby saving a run of several miles.

317. *Fort Sumter Beacon, Charleston Harbor, South Carolina.*—This beacon formerly stood on the east face of Fort Sumter, but on account of the meliorations that are being made in the fort it became necessary to remove it to the center of the southwest face. The beacon was also in need of considerable repairs. The change of position and repairs were made from the general appropriation for repairs and incidental expenses of light-houses.

— *Light-house on or near Hunting Island, entrance to Saint Helena Sound, South Carolina.*—An appropriation was made by act of Congress for a second-order light-house at or near Hunting Island. Under the law governing this appropriation, the light-house site must be selected from lands now owned by the Government. A personal examination was recently made of the locality by the district engineer. There are only two positions that give suitable sites for this light-house, one on the north side of Saint Helena Sound, on Edisto Island, near the southern extremity, and the other at a point some distance south of the site of the former light-house on Hunting Island. It is understood, however, that the Government does not own any land on Edisto Island. In this case it will be necessary to place the light on Hunting Island, where it is known the Government does own land. The objection to this side of Saint Helena Sound lies in the fact that the island is being washed away by the abrasive action of the sea upon its low banks. A survey was made, under the direction of the district engineer, of the north end of the island, from which it appears that about one hundred and fifty acres of this portion of the island have been washed away, the present shoreline having receded about half a mile from its position as given by the Coast-Survey chart of 1869. There is deep water now where at that time there was dry land. The Government formerly owned a tract of fifty acres of that portion of the island which has been washed away. Owing to the danger to which a light-house site on the north end of Hunting Island will be subjected, and the provisions of the act which make it necessary to select a site on land owned by the Government, it will perhaps be necessary to erect such a structure as could be removed in case of necessity to some other place. An iron light-house would answer this purpose, but an additional appropriation will be necessary to complete the work. An appropriation of \$50,000 is accordingly asked, and the light should be of the first instead of the second order, as named in the last appropriation bill.

321. *Tybee light-station, Tybee Island, entrance to River Savannah, Georgia.*—The recommendation contained in the last annual report is again made. As then stated, the tower is not in a safe condition, owing to the damage it sustained in the cyclone of 1871. This tower is very old, having been built in 1793. It is a frustum of an octagonal pyramid, built of Savannah brick. Five of its faces show dangerous cracks. As stated in a previous report, its great age, and neglect during the war, render it impracticable to properly repair it. An appropriation of \$50,000 is therefore asked to commence the building of a new structure. This can be done without delay on Government land near the site of the present tower.

323. *Tybee Knoll, River Savannah, Georgia.*—A light-ship is now stationed off Tybee Knoll, in the River Savannah, which could readily be dispensed with in case a screw-pile light-house was built at this place. An appropriation was made by Congress for this purpose, but reverted to the Treasury under the operation of the act approved July 12, 1870.

A screw-pile light-house will serve the purposes of navigation quite as well as the light-ship, and the expense of maintenance will be considerably lessened. Borings were made more than a year ago, to determine the character of the foundation; it was found to be soft mud to a depth of 19 feet. A light-house on five or six hollow cast-iron piles, with large flanges to give bearing, could be built at very little more than the usual cost of such structures. Its erection would insure the permanent removal of the light-ship, which is now in need of extensive repairs. It is estimated that the cost of this light-house will be \$18,000, and an appropriation of this amount is recommended.

— *Daufuskie Island range-beacons, Calibogue Sound, South Carolina.*—As stated in the last annual report, plans and specifications were prepared, and the securing of proper sites was only necessary in order to commence the work. The sites were selected on the northeastern end of Daufuskie Island; in the aggregate, they amount to five acres. The investigation of the title was intrusted to the United States district attorney for the district in which the land lies, but, owing to the difficulty of procuring information bearing on this subject, and to the loss of records during the war, considerable delay was experienced. It was not until June 13 that the district attorney reported on its validity, which report was approved by the Attorney-General of the United States on the 3d of August. No further delay is now apprehended, and it is proposed to let out the work by contract without delay. The front beacon is to be an open-frame structure; the rear one, a small tower built on the keeper's dwelling. The lights will be of the fifth order, both white.

— *Day-beacons in the River Savannah, Georgia.*—The four day-beacons on Jones's and Long Islands, which were built entirely of wood, were destroyed by the burning of the high marsh-grass. They were rebuilt without delay, and the precaution was taken to have the grass cut in the vicinity. It would be more economical, however, to use iron beacons, which would not be subject to this danger. The estimated cost of four such beacons to replace the frame ones is \$2,500, and an appropriation for this purpose is asked.

— *Light on the obstructions in River Savannah, Georgia.*—It is proposed to extinguish this light as soon as the obstructions are removed by the Engineer Department of the Army. It is expected that this work will be accomplished during the present season.

326. *Fig Island, on the east end of Fig Island, River Savannah, Georgia.*—A new landing was built at this station, as the old one had rotted away. The house had other repairs made, and was painted throughout.

331. *Saint Simon's light-station, north side of the entrance to Saint Simon's Sound, Georgia.*—This light-house, which was contracted for in the fall of 1869, was delayed from various causes, the death of the contractor and one of his bondsmen (each while successively superintending the work) being the main cause. At date of last report the tower was 51 feet high. It was then taken in hand by the surviving bondsman, and by him the work has been completed. The tower is built of brick, of the form of a frustum of a cone, focal plane 103 feet above the sea-level, and will show a fixed light of the third order, varied by flashes alternately red and white, the interval between the

flashes being one minute. The light was exhibited for the first time on the night of September 1, 1872.

333, 334. *Amelia Island north range-beacons, at entrance to Fernandina Harbor, Florida.*—The work on this range was commenced in December, 1871, and finished in May, 1872. The rear light is mounted on the keeper's dwelling, and the front one on an open-frame square pyramid, which rests on a tramway, and can be moved to the right or left, to conform to the changes in the bar which are generally effected after a severe northeasterly or southeasterly gale. The lights at this station were exhibited June 1, 1872.

338. *Dame's Point screw-pile light-house, off Dame's Point, River Saint John, Florida.*—This structure was framed at the workshops at Lazaretto Point, Maryland, during the winter, and the iron-work prepared under contract. In March, 1872, a working party was dispatched to erect the structure, which was completed in June. The light-house stands on a shoal in 8 feet of water. It is built on six wood piles, with cast-iron sleeves, and has two fender-piles, one up and the other down stream. The light, which is fixed white, was exhibited July 15, 1872.

339. *Saint Augustine light-house, north end of Anastasia Island, Florida.*—A site for this light-house, for which an appropriation was made by Congress, was selected about half a mile from the old tower. The lot consists of five acres.

Considerable difficulty and delay were experienced in procuring a valid title and complying with the necessary legal forms incident to the purchase of land by the Government, in consequence of which, work on the tower was not commenced until late in the spring. Borings were made to test the character of the foundation, which was found to be fine sand with some loam, to a depth of about 15 feet; where loose coquina shell was encountered, underlying which is a stratum of compact coquina, called, in this section of the country, *coquina rock*, but of such character as to be totally unfit to enter into the construction of a light-house.

Previous to commencing work on the tower it was necessary to build a wharf and store-sheds, and temporary quarters for the men; also a tramway for moving with facility the material from the landing to the site. Contracts were made, after public advertisement, with the lowest bidders for furnishing the iron and brick. The latter have all been delivered, and there are now at the site sufficient brick to complete the work. All the iron work is on the way. Unfortunately, the last appropriation was so small that operations may have to be suspended by December for want of funds. The foundation of the tower was finished July 29, 1872, and the tower is now several feet above the ground. The base is to be an octagonal pyramid, on which will rest a frustum of a cone. It will be 150 feet high, and show a light of the first order. There is no good building-sand in this locality, and it has to be procured at a distance and transported to the site. This is a source of additional expense, but one absolutely necessary to insure good work.

Observations show that the water has again commenced washing away the shore. At date of last report, high-water mark was 48 feet from the corner of the old tower; it is now about 35 feet distant. It is desirable, therefore, as the old tower may be destroyed at an early day, that this work be finished with as little delay as practicable, and an appropriation of \$25,000 is asked for this purpose. This amount is necessary to complete the work.

— *Mosquito Inlet, east coast of Florida.*—In common with all the inlets and harbors on the east coast of Florida, this bar shifts con-

stantly, so that no soundings can be relied on. The general effect of westerly winds is to reduce the depth of water, and that of northeasterly gales to increase it; thus the inlet may be opened or closed one or more times each year. The wrecks lying on or near the bar give a practical illustration of the uncertainty of the channel. For all practical purposes of construction of a light-house, it may, however, be safely assumed that the material can be delivered without any very serious difficulty or delay, although additional expense would be incurred by reason of the remoteness of the station, and the small-sized vessels that would be required for transportation. As regards the necessity of a light at this point, it is manifest that the commerce passing through the inlet would not justify an expenditure by the United States for a light for merely local purposes, or at least that there are other points that may justly take precedence of it. But a light-house between Saint Augustine and Cape Canaveral lights is necessary, as one of a system of coast lights, and Mosquito Inlet is undoubtedly the proper site, as, in the first place, the light there would answer the double purpose of a harbor and coast guide, and in the second, for a landing-place, both for the original construction and subsequent supply and inspection, which could be made with more safety and certainty there than at any other point along the open-sea beach. A tower 150 feet high, lighted by a first-order Fresnel lens, is recommended for this position, and for the commencement of its construction an estimate of \$60,000 is submitted.

REPAIRS.

At each of the following-named light-stations in the sixth district there have been repairs and renovations, more or less extensive, during the last year, viz:

- 310. *Cape Romain*.—Raccoon Key, South Carolina.
- 313, 314. *Morris Island range-lights*, entrance to Charleston Harbor, South Carolina.
- 317. *Fort Sumter*, Charleston Harbor, South Carolina.
- 318. *Castle Pinckney*, Charleston Harbor, South Carolina.
- 319. *Combahee Bank*, entrance to Saint Helena Sound, South Carolina.
- 321, 322. *Tybee light and beacon*, Tybee Island, Georgia.
- 324. *Cockspur*, River Savannah, Georgia.
- 325. *Oyster-Beds Beacons*; River Savannah, Georgia.
- 326. *Fig Island*, River Savannah, Georgia.
- 327, 328. *Sapelo light and beacon*, entrance to Doboy Sound, Georgia.
- 329, 330. *Wolf Island*, entrance to Doboy Sound, Georgia.
- 332. *Little Cumberland Island*, entrance to Saint Andrew's Sound, Georgia.
- 335, 336. *Amelia Island light and beacon*, Saint Mary's Bar, Fernandina, Florida.
- 337. *River Saint John*, south side of entrance to Jacksonville, Florida.

The following are the names of light-stations in the sixth district not mentioned elsewhere:

- 305. *Federal Point*, New Inlet, River Cape Fear, North Carolina.
- 309. *Georgetown*, entrance to Winyaw Bay, South Carolina.
- 311. *Bull's Bay*, Bull's Island, South Carolina.
- 340. *Cape Canaveral*, on northeast pitch of cape, east coast of Florida.

LIGHT-SHIPS.

"*Frying-Pan Shoals*," off Cape Fear, North Carolina.—This vessel was taken from her station on the 2d of June, 1872, and sent to Wilmington, North Carolina, where she is undergoing extensive repairs. Her place is supplied temporarily by Relief No. 32.

"*Rattlesnake Shoal*," off Charleston Harbor, South Carolina.—The present vessel on this station was placed on this station September 11, 1871. She has received no repairs and requires none; is a new vessel, and is in very good condition.

"*Weehawken*," entrance to Charleston Harbor, South Carolina.—The vessel lately on this station was placed in position over the wreck of the Monitor Weehawken June 23, 1865. Her general condition is good. The wreck having been removed by the Engineer Department of the Army, and range-lights having been established on Sullivan's Island to mark the main ship-channel, the light-ship was removed July 15, 1872.

"*Martin's Industry*," off Port Royal, South Carolina.—The vessel now on this station was placed on her present station September 1, 1871, having been thoroughly repaired at Charleston, South Carolina, in August, 1871. She is in good condition.

"*Tybee*," on Tybee Island Knoll, mouth of River Savannah, Georgia.—This vessel has been on the station for over three years, or since June, 1869. No repairs have been made since, except new standing rigging. Her general condition is very bad, and she is not worth repairs. A small screw-pile light-house should take the place of this light-ship, being more economical in maintenance, and to save the very considerable expense of her necessary repairs.

Relief No. 30.—This vessel was taken from Rattlesnake Shoal and condemned as unfit for service, in August, 1871. By authority of the Secretary of the Treasury, after removing everything from her of value to the light-house establishment, she was sold at public auction for \$916, and the amount was turned into the Treasury.

Relief No. 32.—This vessel was stationed at Charleston, South Carolina, as a relief light-ship, until June, 1872, when she was placed on Frying-Pan Shoals, till the proper light-ship for that station can be repaired. She will require a new gang of rigging before winter; otherwise, her condition is good.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

There are no fog-signals operated by steam or hot-air engines, in this district.

DAY OR UNLIGHTED BEACONS.

The following is a list of the unlighted beacons in the sixth district:
Bald Head, mouth of the river Cape Fear, old tower, discontinued on the establishment of Frying-Pan Shoal light-vessel.

Price's Creek, River Cape Fear, discontinued during the rebellion, not relighted.

Campbell's Island, River Cape Fear, discontinued during the rebellion, brick house, with iron lantern.

Orton's Point, River Cape Fear, discontinued during the rebellion, open frame beacon.

Fort Point, Georgetown, South Carolina, discontinued during the rebellion.

Battery Light, (White Point Garden,) iron spindle, light discontinued during the rebellion.

Cape Romain, old tower, near present light-house.

Savannah City Beacon, iron spindle, light discontinued during the rebellion.

River Saint John, Florida, old tower.

Dumb-Beacons at Oyster Rocks, River Savannah, near Cockspur Island, iron-pile beacons.

River Savannah day-marks.

River Saint John, Florida, wooden piles.

DEPOT.

Fort Johnston, Charleston Harbor, South Carolina.—The wharf at this depot is in a very dilapidated state. Many of the piles have been eaten away by the worms. Repairs of a temporary nature have been made, but it will be necessary to secure another site, as the present one is too much exposed to northerly winds, which render it frequently impossible, for days at a time, for vessels to lie there; and even in calm weather there is danger in getting to and from it, on account of the eddies in the current, and the proximity of the stone jettces thrown out to protect the shore from the abrasive action of the sea.

SEVENTH DISTRICT.

The seventh district extends from (but does not include) Cape Canaveral to, and including, Cedar Keys, Florida.

Inspector.—Commander C. A. Babcock, United States Navy, to April 13, 1872; Commander Albert Kautz, United States Navy, present inspector.

Engineer.—Lieutenant-Colonel C. E. Blunt, Corps of Engineers, brevet colonel, United States Army.

In this district there are:

Light-houses.....	11
Light-ships.....	0
Fog-signals, operated by steam or hot-air engines.....	0
Day or unlighted beacons.....	53
Buoys actually in position.....	99
Spare buoys for relief and to supply losses.....	60
Tender (steam) <i>Arbutus</i> , (employed by the engineer in construction and repairs)..	1
Tender (sailing-schooner, buoy-tender) Florida.....	1

The numbers preceding the names of stations correspond with those of the Light-House List of the Atlantic, Gulf and Pacific Coasts of the United States, issued January 1, 1872.

344. *Alligator Reef, Florida Reefs*.—The preparations for the erection of the new iron-pile light-house, of the first order, on this reef, have been continued and completed. These preparations consist in the construction at Indian Key, the selected depot, (being four miles from the reef and the nearest land,) of a building for quarters for mechanics and laborers, with a capacious cistern, and ample storage-room in the cellar, a smithery and a large shed for the iron-work and other material for the light-house, whence it can be transported as wanted to the reef. A fuel-wharf has also been built, adjoining which the coal for the tender and other purposes is stored. The temporary platform on the site of the light-house has also been finished.

The piles, foundation-disks, and first section of the light-house were

delivered at Indian Key by the contractor, in January, 1872, and the remainder of the work at the close of the year. The steam-engine for hoisting pile-driver hammers, and other purposes, the pile-driver shears, forges, &c., &c., were also received in January.

The site selected is at the northeast end of the reef, about 30 yards from the site of the day-beacon "C;" the position is an excellent one, and the foundation found, by boring and driving test-rods into the coral, to be very good. The work of erection of the light-house has now been fairly commenced, and will be prosecuted as rapidly as possible until the available funds are exhausted.

Three foundation-disks have been accurately placed, and the center and northwest piles have been driven. The average penetration of these piles into the coral, the 2,000-pound hammer falling 18 feet average, was 1 inch per blow.

The funds will not be sufficient to complete the structure, and an additional appropriation of \$25,000 is asked for.

347. *Key West*.—A new lantern has been made and shipped to this station, and will be erected at an early day.

REPAIRS.

At each of the following-named light-stations in the seventh district there have been repairs, more or less extensive, during the last year.

- 342. *Cape Florida*, coast of Florida.
- 243. *Cary's Fort Reef*, Florida Reefs.
- 351. *Egmont Key*, Tampa Bay, Florida.
- 352. *Seahorse Key*, Cedar Keys, Florida.

The following are the names of lights in the seventh district not otherwise mentioned:

- 341. *Jupiter Inlet*, between Jupiter Inlet and Gilbert's Bar, Florida.
- 344. *Alligator Reef*, Florida Reefs, Florida.
- 345. *Dry Bank*, off Dry Bank, near Coffin's Patches and Sombrero Key, Florida Reefs, Florida.
- 346. *Sand Key*, Florida Reefs, Florida.
- 347. *Key West Harbor-light*, on Key West Island, Florida.
- 348. *Northwest Passage*, Key West, Florida.
- 349. *Dry Tortugas*, on Loggerhead Key, Florida.
- 350. *Dry Tortugas Harbor*, on Fort Jefferson, on Garden Key, one of the Tortugas group, Florida.

LIGHT-SHIPS.

There are no light-ships in this district.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

There are no fog-signals operated by steam or hot-air engines in this district.

DAY OR UNLIGHTED BEACONS.

Florida Reef beacons.—Four new iron day-beacons, marking the line of the Florida Reefs, have been erected, viz: "E" on Coach Reef, "F" on Pickle's Reef, "C" on French Reef, and "P" on Fowey Rocks, the latter a very important one. During the next year the erection of these im-

portant aids to navigation will be continued as rapidly as the other necessary works in the district will permit.

DEPOT.

Egmont Key, Tampa Bay, Florida.—This depot is situated in the seventh district, was built by the engineer of the eighth district, having been commenced and finished during the year. The building is of wood, stands on thirty-three piles, and is 30 feet by 60 feet on the outside. A tramway provided with a car, on a platform 208 feet long and 6 feet wide, which is supported by palmetto piles, connects it with the wharf. The wharf, 20 by 60 feet, built on palmetto piles, was constructed in 16 feet of water on the outer edge. These piles were procured on the key. The depot stands on the east side of the key, a small island two and a half miles long by a quarter of a mile broad. It is provided with twenty-eight wooden rollers, each two feet long and one foot in diameter, which materially assist in the handling of the buoys. The building is of the most substantial character, and was put up entirely by hired labor.

EIGHTH DISTRICT.

The eighth light-house district extends from Cedar Keys, Florida, to the Rio Grande, Texas, and embraces a part of the Gulf coast of Florida, and the coasts of Alabama, Mississippi, Louisiana, and Texas.

Inspector.—Commander William P. McCann, United States Navy, until September 5, 1871; Commander Robert Boyd, United States Navy, present inspector.

Engineer.—J. H. Simpson, Colonel, Corps of Engineers, brevet brigadier-general, United States Army.

Assistant Engineer.—Captain A. N. Damrell, Corps of Engineers, brevet major, United States Army.

In this district there are:

Lights and lighted beacons.....	48
Light-ships, (in position)	1
Light-ships, (for relief)	0
Fog-signals operated by steam or hot-air engines	2
Day or unlighted beacons.....	15
Buoys actually in position	106
Spare buoys for relief and to supply losses	147
Tenders (steam) Geranium, (buoy-tender) Ivy, (used in engineer's constructions and repairs).....	2
Tender (sail) Magnolia, (used in engineer's constructions and repairs).....	1

The numbers preceding the names of stations correspond with those of the List of Light-Houses, Lighted Beacons, and Floating Lights of the Atlantic, Gulf, and Pacific Coasts of the United States, issued January, 1872.

353. *Saint Marks, Florida.*—The light-house is in very good condition generally, but the engineer reports the land in front of the house as washing away, and though the building is in no imminent danger, it is threatened with peril from very heavy storms.

354. *Dog Island, Saint George's Sound, Florida.*—The brick tower is in a very precarious situation from wearing of the beach. It has been expected for several years that the first heavy gale from the southeast would undermine and overturn it. Some time ago the precaution was taken of driving a triple row of piles about six feet long in a circle around the foundation, at a distance from its outside of about ten feet,

and filling in between the piling and the tower to the depth of about three feet with concrete, with a smooth cement surface on top. A storm about six months ago washed away the sand on the south side nearly to the bottom of the piles, tore some of them out, and broke up the concrete. The tower was undermined on this side and settled, so that now it leans toward the south, about one foot out of the perpendicular. It might be preserved for some time by correcting the fault of inclination, driving piles around the base and concreting as before, only carrying both piles and concrete to a greater depth. But as it would eventually be swept away by the encroachments of the sea, it is considered better to transfer the lantern and lens from the tower and place them on the keeper's dwelling, which is on screw-piles and farther from the beach than the tower. This will be done, and it will be necessary to strengthen the piles by the usual iron braces, of which this building is destitute. To effect the change will require \$2,500, and the arrangement ought to secure the light for a number of years, except in case of some extraordinary storm.

— *Saint Andrew's Bay, Florida.*—Between Cape San Blas and Pensacola there exists an extent of one hundred and twenty miles of unlighted coast, and it is therefore recommended that there be established a fourth-order light at the entrance of Saint Andrew's Bay, thirty miles northwest of Cape San Blas. It would not only be useful as a coast light, but as a guide to the entrance of Saint Andrew's Bay, a very fine harbor of refuge. The light-house would probably be of the ordinary screw-pile character, though a critical examination of the ground might warrant the erection of a small brick or iron tower as more preferable. But no matter what plan might finally be selected, the cost would be about the same, and an appropriation of \$22,000 is asked for.

— *Upper part of Pensacola Bay, Florida.*—Preparations are in progress looking to the establishment of six day beacons, consisting simply of bunches of palmetto piles, bound together by three iron bolts to each beacon, and capped with sheet-zinc on their tops, the center pile projecting above the others and surmounted by a barrel. They are to serve as aids to navigation in Santa Maria de Galvaez and Blackwater Bays, branches of Pensacola Bay, the Board having authorized their construction. The cost of these six beacons is estimated at \$606. The inspector of the district has recommended the establishment of two lights in these waters; one to be a fifth-order screw-pile structure, in five feet water, off White's Point, near the mouth of Santa Maria de Galvaez Bay; the second to be a fifth-order light placed on the keeper's dwelling, situated on the point of land opposite Pierce's Point, at the head of Blackwater Bay, and a little over eleven nautical miles from the first-named light.

359. *Sand Island, off Mobile Harbor, Alabama.*—A temporary frame tower, with fourth-order lens, erected to replace a brick tower destroyed during the war, exists at this station, but is in danger of destruction by the encroachments of the sea, making it highly desirable that the new tower in progress be speedily completed. Indeed, it is on this account that the old one has been twice removed back from the water. The island lies three miles south of the mouth of Mobile Bay and is merely a bank of sand, about four hundred acres in extent, constantly changing its outline. The new tower has been located in what is, apparently, the most stable part of the island. During the previous fiscal year the work was commenced by the construction of a wharf and pier over 1,000 feet long, and continued early in the present fiscal year by the erection of quarters for the workmen and store-rooms, but the work was checked

by illness of employes from malarial complaints. The foundation, consisting of a double course of sill timbers resting on one hundred and seventy-one piles and overlaid with a depth of 12 feet of concrete, was put down. At the close of the present year, the tower had reached a height of 9 feet 6 inches above the grade line, and is progressing rapidly. It is to be a conical brick shaft, the well containing the iron stairway being also of conical form, with a height of focal plane of 125 feet above the grade line, to be provided with a lens of the second order. The granite-work about the entrance and windows is taken from the ruins of the old tower. Plans and estimates have been made for a double frame dwelling of two stories. Sand Island beacons, Nos. 1 and 2, were entirely destroyed during the war. A previous report recommended their re-establishment as soon as the new light would be in operation. The object of the first, taken in connection with the main light, is to range vessels over the outer bar, and if the second, taken in connection with beacon No. 1, to form a range which shall prevent vessels from getting on the west bank to the northward of Sand Island. The shipping interests of Mobile strongly urge the re-establishment of these minor lights. Inasmuch as the present appropriation is inadequate to complete even the tower, not counting the cost of keeper's dwelling, and the two beacons, an appropriation of \$20,000 is asked for.

360. *Mobile Point, entrance to Mobile Harbor, Alabama.*—A temporary light-house, standing on the southwest bastion of Fort Morgan, now marks the entrance to Mobile Bay, but is about to be replaced by a fourth-order iron tower 30 feet in height from base to focal plane, and, like the temporary frame, will stand on the same bastion, giving the light an elevation of 45 feet above the sea level. During the past fiscal year a neat and substantial frame dwelling of four rooms was added to the old one-room house of the keeper. The wharf at the fort was extended and repaired in conjunction with the Engineer Department of the Army, nine iron screw-piles from abandoned light-houses of another district and masses of brick for riprapping from the ruins of the old Sand Island tower being used for the purpose. The extinguished beacons Nos. 3 and 4 are recommended to be re-established. The two together will range the east bank in the same manner that Sand Island beacons will range the west bank. In addition, No. 4, in connection with the main light, will range the channel northwest one-half north, and guide vessels to clear the Middle Ground. Both these beacons, like those at Sand Island, are highly important to the commercial interests of Mobile. It is believed that on the completion of the tower funds sufficient for the erection of the beacons will remain on hand.

— *Mobile Bay range-lights, Alabama.*—Six temporary beacons to mark the channel over Dog River and Choctaw Pass Bars were authorized and put up during the year. Two are on shore, being elevated on poles, and those in the water on wooden piles, and all lighted by ordinary lanterns. The General Government and the State are both now engaged in increasing the depth and extending the length of the channel, so that it will ultimately be about 45,000 feet long. On its completion a different arrangement of the beacons will be necessary, and when the change is required, it would be highly advisable to alter at the same time the present style of temporary beacons to a more durable form of structure when the time for making the alteration draws near. The lighting of the beacons is now cared for by a party under contract, but it is intended to place it in charge of the keeper of Battery Gladden light-house, using one of the launches belonging to the Light-House Estab-

ishment, and the additional assistance of two sailors. By this system a considerable sum can be saved yearly.

361. *Battery Gladden, Mobile Bay, Alabama.*—The light-house marking the entrance to Mobile Harbor was undertaken and finished during the year. The light replaces an extinguished one that stood on Choctaw Point, at the west side of the mouth of river Mobile, and is a frame dwelling on five wrought-iron screw-piles, surmounted by a fourth-order lantern, of the general design for screw-pile light-houses. The site is an artificial island made by the confederates during the civil war as a defensive work for the city of Mobile, and lies at the head of Mobile Bay, five-eighths of a mile east of Choctaw Point. The iron and wood work, prepared by contract at the North, and the building, was put up by hired labor; the work commencing in December, 1871, by erecting a temporary wharf and workmen's quarters, was furnished March 11, 1872, and lighted for the first time the 8th of April following.

—*Horn Island, Mississippi Sound, Mississippi.*—The establishment of a light at the eastern end of Horn Island is recommended as being necessary toward the completion of aids to navigation in Mississippi Sound. It is much needed both in the navigation of the sound and in the use of Horn Island Pass from the Gulf to the sound. The light-house should be of the ordinary screw-pile character, and would require an appropriation of \$22,000.

366. *Cat Island, Mississippi Sound, Mississippi.*—All material for the screw-pile light-house at this station was shipped from the North and delivered to Cat Island July, 1871. Malarial illness prostrated many of the laborers, and seriously retarded the work. The building is of the ordinary form of screw-pile light-houses, square in plan, and supported on five piles. It was lighted for the first time December 15, 1871. The illuminating apparatus is a fifth-order Fresnel lens, showing a fixed white light, varied by flashes, and has its focal plane 45 feet above the mean level of Mississippi Sound.

369. *Saint Joseph's Island, Mississippi Sound, Mississippi.*—The light-house, a substantial wooden structure, resting on five wooden piles, situated 300 feet north of the most southerly point of the island, a low, marshy plat of land, about half a mile long, and not 400 feet wide in the broadest part, about eight acres in extent, elevated only 3 feet above low water, is in danger of destruction from the abrasion of the eastern shore of the island by the action of the waves. It had been previously attempted to preserve the light-house by a riprapping of 120 tons of brick from the old Cat-Island tower, and spreading thereon 54 cubic yards of concrete, but this proving insufficient, it is now proposed to build a breakwater around from the north to the south sides, about 275 feet in length, as the only economical means of protecting it. The breakwater will be of palmetto piles, (the only kind of wood which resists the attack of the sea-worm in this latitude,) bound on its inner and outer faces with string-pieces, and securely braced at intervals of 12 feet with palmetto logs, abutting against piles of the same. A contract to build the breakwater at the rate of \$13 per foot has been submitted and approved by the board, and the work is to be completed not later than the 1st of February next.

373. *Point aux Herbes, Lake Pontchartrain, Louisiana.*—A fifth-order light has been authorized, but the site for the purpose has not yet been secured. Plans and estimates have been prepared, preparatory to commencing work as soon as the purchase of the site shall have been effected. The light-house will be a wooden building 28 feet square, surmounted by a lantern, with lens of fifth order, and in design the

same with all screw-pile light-houses built in this district. The sub-structure, however, instead of being of iron, will be five brick pyramidal piers, 4 feet square at the base, and a little over 8 feet in height, resting on a bed of concrete 18 inches in depth at the center, which will overlay a grillage of two courses of timber, each 6 inches in thickness, the sub-soil of the site being considered too soft and yielding to permit the use of screw-piles. An appropriation of \$15,000 is available.

378. *Pass Manchac, Lake Pontchartrain, Louisiana.*—A breakwater 200 feet long was built at a cost of \$7.50 per linear foot at the east side of the light-house, to protect it from the destructive action of the waves. The work has two faces, meeting at an angle of 120°, is built of sawed 12-inch by 12-inch yellow pine piles, connected by two courses of 10-inch by 10-inch stringers, faced with sheet-piling of 3-inch plank, and capped with the same. All the piling has a penetration of 8 feet, and the breakwater projects above the surface of the land, on which it is principally located, 7 feet.

— *Errol Island, Gulf of Mexico, Louisiana.*—A light-house has been recommended to be established at this locality as necessary, to fill the gap of fifty-two miles in sea-coast lights existing between Chandeleur Island and Pass à l'outré, but no exact survey has yet been made on which to base an estimate for an appropriation.

380. *Pass à l'outré, river Mississippi, Louisiana.*—A 12-inch steam fog-whistle has been put up, and is now in operation at this light-house.

382. *Head of the Passes, river Mississippi, Louisiana.*—The light-house being in danger of destruction from the washing of the river bank, it has been removed 200 feet farther inland to a place of greater security, and the building is now being repaired and strengthened. A breakwater formerly protected the site, but a large portion of it was carried away in a gale, last October.

383. *Southwest Pass, River Mississippi, Louisiana.*—It has already been reported that the foundation for a new light-house at the station was completed. A first-order iron tower is under contract in the North, and will be erected on its site during the coming year. The old light-house and dwelling are not in very good condition, but will answer all purposes until the completion of the new tower. By the act of Congress approved June 10, 1872, an appropriation of \$25,000 has been granted for completing the erection of this tower. A 12-inch steam fog-whistle has been set up, and is now in operation at this light-house.

385. *Timbalier, Timbalier Bay, Louisiana.*—A first-order iron tower, to be elevated on screw-piles, is under contract in the North. Its design is a skeleton frame-work with a spiral stairway inclosed by sheet-iron, giving access to the lantern, and provided with keeper's dwelling in the lower part of the tower. It will be placed in the water, under the lee of West Timbalier Island. As the available funds are insufficient to finish the erection of the building, it is deemed advisable to store the iron until an additional appropriation of \$44,000 can be granted by Congress for its completion.

387. *Southwest Reef, Atchafalaya Bay, Louisiana.*—The iron screw-pile tower has already once been seriously damaged in a storm by the waves breaking the cast-iron floor of the lower story, and is in danger of being carried away altogether by any hurricane which may visit this vicinity. The lower story, now used as a part of the keeper's quarters, will be replaced by an open iron frame-work. An appropriation of \$5,000 is asked to make the change.

— *Grand Lake, Louisiana.*—Application has been made by parties interested for the establishment of a light or lights in Grand Lake to

accommodate the commerce seeking an outlet to the Gulf by way of the river Atchafalaya. The subject has not yet been fully examined, but there seems to be little doubt that a light-house at the northern end of the lake near Chicot Pass, would be of great benefit. The land in most places is high, with soil suitable for foundation, and could be purchased at from \$5 to \$10 per acre, and a light-house can be constructed, without doubt, at a small expense, but the board are not prepared to recommend an appropriation therefor.

388. *Trinity Shoal, Gulf of Mexico.*—This is an extent of fifteen miles of hard sand, on over 6 miles of which there is less than 12 feet of water, lying 20 miles south of the Louisiana coast. A skeleton iron tower, exactly similar to that for Timbalier, is in course of preparation, under contract in the North. It will probably be located in 14 feet water, and the light, which will be of the first order, will have an elevation of about 131 feet above the sea. A survey of the shoal has just been completed by the Coast Survey. The iron-work will be ready for delivery at an early date, but, for lack of funds adequate to complete the erection, will have to be stored until an additional appropriation is granted, and \$44,000 is asked for it.

389. *Calcasieu, mouth of River Calcasieu, Louisiana.*—A site for a new light-house has been surveyed and steps have been taken toward the purchase of the land, the matter having been placed in the hands of the United States district attorney, who has not yet been heard from. The structure is to be a fourth-order iron tower, similar to that at Southwest Reef, with focal plane of about 50 feet, supported on hollow cast-iron screw-piles, four in number, and strengthened by braces abutting against four exterior piles. The tower will be sheathed with plate-iron. It is already contracted for in the North, and will be erected on its site during the coming year.

392. *Bolivar Point, entrance to Galveston Bay, Texas.*—The foundation of this light-house was completed previous to the last annual report. It is to be a conical sheet-iron tower inclosing a wall of brick; the focal plane of the light (third order) to be 110 feet above the base. When the tower had reached a height of 40 feet the past April, work was suspended by order of the board for want of funds. A new appropriation of \$10,000 having been granted, the construction party will very shortly recommence and the tower be completed at an early date. The lens and all the iron-work are on the ground.

396. *Matagorda, entrance to Matagorda Bay, Texas.*—An appropriation of \$20,000 having been made, a new site for an iron tower similar to that at Bolivar Point, to be provided with a third-order light, has been selected nearly two miles from the old destroyed tower, from which nearly all the iron will be serviceable for the new one. At the close of the year the foundation was under way, and it is proposed to continue the work until the present appropriation is exhausted, when it must be suspended until an additional appropriation of \$12,000 is granted to complete it, which is included in the estimates.

397 and 398. *West Shoal and East Shoal, entrance to Matagorda Bay, Texas.*—The screw-pile light-houses were prepared, and a party organized at Baltimore, in the fifth district, for their erection. They were built simultaneously, and finished in the month of March last. Both lights are on screw-piles. The West Shoal light-house being nearest the Gulf, exhibits a *white* light, and the East Shoal, about one-half mile distant, shows a *red* light.

401. *Brazos Island Beacon, Texas.*—This is the last light but one that exists on the Texas coast before reaching the Mexican boundary. The

present wooden tower is decayed, and is subject to destruction in heavy gales. The vibration of the building in storms causes the breaking of the glass in the lantern, and it is highly important that something be done at this station at an early day. A new light-house of the ordinary screw-pile character of iron foundation is recommended. The distance of the station and the high prices ruling there would enhance the cost of the building above the ordinary rates for such structures even in this district, and an appropriation of \$25,000 is asked.

REPAIRS.

At each of the following-named stations in the eighth district there have been repairs, more or less extensive, during the past year:

— *Buoy and coal depot*, Fort Pickens, Florida.

369. *Saint Joseph's Island*, Mississippi Sound, Mississippi.

380. *Pass à L'outré*, River Mississippi, Louisiana.

386. *Ship Shoal*, Gulf of Mexico, Louisiana. The entire building had the rust scraped off, cleansed with acid and coal-tarred, and a new iron cistern furnished. The fog-bell, which had been only temporarily hung, was permanently fitted in an iron frame.

It is proposed to make repairs at the following-named stations in the eighth district during the coming year:

353. *Saint Mark's*, Florida.

355. *Cape Saint George*, Florida.

356. *Cape San Blas*, Florida.

363. *East Pascagoula River*, Mississippi.

364. *Ship Island*, Mississippi Sound, Mississippi.

368. *Morrill's Shell Bank*, Mississippi Sound, Mississippi.

369. *Saint Joseph's Island*, Mississippi Sound, Mississippi.

372. *West Rigolets*, entrance to Lake Pontchartrain, Louisiana.

374. *Port Pontchartrain*, Lake Pontchartrain, Louisiana.

377. *Tchefuncti River*, Lake Pontchartrain, Louisiana.

379. *Chandeleau*, Gulf of Mexico, Louisiana.

381. *South Pass*, River Mississippi, Louisiana.

384. *Barrataria Bay*, Louisiana.

386. *Ship Shoal*, Gulf of Mexico, Louisiana.

399. *Half-Moon Reef*, Matagorda Bay, Texas.

The following are the names of the light-stations in the eighth district not mentioned elsewhere:

357. *Pensacola*, south side Pensacola Bay, near Barrancas, Florida.

362. *Round Island*, off Pascagoula, Mississippi.

365. *Biloxi*, entrance Biloxi Bay, Mississippi.

367. *Pass Christian*, six and one-half miles northwest of Cat Island.

370. *Rigolets*, (Pleasanton's Island,) mouth River Pearl.

371. *Proctorville Beacon*, near fort at Proctorville, Lake Borgne.

375. *Bayou Saint John*, five miles north of New Orleans.

376. *New Canal*, entrance New Canal, Louisiana.

390. *Sabine Pass*, on Brant Point, east side entrance river Sabine.

391. *Galveston light-vessel*, inside Galveston Bar, Texas.

393. *Half-Moon Shoal*, in Galveston Bay, between Pellican Island and Dollar Point, Texas:

394. *Red-Fish Bar*, to mark channel across Red-Fish Bar, Galveston Bay, Texas.

395. *Clopper's Bar*, to mark channel across Clopper's Bar, Galveston Bay, Texas.

400. *Aransas Pass*, on Low Island, inside Aransas Pass, Texas.

402. *Point Isabel*, at Point Isabel, Brazos Santiago, Texas.

LIGHT-SHIPS.

"*Galveston*," inside of *Galveston Bar*, Texas.—This vessel is very much in want of repair, and she leaks so much that she cannot be kept afloat. She will be removed at once, and a chartered vessel will be procured as a temporary substitute and until the *Galveston* can be repaired.

There are no other light-ships in this district.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

Pass à l'outré.—A 12-inch steam-whistle, in good condition.

Southwest Pass.—A 12-inch steam-whistle, in good condition.

DAY OR UNLIGHTED BEACONS.

The day-beacons of the eighth district are all in good condition as far as known, except the one at Stake Island, Southwest Pass, which requires a very trifling strengthening of the bracing to make it more secure.

Day-beacons in Mississippi Sound have been authorized by the board to be established at Horn Island, Round Island, Biloxi, and Pass Christian, and it is proposed to erect them during the coming year. There are five old wrought-iron screw-piles in store, which will answer the purpose, and will be used.

An iron day-beacon about 20 feet in height, and of the form of a tripod surmounted by a hoop-iron globe, has been erected to take the place of the wooden one destroyed in the heavy gales of last fall at Pass à L'outré. It rests on three hollow cast-iron piles filled with concrete.

A day-beacon of the same design as that at Pass à L'outré, but of a height of 50 feet, has been put up in place of a wooden one that was damaged at Stake Island, mouth of river Mississippi, in the same storms that destroyed the Pass à L'outré Beacon.

DEPOTS.

Depot at Head of the Passes, River Mississippi.—This building is in fair condition, but threatened by the wearing away of the river-bank. The cost of protective works to insure the safety of the building, makes it a question as to whether it would not be advisable to remove the depot back from the river, as in the case of the light-house, or to abandon the site for some other eligible location in the western portion of the district.

The cost of everything that enters into light-house construction on the Mexican Gulf coast is exceedingly high compared with other parts of the Union; the small number of cities where supplies necessary can be obtained at any price, in a district extending over one thousand miles of coast, measured on the shortest line, not taking into consideration the bays, sounds, and estuaries; the delays experienced from illness among working-parties from malarial fevers; the soft and yielding nature of the land and shoals in the greater part of the district, making the operation of putting down foundations difficult and ex-

pensive; the unreliable means of communication with distant field-parties, by reason of the deficiency of railroads and packet-lines, have prevented the board from completing many of the works in the eighth district.

TENTH DISTRICT.

The tenth district extends from the mouth of River Saint Regis, New York, to include Grassy Island light-house, River Detroit, Michigan, and embraces all the aids to navigation on the American shores of Lake Erie, Lake Ontario, and River Saint Lawrence.

Inspector.—Commodore Gustavus H. Scott, United States Navy, until 18th September, 1871; Commodore Napoleon Collins, United States Navy, present inspector.

Engineer.—Major George L. Gillespie, Corps of Engineers, brevet lieutenant-colonel, United States Army.

In this district there are:

Light-houses and lighted beacons.....	56
Light-ships	0
Fog-signals operated by steam or hot-air engines.....	0
Day or unlighted beacons	1
Buoys actually in position.....	76
Spare buoys for relief to supply losses.....	84
Tenders.....	0

The numbers preceding the names of stations correspond with those of "Light-House List of the Northern Lakes and River Coasts of the United States," issued January 1, 1872.

461. *Cross-Over Island, River Saint Lawrence, New York.*—The tower and dwelling are both in very bad condition, and are not worth repair. The tower is of wood, and rises from the roof of the brick dwelling; the timber is so decayed, and the interior framing so badly arranged, that water finds its way into the interior at all points of the connection with the roof. The brick of which the old dwelling is built were originally very inferior, and have been so injured by frosts that the walls are now unserviceable, and cannot be used for supporting any new work. They were sheathed on the outside with boards, in 1869, but this was a temporary expedient, serving only to relieve the cold and dampness of the dwelling, until the whole could be renewed. An appropriation of \$11,000 is required for a new tower and dwelling.

470. *Oswego, Lake Ontario, New York.*—A small frame beacon, with a focal plane 23 feet above the lake-level, was established at the end of the pier, and a communication with the main light formed by a strong elevated wall. The apparatus used is a lens of the sixth order, showing a fixed white light.

471. *Fair Haven, Little Sodus Bay, Lake Ontario, New York.*—An appropriation was made, March 3, 1871, for the erection of a pier, light-house, and dwelling at this station. In May, 1871, a lot of four acres, the smallest which could be obtained, was purchased on the west bank, as the site for the keeper's dwelling. No work was done during the working season on account of the delay of the seller in presenting warrantee deed for the light-house lot for examination. Finally, in May, 1872, the title-papers were presented, but not proving acceptable to the United States district attorney they were returned. Having determined early in the spring to build the frame beacon, irrespective of the dwelling, sealed proposals were publicly invited for the necessary materials. No bids were offered. The materials were accordingly purchased in open

market at Oswego, New York, and framing done there by days' labor. The beacon was shipped from Oswego in May, 1872, erected on the west pier, and the light exhibited June 10, 1872. The apparatus is a Fresnel lens of the fourth order, arc 270° , showing a fixed white light. The height of focal-plane above the lake-level is 34 feet. Should the Board not be able to obtain title to the lot selected, another will be purchased on the opposite side of the bay upon which to erect the keeper's dwelling.

— *Thirty-mile Point, Lake Ontario.*—It is recommended that a lake-coast light be established near the point where the boundary line between Niagara and Orleans Counties intersects the south shore of Lake Ontario. The point is designated on some maps as Thirty-mile Point, being just thirty miles from the mouth of Niagara River. The necessity for this light will be apparent when it is considered that the first light to the eastward of the mouth of the Niagara River is at Oak Orchard, New York, a fourth-order light on a pier, and which, from its re-entrant position, can be of but little service to shipping making the Welland Canal. The light proposed is of the third order. An appropriation therefor is required of \$30,000.

478. *Fort Niagara, mouth of Niagara River, New York.*—An appropriation was made, March 3, 1871, for rebuilding the light-house at this station. Immediately after the passage of the act plans were prepared for the new buildings; sealed proposals were publicly invited for the delivery of the necessary building-materials, and contracts made. The former light was placed on one of the old military buildings of the fort, and unsuccessful efforts were made to locate the new tower within the walls, being near the point which the light is intended to mark, the main object, however, being to serve as a lake-coast light, but it was found that the only place practicable was the lot on which stands the light-keeper's dwelling; this, although further from the point than is desirable, serves very well for both of the above purposes. Work was commenced in July, 1871, and pushed rapidly, but cold weather coming on unusually early, masonry was suspended November 30, 1871. Work was resumed April 15, 1872, and the light exhibited June 10, 1872. The tower and oil-room were completely finished June 27, 1872. When it was decided to place the tower upon the light-house lot, a careful inspection of the bank of the river showed that some protection should be made to arrest the abrasion constantly in operation by the currents and the ice of the river. A thick, low, rubble-stone wall was run along the greater part of the shore, near the water edge, and behind this the bank was terraced and sodded. Six heavy timber jettées, 14 feet to 30 feet in length, filled with stones, were run out from the wall perpendicular to the shore. These have caused the water to shoal, and, it is believed, now perfectly protect the lot. The station is now in fine order.

480. *Buffalo breakwater, (north end,) Lake Erie, New York.*—The work in progress at the date of last report was suspended again September 9, 1871, on account of the continued and irregular setting of the pier of protection, and was not resumed during the working season further than to throw in some heavy stone around northwest corner, to prevent the undermining of the crib, and to protect the angles of the crib with a sheathing of boiler-iron against injury from ice. Work was resumed as early in the spring as the ice would permit, and has been continued, with a few interruptions, to date. The interior finish of the house was completed on the 10th July. The fog-bell is suspended on the exterior, and the striking-apparatus, occupying one of the rooms of the dwelling, has been properly adjusted to strike three times in quick succession, at

intervals of thirty seconds, during foggy weather. The lens is of the fourth order, arc 360° , and the light shown is a fixed red.

485. *Erie Harbor, Pennsylvania*.—An appropriation was made, March 3, 1871, for renovating this station. It was expended in raising the roof, renewing the brick-work around windows, renewing floors, replastering the house, renewing the barn, and building a fence partially around the buildings. The station is in good order.

488. *Presqu'île beacon-range No. 3, Erie Harbor, Lake Erie*.—A small octagonal frame tower has been erected upon the east end of the north pier, to mark the extremity of the new extension. The height of focal plane above lake-level is 12 feet. The apparatus is a sixth-order lens, showing a fixed white light.

— *Presqu'île, Lake Erie, Erie, Pennsylvania*.—An appropriation was made, June 10, 1872, for building a light-house on the north shore of peninsula covering the harbor of Erie. Plans have been prepared, and proposals will be publicly invited at an early day for the delivery of the necessary building-materials. The buildings will consist of a tower and keeper's dwelling attached, and will be built of limestone. The apparatus will be a Fresnel lens of the fourth order, revolving, showing a white light. The height of focal-plane above lake level will be 45 feet.

491. *Conneaut, Lake Erie, Ohio*.—An appropriation was made, March 3, 1871, for building a light-keeper's dwelling at this station. Proposals were publicly invited for its construction, and a contract was made. The contract has been satisfactorily executed excepting a part of the interior finish. The dwelling is a one-story and attic frame structure, with an oil-room, and is situated on the left bank of the stream, a short distance from the piers.

492. *Ashtabula, Lake Erie, Ohio*.—An appropriation was made, March 3, 1871, for building a light-keeper's dwelling at this station. Proposals were publicly invited for its construction, and a contract was made. The contract has been satisfactorily executed, and the building has been accepted. It is a building of the same character as that at Conneaut, Ohio, and is situated on the left bank of the stream, within the township of Ashtabula. The beacon on the east pier is very old and dilapidated, and by the irregular setting of its crib has been much thrown out of verticality. It should be removed, and a pier-head beacon should be established in its stead. The appropriation required is \$3,400.

493. *Grand River, Lake Erie, Fairport, Ohio*.—Work in progress at date of last report was so far completed as to exhibit the light from the new tower on the 11th of August, 1871. The new building and oil-room were completed 20th of October, 1871. The order of the original light was not changed. The east pier of entrance to the harbor at this station is being extended 400 feet, and as the frame beacon is very old and needs renewing, it should be taken down and a new frame beacon should be erected at the pier-head of the new extension. An appropriation is required of \$3,400.

495. *Cleveland, Lake Erie, Ohio*.—The work of building the stone wall in closing the lot, in progress at date of last report, was completed in July. Proposals were publicly invited for the necessary building-materials for the new tower and dwelling, and a contract was made for the stone. One bid was offered for the brick, but as the sample presented was of a very inferior kind, it was rejected. No bid was offered for lumber. The stone were delivered in November, and the winter was consumed in dressing them, and in preparing all the necessary carpentry. On account of the great fire in Chicago, it was found impossible to buy in

Cleveland, at anything like a reasonable price, brick at all suitable for exterior work. The engineer, therefore, was compelled to make a contract with a firm at La Salle, New York, for the supply of the brick needed. This season has been most unfavorable for their manufacture, and the contractors have not supplied them at the time nor in the quantities expected. A small lot has been delivered, and the work of construction has advanced to 5 feet above the water-table. On the 15th of July it was expected that the full amount ordered would have been delivered, and that after that date the construction would advance without interruption.

498. *Black River, Lake Erie, Ohio.*—This station has no keeper's dwelling. An appropriation of \$4,000 is required for the construction of a frame dwelling similar to the one at Ashtabula, Ohio.

499. *Vermillion, Lake Erie, Ohio.*—The house and lot purchased in this village for the use of the light-keeper were transferred to the United States in April. A few alterations have been made to the house to furnish accommodations for oil, and a cellar, a neat inclosure, and a stone sidewalk have been added. The station is in fine order.

500. *Huron, Lake Erie, Ohio.*—An appropriation was made March 3, 1871, for building a light-keeper's dwelling at this station, and a lot has been purchased for it. There was great delay in making the title-papers satisfactory to the district attorney, but they have been perfected at last, and have been forwarded to the Attorney-General of the United States for examination and approval. The construction of the dwelling is under contract, and work will commence immediately after the acceptance of the title-papers by the Attorney-General.

508. *Maumee outer range, (rear,) Toledo, Ohio.*—Work in progress at date of last report was satisfactorily completed in October. The dwelling was accepted, and the keeper immediately installed. There are two points in the southwest channel through Maumee Bay, Ohio, which require to be marked by day-beacons. The one is in the position now occupied by red can-buoy No. 2, and the other is that occupied by black can-buoy No. 1. Vessels making the harbor frequently strike these buoys and either break their moorings or drag them out of the place, to the great embarrassment of shipping. Vessels are continually grounding in the bay from this cause. The foundation and superstructure of the beacons should be made of 12-inch pine timber, framed and bolted like ordinary crib-work for harbor-piers, and filled with heavy stone; the foundation to be 30 feet square, sunk in 10 feet water, and its exposed angles protected by piling. The superstructure will be sheathed on the outside with heavy oak timber. The whole will be surmounted by an iron cage. One beacon will be painted red and the other black. An appropriation of \$12,000 is required for these beacons.

511. *Maumee inner range, (front,) Toledo, Ohio.*—A frame buoy-house has been built on the water-front of the light-house property. It is established about 200 feet from shore upon a crib of protection 25 feet square, sunk in 6 feet of water.

514. *Gibraltar, mouth of River Detroit, Lake Erie, Michigan.*—An appropriation was made June 10, 1872, for rebuilding tower and keeper's dwelling at this station. It is proposed to remove the old tower, relinquish the site, and to erect the new buildings upon the light-house lot. Sealed proposals will be publicly invited at an early day for the supply of the necessary building-materials. The plans contemplate a tower, and dwelling attached, constructed of brick. It is expected to complete the work before the close of the working season.

REPAIRS.

At each of the following-named stations in the tenth district there have been repairs and renovations more or less during the year :

- 461. *Cross-Over Island*, New York, River Saint Lawrence.
- 462. *Sister Islands*, New York, River Saint Lawrence.
- 464. *Rock Island*, New York, River Saint Lawrence.
- 469. *Oswego*, New York, Lake Ontario.
- 470. *Oswego pier-head light*, New York, Lake Ontario.
- 473. *Big Sodus beacon, (rear,)* New York, Lake Ontario.
- 474. *Big Sodus*, New York, Lake Ontario.
- 475. *Genesee*, New York, Lake Ontario.
- 476. *Genesee beacon*, Lake Ontario, moved to end of pier.
- 477. *Oak Orchard beacon*, Lake Ontario, moved to end of pier.
- 479. *Horseshoe Reef*, Buffalo, New York, lantern changed.
- 482. *Buffalo*, New York.
- 483. *Dunkirk*, New York, Lake Erie.
- 489. *Peninsula range No. 1*, Lake Erie.
- 490. *Peninsula range No. 2*, Lake Erie.
- 494. *Grand River*, Fairport, Ohio, Lake Erie.
- 504. *Green Island*, Lake Erie, Ohio.
- 505. *West Sister*, Lake Erie, Ohio.
- 506. *Turtle Island*, Maumee Bay, Ohio.
- 508, 510, 511, 512. *Maumee ranges*, Toledo, Ohio.
- 513. *Monroe*, Lake Erie, Michigan.
- 515. *Mamajuda*, River Detroit, Michigan.
- 516. *Grassy Island*, Detroit River, Michigan.

Stations at which repairs in the tenth district will be made during the next year :

- 462. *Sister Islands*, River Saint Lawrence, New York.
- 464. *Rock Island*, River Saint Lawrence, New York.
- 465. *Tibbets's Point*, Lake Ontario, New York.
- 479. *Horseshoe Reef*, Buffalo, New York.
- 483. *Dunkirk*, Lake Erie, New York.
- 491. *Conneaut*, Lake Erie, Ohio.
- 500. *Huron*, Lake Erie, Ohio.

The following are the names of the light-stations in the tenth district not mentioned elsewhere :

- 460. *Ogdensburgh*, River Saint Lawrence, New York.
- 463. *Sunken Rock*, River Saint Lawrence, New York.
- 466. *Galloo Island*, Lake Ontario, New York.
- 467. *Sackett's Harbor*, Lake Ontario, New York.
- 468. *Stony Point*, Lake Ontario, New York.
- 472. *Big Sodus*, Lake Ontario, New York.
- 481. *Buffalo breakwater, (south end,)* Buffalo, New York.
- 482. *Buffalo*, Lake Erie, New York.
- 484. *Dunkirk beacon*, Lake Erie, New York.
- 486. *Presqu'isle range, No. 1*, Pennsylvania.
- 487. *Presqu'isle range, No. 2*, Pennsylvania.
- 496. *Cleveland, No. 1*, Ohio.
- 497. *Cleveland, No. 2*, Ohio.

501. *Cedar Point*, Sandusky Bay, Ohio.
 502. *Cedar Point Beacon range*, Sandusky Bay, Ohio.
 503. *Marblehead*, Sandusky Bay, Ohio.
 507. *Maumee outer range*, (front,) Ohio.
 509. *Maumee middle range*, Ohio.

LIGHT SHIPS.

There are no light-ships in this district.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

There are no fog-signals operated by steam or hot air in this district.

DAY OR UNLIGHTED BEACONS.

There are no day-beacons in this district.

DEPOT.

The construction of a wharf for the use of the light-house depot at Buffalo, New York, in progress at the date of last report, was prosecuted satisfactorily during the summer, and completed September 30, 1871. This wharf is 264 feet long, by $12\frac{1}{2}$ feet wide, and is sunk 6 feet below low-water mark. At a distance of 3 feet in front of the wharf a row of protecting piles has been driven, 4 feet from center to center, and confined at top with walling pieces bolted through and through to each pile with seven bolts. During the winter it was found that snow penetrated the roof of the store-house and damaged articles in store there. The slate were removed in June, new boards and felting put on, and the slating renewed. The foundation of the exterior stairs being cracked and sunken, was removed and rebuilt; the decayed sleepers of the second floor were replaced by sound ones, and additional supporting-timbers placed underneath. All the buildings of the station have been painted, a new fence built in front, with spikes on top to exclude trespassers, and the grounds planted with shade-trees and grass. A commodious boat-house for two boats has been built at the east end of the wharf. The station is now in fine condition.

TENDER.

There is now no tender in the tenth district; and the *Haze*, belonging to the eleventh district, is used for supplying the lights in the tenth district, and for buoy service. The great distances between the extremes of the tenth and eleventh districts make it necessary to have another tender, to be used in the former for inspector's and engineer's purposes, and an estimate is submitted therefor.

ELEVENTH DISTRICT.

The eleventh district embraces all aids to navigation on the northern and northwestern lakes above Grassy Island light-house, River Detroit, and includes Lakes Saint Clair, Huron, Michigan, and Superior.

Inspector.—Commodore Alexander Murray, United States Navy.

Engineer.—Major O. M. Poe, Corps of Engineers, brevet brigadier-general, United States Army.

There are in this district :

Light-houses and lighted beacons.....	91
Light-ships.....	none
Fog-signals operated by steam or hot-air engines.....	7
Day or unlighted beacons.....	1
Buoys actually in position.....	138
Spare buoys for relief and to supply losses.....	99
Tender (steam) Haze, buoy-tender and supply-vessel, (common to tenth and eleventh districts).....	1
Tender (steam) Warrington, (used in engineer's constructions and repairs).....	1
Tender (sail) Belle, (used in engineer's constructions and repairs).....	1

The numbers preceding the names of stations correspond with the "Light-House List of the Northern and Northwestern Lakes of the United States," issued January 1, 1872.

520, 521. *Saint Clair Flats Canal*.—These two light-houses were completed as proposed in the last annual report, and were lighted for the first time on the night of November 15, 1871. Simultaneously the temporary lights were discontinued. It was found that the foundations were liable to injury from the impact of rafts in tow of steam-tugs, as well as from other causes not connected with the construction. They were protected by special constructions, which thus far have proven perfectly satisfactory.

522. *Fort Gratiot, Lake Huron, Michigan*.—The steam fog-whistle under construction was completed in good time last season, and was in operation during all the thick and smoky weather consequent upon the great fires in the Northwest of last fall. Its use was most opportune, and the signal gives great satisfaction.

— *A light-house between Fort Gratiot and Point aux Barques, Lake Huron, Michigan*.—The recommendation contained in the last annual report is renewed, together with the estimate of the cost of a suitable structure. This light-house is one of the coast-lights of the general system, and is not intended to serve any local interest. Its value to the general commerce will be great, as it will divide the long distance of seventy-five miles between Point aux Barques and Fort Gratiot.

528. *Thunder Bay Island, Lake Huron, Michigan*.—The steam fog-whistle under construction at this station at the date of the last annual report was duly completed, and has rendered excellent service.

532. *Spectacle Reef, Lake Huron, Michigan*.—At the date of the last annual report (July 1, 1871,) the crib, 92 feet square, with a central opening of 48 feet square to receive the coffer-dam which was to form the pier of protection, as well as a landing-place for materials during the building of the light-house, was in course of construction at Scammon's Harbor. The original intention was to put the crib in position in four sections, but upon further consideration it was decided to attempt placing it as a whole upon the reef, which was successfully accomplished, as is detailed hereafter.

In order to get accurate soundings to guide in shaping the bottom of the crib, and to fix with a degree of certainty the position of these soundings and that to be occupied by the crib, the following method was pursued: Four temporary cribs, each 15 feet by 25 feet, of round timber, were placed in from 8 to 10 feet of water, in a line corresponding with the proposed eastern face of the pier of protection, and filled to the level of the water with ballast-stone. These four cribs were then decked over and connected together. Upon the pier thus formed about seventy cords of ballast-stone were placed, ready at the proper time to be thrown into the crib forming the pier of protection. The lower two complete courses of the pier of protection, having been fastened together by screw-bolts, forming a raft, constituting a ground-plan of the pier of

protection, were then towed from the harbor where framed to the reef, and moored directly over the position to be occupied by the finished pier. Its position was marked upon the temporary pier referred to above, and soundings taken at intervals of two feet along each timber in the raft, thus obtaining accurate contours of the surface of the reef within the limits of these timbers. The raft was then towed back to the harbor, hauled out upon ways, and by means of wedges of timber the bottom was made to conform to the surface of the reef. The raft, now become the bottom of the pier of protection, was then launched, and additional courses of timber built upon it, until its draught of water was just sufficient to permit its being floated into position on the reef, at which time it was estimated that the top of the pier would be one foot out of water.

The depth of water on the reef at the points to be occupied by the four corners of the pier of protection was found to be as follows: At northeast corner, 10 feet 6 inches; at northwest corner, 13 feet; at southwest corner, 14 feet 6 inches; and at southeast corner, 9 feet 6 inches; the position to be occupied by the pier of protection having been so chosen that the sides would correspond to the cardinal points of the compass. Meanwhile five barges at the harbor had been loaded with ballast-stone, making, together with those on the temporary pier at the reef, 290 cords (about 1,800 tons) at command, with which to load the pier of protection and secure it to the reef as soon as it should be placed in position.

On the evening of the 18th of July, 1871, everything being in readiness, and the wind, which had been blowing freshly from the northwest for three days previously, having somewhat moderated, at 8 p. m. the tugs *Champion* (screw-propeller) and *Magnet* (side-wheel) took hold of the immense crib and started to tow it to the reef, fifteen miles distant, followed by the *Warrington* (screw-propeller) having in tow the schooner *Belle*, (the two having on board a working force of 140 men,) the tug *Stranger* (screw-propeller) with barges *Ritchie* and *Emerald*, and the tug *Hand* with two scows of the Light-House Establishment. The large *Table Rock*, with fifty cords of stone on board, was left in reserve at the harbor. The construction-scow, with tools, &c., on board, was towed with the crib. At 2 a. m. next morning, six hours after starting, the fleet hove to off the reef awaiting daylight and the abatement of the wind, which had again freshened up. At 6½ a. m., it having moderated, the pier, with considerable difficulty, was placed in position, and after being secured to the temporary pier and the moorings previously set for the purpose, all hands went to work throwing the ballast-stone into the compartments, and by 4 p. m. succeeded in getting into it about 200 cords (1,200 tons.) By this time the wind was blowing freshly and the sea running so high as to make it necessary to stop work for the time, but early next morning all the reserve stone were put into the compartments.

The tugs *Magnet* and *Stranger* were discharged as soon as the pier was in position, but for fear of accident the *Champion* (a steamer of great power) was retained until all the stone were in place, when she was discharged, and started for Detroit with the barges *Ritchie* and *Emerald* in tow. The *Table Rock* was retained in service until the 30th July, when she was dispensed with. After the pier was in position the schooner *Belle* was moored on the reef to serve as quarters for the working force, which proceeded to build up the pier to the required height above water, (12 feet.) The *Warrington* having gone to Detroit to receive a new boiler, the tug *Hand* was retained to tow the scows carry-

ing the ballast-stone used in completing the filling of the compartments, until the return of the Warrington on the 12th of September, when she, too, was discharged. By this time the pier had been built up to its full height, and by the 20th of September quarters for the workmen had been completed upon it, which were at once occupied, and the Belle returned to the harbor. By means of a submarine diver the bed-rock within the opening of the pier was then cleared off, and the work of constructing the coffer-dam was taken in hand. The coffer-dam itself consisted of a hollow cylinder, 41 feet in diameter, composed of wooden staves, each 4 inches by 6, and 15 feet long. The cylinder was braced and trussed internally, and hooped with iron externally, so as to give it the requisite strength. It was put together at the surface of the water, and when complete was lowered into position on the bed-rock by means of iron screws. As soon as it rested on the rock, (which was quite irregular in contour,) each stave was driven down so as to fit as closely as it would admit and a diver filled all openings between its lower end and the rock with Portland cement. A loosely-twisted rope of oakum was then pressed close down into the exterior angle between the coffer-dam and rock, and outside of this a larger rope made of hay. The pumping-machinery having meanwhile been placed in readiness, the coffer-dam was pumped dry, and on the same day (14th October) a force of stone-cutters descended to the bottom and commenced the work of leveling off the bed-rock, and preparing it to receive the first course of masonry. The bed-rock was found to consist of dolomitic limestone, (confirming the previous examinations,) highest on the western side, (toward the deepest water,) and sloping gradually toward the eastern. In order to make a level bed for the first course of masonry, it was necessary to cut down about two feet on the highest side, involving a large amount of hard labor, rendered more difficult by the water forcing its way up through seams in the rock. But the work was finally accomplished, the bed being as carefully cut and leveled as any of the courses of masonry. The first course of masonry was then set, completing it on the 27th of October. While setting this course much trouble was caused by the water, already referred to as forcing its way up through seams in the rock, which attacked the mortar bed. For this reason water was let into the dam every evening (and pumped out next morning) to give the mortar time to harden during the night. This mortar was composed of equal parts of Portland cement and screened siliceous sand. Specimens of it obtained the following spring, after being in place under water for seven months, were quite as hard or harder than either the bed-rock or the stone used in building the tower.

The weather having now become very boisterous, with frequent snow-squalls, often interrupting the work, and the setting of any additional stone requiring the removal of a portion of the most important of the interior braces of the coffer-dam, it was deemed prudent to close the work for the season. This, too, would give ample time for the hardening of the mortar used in bedding the stone, and in the concrete used for filling cavities in the bed-rock, as well as the space between the outside of the first course and the coffer-dam, (which was solidly filled with concrete to the top of the first course.) Therefore the coffer-dam was allowed to fill with water, the process being hastened by boring holes through it to admit the water, and it was secured to prevent its being lifted by the ice during the winter. The machinery was laid up, and on the last of October all the working force, except two men, were removed. These two men were left to attend to the fourth-order light, which had been established on top of the men's quarters, and the fog-

signal, consisting of a whistle attached to one of the steam-boilers. At the close of navigation they were taken off the pier by the light-house tender Haze.

The degree of success of this novel coffer-dam may be inferred from the fact that although prepared with pumps of an aggregate capacity of five thousand gallons per minute, not more than a capacity of seven hundred gallons was used, except when emptying the coffer-dam, and then only to expedite the work. Once emptied, a small proportion of this capacity was ample to keep the coffer-dam free from water; and this at a depth of 12 feet of water, on rock, at a distance of nearly eleven miles from the nearest land. Every person connected with the work may well feel a just pride in its success. All the stone which had been delivered at the harbor, consisting of the first five courses, (each course 2 feet thick,) having been cut by this time, the work there was also closed.

The season opened a month later in 1872 than in 1871, consequently work was not resumed at the harbor until the 3d of May, and upon the reef on the 20th of the same month. On the 13th of May the ice in the coffer-dam was still a compact mass, of some feet in thickness. Masses of ice still lay on top of the pier itself. As soon as anything could be done, the ice still remaining was cleared out of the coffer-dam, the machinery put in order, the braces removed from the interior of the coffer-dam, and the work of setting additional courses begun. This has continued without interruption to the present time, when the masonry is well above the water, and going on at such a rate that one entire course is set, drilled, and bolted complete every three days. If this continues, the tower will have reached a height of at least 40 feet above the lake-level before the close of the season.

It is greatly to be regretted that in a work of such difficulty and importance it was not found practicable to use granite. The first contractor to furnish stone agreed to supply granite from a quarry at Duluth, Minnesota. After a trifling effort to quarry the stone, he utterly failed, and he abandoned the contract. It was then so late in the season that the engineer was compelled either to stop operations or to go into the open market and purchase such stone as he could get. The best available was the Marblehead limestone from the vicinity of Sandusky, Ohio, and this was used. In February, 1872, proposals for the remaining stone were received, and of these the granite offered was at such a price as to exclude it, and no other suitable stone except the Marblehead limestone being offered, he was again driven to use it.

It is hoped that the work will be entirely completed by the close of the season of 1873. It seems now as though the appropriations available would be sufficient to complete the work, but for fear they may not, it is deemed advisable that \$20,000 be appropriated for the important work, in addition to the balance of appropriations on account of this work, which have heretofore reverted to the Treasury, or which may do so under existing laws, previous to the time at which it is possible to complete it.

536. *Detour, Lake Huron, Michigan.*—A steam fog-whistle has been established at this station, greatly to the benefit of navigation.

— *Saint Helena Island, Straits of Mackinac.*—An appropriation for this work is available, and it will be taken in hand as soon as practicable.

— *Little Traverse, Lake Michigan, Michigan.*—Attention was directed to the necessity of a light-house to make this fine harbor of refuge available at all times, by an inquiry from the Senate Committee on

Commerce, which inquiry was referred to the engineer officer of the district, and he reported under date of April 11, 1871, in a communication of which the following is a copy :

Referring to a letter from the Light-House Board, dated March 23, 1871, inclosing a copy of a communication from the chairman of the Senate Committee on Commerce, covering a resolution of the legislature of Michigan, relative to establishing a light-house, &c., at the mouth of Little Traverse Bay, Michigan, and directing me to report as to the utility and cost of the constructions asked for, I have the honor to submit the following :

By reference to the tracing of the lake-survey detail chart of Little Traverse, inclosed herewith, and the engraved lake-survey chart of the northeast end of Lake Michigan, including Big and Little Traverse Bays and the Fox and Manitow Islands, a copy of which is supposed to be in the office of the board, or can be readily obtained at the office of the Chief of Engineers, the relation of the harbor of Little Traverse to the navigation of Lake Michigan can be readily seen and appreciated. The harbor itself is excellent in every respect, easy of access, affording good anchorage, and a complete shelter from all winds.

A light-house of the fifth order, together with a fog-bell of 600 pounds, with Stevens's striking-apparatus will make the harbor available.

In addition to its relation to the general commerce of Lake Michigan, the harbor has some local importance. This is increasing and doubtless will continue to do so.

The proposed aids to navigation should be placed at the extreme end of the point, on the south side of the harbor, as indicated on the accompanying tracing, and would cost about \$12,000, which sum, for the purpose indicated, I respectfully recommend be included in the next annual estimates.

544. *South Manitow Island, Lake Michigan.*—The work of improving this station, which was in progress at the date of the last annual report, was duly completed.

546. *Manistee, Lake Michigan, Michigan.*—This light-station was destroyed during the great fire of the night of the 8th of October, 1871. The keeper, with commendable energy, established a temporary light within a few days afterward, and under the act of Congress approved May 18, 1872, making an appropriation for rebuilding the station, a working party was dispatched some time since from Detroit for the work.

548. *Pere Marquette, Lake Michigan, Michigan.*—This station is as yet without a keeper's dwelling, and an appropriation of \$4,000 is required for the purpose in question.

— *Little Point au Sable, Lake Michigan, Michigan.*—The site required for the proposed coast-light at this point has been reserved, and as soon as practicable the erection of the station, under the act of Congress approved June 10, 1872, will be undertaken.

— *White River, Lake Michigan, Michigan.*—A pier-head light has been established at this point, but a dwelling for the keeper is much needed, there being none at the station, and an appropriation of \$4,000 is required for the purpose.

550. *Muskegon pier-light, east shore of Lake Michigan, Michigan.*—This light, in course of construction at the date of the last annual report, was duly completed, and has been in operation since.

552. *Grand Haven pier-light, Lake Michigan, Michigan.*—This light has also been established since the date of the last annual report. It is one of the general system of pier-head lights.

553. *Holland, Michigan, at the mouth of Black Lake, east side Lake Michigan, Michigan.*—The construction of a dwelling for the keeper at this station will be undertaken as soon as a title to the requisite site can be obtained. The necessary funds were appropriated by act of Congress approved June 10, 1872.

555. *South Haven, Lake Michigan, Michigan.*—The necessary buildings have been erected at this station and the light established.

559. *Michigan City pier-light, Lake Michigan, Indiana.*—As proposed at the date of the last annual report, this light was erected and in full operation before the close of last season.

— *Calumet, Lake Michigan, Illinois.*—The re-establishment of this light has been delayed by the failure of the present owners to make to the United States the requisite title to the proposed site. Efforts to obtain title are still being made.

562. *Grosse Point, Lake Michigan, Illinois.*—The plans and specifications for the proposed buildings at this station have been made, and proposals for their construction will be invited within a few days.

— *Racine Point, Lake Michigan, Wisconsin.*—The following are the remarks concerning the establishment of a coast-light at this point, contained in the last two annual reports :

This is a prominent point on the west coast of Lake Michigan, about three and a half miles north of Racine, and eighteen miles south of the North Cut beacon, at Milwaukee. The point shuts out to the northward the Racine light, which lies in a bay, and is not seen by vessels coming from the north, and keeping the shore well aboard, as they mostly do, until nearly abreast of it.

Frequent shipwrecks have occurred at this point for the want of a light. For vessels coming from the south it would also be a good guide for steering clear of Racine Reef.

A fog-signal should also be provided. For these two objects there is required an appropriation of \$40,000. •

— *Racine pier-light, Lake Michigan, Wisconsin.*—A working party is now engaged in erecting a pier-head light and elevated walk at this place. It will be completed about the 1st of September of this year.

— *Milwaukee pier-head light, Lake Michigan, Wisconsin.*—Upon completion of the pier-head light at Racine, the working party will be transferred to Milwaukee for the purpose of erecting a pier-head light at the outer end of the north pier, which has been extended during the present season. An elevated walk will be built to connect the light with the shore.

— *Twin River Point, Lake Michigan, Wisconsin.*—This point is seven miles north of Manitowoc, and occupies a position on the west coast of Lake Michigan, similar to Grand Point au Sable on the east. It is the prominent landmark for vessels navigating Lake Michigan, and should be marked by a tower 100 feet high, with an apparatus of the third order. There is an old discontinued station at the village of Twin River, but the site is too far south of the point to answer the purpose of a coast-light. There is required for a proper light at this station an appropriation of \$40,000.

— *North Bay, Lake Michigan, Wisconsin.*—By act of Congress approved July 15, 1870, an appropriation of \$7,500 was made for the purpose of establishing a light or lights to enable vessels to enter this harbor, and a price for the land required was agreed upon. But the owner found it impracticable to clear the title before the 30th June, when the appropriation reverted to the Treasury. It is recommended that the amount be re-appropriated and another attempt be made to obtain title.

— *Poverty Island, Lake Michigan.*—The remarks contained in the last annual report, and those for the two preceding years, respecting the necessity for a light at this point, with estimate of cost of same, are repeated, as follows :

The already large and rapidly increasing commerce to and from the northern end of Green Bay, and the lower lake ports, now takes, in daylight, the northern passage from Lake Michigan into Green Bay, because of its being much shorter and more direct. To enable vessels to use the same passage in the night, a light-house on Poverty Island is necessary.

There is recommended an appropriation of \$18,000 for the object stated.

— *Big Sable, Lake Superior, Michigan.*—An appropriation for a light-house at this point was made at the last session of Congress, under the title of “*a light between White Fish Point and Grand Island Harbor.*” Steps have been taken to select the exact site; when this is done, the title will be secured as soon as possible, and the erection of the necessary buildings undertaken.

— *Stannard's Rock, Lake Superior.*—The remarks and estimate contained in the last annual report, relating to a light-house at this point, are renewed as follows:

The rapid increase of the commerce between Du Luth, the eastern terminus of the Northern Pacific Railroad, and the lower lakes, will demand at no distant day the erection of a light-house on this danger so much dreaded by all vessels bound to or from ports above Keweenaw Point, and ports below. The case will be similar to that of Spectacle Reef, and all the costly apparatus and machinery purchased for the latter can be made available for the former, thereby greatly reducing the cost of construction. It is not proposed, however, to do anything further at this time than to make the preliminary examinations, and mature plans for the work, for which purpose it is recommended that the sum of \$10,000 be appropriated.

— *L'Anse, Lake Superior, Michigan.*—The last annual report contained the following remarks and estimate relating to the necessity of establishing a light at this place, which are repeated:

The railroad from Escanaba and Marquette, to Ontonagon, passes the head of L'Anse Bay, and will for the present terminate there. Efforts which will probably prove successful are now being made to complete the road to L'Anse before the close of this season, when the place will at once become an important point for the shipment of iron-ore. A good harbor is found at the head of the bay, and it should be lighted. A joint report upon this subject was made by the inspector and engineer. To establish such a light as is needed will require an appropriation of \$12,000, which amount, for the purpose indicated, is recommended.

— *Outer Island, Lake Superior.*—Concerning the necessity for a light at this point the following, contained in the report for the last year, is repeated:

The through commerce to and from the western end of Lake Superior increasing so rapidly, as the railroads having their terminus at Du Luth are extended to the westward, all passes outside of the Apostle Islands, and is greatly in need of a light-house on the northern end of Outer Island. This should be a light of the third order, and will cost \$40,000, which sum is recommended for appropriation.

— *Sand Island, Lake Superior.*—The remarks and estimate of last year are renewed as follows:

For reasons given in the preceding case, (Outer Island,) a light (of a lower order, however) is demanded on the northern end of Sand Island, the most westerly of the group, for which purpose an appropriation of \$18,000 is recommended.

608. *Duluth, Lake Superior, Minnesota.*—A contract for the erection of this station has been made, and the work is now in progress.

— *Passage Islands, Lake Superior.*—Respecting the importance of establishing a light at this place, the remarks contained in the last annual report are repeated with the estimate of cost, as follows:

The discovery of the silver mines on Lake Superior, and consequent sudden and remarkable increase of travel and traffic to that region, render it desirable that a light house should be built on Passage Island, to mark the channel between it and Isle Royale. The island is difficult of access, and therefore any structure put there will cost more than if erected at some more accessible point. There is recommended an appropriation of \$18,000 for the purpose indicated.

PIER-HEAD LIGHTS.

These are being erected as rapidly as piers are reported by the Engineer Department of the Army ready to receive them, and apparatus

can be supplied. The extension of this system of pier-lights must depend upon that of harbor improvements, which renders it somewhat difficult to estimate in detail until it is known just where these improvements are to be made.

REPAIRS.

Repairs, more or less extensive, were made or are in progress at the following stations in the eleventh district, viz :

- 518. *Saint Clair Flats*, Lake Saint Clair.
- 520. *Saint Clair Flats Canal*, (lower light.)
- 521. *Saint Clair Flats Canal*, (upper light.)
- 523. *Point aux Barques*, Michigan, Lake Huron.
- 524. *Tawas*, (Ottawa,) Michigan, Lake Huron.
- 526. *Saginaw Bay*, Michigan, Lake Huron.
- 534. *Cheboygan*, Michigan, Lake Huron.
- 538. *Skilligallee*, Michigan, Lake Michigan.
- 549. *Muskegon*, Michigan, Lake Michigan.
- 556. *Saint Joseph*, Michigan, Lake Michigan.
- 567. *Milwaukee*, Wisconsin, Lake Michigan.
- 568. *Milwaukee pier-light*, Wisconsin, Lake Michigan.
- 569. *Port Washington*, Wisconsin, Lake Michigan.
- 570. *Sheboygan*, Wisconsin, Lake Michigan.
- 575. *Port du Mort*, Wisconsin, Lake Michigan.
- 576. *Pottawatomie*, Wisconsin, Lake Michigan.
- 577. *Point Peninsula*, Michigan, Green Bay.
- 580. *Chambers Island*, Wisconsin, Green Bay.
- 582. *Tail Point*, Wisconsin, Green Bay.
- 585. *White Fish Point*, Wisconsin, Green Bay.
- 587. *Grand Island Harbor*, Wisconsin, Green Bay.
- 588. *Grand Island Harbor range*, (front light,) Wisconsin, Green Bay.
- 589. *Grand Island Harbor range*, (rear light,) Wisconsin, Green Bay.
- 592. *Huron Island*, Michigan, Lake Superior.
- 594. *Portage range*, (front light,) Michigan, Lake Superior.
- 595. *Portage range*, (rear light,) Michigan, Lake Superior.
- 596. *Manitou*, Michigan, Lake Superior.
- 597. *Gull Rock*, Michigan, Lake Superior.
- 598. *Copper Harbor*, Michigan, Lake Superior.
- 599. *Copper Harbor range*, (front light,) Michigan, Lake Superior.
- 600. *Copper Harbor range*, (rear light,) Michigan, Lake Superior.
- 605. *La Pointe*, Wisconsin, Lake Superior.
- 607. *Minnesota Point*, Wisconsin, Lake Superior.

The following are the names of the light-stations in the eleventh district, not mentioned elsewhere :

- 517. *Windmill Point*, River Detroit, entrance to Lake Saint Clair, Michigan.
- 525. *Charity Island*, mouth of Saginaw Bay, Michigan.
- 527. *Sturgeon Point*, Lake Huron, Michigan.
- 529, 530. *Presque Isle Harbor*, Lake Huron, Michigan.
- 531. *Presque Isle range-light*, Lake Huron, Michigan.
- 533. *Bois Blanc*, Bois Blanc Island, entrance to Straits of Mackinac, Lake Huron.
- 535. *McGulpin's Point*, Straits of Mackinac, Michigan.
- 537. *Waugoshance*, entrance to Straits of Mackinac, Lake Michigan.

539. *Beaver Island*, south end, Lake Michigan.
 540. *Beaver Island*, north end, Lake Michigan.
 541. *South Fox Island*, Lake Michigan.
 542. *Grand Traverse*, entrance to Grand Traverse Bay, Michigan.
 543. *Mission Point*, Grand Traverse Bay, Michigan.
 545. *Point Betsey*, (Aux Becs Scies,) Lake Michigan, Michigan.
 547. *Grand Point au Sable*, Lake Michigan, Michigan.
 551. *Grand Haven*, Lake Michigan, mouth of Grand River, Michigan.
 554. *Kalamazoo*, Lake Michigan, mouth of Kalamazoo River, Michigan.
 558. *Michigan City*, Lake Michigan, Indiana.
 560. *Chicago*, Lake Michigan, Illinois.
 563. *Waukegan*, Lake Michigan, Illinois.
 564. *Kenosha*, Lake Michigan, Wisconsin.
 566. *Racine*, Lake Michigan, Wisconsin.
 571. *Manitowoc*, Lake Michigan, Wisconsin.
 572, 573. *Bailey's Harbor*, Lake Michigan, Wisconsin.
 574. *Canu Island*, Lake Michigan, Wisconsin.
 578. *Escanaba*, Green Bay, Wisconsin.
 579. *Eagle Bluff*, Green Bay, Wisconsin.
 581. *Green Island*, Green Bay, Wisconsin.
 583. *Round Island*, White Fish Bay, Lake Superior, Michigan.
 584. *Point Iroquois*, White Fish Bay, Lake Superior, Michigan.
 586. *Grand Island*, Lake Superior, Michigan.
 590. *Marquette*, Lake Superior, Michigan.
 591. *Granite Island*, Lake Superior, Michigan.
 593. *Portage River*, Keewenaw Bay, Lake Superior, Michigan.
 602. *Eagle River*, Lake Superior, Michigan.
 603. *Ontonagon*, Lake Superior, Michigan.
 604. *Michigan Island*, Lake Superior, Wisconsin.
 606. *Raspberry Island*, Lake Superior, Wisconsin.

LIGHT-SHIPS.

There are no light-ships in this district.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

- White Fish Point, Lake Superior*.—A steam fog-whistle.
Port du Mort, (Pilot Island,) Lake Michigan.—An air-trumpet.
Grand Haven, Lake Michigan.—A fog-bell, rung by hot-air engine.
Detour, Lake Huron.—A steam fog-whistle.
Spectacle Reef, Lake Huron.—A steam fog-whistle.
Thunder Bay Island, Lake Huron.—A steam fog-whistle.
Fort Gratiot, Lake Huron.—A steam fog-whistle.

DEPOT.

The fire-proof store-house of the light-house depot at Detroit was carried up two stories above the basement, and then covered with a temporary roof during last season. A line of sheet-piling was driven along the western line of the lot between the basin and the adjoining glue-factory. By act of Congress approved June 10, 1872, the sum of \$25,000 was appropriated for this work, and will, it is thought, be sufficient to complete it.

The first work undertaken under this appropriation will be the erec-

tion of a suitable dwelling for the store-keeper and a close board fence along the top of the sheet-piling referred to. As soon as practicable it is also proposed to finish the store-house. This depot is already of great value, and its advantages will increase from year to year.

SURVEYS OF LIGHT-HOUSE SITES.

These surveys have been carried on as rapidly as possible. Those completed are Windmill Point and River Clinton, Lake Saint Clair; Fort Gratiot and Point aux Barques, on Lake Huron; Saginaw Bay and Tawas, on Saginaw Bay; Grand Haven, South Haven, Grosse Point, Beaver Island, and Beaver Island Harbor, on Lake Michigan; and Eagle River, on Lake Superior. The work will be continued in accordance with the plans of the board.

TENDERS.

The steam-barge Warrington has been almost exclusively used as a tender upon the work at Spectacle Reef. Last fall she was supplied with a new boiler and heater, both of the very best class, and her machinery for handling freight put into the best possible condition, and she has contributed greatly to the success of the work on Spectacle Reef.

The schooner Belle was used as quarters for the workmen on Spectacle Reef until the completion of the barracks on the pier of protection, when she was withdrawn from that duty and used for the general purposes of the work. During the latter part of the winter repairs of considerable extent were put upon her, which will enable her to perform good service for at least four years. Since the opening of this season she has been used principally in carrying coal and other heavy supplies to Spectacle Reef and the several steam fog-signals.

TWELFTH DISTRICT.

This district embraces all aids to navigation on the Pacific coast of the United States between the Mexican frontier and the southern boundary of Oregon, and includes the coast of California.

Inspector.—Commodore Alfred Taylor, United States Navy, until February 27, 1872; Commander Charles J. McDougal, United States Navy, present inspector.

Engineer.—Lieutenant-Colonel Robert S. Williamson, Corps of Engineers, United States Army, until May 1, 1872; Major N. Michler, Corps of Engineers, brevet brigadier-general, United States Army, present engineer.

There are in this district :

Light-houses	16
Light-ships	none.
Fog-signals, operated by steam or hot-air engines	6
Day or unlighted beacons	1
Buoys actually in position	35
Spare buoys for relief and to supply losses	26
Tenders Fern (ordered to the East to serve as supply-vessel for Atlantic and Gulf coast) and Shubrick, (common to twelfth and thirteenth districts,) used for inspector's and engineer's purposes	2

The following numbers, which precede the names of stations, correspond to those of the "Light-House List of the Atlantic, Gulf, and Pacific Coasts of the United States," issued January 1, 1872.

— *Point Fermin, entrance to San Pedro Harbor, California.*—An appropriation of \$20,000 was made June 10, 1872, for establishment of a light and fog-signal at this point. The site has been selected and a survey of the locality made. As there are several proprietors to the land, resort must be had to the California law of condemnation, in order to acquire title to the site, so that the construction will very probably be delayed beyond the fiscal year. A report, accompanied by a map of the site, has already been forwarded to the board. The structure can be rapidly built, as the material can be hauled over a very good road from New San Pedro, a distance of about five miles. The landing is safe and the anchorage-ground secure and well protected. A large well has been sunk near the settlement. It can furnish water during the construction, and, if necessary, can be purchased for the subsequent use of the keepers and for supplying the fog-signal.

— *Point Hueneme, Santa Barbara Channel, California.*—An appropriation of \$10,000, approved June 10, 1872, has been made for the establishment of a first-class fog-signal at this point. By direction of the board the site was selected in the month of June and surveys were made of the locality. Negotiations are in progress for its purchase.

405. *Point Conception, sea-coast of California.*—An appropriation was made March 3, 1871, for the establishment of a first-class steam fog-signal. A thorough examination and survey of the point were made with a view to ascertain the best location for the signal, and the supply of water. The structure has been completed, and the machinery placed in position. Owing to ignorance on the part of the light-house keeper, the latter soon needed repairs. The pipes connecting the hydraulic ram with the cistern were not laid according to directions from the district engineer, and will have to be relaid. The cistern and water-shed, said to have been damaged by the recent earthquakes, will require an additional coat of cement. An abundant supply of water from an adjoining spring furnishes all that is required for the light-house and fog-signal. Many minor repairs to the light-house are needed.

— *Piedras Blancas, sea-coast of California.*— This point is about midway between Point Conception and Point Pinos light-houses, distant one hundred and fifty miles from each. An appropriation of \$75,000 was approved June 10, 1872, for a first-order light and fog-signal at this point. By direction of the Board, an examination of the locality was made, a site selected for the light, and necessary surveys made to connect it with previous ones, by the county surveyor, for the purpose of defining the limits of the reservation set aside by direction of the President for light-house purposes. A report, accompanied by a sketch of the locality, has been submitted for the information of the board. The site belongs to the United States, and as soon as certain details in regard to it can be obtained, the plans will be made and the work commenced.

406. *Point Pinos, sea-coast of California, entrance to Monterey Bay.*—The suit for condemnation of land for right of way to this light-house has not yet been decided, the owners having appealed the case from the district court to the supreme court of California.

408. *Año Nuevo Island, sea-coast of California.*—A steam fog-whistle and keeper's dwelling have been constructed on this island, and it has been in operation since the 29th of May of this year.

409. *Pigeon Point, sea-coast of California.*—An appropriation was approved March 3, 1871, for continuing and completing the light-house and fog-signal at this point. The work was commenced June 9, 1871, and the tower and keeper's dwelling are already completed. The para-

pet, lantern, and lens are still to be placed in position. It is expected to have the light in full operation by the end of August of this year. A steam fog-whistle has been erected on this point, and has been in operation since September 10, 1871.

— *Pillar Point, sea-coast of California.*—Two and a half nautical miles north of this point a light-house and steam-fog signal are required, and an appropriation of \$50,000 is recommended for their establishment. This point is approximately midway between Pigeon Point and Point Bonita, and within a few miles of Point San Pedro, from which extends a dangerous reef of rocks.

411. *Point Bonita, entrance to San Francisco Harbor, California.*—An appropriation for the establishment of a first-class steam fog-signal at this point was made March 3, 1871. The structure was completed, the machinery placed in position, and the signal, a syren, was put in operation May 29, 1872.

— *Point San Pablo, between San Francisco and San Pablo Bays, California.*—An appropriation of \$20,000, approved March 3, 1871, was made for a light-house and steam fog-signal on this point. On the 13th of July, 1871, a special proceeding was instituted in the district court of the fifteenth judicial district of the State of California to obtain condemnation of the necessary land for light-house purposes on this point. An award of \$4,000 was given by the jury to the owners of the land, from which they appealed, and the case comes before the court for final hearing in October next.

— *Entrance to the Straits of Karquines, California.*—An appropriation of \$20,000, approved June 10, 1872, was made for the erection of a light-house and fog-signal to mark the entrance to the Straits of Karquines. A site on the southern shore, opposite Mare Island, having been recommended by the local officers and others, surveys were made there, but none suitable was found, and the engineer of the district has been ordered to locate the light on the southern end of Mare Island.

414. *Point Reyes, sea-coast of California.*—An appropriation of \$10,000 was made by Congress, approved June 10, 1872, for rebuilding and re-establishing the steam fog-signal station at this point, which was destroyed by fire April 28, 1872, and the district engineer has received orders from the board for its reconstruction.

415. *Point Arena, sea-coast of California.*—Since the last annual report a steam fog-whistle has been constructed, and was put in operation November 25, 1871.

416. *Cape Mendocino, sea-coast of California.*—During the month of November, 1871, the keeper's dwelling and cistern, referred to in the last annual report, were completed.

418. *Trinidad Head, sea-coast of California.*—On the night of December 1, 1871, a fourth-order light of the system of Fresnel was exhibited for the first time from the tower built on the southern slope of Trinidad Head. The structures built consist of a pyramidal tower on a square base, 18 feet high from the ground-line to focal plane; a dwelling for the keeper, and a cistern.

REPAIRS.

At each of the following-named stations in the twelfth district there have been repairs, more or less extensive, during the last year:

406. *Point Pinos, sea-coast of California, south side of entrance to Monterey Harbor.*

412. *Fort Point, entrance to San Francisco Harbor, California.*

415. *Point Arena*, sea-coast of California.
 417. *Humboldt*, entrance to Humboldt Bay, California.

The following are the names of light-stations in the twelfth district not mentioned elsewhere:

403. *Point Loma*, sea-coast of California, entrance to San Diego Bay.
 404. *Santa Barbara*, sea-coast of California.
 407. *Santa Cruz*, entrance to Santa Cruz Harbor.

LIGHT-SHIPS.

There are no light-ships in this district.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

- Point Conception*.—A 12-inch steam-whistle.
Año Nuevo Island.—A 12-inch steam-whistle.
Pigeon Point.—A 12-inch steam-whistle.
Point Bonita.—A first-order steam-syren.
Point Reyes.—A 12-inch steam-whistle.
Point Arena.—A 12-inch steam-whistle.

DAY OR UNLIGHTED BEACONS.

Fauntleroy Rock, Crescent City Harbor, California.—An appropriation for erecting a day-beacon on this rock was made March 3, 1871. It is now in course of construction under contract, and is expected to be completed at an early day.

BELL-BOAT OFF HUMBOLDT BAR, CALIFORNIA.

A bell-boat has been moored off this dangerous bar, in 16 fathoms of water, to aid in crossing it in foggy weather.

DEPOTS.

San Diego, California.

Yerba Buena Island, Harbor of San Francisco, California.—A selection of a site for a buoy depot, to serve instead of the present inconvenient depot at Mare Island, has been made on the eastern side of the island of Yerba Buena. A sketch showing the site selected, the depth of water, and proposed plan of building, is being prepared, and will be forwarded to the board at an early day.

Eureka, Humboldt Bay, California.—This depot is on rented ground, and it is proposed to remove it to the Humboldt light-house, and place it under charge of the keeper.

THIRTEENTH DISTRICT.

This district embraces all aids to navigation on the Pacific coast of the United States north of the southern boundary of Oregon. It extends from the forty-first parallel of latitude to British Columbia, and includes the coasts of Oregon and the Territory of Washington.

Inspector.—Commodore Alfred Taylor, United States Navy, until Feb-

ruary 27, 1872; Commander Charles J. McDougal, United States Navy, present inspector.

Engineers.—H. M. Robert, major of engineers, United States Army.

There are in this district:

Light-houses and lighted beacons.....	11
Light-ships	0
Fog-signals, operated by steam or hot-air engines	1
Unlighted or day beacons	0
Buoys actually in position	46
Spare buoys for relief and to supply losses	26
Tender (steam) Shubrick, common to the twelfth and thirteenth districts.....	1

The following numbers which precede the names of stations correspond with those of the "Light-House List of the Atlantic, Gulf, and Pacific Coasts of the United States," issued January 1, 1872:

422. *Yaquina Bay, Oregon.*—The light-house at this point was commenced May 1, 1871. It was completed the following October, and lighted November 3, 1871.

— *Cape Foulweather, sea-coast of Oregon.*—Work has been seriously hindered by the difficulties connected with the transportation of materials. Since the commencement of work in the autumn of 1871 the lighters have been destroyed twice, and the schooner engaged in bringing materials from San Francisco has been obliged to discharge most of her freight at Newport, to be reshipped in milder weather, besides twice getting on the bar at the mouth of Yaquina Bay, and being once partially wrecked. Part of the materials have been hauled from Newport, six miles over an almost impassable road to the light-house site. The metal-work was completed at Portland, Oregon, June 1, 1872. After the failure of persistent efforts to charter a vessel for carrying iron and brick from Portland to the cape, the metal-work was shipped via San Francisco. About one-half the time since the work began has been lost on account of the difficulties of transportation. The foundation of the tower has been laid, and work commenced on the keeper's dwelling, a double frame house. Both will probably be completed this season.

— *Sand Island, mouth of river Columbia.*—The daily growing home and foreign commerce of the Columbia and Willamette Valleys demands that additional aids to navigation be judiciously disposed about this important outlet to the commerce of the Northwest. The chief difficulty in navigating the Columbia is the prevalence of fogs, and the fog-bell at Cape Disappointment cannot be heard in the south channel, through which the major part of the commerce of the Columbia is carried on.

A small light, to serve as a beacon leading into the south channel, and a powerful steam fog-signal, should be erected on Sand Island. As this island is shifting, a small dwelling, (surmounted by the light,) which can be moved from time to time, is designed for this place. The drift-wood on the island will furnish an inexhaustible supply of fuel for the fog-signal, and it, like the light-house, will be so erected that it can be moved from time to time as the position of the island is changed by the currents. An appropriation of \$30,000 is recommended.

423. *Cape Disappointment, mouth of river Columbia, Territory of Washington.*—There was commenced in August and completed in December, 1871, a new double frame dwelling for the keepers. The old fog-bell frame having been shattered by a blast from a gun of a neighboring battery, in July, a new fog-bell house was built in August, 1871. A new oil-house is needed at this station, and will be built during the present fiscal year.

425. *Cape Flattery, Tatoosh Island, entrance to the Straits of Fuca, Terri-*

tory of Washington.—A first-class steam fog-whistle, with large fuel-house, a cistern holding 33,000 gallons, and a water-shed of 3,000 square feet, were completed June 6, 1872. The machinery and materials for this work were ready for shipment from Portland six weeks before transportation could be secured to any point in the Straits of Fuca or Puget Sound, and as, in the end, delivery at Tatoosh Island could not be obtained, they were shipped to Port Townsend, Territory of Washington. Although efforts were made to secure transportation in Puget Sound, the only vessel that could be had was one with mail and other contracts which could not be interfered with. One cargo was delivered safely on the island early in October, 1871, but the time consumed by the steamer in other work made the second trip so late that only part of the cargo could with great risk be discharged at Tatoosh Island, and the balance was landed at Neah Bay, on the main-land, November 1. This necessitated suspension of work on the island, then well under way, until the next season. In order, if possible, to complete the cistern in time to make sure of a sufficient supply of water for the summer of 1872, work was carried on at intervals during February, March, and April, but great difficulties were experienced in carrying freight by Indian canoes from Neah Bay. A party was sent May 1 from Portland which completed the work June 6. As no supply of water can be had until the next rainy season, the fog-whistle cannot be operated before that time, (about November.) Much as this delay of twelve months is to be regretted, it could not have been avoided, in the dearth of vessels in the North Pacific and Straits of Fuca.

— *New Dungenness, Straits of Fuca, Territory of Washington.*—This station is exposed to heavy surfs, and the fact that in the North Pacific and Straits of Fuca fogs prevail to a considerable extent during storms, makes the fog-bell now at this station almost if not quite useless. An appropriation of \$8,000 is required for a steam fog-whistle to replace the fog-bell at this point.

— *Point No Point, Puget Sound, Territory of Washington.*—This point is about twenty miles from Port Townsend on the route to Seattle, Territory of Washington. The rapidly increasing importance of the commerce of Puget Sound, which will be still more augmented by the Northern Pacific Railroad, requires the construction of such aids to navigation as will more effectually open these waters to foreign as well as to home trade. An appropriation of \$25,000 is required for a light-house.

— *West Point, Puget Sound, Territory of Washington.*—This point marks the entrance to Dwamish Bay, the harbor of Seattle. The reasons given for the preceding apply with equal force to this case and also the following, (Point Defiance.) An appropriation of \$25,000 is required for a light.

— *Point Defiance, entrance to the Narrows, Puget Sound, Territory of Washington, nine miles north of Steilacoom.*—This is a most difficult point to avoid in fogs and cloudy nights. A light at this important point would greatly aid in navigating the upper sound, for which an appropriation of \$25,000 is required.

REPAIRS.

Repairs have been made at the following stations in the thirteenth district during the year:

423. *Cape Disappointment, Territory of Washington.*

Repairs and renovations are needed at each of the following-named stations during the next year :

- 422. *Yaquina Bay*, Oregon.
- 423. *Cape Disappointment*, mouth of river Columbia, Washington Territory.
- 425. *Cape Flattery*, entrance Straits of Fuca, Territory of Washington.
- 426. *Ediz Hook*, Straits of Fuca, Territory of Washington.
- 427. *New Dungeness*, Straits of Fuca, Territory of Washington.
- 429. *Admiralty Head*, Admiralty Inlet, Territory of Washington.

The following are the names of light-stations in the thirteenth district not mentioned elsewhere :

- 420. *Cape Blanco*, sea-coast of Oregon.
- 421. *Cape Arago*, sea-coast of Oregon.
- 424. *Shoalwater Bay*, Territory of Washington.
- 428. *Smith's (or Blunt's) Island*, Washington Sound.

LIGHT-SHIPS.

There are no light-ships in this district.

FOG-SIGNALS OPERATED BY STEAM OR HOT-AIR ENGINES.

Cape Flattery.—A 12-inch steam-whistle.

DEPOT.

The depot for the buoys of the thirteenth district is now at Astoria, at the mouth of the river Columbia, but it is proposed to remove it to Cape Disappointment, and place it under charge of the light-house keeper.

Respectfully submitted.

JOSEPH HENRY,
Chairman.

CHAS. S. BOGGS,
Rear-Admiral, U. S. N., Naval Secretary.

GEORGE H. ELLIOT,
Major of Engineers, U. S. A., Engineer Secretary.

INDEX OF ALPHABETICALLY

[The following text is extremely faint and illegible, appearing to be an index or list of entries.]

INDEX TO SECRETARY'S REPORT.

I. REPORT OF THE SECRETARY OF THE TREASURY.

	Page.
Assistant Secretaries, increase of salary of, recommended.....	iii
Assistant treasurer's office, New York, investigation of the affairs of.....	xiii
Assistant treasurer, New York, passage of a law for relief of, recommended ..	xiii
Balance of trade	x, xi
Bonds purchased, average cost of, in gold.....	ix
Branch mint, examination of, at Carson City and San Francisco	xi
Carrying-trade.....	ix, x
Coast Survey, operations of	xiv
Currency, a degree of flexibility in the volume of, essential to proper manage- ment of Treasury Department	xx
Currency, the power to increase or diminish the volume of, in circulation, within limits fixed by law, should be in the Treasury Department.....	xx
Currency, increase of, to move crops required	xx, xxi
Clerks and officers, commendation of, for ability and fidelity	iii
Expenditures for fiscal year ended June 30, 1872	iv
Expenditures for the first quarter of the year ending June 30, 1873	vi
Estimated expenditures for three quarters ending June 30, 1873.....	vii
Estimated receipts for three quarters ending June 30, 1873.....	vii
Estimated receipts for fiscal year ending June 30, 1874	vii
Estimated expenditures for fiscal year ending June 30, 1874.....	viii
Exports.....	xi
Five-per-cent. bonds negotiated.....	iii
Five-twenty bonds redeemed	iii
Financial policy.....	xvii-xxi
Fractional currency, fresh issues of, through Post-Office Department practica- ble	xii
Interest account, reduction of.....	v
Imports.....	xi
Light-House Board.....	xiv
Life-saving stations	xv, xvi
Mint, at Philadelphia, examination of	xi
Mint bill, renews recommendations for passage of, with alterations suggested.	xii
Marine hospitals	xvi
National-bank notes, new issue of, recommended.....	xii
National banks, bonds held by	xix
National-bank circulation.....	xix, xx
Public debt, reduction of, during fiscal year ended June 30, 1872	v
Public debt, reduction of, from March 1, 1869, to November 1, 1872.....	v
Paper money, provision for redemption of	xii
Public buildings	xiii, xix
Receipts for fiscal year ended June 30, 1872	iv
Receipts for first quarter of the year ending June 30, 1873.....	vi
Recommends that registered bonds be made convertible into coupon bonds at the will of the holder.....	iii

	Page.
Recommends that the use of silver coin as currency be discontinued.....	xi
Recommends the passage of an act for the relief of the United States Treasurer from responsibility for the dishonesty of Marden and Johnson.....	xii
Recommends the passage of a bill to amend and consolidate the navigation and customs collection laws.....	xvii
Revenue marine.....	xiv, xv
Salaries, increase of, recommended for certain officers and clerks.....	iii
Sinking fund.....	ix
Silver, coinage of.....	xi, xii
Steamboat-inspection service.....	xvi, xvii
Specie payments, resumption of, to be brought about by natural causes....	xxii, xxiii
Taxation, estimated reduction of, since close of the war.....	ix
The tariff, effects of, upon the wages of labor and the prosperity of the country.....	xvii-xix
The national-banking system, contrasted with old State-bank systems.....	xix

Tables accompanying the report.

TABLE A.—Statement of the net receipts (by warrants) during the fiscal year ended June 30, 1872.....	3
TABLE B.—Statement of the net disbursements (by warrants) during the fiscal year ended June 30, 1872.....	4, 5
TABLE C.—Statement of the redemption and issue of loans and Treasury notes (by warrants) for the fiscal year ended June 30, 1872.....	6
TABLE D.—Statement of the net receipts (by warrants) for the quarter ended September 30, 1872.....	7
TABLE E.—Statement of the net disbursements (by warrants) for the quarter ended September 30, 1872.....	7
TABLE F.—Statement of outstanding principal of the public debt of the United States on the 1st of January of each year from 1791 to 1843, inclusive, and on the 1st of July of each year from 1844 to 1872, inclusive.....	8, 9
TABLE G.—Statement of the receipts of the United States from March 4, 1789, to June 30, 1872, by calendar years to 1843, and by fiscal years (ended June 30) from that time.....	10, 11, 12, 13
TABLE H.—Statement of the expenditures of the United States from March 4, 1789, to June 30, 1872, by calendar years to 1843, and by fiscal years (ended June 30) from that time.....	14, 15, 16, 17
TABLE I.—Statement of the differences between the several accounts showing the outstanding principal of the public debt, with an explanation thereof, so far as the examination of the accounts has progressed.....	18
TABLE K.—Statement showing the condition of the sinking-fund, from its institution in May, 1869, to and including June 30, 1872.....	19
TABLE L.—Statement showing the purchases of bonds on account of the sinking-fund during each fiscal year from its institution in May, 1869, to and including June 30, 1872.....	20, 21
TABLE M.—Statement showing the purchases of bonds in excess of the amount required for the sinking-fund during each fiscal year from the commencement of the purchases in May, 1869, to and including June 30, 1872.....	22
TABLE N.—Statement showing the purchases of bonds from May, 1869, to September 30, 1872.....	23, 24, 25, 26, 27, 28
TABLE O.—Statement of the outstanding principal of the public debt of the United States, June 30, 1872.....	29, 30, 31, 32, 33, 34, 35, 36, 37, 38
TABLE P.—Statement of 30-year 6 per cent. bonds (interest payable January and July) issued to the several Pacific Railway companies, under the acts of July 1, 1862, (12 Statutes, 492,) and July 2, 1864, (13 Statutes, 359).....	39, 40, 41, 42

	Page.
TABLE Q.—Statement showing the reduction of the principal and interest of the public debt of the United States, from March 1, 1869, to November 1, 1872.	43
TABLE R.—Returns, by award of the United States Court of Claims, of proceeds of property seized as captured or abandoned under the act of March 12, 1863, paid from July 1, 1871, to June 30, 1872.	44
TABLE S.—Awards of the United States Court of Claims of proceeds of property seized as captured or abandoned under act of March 12, 1863, decreed but not paid, during the fiscal year ended June 30, 1872.	45

II. REPORTS OF TREASURY OFFICERS.

COMMISSIONER OF INTERNAL REVENUE :

Amendment of section 54, act of July 20, 1868, as amended by act of June 6, 1872, recommended.	55
Amendment of section 59, act of July 20, 1868, as amended by act of April 10, 1869, recommended.	56
Amendment of sections 18 and 22, act of June 6, 1872, recommended.	56
Assessors and assistant assessors, offices of, abolition of, recommended, and reasons stated.	65
Assessors and assistant assessors, offices of, abolition of, approved by leading officers of the revenue.	66
Assessors, duties of, enumeration of, under acts now in force.	65
Banks and bankers, receipts from for fiscal years 1871 and 1872 compared.	62
Breweries, distribution of, among States and Territories.	55, 56
Cigar-boxes from which stamps have not been destroyed, device required to prevent re-use of.	60
Cigars, cigarettes, and cheroots, number of, returned for tax during the year.	57
Cigars, number of, returned for tax prior to June 30, 1872.	51
Collection-districts, immediate consolidation of, objections to.	64
Collection-districts, to what number to be reduced under act of June 6, 1872.	64
Die, steel, for cancellation of registered tobacco-stamps, furnished to all tobacco manufacturers.	60
Die, steel, for cancellation of registered tobacco-stamps, how constructed.	60
Die, steel, for cancellation of registered tobacco-stamps, satisfactory operation of.	60
Distilleries, distribution of, among States and Territories.	53, 54
Distilleries, number of, in operation at the beginning of each month during the last fiscal year.	54
Distilleries, number of, operated during the last fiscal year.	53
Distilleries, number of, registered during last fiscal year.	53
Drawback allowed, amount of, during fiscal years 1870, 1871, and 1872.	50
Drawback allowed, amount of, prior to June 30, 1872.	50
Exportation of manufactured tobacco, new system for, practicability of, not sufficiently tested.	59
Exportation of manufactured tobacco, two systems for, operating concurrently, not harmonious.	59
Export bonded warehouses, abolition of old system of, necessity for.	59, 60
Export bonded warehouses, instructions given for closing, at the time fixed by law.	59
Export bonded warehouses, no hardship imposed by closing in six months from passage of act of June 6, 1872.	59
Export bonded warehouses, present system of, advantages of.	60
Export bonded warehouses, when to be discontinued.	59
Fermented liquors, increase in receipts from, during the last three years over previous years.	55

	Page.
COMMISSIONER OF INTERNAL REVENUE—Continued.	
Fermented liquors, receipts from, at one dollar per barrel, from 1867 to 1872	55
Gas, receipts from, for fiscal years 1871 and 1872, compared	62
Income, receipts from, for fiscal years 1871 and 1872, compared	62
Legislation as to pay of store-keepers, in certain cases, recommended	55
Persons assessed for income, number of, from 1867 to 1872	52
Receipts, aggregate, decrease in, for 1871 and 1872, to what due	50
Receipts, aggregate, estimate of, for fiscal year 1873	64
Receipts, aggregate, for fiscal year 1872, how much in excess of estimate	64
Receipts, aggregate, statement of, for fiscal years 1870, 1871, and 1872	49
Receipts first quarter of fiscal year 1873, at what rate per annum	64
Receipts from all sources, first 3 months of fiscal years 1872 and 1873, compared	63, 64
Refunding amount of, during fiscal years 1870, 1871, and 1872	50
Refunding amount of, prior to June 30, 1872	50
Spirits, amount of revenue from, for fiscal years 1871 and 1872	53
Spirits bonded and withdrawn from bond, quantity of, during year	54
Spirits in bond, quantity of, July 1, 1871 and 1872	54
Spirits, number of proof-gallons of, on market May 1, 1872	55
Spirits, total production of, in taxable gallons, during the year	53
Stamps, adhesive, receipts from, for fiscal years 1871 and 1872, compared	62
Statistics relating to seizures, compromises, criminal actions, civil actions <i>in personam</i> , actions <i>in rem</i> , &c.	61, 62
Tables, titles of, for fiscal year 1872, and years previous	49
Taxes, aggregate amount of, from specific and general sources, prior to June 30, 1872	50-52
Tobacco, annual receipts from, under uniform rate of tax, estimate of	58
Tobacco, exportation of, no grounds for distrusting practicability of provisions of act of June 6, 1872, relating to	59
Tobacco, manufactured, exportation of, two modes of	59
Tobacco, manufactured, number of pounds of, returned prior to June 30, 1872	51
Tobacco, quantity of, in bonded warehouses July 1, 1871 and 1872	58
Tobacco, quantity of, stored in export bonded warehouses during year	58
Tobacco, quantity of, withdrawn from export bonded warehouses for exportation and consumption	58
Tobacco, receipts from, for first quarter of current fiscal year greater than for corresponding quarter of any previous year, to what owing	58
Tobacco, receipts from, for fiscal years 1871 and 1872, compared	56, 57
Tobacco, reasons for no immediate legislation in relation to	60
Tobacco taxed last year, different grades of, cause of change in relative proportions of, as compared with year previous	57, 58
Tobacco, tax on, uniform rate of, law imposing, operating satisfactorily	58
Tobacco, total production of, during year	57
Tobacco, total production of, for fiscal years 1871 and 1872, compared	57
COMPTROLLER OF THE CURRENCY.
