REPORT  
OF  
THE SECRETARY OF THE TREASURY,  
ON THE FINANCES.

DECEMBER 17, 1833.

Read, and ordered to be printed, and that 1,500 additional copies be printed.

TREASURY DEPARTMENT, 17th December, 1833.

SIR: I have the honor to transmit a report prepared in obedience to the "Act supplementary to the act to establish the Treasury Department."

I have the honor to be,

With great respect,

Your obedient servant,

R. B. TANEY,  
*Secretary of the Treasury.*

HONORABLE MARTIN VAN BUREN,  
*Vice President of the United States,  
and President of the Senate.*

REPORT ON THE FINANCES.

In obedience to the directions of the "Act supplementary to the act to establish the Treasury Department," the Secretary of the Treasury respectfully submits the following report:

1. OF THE PUBLIC REVENUE AND EXPENDITURES.

The receipts into the Treasury from all sources during the year 1831, were - - - - - \$28,526,820 82

The expenditures for the same year, including payments on account of the public debt, were - - - - - \$30,038,446 12

The balance in the Treasury on the 1st of January, 1832, was - - - - - \$4,502,914 45

The receipts from all sources during the year 1832, were, 31,865,561 16

VIZ.

Customs - - - - -	\$28,465,237 24
Lands, (statement D,) - - - - -	2,623,531 03
Dividends on bank stock (E,) - - - - -	490,000 00
Sales of stock in the Bank of the United States (E,) - - - - -	169,000 00

Incidental receipts, (E)	-	-	\$ 117,942 89
Making, with the balance, an aggregate of	-	-	\$36,368,475 61
The expenditures of the same year, were (F)	-	-	34,356,698 06

VIZ.

Civil list, foreign intercourse, and miscellaneous	-	-	\$4,577,141 45
Military service, including fortifications, ordnance, Indian affairs, pensions, arming the militia, and internal improvements	-	-	7,982,877 03
Naval service, including the gradual improvements of the navy,	-	-	3,956,370 29
Public debt	-	-	17,840,309 29

Leaving a balance in the Treasury on the 1st of Jan., 1833, of	\$2,011,777 55
The receipts into the Treasury, during the first three quarters of the present year, are estimated at	\$24,355,317 95

VIZ.

Customs	-	\$21,256,089 77
Lands, (G,)	-	2,219,957 35
Dividends on bank stocks, (H,)	-	474,985 00
Sales of stock in the Bank of the United States, (H,)	-	91,000 00
Third instalment under the convention with Denmark (H)	221,315 17	
Incidental receipts, (H,)	-	91,970 66

The receipts for the fourth quarter are estimated at	-	-	\$7,675,000 00
--	---	---	----------------

Making the total estimated receipts of the year	-	-	\$32,030,317 95
---	---	---	-----------------

And with the balance of the 1st on January, 1833, forming an aggregate of	-	-	\$34,042,095 50
The expenditures for the first three quarters of the present year, are estimated at (I,)	-	-	\$18,248,388 15

VIZ.

Civil list, foreign intercourse, and miscellaneous, including	\$667,160 87,
duties refunded under the 3d section of the act of	

2d March, 1833, and, \$661,160 95 awards under the convention with Denmark -	\$4,951,462 84
Military service, in- cluding fortifica- tions, ordnance, In- dian affairs, pen- sions, arming the militia, and inter- nal improvements	\$9,950,349 29
Naval service, in- cluding the gradu- al improvement of the navy -	3,076,051 39
Public debt -	270,524 63

The expenditures for the fourth quar-  
ter, including \$2,301,716 36 on ac-  
count of the public debt, are esti-  
mated, on data furnished by the res-  
pective departments, at - - \$6,409,916 45

Making the total estimated expenditures of the year - \$24,658,304 60

And leaving in the Treasury on the 1st of January, 1834,  
an estimated balance of - - - \$9,383,790 90

This balance, however, includes the funds estimated at \$1,400,000 hereto-  
fore reported by this department as not effective.

The appropriations remaining unsatisfied at the close of the year are es-  
timated at \$5,964,571 23; but of this amount, it is estimated by the proper  
departments,

1. That the sum of \$5,190,287 62 only will be required for the objects  
for which they were appropriated;
2. That the sum of \$449,424 04 will not be required, and may there-  
fore be considered as an excess of appropriation, and is proposed to  
be applied, without being re-appropriated, in aid of the service of the  
year 1834, as will more fully appear when the estimates of the ap-  
propriations for that year are presented;
3. That the sum of \$324,859 57 will be carried to the surplus fund,  
either because these moneys will not be required for, or can no lon-  
ger be applied to them.

## II. OF THE PUBLIC DEBT.

Notice has been given of the intended reimbursement of the residue of  
the exchanged 4½ per cent. stock on the 1st of May, 1834. This stock  
was subject to redemption, at the pleasure of the United States, at any time  
after the 31st of December, 1833, upon six months' public notice of such  
intended reimbursement. The time at which the notice was given does not  
enable the United States to insist on reimbursing it, so as to stop the inter-  
est before the 1st of May, 1834; a small portion of it was, however, purchased

for the United States, in the months of September and October, by an agent employed for that purpose; and, on the same day that notice was given of the intended reimbursement on the 1st of May next, an offer was made to the holders, by public advertisement, to pay them the whole amount of the principal, with interest to the day of payment, upon their making the proper transfers of the certificates. Many of the holders have already accepted this offer, and portions of it continue, almost daily, to be presented for payment. It is believed that the greater part, if not the whole of this stock, will be redeemed by the end of the present year. Under these circumstances, it seemed proper to charge the whole amount to the expenditures of the present year rather than to the next. The account is accordingly stated on this principle, and the interest calculated to the first of January; and if a part of it should not come in by that time, it will make no material difference in the result; because the interest saved upon the stock paid before the end of the year will, it is expected, be equal, or nearly so, to the amount of interest which may afterwards accrue on the portion remaining unpaid; and if the whole of it should be reimbursed within the present year, the interest saved will increase the estimated balance in the Treasury in but a very small degree. In the following account, therefore, the whole of this stock is charged to the expenditure of 1833, and the interest on it calculated as if it would be reimbursed on the first of January, 1834.

The disbursements on account of the public debt, during the year 1833, will amount, as has already been shown, to	\$2,572,240 99
Of which there will have been applied to the payment of the principal	\$2,240,950 80
And to interest	331,290 19

The stocks which will have been redeemed by the application of this sum, during the year, are as follows:

The residue of the exchanged $4\frac{1}{2}$ per cent. stock issued under the act of the 26th May, 1824	\$2,227,363 98
A part of the 5 per cent. stock, issued under the act of the 3d of March, 1821	13,036 01
Also, certain portions of the old registered debt, which have been presented for payment, being part of the unfunded debt of the revolution	50 81
And Treasury notes	500 00
On the 1st of January next, it is estimated the public debt will be reduced to (K)	\$4,760,082 08

Viz.

1. The funded debt, consisting of the residue of the 5 per cent. stock issued under the act of 3d of March, 1821, and redeemable after 1st January, 1835
2. The unfunded debt, amounting to

\$4,722,260 29
37,821 79

Consisting of the registered debt, being claims registered prior to the year 1798 for services and supplies during the revolutionary war

\$27,476 70

Treasury notes issued during the late war - - -	\$6,025
And Mississippi stock - -	4,320 09

These three last sums, composing the unfunded debt, are payable on the presentation of the certificates.

3d. Of the estimates of the public revenue and expenditures for the year 1834.

According to the best judgment the department is able to form on the subject, the receipts into the Treasury from all sources during the year 1834, may be estimated at - - - - - \$18,500,000

Viz.

Customs - - - - -	15,000,000
Public lands - - - - -	3,000,000
Bank dividends, and miscellaneous receipts of all kinds - - - - -	500,000

To which add the balance estimated to be in the Treasury on the 1st January, 1834, after deducting the unavailable funds - - - - - 7,983,790 90

Making together the sum of - - - - - \$26,483,790 90

The expenditures for the year 1834, including the reimbursement of the whole of the public debt, are estimated at 23,501,994 85

Viz.

Civil, foreign intercourse, and miscellaneous	2,800,897 33
Military service, including fortifications, ordnance, Indian affairs, pensions, arm- ing the militia, and internal improvements	8,654,942 25
Revolutionary pensions under the act of 7th June, 1832, including arrearages from 4th March, 1831, in cases in which payment has not been made -	3,000,000
Naval service, including the gradual im- provement of the navy - - -	4,051,073 19
Public debt, principal \$4,760,082 08	
Interest - 235,000	4,995,082 08

Which will leave in the Treasury, on the 31st December, 1834, a balance estimated at - - - - - \$2,981,796 05

The value of the exports of the year ending on the 30th of September last, is estimated at \$90,663,403, of which \$70,642,030 were of domestic, and \$20,021,373 of foreign articles; showing an increase in the exports of domestic produce of \$7,504,560 over the exports of the same character for the year ending 30th of September, 1832, and a diminution in foreign articles of \$4,018,100. The value of the imports for the year ending on the 30th of September last, is estimated at \$109,000,000, being greater, by the sum of \$8,000,000, than the imports for the year ending the 30th of September, 1832. Of the imports for the year ending the 30th of September last, it is estimated that \$34,000,000 were in articles free from duty

It will be seen from the foregoing statement of the receipts of the present year, that they very much exceed the amount at which they were estimated in the last annual report. The excess has been derived chiefly from customs, which are estimated to produce more than \$28,000,000. The large receipts of this year have been principally occasioned by the operation of the act of July 14, 1832, which abolished the system of long credits on revenue bonds; and required the duties on woollen goods to be paid in cash, and in other articles, in three and six months. The new regulation took effect on the 4th of March last, and the cash duties, and shortened credits, have brought into the Treasury, during the present year, a large amount of revenue, which, under the former system of credits, would not have been payable until 1834, and would have formed a part of the receipts of that year. The income of 1833 has, therefore, had the advantage of the new system, as well as the former one, and the receipts are much greater than they would have been under either of them, according to the established rate of duties.

The expenditures for the present year have also been unusually large, and are estimated at \$22,086,063 61, exclusive of the expenditure on account of the public debt.

The appropriations for the year were heavy, and exceeded by \$3,000,000, the appropriations for 1832; and the balances of unexpended appropriations at the close of that year have been, for the most part, applied during the present one to the various objects authorized by law, and, therefore, enter into the account of its expenditures. Several items of appropriation, however, for the present year, cannot be considered as forming a part of the ordinary expenditure of the Government. Without enumerating all objects of this description, it may be sufficient to mention some, which have contributed materially to enhance the amount actually expended. The duties refunded at the Treasury under the law of the last session, and the awards under the convention with Denmark, are included in this account; and the expenses occasioned by the Indian aggressions in 1832, have been, for the most part, paid in this year. These three items amount to nearly two millions of dollars. But, when this sum is deducted from the whole annual expenditure, it shows that more than twenty millions of dollars have been expended during the present year for the various other objects authorized by law, exclusive of the amount set apart for the reimbursement of the 4½ per cent. stock. The pensions for life, granted under the acts of 1818 and 1832, to the officers and soldiers of the revolution, have increased considerably the annual expenditure. More than four millions of dollars have been already paid on that account during the present year. There is, indeed, no item in the list of appropriations which our citizens generally, more cheerfully contribute to pay than the one last mentioned; but, in the order of nature, it must be annually decreasing, and, in the estimates of the coming year, those payable under the act of June, 1832, are set down at \$3,000,000. The different sums abovementioned, therefore, show six millions of dollars paid for purposes which cannot be considered as entering into the ordinary and regular expenses of the Government, and form no rule by which its future annual expenditure ought to be estimated.

The receipts of 1834 must be very much below those of the present year. A large portion of the receipts from customs, as already stated, has been derived from the importations of previous years. But, from the change of the system of credits, only a small part of the duties accruing in this year will

go into the receipts of the next; and the diminished rate of duties, which takes effect on the 1st of January next, on some of the most productive articles, and the entire exemption of others, will contribute still more to reduce the receipts of the coming year as compared with the present.

In estimating the receipts from customs, for the year 1834, at fifteen millions of dollars, I have assumed that the imports of that year will nearly equal those of 1832. This estimate is higher than the average of the last five or six years; but it is believed to be a safe one; for, although the importations of each of the two last years were unusually large, yet the imports of the present one have gone still higher. And the general state of our commerce, and the situation of the country, justify the belief that there will be no serious diminution in the coming year. The condition of the mercantile classes does not indicate any excess of importation. Indeed the short credits and cash duties will be found to contribute greatly to prevent overtrading in that respect. Moreover, many articles in common use are admitted free from duty. This will produce an increased ability in the community to buy those which pay duty, and consequently a greater consumption. There appears, therefore, to be no reason to apprehend any serious diminution in the importations of 1834, and it will be safe to estimate its receipts by the standard abovementioned; yet any material excess beyond that estimate cannot, I think, be counted on. The produce of the public lands can hardly fall short of the sum at which it has been stated, and will perhaps exceed it.

In this view of the receipts of 1834, the income of the year will about equal the estimated expenditure; and, with the aid of the balance in the Treasury on the first of January next, it will be sufficient for all the wants of the Government, including the amount necessary to pay off the residue of the national debt. It must, however, be observed that, in addition to the appropriations now asked for, there will be an unexpended balance of former appropriations amounting to the sum of \$5,190,287 62, which will probably be required in the course of the ensuing year for the objects for which it has been appropriated; and if the entire amount of appropriations proposed in the estimates for 1834, were also to be required within the year, there would not be money enough in the Treasury to meet them after satisfying the balances above stated, and paying off the public debt. But the experience of former years shows that a portion of the appropriations may always be expected to remain unexpended at the end of the year; and the average of these unexpended balances, for the last four years, is about \$5,300,000. In estimating the balance in the Treasury at the close of 1834, I have therefore assumed that a portion of the estimates of expenditures herewith submitted will not be used during the year; and that balances of appropriations, equal to the amount at the close of the present year, will in like manner, remain in the Treasury at the end of the year 1834, and go into the expenses of the succeeding year: and it is not necessary to raise money for the public use, sooner than it will probably be needed. But the balance stated at the end of 1834 is not to be considered as a clear surplus. It will still be chargeable with the amount of appropriations estimated to remain unexpended at that time.

From this state of the finances, and of the proposed appropriations, it is evident that a reduction of the revenue cannot, at this time, be made without injury to the public service. Under the act of the last session, the receipt of 1835 will be less than those of 1834, as a farther reduction in the rate o

duties will take effect on the 1st of January, 1835; and if the appropriations should be kept up to the amount authorized for the present year, the charge upon the Treasury in 1835 would be more than it could probably meet. But the debt will then have been entirely paid, and, if a guarded rule of appropriation is at once commenced, there will be no difficulty in bringing down the expenditure, without injury to the public service.

If the revenue is not to be reduced more than the existing laws provide for, there seems to be no sufficient reason to open, at this time, the vexed question of the tariff. The manner in which duties are now apportioned on different articles would be liable to insuperable objections, if it were to be considered as a settled and permanent system. But the law is temporary on the face of it, and was intended as a compromise between conflicting interests; and unless the revenue to arise under it should hereafter be more productive than is anticipated, it will be necessary, in two years from this time, to impose duties on articles that are now free, in order to meet the current expenses of the Government. There would seem, therefore, to be no advantage in agitating the question at the present moment; yet some modifications of the existing laws will be necessary in order to carry into effect the intentions of the legislature, and to guard against attempts to evade its provisions, without, in any degree, affecting its principles.

It is, however, respectfully recommended that the appropriations for 1834 should be regulated by a proper regard to economy. Heretofore, the receipts to be expected could be ascertained with some degree of certainty, because they were principally derived from the imports of previous years, and the bonds taken for the duties on such imports showed the amount of receipts which might safely be counted on. But, under the new system of cash duties and short credits, each year must mainly depend for its income on its own imports; and, as commerce is always more or less liable to fluctuations, the public interest requires that there should be at all times in the Treasury a sufficient sum to provide for unforeseen contingencies, and to guard against disappointment in the estimated receipts. The calculation on the income of a succeeding year is necessarily more uncertain under the present system, than under the former one, of long credits; and if the anticipations of the receipts of 1834 and 1835 should be fully realized, there will not be more than ought to be provided on the estimated scale of expenditures. At the last session of Congress, the appropriations exceeded twenty-one millions five hundred thousand dollars; being nearly three millions five hundred thousand dollars above the estimates presented at the beginning of the session. A similar amount of expenditure, authorized at the present session, might render it necessary to provide additional revenue, earlier than is now contemplated.

It is understood to be conceded on all hands, that a tariff for protection merely, is to be finally abandoned, and that the revenue is to be reduced to the necessary wants of the Government. Various causes have contributed to enlarge the proposed expenditures for 1834, as will be seen by the particular estimates from the different departments. But it is believed that all the objects for which this Government was established can be effectually attained at much less annual expense hereafter; and the harmony, and mutual good feeling of this extensive country, will be best secured and perpetuated by rigidly confining the operations of the General Government to its appropriate sphere. If this is done, and its expenditures are regulated by a strict economy, the burdens it imposes will scarcely be felt by our citizens, while its blessings are inestimable.

As the public debt will soon be extinguished, it is proper that the books and papers which belong to the various loan offices should be transmitted to the seat of Government, and placed among the archives of the nation. It is believed that the outstanding debt can be purchased on favorable terms in the course of the ensuing year, and that it can be most conveniently purchased at the Treasury. It appears, therefore, desirable that provision should be made by law for immediately transmitting to this department all the books and papers relating to the national debt. The money can readily be remitted to the public creditor without charge to him or to the Government, and he can be paid at any place where he may wish to receive it.

The act of March 3, 1817, abolished the office of commissioner of loans, and transferred the duties to the Bank of the United States. The money necessary to pay the public creditors has, from time to time, been advanced to the bank by the Treasury, and it appears that large sums have remained for a considerable time in the bank without being applied to the purposes for which they were intended. The amount has been reduced within a few months past; but the statement from the Register's office, herewith presented, marked L, will show that \$773,111.98 cents still remained in their hands on the first of October last. A portion of this sum, as appears by the paper referred to, was advanced some years ago; and there is no reason why this money should continue in the hands of the bank, where it is useless to the Government as well as the creditor. The delay in the payment has probably, in some instances, been caused by the death of the party entitled, and the ignorance of his representatives as to his claim on the United States. The situation of these outstanding claims renders it still more necessary that the books and papers relating to the public debt should be forthwith transmitted to this department, where the proper inquiries could be made as to the cause of the delay, and measures taken to ascertain who is entitled to receive the money. As the amount is justly due from the United States to some one, and may belong to persons who are ignorant of their rights, justice seems to require that the Government should take measures to apprise them of their claims, and of the readiness of the United States to discharge them.

The destruction of the building occupied by the Treasury Department has occasioned the loss of some valuable papers. But it is believed that none have been destroyed, that can materially affect the public interest. It will become necessary to provide another building, and the loss already sustained in the documents and records of this office shows the propriety of erecting it upon a different plan from the former one, and of placing the archives of the Government in a situation less exposed to danger. The inconveniences which are felt from the present situation of the offices connected with this department, as well as the more exposed condition of the papers, induce me to invite the early attention of Congress to this subject.

The report from the Commissioner of the General Land Office is herewith presented, showing the condition of that branch of the public service, and containing suggestions for its improvement.

All which is respectfully submitted:

R. B. TANEY,  
*Secretary of the Treasury.*

TREASURY DEPARTMENT,

Register's Office, November 26, 1833.

T. L. SMITH, Register.

**REPORT**

OF THE

COMMISSIONER OF THE GENERAL LAND OFFICE,

*To the Secretary of the Treasury, with the accompanying documents.*

---

GENERAL LAND OFFICE,  
November 30, 1833.

SIR: I have the honor of submitting to your examination, and for the consideration of the Government, a report of the operations of this office during the last year; the present condition of the same, with its arrears of business; and the necessary action of Congress to enable it to discharge its various duties with more promptness, and with that justice which is due to the parties interested, and to the public service.

The annexed document, marked A, shows the periods to which the quarterly accounts of the receivers have been rendered to this office, as also the monthly abstracts of sales and receipts, and the admitted balances remaining in the hands of the receivers at the respective dates of their last returns. With few exceptions, the land officers have been very prompt in transmitting to this office their monthly and quarterly statements, as required by law and the regulations of the department.

The accompanying statement, marked B, exhibits for the year 1832, and the first three quarters of 1833, the amount of public lands sold in the respective States and Territories; the several amounts received in cash, in forfeited land stock, in military bounty land scrip; and the total amount of purchase money, with the amount paid into the Treasury. From which statement it will appear that the sales of the first three quarters of 1833 have exceeded those of the corresponding quarters of 1832, 532,838 acres; 655,080 dollars of purchase money; and of amount paid into the Treasury, the sum of 609,838 dollars. This excess can be accounted for in the increasing disposition for emigration which pervades the Atlantic States and many portions of Europe, and in the persevering industry and enterprise of our western and southwestern population. It is not improbable that the sales for the present year will amount to three millions of acres, and the money paid into the public Treasury exceed three millions of dollars. In many of the districts the largest sales frequently occur in the last quarter of the year.

I have caused to be prepared the tabular statement, marked C, which presents, at one view, the sales of the public lands, under the cash system, from its commencement on the first of July, 1820, to the end of the year 1832. It exhibits the quantity sold at the several land offices in each year, with the aggregate amount at each office during the whole of that period; as also the amount sold in each year in the several States and Territories, together with the total amount in each year, the total amount in each State and Territory, with the grand total. This statement also shows the progressive increase of

the ordinary sales, with the exception of the year 1832, which did not equal those of 1831 by 315,514 acres, in consequence, principally, of the general prevalence of the Asiatic cholera in many of those districts to which emigration tended, and from which it usually emanates, and the Indian war which pervaded the northern frontier of Illinois, and the western part of Michigan.

A schedule of forfeited land stock issued and received at the several land offices, under the provisions of the acts of Congress of May 23, 1828, March 31, 1830, and July 9, 1832, is herewith appended, marked D. It shows the amount issued and received at each office in each of the years 1828, 1829, 1830, 1831, 1832, and the first three quarters of 1833; the total amount issued and received in each year, the whole amount at each office during that period, with their respective grand totals. The small balance of less than 16,400 dollars, of the whole amount issued, remained to be received and accounted for at this office on the 30th of September last.

By the act of May 30, 1830, there were appropriated 260,000 acres of land, subject to private entry, in Ohio, Indiana, and Illinois, to satisfy the unlocated military bounty land warrants of the Virginia State line and navy; 50,000 acres of the Virginia continental line; and an unlimited quantity for the United States' military warrants for services rendered in the revolutionary war; and scrip was authorized to be issued in eighty acre tracts, in lieu of said warrants. The act of July 13, 1832, made an additional appropriation of 300,000 acres for the Virginia continental line, and the State line and navy; and by the act of March 2, 1833, the further quantity of 200,000 acres was appropriated for the Virginia warrants, to be located on *any* of public lands liable to sale at private entry; making a total for Virginia warrants of 810,000 acres. Of this quantity, scrip had been issued, or prepared to be issued by the Secretary of the Treasury, on the 15th of November instant, for 772,424 acres, leaving a balance of 37,576 acres, the warrants for which have been filed, and the scrip will be issued thereon so soon as the title papers thereof shall be completed. The schedule hereunto annexed, marked E, exhibits a summary statement of the number of warrants which have been satisfied, of each class or description; the quantity of land for which scrip has been issued; its amount in money at one dollar and twenty-five cents per acre; together with the total number of certificates of scrip issued. Virginia warrants have already been filed for about 10,000 acres exceeding the amount which can be satisfied with scrip out of the appropriations which have been made. I have no means of ascertaining the amount of outstanding Virginia warrants not yet filed in this office, and it will be for the decision of Congress whether further provisions shall be made to satisfy the same.

The annexed statement, marked F, shows the amount, in money, of the military land scrip received in payment for public lands at the several land offices, in the years 1830, 1831, 1832; and the first three quarters of 1833, with the total amount in each year, in each State, and at each office, with the grand total. It will appear from this statement that, of the whole amount of scrip issued (1,063,592 dollars,) there had been received at the land offices, and accounted for at this office, on the 30th of September last, the sum of 754,827 dollars; and that, of this sum, more than one half had been taken at the Zanesville office in Ohio, and at the office of Indianapolis, in Indiana. It is altogether, in my opinion, irreconcilable with the ordinary course of such business, and the usual current of public sales, that so large a portion should have been received at these two offices, without the connivance or

direct agency of the land officers and their clerks, or one or more of them at each office, by which scrip has been taken in cases where otherwise cash would have been received. Other offices have also received and transmitted an unexpected amount, in consequence of which measures have been taken to ascertain the facts and circumstances connected with these transactions, and explanations have been required of the officers. Before the close of the present session of Congress, the department will be able to show the causes and agencies which have contributed to throw this species of property so rapidly upon the Government.

The appropriation of seven thousand dollars made at the last session of Congress, for extra clerk hire for this office, has enabled me to progress with its current business to a very considerable extent, and to great advantage to those most interested, and to the Government. Out of that appropriation there have been opened twenty-two tract books, containing the entries of the tracts of 504 townships; the posting of about 17,000 entries of lands sold, besides the writing and recording of more than 13,000 patents, and the performance of a large amount of miscellaneous business, equally pressing and important. Yet, notwithstanding the benefits which have resulted from that appropriation, the force of the office, provided by law, has been inadequate to the discharge of its current duties, and leaving, at the close of the present year, a greater aggregate amount of arrears than existed on the first of January last.

On the passage of the act of March 2, 1833, providing for the appointment of a secretary to sign patents in the name of the President, there were written and recorded, and prepared for signature, more than twenty thousand patents for lands sold. In consequence of the provisions of that act, it became necessary to alter the date of execution of each patent, and the record thereof, and the endorsement of the certificate on which the same was founded. This service was an expense to the office of more than six hundred dollars, requiring, on all the documents, more than sixty thousand alterations or additions, and, in effect, abstracted that sum from the appropriation for the salaries of the permanent clerks. I would, therefore, for the purpose of reimbursing that amount to the office, respectfully recommend a special appropriation of six hundred dollars, to be expended in writing and recording four thousand patents, which would diminish that branch of arrears, without interfering with current duties.

The unfortunate destruction of the Treasury building, by fire, admonished me of the propriety and absolute necessity of adopting every precautionary measure to secure the safety of the title papers, records, and other important documents, which constitute the archives of this office. On a particular examination, with a view to that object, it was found that about two tons of the papers, embracing a large portion which belong to the credit system of the land sales, were deposited in the attic story of the building, immediately under the roof, in the utmost confusion, in bundles arranged neither in chronological order, nor in the order of consecutive numbers. On a representation of these facts to the then Secretary of the Treasury, and by his advice, I have adopted those means which would secure to the Government, and to the extensive regions of the Ohio and Mississippi, the safety and security of those documents which are connected with the land titles of more than three millions of white population. Portable cases for all papers and documents not of daily use, and fire bags for each room of the office, have been contracted for, and will be delivered in the course of two or three

weeks, while the assortment and arrangement of the title papers are in rapid progress, by persons especially employed in that service. The plan adopted, and which, when completed, as it will be in two or three months, will enable twenty able-bodied men, in case of fire, to remove from the office every paper, document, book and record of the same, to a place of security in *fifteen minutes*, without the derangement of either; so that, in case the roof and second story of the building should be in flames, every thing belonging to the land office, except its furniture, could be saved and removed by the ordinary assistance which is found in the case of fires. The whole expense of these necessary and precautionary measures will amount to about twenty-six hundred dollars, for which a special appropriation is respectfully requested.

One of the most serious causes which have produced the delays and embarrassments to the performance of the ordinary business of this office, is the want of the statutes, and the reports of the adjudicated decisions of the highest courts of justice in the several States. The daily necessity of a recurrence to such documents, and the difficulty of obtaining access to the same, has been the occasion of vexatious delays, in numerous instances, to the parties immediately interested, and to the prompt discharge of official duty. This can be remedied by a special appropriation for that purpose, of about twenty-five hundred dollars, which is respectfully and urgently recommended. It is frequently the case, that a resort to these statutes, and the reported decisions thereon, is absolutely necessary to a correct action on questions arising under the law of descent, the jurisdiction of probate matters, the settlement and distribution of intestate estates, the law of judgments and executions, and the lien created thereby, with the law of assurance or conveyances in relation to real estate. Access to these sources of information is often indispensable to the security of individual rights, and important to the pecuniary interests of the Government. In many of the States, some of the principles of the common law have been declared inapplicable to the peculiar circumstances of the people and the country, and inconsistent with the genius and provisions of our political institutions; and others have been substituted, by legislative adoption, compatible with constitutional rights, and the immunities of the citizen. Hundreds of questions are presented every year in the administration of the powers and duties of this office, involving the examination and application of legal principles, connected with the subjects above enumerated; and it is a matter of surprise to me, that more complaints have not been made against the decisions of the Commissioner in cases where he has been called upon to decide, without the requisite legal information to do so understandingly. In many instances, I have no doubt they have been submitted to rather than incur the expense of an appeal to the administration of justice in the United States' courts. These evils should no longer prevail, and the excuse for them should cease to exist, by the appropriate action of Congress. The small sum necessary to be appropriated cannot come in competition with the resulting benefits to individuals and to the Government. There is, probably, no bureau under the Executive Departments which requires so frequent a recurrence to the statutes and judicial decisions of the several States as that of the General Land Office, and in which they are so necessary to the administration of right and justice. In truth, it has become in practice, from necessity, a court of exchequer, where its decisions are tacitly assented to from ignorance of the law, or acquiesced in from pecuniary considerations. My duty to the Government and to in-

dividual rights requires this statement from me as an act of justice to the parties interested, and as highly proper and important for the legislative action of Congress.

Although the above statements and exhibits show that the duties of this office are annually increasing and rapidly accumulating, it is proper for me to say that they present a small portion of the items of such increase. Exclusive of the correspondence with the Secretary of the Treasury in relation to the issue of military bounty land scrip, since the first of January last, which is equal to the writing and recording of 342 letters, and the letters written to the several land officers, acknowledging the receipt of their monthly and quarterly returns, amounting to 1,150 to the 15th of the present month, there have been written in the office, on other subjects, from the first of January last to the 15th instant, including copies of a portion of the same, 4589 letters, occupying in the record thereof 3,047 large folio pages. During the present year, there will have been issued and transmitted from the office more than *forty thousand* patents, leaving an arrear of patents for lands sold, at the close of the year, an amount exceeding SEVENTY THOUSAND. To this should be added, besides other increasing demands upon the office, the requirements of individuals for copies of title papers, records, correspondence, and other documents, to be used in the administration of justice, the settlement of intestate estates, to supply the loss or destruction of the originals, and for other lawful purposes, which will amount for the present year, at twelve and a half cents per one hundred words, to a sum exceeding three thousand dollars. This class of requisitions upon the time and duties of the office must annually increase with the progress of the sales of the national domain, the opening and clearing the forests, and the extension of the western settlements. Another source of expense to the office, and which is constantly increasing with the accumulation of its arrears, is the issuing, in ignorance of the fact, of patents to purchasers or to their assigns after the death of the patentees. To remedy this defect in the system of legal grants for lands sold, which has now become serious and embarrassing, it is necessary for Congress to provide by law that patents issued to persons deceased, the legal title shall inure to the heirs or devisees to every lawful effect and extent, as if they had been executed and delivered in the life time of the same.

The surveys of the public lands have progressed to a very considerable extent, a large portion of which, however, are rendered immediately unavailing, in consequence of the deficiency of aid provided by law in the offices of the Surveyors General. At the present time, I am not able to make a particular report thereof, but it is expected that statements, in detail, of the progress of this work, and the condition and necessities of each office, on the first of January next, will be returned as soon as practicable after that date, by the several surveying departments. When these statements are received, they will be communicated in extenso, or in a condensed form, as may be required. It is known, however, that the surveys of about 800 townships have been made and paid for, the plats and descriptive notes of which should be returned to this office, and to the proper land offices, in the course of six or eight months. A large amount of surveys have been made, and are in progress, which will be completed and paid for, and the returns thereof made, during the year 1834, if the necessary means should be provided by Congress. I consider it my duty to state, in connection with this subject, that it is impossible for the public surveys to progress, and the sales and disposi-

tion of the national domain to be facilitated and extended with advantage to the Government, and without injury to individuals, unless more discretionary power is vested in the Treasury Department to meet unforeseen evils, and the defects of legislation, to bring up and prevent the accumulation of arrears, and to secure a prompt and efficient discharge of public duty. I would, therefore, respectfully propose that the Secretary of the Treasury, on a reported statement of facts by the Commissioner of the General Land Office, be authorized and directed by law to cause all the arrears of the surveying departments to be brought up as soon as practicable; to require an authenticated transcript of the records of the field notes to be transmitted to the General Land Office; to cause renewed township plats to be furnished to the land offices, where the originals have become so defaced and injured, and the entries thereon obliterated by constant use, as to be no longer available in every particular as public documents; and to make reasonable allowance for the surveys of the principal and guide meridians and base lines, and particular sections of the public lands, in cases where they cannot be executed for the prices allowed by law; and that the expense thereof be paid out of the general appropriation for the surveys of the public lands.

In making this annual report, I am again required by a sense of public duty, to present a brief view of the arrears of business in this office, and the means necessary to bring up those arrears in connection with a proper discharge of current duty. Under the head of

1st. *Private Land Claims.* The printing and publication of State Papers by Gales and Seaton, and Duff Green, supersede much of the duty previously required by this bureau. The arrears of this branch of business can now be brought up by one competent clerk in one year.

2d. *Military Bounty Lands.* The duties now required to be performed under this head would require the time of three clerks for one year.

3d. *Posting the entries and sales of public lands, and adjusting the quarterly accounts thereof,* would occupy the time, for one year, of six intelligent and industrious clerks.

4th. *Indexes to the records of patents,* a work of the most pressing necessity, and which is almost entirely in arrears, from the commencement of the public land sales, cannot be accomplished in less than one year by fifteen active and competent clerks.

5th. *The opening of tract books,* for surveys already returned to the office, as rendered necessary by the quarter-quarter section subdivision, would require the service of two clerks for one year.

6th. *Writing, recording, and examining patents for lands sold.*—The amount of arrears under this head, for lands sold to the 1st of January next, will exceed SEVENTY-TWO THOUSAND PATENTS. To write, record, and examine the same, would require the service of eighteen diligent clerks for a year.

7th. *Suspended cases under the credit system,* from the difficulty of completing the title papers, and the great labor of examination, will demand the service of two clerks one year, who are acquainted with this duty.

8th. *The draftsman bureau.*—There are now in the office 926 township plats, to be protracted on the maps of the proper land districts, besides about 800 other plats which are expected to be returned in the course of six or eight months; information having been received that the surveys thereof have been made and returned to the respective Surveyors General. To make the protractions and connexions which should be done in the course of the

ensuing year, will require the labor of one competent and industrious draftsman at least twelve months. The lands selected by the States of Ohio, Indiana, Illinois, and Alabama, under grants for canal purposes, and those selected under grants for other purposes, with the school lands selected in lieu of section 16, have all to be entered and marked on the township plats and maps of the proper districts. To perform this service, as also that of making similar entries under the act of April, 1832, authorizing a subdivision of the fractional sections into forty-acre tracts, would occupy the time of a draftsman more than one year. If it is contemplated by the Government to complete the service, as far as practicable, required by the resolution of the Senate of February 28, 1823, the labor of one draftsman acquainted with the duty would be required for six years. The daily interruption to the proper discharge of public duty, and the expense resulting to the office in consequence of the continuance of these arrears, have become evils of the most serious character, and should be done away immediately.

9th. *Miscellaneous arrears*, others than those above enumerated, would occupy the time of four clerks one year. These arrears, now amounting to the services of fifty-nine clerks for one year, have been accumulating for a long period of time, and a large portion of which existed before the administration of the office was committed to my hands. They have arisen from the physical impossibility of the office to discharge all the duties required of it by law, with the force provided for that purpose, from the injudicious and unfortunate reduction of six of its clerks in 1827; from the great increase of business arising under the relief laws since 1826; from the establishment of additional land and surveying districts; from the numerous reservations made in Indian treaties; from the many grants of public lands for canal, road, literary and other purposes; and from the great increase of miscellaneous business within the last four or five years, not previously demanded of the office.

To bring up these arrears, I would respectfully recommend that the Secretary of the Treasury be authorized to cause the same to be done, and the expenses thereof paid out of any moneys in the Treasury not otherwise appropriated, to such an extent as, in his judgment, the necessities of the Government, and justice to individuals, may require. And to enable the office to discharge its current duties, I propose the employment therein, of one chief clerk, at a salary of \$1,700 per annum; one clerk at \$1,500; five at \$1,400; ten at \$1,150; and thirteen at \$1,000; making in all thirty clerks; and, also, one draftsman at \$1,500; one assistant draftsman at \$1,150; one messenger at \$700; and two assistant messengers at \$350. For the reasons of this additional aid, and the increase of pay to a portion of the same, I refer you to my report made to the Secretary of the Treasury on the 21st of January last, and which has been printed as number 50 of the Senate documents of last session. If, however, it should not be deemed expedient by Congress to adopt this proposition, an appropriation of \$6,000 per year for the writing and recording of patents for lands sold, and a like appropriation for six extra clerks in the office, would greatly facilitate its business, and very much lessen the embarrassments under which it now labors.

All which is respectfully submitted.

ELIJAH HAYWARD.

Hon. R. B. TANEY,  
*Secretary of the Treasury.*
