ESTIMATE OF APPROPRIATIONS FOR 1834.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

*An Estimate of Appropriations for the year 1834.*

DECEMBER 24, 1833.

Referred to the Committee of Ways and Means.

TREASURY DEPARTMENT,

December 23, 1833.

SIR: I have the honor to transmit, for the information of the House of Representatives, an estimate of the appropriations proposed to be made for the service of the year 1834, amounting to - - \$14,147,488 73

Viz.

Civil list, foreign intercourse, and miscellaneous,	-	2,598,785 33
Military service, including fortifications, armories, arsenals, ordnance, Indian affairs, revolutionary and military pensions, and internal improvements,	-	7,997,630 21
Naval service, including the marine corps,	-	3,551,073 19

To the estimates are added statements showing :

1. The appropriations for the service of the year 1833, made by former acts, including public debt, revolutionary pensions, under the act of 7th June, 1832, arming the militia, revolutionary claims, civilization of Indians, claims of the State of Virginia, and gradual improvement of the navy, amounting to - 8,905,082 08
2. The existing appropriations which will not be required for the service of the year 1833, and which it is proposed to apply in aid of the service of the year 1834, amounting to - 449,424 04

3. The existing appropriations, which will be required to complete the service of the year 1833, and former years, but which will be expended in 1834, amounting to - - - - - 5,190,287 62

There is also added to the estimates a statement of the several appropriations which will probably be carried to the surplus fund at the close of the present year, either because the objects for which they were made are completed, or because these sums will not be required for, or will no longer be applicable to, them, amounting to - - - - - 324,859 57

I have the honor to be,

Very respectfully,

Your obedient servant,

R. B. TANEY,

*Sec'y of the Treasury.*

To the Hon. the SPEAKER

*Of the House of Representatives U. S.*

# ESTIMATE OF APPROPRIATIONS FOR THE YEAR 1834.

## ARRARAGES.

For arrearages prior to the 1st July, 1815, payable through the office of the Third Auditor, in addition to an unexpended balance	-	-	3,000	
For arrearages payable through the office of the Second Auditor	-	-	1,000	4,000

## PERMANENT OBJECTS.

## QUARTERMASTER'S DEPARTMENT.

For carrying on the Delaware breakwater	-	-	350,000	
For completing barracks, quarters, &c. at Savannah, Georgia,	-	-	25,000	
For continuing the repairs of the barracks, quarters, &c. at Baton Rouge, La.	-	-	10,000	
For the erection of officers' quarters at Fort Severn	-	-	5,000	
For the repair of barracks and for defences at Fort Brady	-	-	10,000	
For carrying on the improvements at Green Bay necessary for defence, and the accommodation of troops, and the security of supplies	-	-	10,000	
For the erection of additional barracks and defences at Fort Gibson	-	-	25,000	
For the erection of new barracks and defences at Fort Armstrong	-	-	10,000	
For the purchase of land adjoining Fort Sullivan, at Eastport	-	-	3,300	
For completing the military road from Fort Howard, at Green Bay, to Fort Crawford	-	-	10,000	
For opening a military road from Little Rock to Fort Towson	-	-	20,000	
For opening a military road from Fort Gibson to Fort Leavenworth	-	-	20,000	
For opening a military road from Fort Gibson to Fort Towson	-	-	10,000	
For repairing the military road from Pensacola to Tallahassee, and thence to St. Augustine	-	-	15,000	523,300

ENGINEER DEPARTMENT.

For fortifications, viz.

For the preservation of Castle island, and repair of Fort Independence	-	34,758	80
For a fort on George's island	-	100,000	
For Fort Adama	-	100,000	
For repairing Fort Columbus and Castle Williams	-	50,000	
For a fort on Throg's neck, East river, New York	-	100,000	
For rebuilding Fort Delaware	-	79,000	
For Fort Monroe	-	15,000	
For Fort Calhoun	-	120,000	
For fortifications in Charleston harbor	-	50,000	
For the fort at Cockspur island, Georgia	-	82,000	
For completing a fort at Pensacola	-	40,000	
For a fort on Foster's bank, Florida	-	50,000	
For a fort at Grand Terre, Louisiana	-	50,000	
For contingencies of fortifications	-	10,000	
The estimates heretofore submitted for the preservation of Castle island and repair of Fort Independence were predicated on the prices of labor and of materials as they existed in 1831, since which they have risen about 25 per cent. The operations have been confined as yet to the rebuilding of the sea wall for the preservation of the island and the repair of a wharf, and nothing will be undertaken towards repairing the fort, till after the further wishes of Congress on the subject are expressed by the passage of the additional appropriation asked.			880,758 80

For completing and securing the works at Black river, Ohio	13,315
For extending and securing the works at Huron river, Ohio	17,706
	11,974

968,071

The appropriations for the works included within the brackets in the States of New York, Pennsylvania, and Ohio, have already executed the original estimates, and most of the works have been completed according to the original idea and plans. The estimates now submitted are predicated on the recommendation of a skillful and experienced engineer, who made during the last season, under the orders of the department, a minute and thorough inspection of the works for which they are intended, and whose report and estimates, looking towards their final completion and permanent preservation, are annexed to the report from the Engineer Department; to them I would respectfully refer. All of which is respectfully submitted for the consideration of Congress.

FOR REPAIRING THE CUMBERLAND ROAD EAST OF THE OHIO RIVER.

An examination was made of the Cumberland road east of the Ohio, in 1827, for repairing it upon the plan of its original construction, when it appeared that 75 $\frac{1}{2}$  miles of the old pavement were in good order, and required 3 inches of broken stone for a covering to restore it to its primitive state, estimated to cost \$3 75 per rod, that 327 miles required 4 $\frac{1}{2}$  inches of stone, and 21 $\frac{1}{2}$  miles required 6 inches of stone, broken to 4 ounces in weight, and that the masonry might cost \$11,000. and the whole road thus repaired would cost \$230,274. In February, 1826, it was estimated that the sum of \$278,983 would be sufficient to repair the whole road upon the McAdam plan; and in May, 1827, a period of 16 months, the superstratum or cover of reduced stone had been worn and washed away to an extent almost incredible, and proved that

too great reliance was placed upon the layer of large stone, as there were not so many of them of as good quality as was first supposed. To have effected the same repair in 1827, as was contemplated in 1826, would have required an additional sum of \$50,000, making \$328,983 necessary to repair the road, upon the best information to be obtained at that period.

The utter destruction of the road was foreseen at this period, unless measures were taken to repair it thoroughly, it being then in a most "wretched condition."

In July, 1832, it was determined to repair the road effectually from end to end, and cede it to the respective States through which it passed; after which, the repairs were to be met by the tolls collected from the travelling on it.

The system adopted was that extensively used in England, and known by the name of its inventor, McAdam. The condition of the road at this period made very extensive repairs necessary, commencing from the grade, there being neither side drains, ditches nor culverts for draining the water, presenting no better condition for the basis of repairs on the McAdam system, than what is called a "rough grade" with the large bridges.

Rather than make a partial repair, by distributing the sum appropriated over the whole line of 132 miles, the parts through the mountains being in worse condition, and, from the face of the country, most difficult to travel, were first commenced. The supposition of finding good stone in the bed of the road wherewith to make "McAdamized metal," proved fallacious; not a perch was found through the whole mountain district, the bed being composed of soft sand stone. This, when broken to four ounce pieces, and used for a covering, is, in the course of three months, reduced to sand, and washed by the heavy rains from the road into the ditches and drains, making it worse than useless to depend upon any of the varieties of sand stone.

Under these circumstances but one course was left, and that was to procure the only suitable material the country produced—lime stone. The natural position of this stone is under the sand stone, and found only in the lowest valleys, often in the beds of creeks, covered with several feet of earth, and distant from the line of the road. Through the mountains it is found in few positions. The expense of repairing the road with a good material, and the only one of this character found in the country, is far greater than anticipated before these facts were known. Another heavy item in the expense of repair is the condition of the masonry; this having been exposed for a long time to the weather, without coping to throw off the rain and snow, is now in a dilapidated condition, requiring a considerable portion to be renewed.

Under these circumstances, the cost of putting the road in such a condition as will justify toll being exacted, is so far beyond that at first anticipated, as to make it proper to draw the particular attention of Congress to the estimate for the year, based upon the facts herein stated. It will be perceived that the sum asked for the service of the year is to finish all that part lying between Cumberland and the Monongahela river, and commence that part situated between this river and the Virginia line, and to finish the 16 miles in Virginia; making the sum required to repair the whole road, on the McAdam plan, not less than \$645,000, of which the resources of that region of country will advantageously admit of \$300,000 being expended during the year.

Should it however be the determination of Congress to make a particular repair of this great national line of communication between the Western waters and the Atlantic, the estimate would be materially varied. Leaving the masonry in its present ruined state, constructing no more culverts to throw the water under the road, abandoning the McAdam plan of repair, and merely opening the ditches and drains, and restoring the grade with earth, the cost would be for the part between Brownsville and West Alexandria, upon which as yet nothing has been done, 42 miles

-	50,000
For the 16 miles in Virginia, (finishing the masonry on Wheeling hill)	20,000

ESTIMATE—Continued.

For the first 10 miles in Maryland	-	-	-	-	25,000
For the remaining 22 miles in Maryland	-	-	-	-	22,000
For the part through Pennsylvania, heretofore partially McAd-	-	-	-	-	30,000
amized, 41 miles	-	-	-	-	

\$147,000

This however effects nothing more than making a clay road, by no means suited to the immense travel, passing the mountains by this route, and, when finished, soon destroyed by the rains which would wash the earth from the face of the road into the valleys.

To use stone found on the road side is, as before remarked, worse than useless, the expense of applying it being very great, and, when applied, soon ground to sand and washed away. Hence it will be far better to apply the sum that may be appropriated for a partial repair to form a clay road over the old bed, than attempt to apply sand stone, that is no better, costs more, and is soon washed away.

The road repaired in this manner will not justify tolls being exacted, as in the fall and spring of the first year it will be next to impassable, and good only for the first two or three summers. Another mode of repair might be adopted, viz. that of restoring the grade by breaking up the sand stone to twelve ounce pieces, and covering it with earth. The result of this would be, after a year or two, when the earth had washed from the surface, an irregular mass of rough stone, much like the road in its present condition: the cost of this might be \$200,000.

A more particular estimate for these partial repairs is not submitted, as it cannot be recommended, and the necessary information has not been collected to prepare one.

If the first project above mentioned be adopted, then there will be required

the service of the year, between Cumberland, Maryland, and Wheeling, Virginia	-	-	-	-	\$300,000
If the second be adopted,	-	-	-	-	147,000
If the third be adopted,	-	-	-	-	200,000

FOR THE NORTHERN BOUNDARY LINE OF OHIO.

For the purpose of carrying into effect the provisions of the act of the 14th July, 1832, to provide for the taking of certain observations preparatory to the adjustment of the northern boundary of the State of Ohio

					<b>\$8,905,082 08</b>

STATEMENT accompanying the annual estimates of appropriations, formed in pursuance of the 8th section of the act of 1st May, 1820.

Heads of appropriation.	Amounts required to complete the service of the present and former years, though they may not be called for until after the close of the year 1832.	Amounts which will not be required for the service of the present year, and may be therefore applied in aid of the service of the year 1834.	Amounts which may be carried to the surplus fund at the close of the present year, either because the objects for which it was appropriated are completed, or because these moneys will not be required for, or will no longer be applicable to them.
